NEW YORK:
D. APPLETON & COMPANY, 443 & 445 BROADWAY.

M.DCCC.LXII.

70225A
D.C.

ENTERED, according to Act of Congress, in the year 1862, by

D. APPLETON & COMPANY,

In the Clerk's Office of the District Court of the United States for the Southern District
of New York.

P R E F A C E .

IN preparing a Cyclopædia of what came to pass during the year 1861, the political and military events appeared to possess a greater importance than all that had been developed in the different branches of knowledge. The interest which they awakened soon became so strong and engrossing that the peaceful pursuits of industry were paralyzed, trade and commerce languished, the student of science forsook his quiet seclusion for the tented field, and the inventive genius turned to find more skilful weapons for conflict or terrible engines for destruction. The consequences involved in these events are regarded as destined to exert a permanent influence on mankind. Whether constitutional liberty can survive the violence of human passions; whether institutions organized to preserve and protect the rights of men, and which depend for their existence upon the will and pleasure of those whom they control, can withstand the shocks of military power, are questions in which the welfare of all is at issue. The conflict, therefore, in the United States, forms an important part of this volume. It embraces the political principles involved, with the arguments of their respective advocates and opponents; the movements of the leaders of secession, from their first acts to the close of the year, including the proceedings, step by step, in each of the Southern States until they had resolved themselves out of the Union, and their subsequent efforts; the organization of the Confederate States; the principles upon which that organization was founded; the civil and commercial regulations of the Confederacy; the movements of its Government to fill its treasury, and organize and equip vast armies; the counteracting movements of the United States; the organization of its armies, with the details of the weapons for the infantry and artillery, and for the batteries of the ships and gunboats; together with all the original documents, from the Messages of the respective Presidents; the instructions of Cabinet officers; the Messages and proclamations of Governors; the important acts of the United States and Confederate Congresses; the acts and resolutions of State Legislatures; the proclamations and orders of commanding officers; the contributions of men and money from each State, North and South; the details of every battle and every skirmish involving a loss of life. So ample have been the resources from which its details have been prepared, comprising publications both North and South, that it is believed no important public measure of the Federal or Confederate Governments, or of any of the States, has been over-

looked, or valuable document omitted. The efforts of the Confederacy to secure the coöperation of foreign powers, and of the United States to prevent it, are summarily presented in the letters and instructions of the respective diplomatic agents.

In thus preparing in a narrative form this portion of the events of the year, although the effort has been made to observe strict accuracy and impartiality, some mistakes may have occurred, which ask for the forbearing consideration of the intelligent reader.

The developments of science during the year present some interesting particulars. The assent of geologists to the Taconic system advocated by the late Prof. Emmons, after so many years of disbelief, is another instance of the triumph of investigation over preconceived errors. The introduction of the method of Solar analysis, which has as yet progressed hardly so far as to receive a name, although Spectrography meets with much approval, may justly be classed among the important events. The conclusions of science, as applied to agriculture, which were reached during the year 1861, will become to the farmer of great practical value. At the same time, they set aside many opinions and processes of labor which have not yielded fruitful results. They will be found fully explained in a very practical essay from the pen of Prof. J. J. Mapes.

Geographical explorations were pursued with vigor in various quarters of the globe, and many travellers returned from their perilous journeys of a previous year. In all instances the information is highly interesting, and often valuable.

Connected with mechanical industry there were many ingenious inventions during the year, especially relating to implements of war, some of which have been described, while others are reserved, to be accompanied with such illustrations as more ample time will allow. To mechanical industry, so important in this country, an extensive portion of the annual volume of this work will be devoted.

The commerce of the whole world was interrupted during the year, and although sufficient time has not elapsed to gather the statistics of all its changes, yet the details of disaster to many branches have been made up in these pages. The stupendous resources of the United States, hitherto unconsciously possessed, not only in military and naval affairs, but especially in financial, have been brought to light by the present difficulties. The financial measures of the Government and of the States are explained with the most ample details.

The number of distinguished men who closed their career in 1861 was not so large as in many other years. A tribute has been paid to their virtues and their services.

Subsequent volumes of this work will be issued about the first of March in each year.

ANNUAL CYCLOPÆDIA.

A

ABDUL MEDJID, KHAN, late Sultan of Turkey, born May 6, 1822, succeeded to the throne July 1, 1839, died June 25, 1861. Educated in the seclusion of the harem, and coming to the throne at the early age of 17, and possessing naturally a kindly but indolent and almost effeminate nature, it was hardly possible that he should have become an efficient ruler over an empire so extensive, and peopled by races so diverse, even in the most favorable period of its history. But his accession to the throne took place at a time of unusual commotion, and when the strong arm of a wise and vigorous ruler could hardly have saved the empire from disintegration and ruin. His father had been a man of great energy and iron will, and had initiated reforms which, in the opinion of the more fanatical Moslems, struck at the very foundations of their faith. The ill-concealed hostility of the mass of the Mohammedan people to these reforms would have awed a less resolute ruler than Mahmoud II., and his death leaving his reforms but half accomplished, encouraged the hopes of the reactionary party. Nor were there wanting other causes of anxiety to harass the mind of the boy sultan. Mehemet Ali, Pasha of Egypt, his most powerful vassal, had placed himself in an attitude of open rebellion during the lifetime of Mahmoud II., and his son, Ibrahim-Pasha, on the 24th of June, 8 days previous to Abdul Medjid's accession to the throne, had defeated the sultan's troops in the decisive battle of Nezib. The interference of the allied powers alone prevented the Turkish empire from dismemberment at this juncture.

This danger passed, the young sultan applied himself to the development of his father's plans of reform. The first step in this direction was the promulgation of the *Hatti-Scherif* of Gul-Khané, in Nov. 1839. This *Hatti-Scherif* was a general decree in the nature of a bill of rights, declaring the equality of all his subjects, whether Mussulmen or not, before the law. Its intention was more fully developed in the subsequent measures, now included under the name of the *tanzimat*, or system of reforms. The

most important of these measures were: the reorganization of the army in 1843 and 1844, the creation of new ministerial departments of commerce and public works, the reorganization of the provinces, the promulgation of a penal code and of a code of commerce, the establishment of mixed tribunals allowing Christians a share with Mussulmen in the administration of justice, the introduction of a new monetary system, the abolition of the *Kharadj*, or capitation tax, previously levied on all who were not Mussulmen; the reform of the system of public education, and the introduction of postal service, railroads, telegraphs, the regulation of quarantines, the establishment of banks, &c.

These reforms were at first put in force in the capital, and thence extended gradually to the remoter provinces. Not being in the nature of absolute decrees, but rather suggestions for reform, whose stringency was to be increased as the people would bear them, they were at first of little effect, except immediately in the vicinity of the capital. In Sept. 1854, desirous of giving them a wider scope and a more decided efficacy, the sultan called a council of *tanzimat*, or congress of representatives from all parts of his empire, and laid before them his measures. On the 18th February, 1856, he issued a new *Hatti-Humayoun* or imperial decree, conforming and enlarging the propositions of the *Hatti-Scherif*. These measures indicated the progressive disposition of the sultan, and his desire to become an efficient ruler. They were undertaken under circumstances of great difficulty; from the commencement of his administration to its close, there was constantly some disturbing element to delay or thwart his purposes: the Turko-Egyptian question at the commencement of his reign, and subsequently the Servian question; the insurrection in Albania; the war in Koordistan; the troubles in Syria, in Bosnia, and Montenegro; the Turko-Greek and Wallachian revolution of 1848-'9; his noble refusal to surrender the Hungarian and Polish refugees, who had sought protection on his soil, to Austria and Russia in 1850; the question of the holy places

which led to the Crimean war; the attempt to assassinate him in 1859; and the Syrian massacres of 1860, were all so many obstacles to his progress. To these might also be added his natural indolence and love of sensual indulgence, his infirm health and his yielding disposition, which made him often the helpless prey of the dissolute ministers and the rapacious harem which controlled him. He has been succeeded by his brother, Abdul Aziz Khan.

AGRICULTURE is the art of cultivating the earth in order to increase the quantity and improve the quality of its productions.

The practical farmer should be able to raise from a given number of acres, the largest quantity of the most valuable produce, at the least cost, in the shortest period, and without permanent injury to the soil; and therefore the great problem which the present age has to solve, is the discovery of the means of producing on a given area, a larger amount of bread and meat to supply the wants of a continually increasing population.

The object of these remarks will not be to give any history of agriculture, but rather to show the advantages which have arisen from the application of the sciences to its practice, until it may now be truly said, in its present status, to compose a science in itself, embracing the operation of the natural laws in their most extended sense, and covering, as part of its accessories, much of geology, chemistry, etc.

We shall aim rather to demonstrate that which experimental theories have culminated during the last few years into exact knowledge, than to give descriptions of the leading and more prominent improvements in agriculture as an art. It is now well understood that all known primaries are to be found in the soil, itself being chiefly composed of the debris of rocks, whence have arisen all of the primaries, except those which have existed in more dilute form, as in the atmosphere.

For a long time it was supposed by chemists that the analyses of plants and soils would furnish a sure guide to the farmer in his selection of the amendments requisite to the production of crops. Recent investigations, however, prove that these primaries, as found in the ashes of a plant, differ materially in their *functions*, from the same primaries existing in the rock or in the soil, unless they have been redeposited in the soil by the decay of organisms; that each primary, when taken up and appropriated by a plant, and then restored again to the soil by the decay of the plant, possesses functions which are entirely distinct from those belonging to a primary before its entrance into organic life: and thus arable soils are composed in part of inorganic matter which belonged originally to the rocks, then to the soil, then formed a part of organic life, and on being restored to the soil, became ready to act as pabulum to a higher organism; and that each time a primary so enters into organic life, it takes new functions and qualities not belonging to its original condition,

and not recognizable by analyses or microscopic investigations. Thus we find that the feldspar rock, containing seventeen per cent. of potash, when ground to the finest powder, will not supply potash directly to the higher class of plants—still a rock containing feldspar will furnish potash to those of a lower class, such as the lichens and mosses, etc.; and on their decay it returns to the soil in a progressed or advanced condition, capable of being assimilated by a higher class of plant.

It is for this reason that, while ground feldspar fails to prove a valuable amendment to soils, requiring additions of potash, unleached wood ashes so readily furnish plants with this necessary alkali.

The same truth is observable with phosphate of lime, so readily assimilated by plants when furnished in the form of animal bones, even after they have been heated to redness, so that the phosphate of lime which they contain is freed from all surrounding matters.

This same substance, without any differences which may be recognized by the chemist, is found in large quantities in what is known as the phosphatic rocks, and some of them contain ninety-five per cent. of pure phosphate of lime; still when this is ground to a powder it will not be assimilated by the roots of plants in contact with it; and many soils formed in part of the chlor-apatite rock require additions of more progressed phosphate before their cultivation can be rendered profitable.

The same may be said of lime, for although primitive limestone when burnt so as to render it caustic, is valuable to the farmer as a means of disintegrating other materials in the soil from its chemical effects, yet lime so furnished will not form direct food for plants, while lime arising from organic decomposition is readily assimilated by them.

Two thousand bushels of lime, made by burning limestone rock of Westchester Co., N. Y., applied to a single acre, will render the land sterile for many years, itself forming less than two per cent. of the weight of this soil to a depth of fifteen inches.

There are many chalk farms, however, in England, containing forty per cent. of carbonate of lime, (which is the form which the Westchester lime assumes before the farmer uses it;) but this latter (chalk) has its origin in organic decay, and therefore is readily assimilated by plants to the extent they require lime to form part of their ash when burned; and the quantity in excess is not unfriendly to surrounding vegetable growth.

Indeed this principle is true of each and all the primaries in nature; thus, old soils which have been fairly and properly treated, are more fertile than new ones. As a general principle, therefore, it should be understood that, in the selection of fertilizers, those taken from the refuse of factories, etc., or at least from the highest organic sources, should be preferred.

Many of the ingredients in the soil have the

power of absorbing and retaining ammonia and other gases consequent upon organic decay, which are brought down with rains and dews from the atmosphere, and these give to water the power of dissolving much larger quantities of inorganic matter than can be taken up by positively pure water. Of the ingredients having such power, the chief are carbon and alumina: were it not for the presence of which in the surface soils, the decay of organic life would not be retained for the use of forthcoming crops, but would filter downward and render every well and spring a cesspool.

So perfect is the action of these materials that one per cent. of either or both, disseminated through a soil to a depth of 12 inches, is quite capable of abstracting from fluids, during their downward course, most of those substances required to sustain plant life; and recent discoveries are quite sufficient to assure the agriculturist that he need not fear the loss of manures by downward filtration. A pure gravel or positively pure sand are the only exceptions which are practically to be met with, and these, overtopped by a loam to an ordinary depth, will never receive from the upper soil any solutions which would be valuable to plant life, unless such solutions be added in quantities far beyond what would ever be applied in practice. Were it not for this law, all the progressed and more soluble portions of organic life would have passed towards the earth's centre, leaving the surface sterile and incapable of sustaining man. The full understanding and appreciation of this fact may be fairly registered as belonging to the year 1861; for, although before suggested, it has not been generally admitted and understood until this time.

In the mechanical operations upon the soil, while agriculture was pursued simply as an art, the farmer merely knew that a disturbance of the surface produced increased results—but he now understands the laws on which such increase depends.

Rains and dews may be viewed as the natural means of cleansing the atmosphere, taking therefrom all the volatile exudations of organic life and restoring these to the soil for reassimilation. We find the atmosphere at all times containing certain proportions of these gases, and during droughts the quantity held in atmospheric suspension is materially increased. The first half-pint of rain, falling on the roof of a house, during a shower, will be found so highly charged with ammonia, sulphuretted hydrogen, etc., as to emit a peculiar odor; consequently the water from dews and the early parts of showers is more valuable to farmers than that furnished by continuous rains. To fully avail of this effect, the soil should be deeply disintegrated so as to permit the atmosphere permeating the soil to deposit its moisture upon the surface of the colder particles beneath the surface of the soil. We all know that a glass vessel containing ice or cold water, if placed in the sun's rays at midday, during

droughts even at midsummer, will be speedily covered on its outer surface with drops of water, which of course are condensed from the atmosphere; for if the soil be dry the atmosphere *must* contain moisture, however dilute, as there are but two places in which it can exist, viz., the earth and the atmosphere—its quantity at all times must be constant. In the same way, then, the surfaces of particles of soil colder than the atmosphere, are capable of receiving a proper degree of humidity, which in turn is capable of absorbing all the gases from the atmosphere requisite to render the moisture a more perfect solvent of the inorganic food required to sustain plants: in this state, and in this only, can plants receive it—they cannot take up inorganic matter unless in solution, and no plant can grow without its reception. All these necessary conditions may be secured by *Underdraining* and *Subsoil-ploughing*.

Underdraining.—This consists in burying beneath the soil, in a proper manner, a series of tubes or pipes, so made as to be capable of receiving from the soil any excess or surplus of water it may contain, and leading it to lower points whence it may be discharged and find its way to outlets. For the method of constructing underdrains, we would refer the reader to the recent works of Judge French, Klippart, and others. The best specimen of practical underdraining with which we are acquainted, may be found at the Central Park, New York.

Millions of acres of apparently valueless soils have been rendered capable of profitable cultivation by underdraining. Drains have been made of stones, porous pipe, tile, wooden tubes of various kinds, etc.; but practice has proved that the ordinary draining tile, made of unglazed burnt clay, forms the safest and most efficient and durable underdrain. It is also ascertained that the tiles laid at a depth of five feet, in soils where underdrains may be so deeply constructed, produce results better than those attainable by drains of less depth. These drains should be at such distance apart as to thoroughly remove all excess of water from the soil, and in so doing, they insure full aëration. Both ends of each drain should be open to and at the surface, producing a continuous draft of air always passing through them, and as the atmosphere is warmer than the soil, the heat rising during its horizontal travel passes into and through the soil, materially elevating its temperature—it also secures motion to the air in the soil, which, in passing between the particles, supplies the necessary amount of humidity, and with it those gases which guarantee all the chemical changes required to furnish the inorganic food to plants.

The chief advantages of underdraining may be summed up as follows:

"*Underdrained soils never suffer from drought*," provided that the subsoil be disintegrated as in the process known as *subsoil-ploughing*. Less manure will suffice for crops,

The after disintegration of the soil is more readily and cheaply performed. Its temperature is increased, and therefore a longer season of growth is secured. The best proof of the usefulness of underdraining, however, is to be found in the fact that the English Government, and many chartered companies and individual capitalists, have freely loaned money on mortgage to English farmers for the purpose of underdraining their soils, and that these mortgages are only active after a valuation—in other words, the mortgages only bear upon the increased value of the soil consequent upon underdraining. After the expenditure of millions of pounds sterling in this way, scarcely an instance can be found where the income of the farmer has not been increased sufficiently to enable him to pay his underdrainage mortgage, leaving him an increase of profit ever after, while the nation at large is permanently rendered wealthier by the system. Indeed it is doubtful if England could at this time sustain her population, were it not for the increase of crops consequent upon the underdraining of the land.

Subsoil-ploughing.—It is only within a few years that the process of subsoil-ploughing has been rendered practicable, for although known for many years as a needed improvement in the culture of soils, the tools presented for such use were inadequate, until the invention of the lifting subsoil-plough, by the writer of this article. This implement is known as Mapes' lifting subsoil-plough, and is formed of a lozenge-shaped wedge of steel, point forward, like a spear-head laid horizontally, and forming a series of inclined planes, gradually rising from the point to its bridge or highest part, being an elevation of only five-eighths of an inch. This horizontal wedge is sustained to a beam by two curved knives placed vertically, and by these means, as with other plough-beams, the instrument is propelled in the usual manner. In practice, the surface-plough precedes the subsoil-plough, moved by a separate team. The subsoil-plough follows with its beam in the bottom of the furrow, thus disintegrating to a depth of 12 inches or more, beneath the bottom of the surface furrow, raising the soil five-eighths of an inch, and in so doing, causing the separation of particle from particle, as in the soil over an ordinary *mole-track*, but to a width, at the surface, of twenty inches, and this disintegration is more perfect than between the particles of a soil turned over in a furrow-slice, as with the surface-plough.

The subsoil-plough insures to the subsoil full depth for the travel of roots, also permitting the entrance of atmosphere; the surface loam is consequently gradually deepened to any required depth; for while the loam as a new soil, may have a depth of but 6 inches, and the farmer is constrained to that depth of surface-ploughing; still, by the use of a subsoil-plough, he may disintegrate without elevating the subsoil, which will gradually change by atmospheric and other influences into a loamy soil, so

that, in after ploughings, the depth of the surface furrow may be increased. Grass lands previously underdrained and subsoil-ploughed, *never run out*, and the full ratio of crops may be maintained for any length of time, by slight top-dressings, of such amendments as have not yet been progressed from the soil itself.

Where subsoiling and underdraining are not practised, mowing-lands and pastures are continually lessening in their products, so that the farmer is compelled every few years to take his land out of grass, and carry it through a series of rotation of crops, before he can reestablish a grass crop. The foregoing may be considered as an epitome of the greater improvements connected with the proper mechanical preparation of the soil, together with the necessary rationale for comprehending the causes of the benefits to be derived therefrom; and all other and after manipulations are but the presentation of the same desirable conditions to the surface soil, in a more minute and extended manner, so as to avail of the same laws more rapidly and effectively. No farmer can reasonably expect to avail of the largest amount of profit, who has not prepared his surface and subsoil in the manner we have indicated; for, be his surface cultivation what it may, and the use of fertilizers ever so liberal, his profit will not be as great as that of his neighbor whose farm is underdrained and subsoil-ploughed.

Fertilizers.—In old times, farmers sometimes suffered their land to remain without crops for the purpose of enabling it to gain in fertility. This was accomplished by the slow reception from the atmosphere of gases capable of enabling the moisture in the soil to dissolve new quantities of the inorganic constituents, storing them up until, by their accumulation, the soil was again capable of bearing crops. This was called *fallowing*. The modern improvements, however, of underdraining and subsoil-ploughing, will secure all the advantages of the fallowing system, and in a much shorter time; for it is now admitted that "the true rest of the soil is a judicious succession of crops." This result is farther accelerated by presenting to the soil the necessary food for plants in a progressed shape, of organic origin, so that the growing crop is fed independently of the soil in place; therefore permitting it, as in the following process, to augment the quantity of plant food rapidly; for it must be understood that moisture is enabled to dissolve increased quantities of each of the inorganic constituents, when the roots of a growing crop are present. In the use of fertilizers, the farmer should not inquire, "*with how small a quantity can I create a crop?*" but rather, "*how large a quantity may I use with increased profit?*" for, with an increased quantity, not only does he increase the amount and quality of a current crop, but he leaves the soil increased in productiveness for the future.

Manures of the farm.—These are of the first importance, and require the greatest amount of care for their proper manipulation, admixture,

and use. The value of farm-yard and stable manures consists mainly in the progressed inorganic matter they contain, and in the state of division in which that matter exists, and not, as many suppose, in the amount of nitrogen or ammonia they contain; for the value of ammonia consists, not in being a food for plants, but in its ability to give to water the power of dissolving new portions of the soil itself, passing it through the proper chemical changes to fit it for plants. It is doubtful if any plant ever received, through its roots, any of the constituents of ammonia; and it is only to this function of ammonia that the farmer need look for any advantage from its use.

If his soil be fairly arable, from former use, and be thoroughly underdrained, and subsoil-ploughed, containing a full share of progressed inorganic food for plants, he will find no benefit from the application of ammonia in any form; for soils so prepared will receive all they require of nitrogenous matters from the atmosphere, as they will be continuously condensing from that source moisture charged with gases. We freely admit that on badly-prepared soils, merely surface-ploughed, and presenting so slight a depth of soil to atmospheric influences that the necessary quantity of nitrogen cannot be received, it is necessary to increase the solvent power of the moisture they contain so as to secure the solution of a sufficient amount of inorganic pabulum to sustain crops; but the real value of every manure, so far as furnishing the constituents of plants is concerned, is due not only to the amount of inorganic food which it contains, but to its condition or state of progression, and not to the amount of nitrogen combined therewith in any form.

The best cultivators do not use open barn-yards as the receptacle of manures, but the manures of the farm are removed daily to adjacent manure-sheds, where the compost is placed on and above the surface of the ground, with a drainage cistern at the lower end of the shed, furnished with a pump, so that the fluid drainage of the manure heap may be thrown from the cistern on top of the mass, and by its downward filtration through the compost supply moisture and convey the soluble portions to the inert parts, causing continuous fermentation without excessive heat, preventing fire-fanging, and insuring entire disintegration, destroying weed seeds, and breaking up organic forms of all kinds, so that the mass may become homogeneous without the labor or expense of turning by forking, etc. All the fluids of the stables, house, etc., may be carried by gutters to this cistern, the compost heap may be supplied with muck, meadow mud, head-lands, weeds, and all waste materials of the farm, and by the continued and repeated infiltration of the soluble portion through all other parts, the admixture will become more perfect than by any other method; the occasional addition of sulphuric acid to this cistern will convert all the volatile products of decomposition

into sulphates which are non-volatile, thus preventing evaporation, malaria, etc.

Special fertilizers which are soluble may be thrown into the cistern, and so find their way through the mass, and, with it, to the fields.

When the drainage is insufficient to supply the necessary amount of moisture, water may be passed into the cistern, and when fluid manures are called for to be used on the farm, they may be taken from this reservoir, and distributed by a sprinkling-cart.

With such an arrangement all kinds of farm manures may be thoroughly combined, securing such chemical changes as will do away with the disadvantages consequent upon their separate use, such as the unfavorable influence of hog-manure, when used alone upon the brassica tribe of plants, clump-rooting cabbages, giving ambury, or fingers and toes, to turnips, etc. The manure of the hen-house should frequently be added to the compost heap, so as to be more evenly divided through it.

The pump with which the cistern is supplied may be moved by a small wind-mill, placed above the shed, causing the changes to be continuous by the downward filtration through the mass followed by the atmosphere.

The value of manure so prepared, diluted with many times its bulk of waste organic matter, such as muck, leaves from the woods, woods-earth, etc., is greater per cord after fermentation than that of the pure manure kept in an open barn-yard, while the quantity will be materially greater, no loss by washing or evaporation having occurred. When potash is required by the soil, it may be added in the form of wood-ashes, and other special amendments, in solution or otherwise. These will not only find their way to the field, but while in the compost heap will furnish chemical action for the decomposition of all other portions, securing at the same time their own dissemination throughout the mass. So much for farm-yard manures; but who can produce so large a quantity of such manures (whatever may be the extent of his stables) as may be used on his land with increased profit? We claim that no farmer or stock-breeder can do so, and when, under these circumstances, the farmer has the means of farming more profitably, he must of necessity become the buyer of fertilizers; there are but few localities where farm and stable manures can be purchased; those manures made upon the farm itself may be used with profit, but if they are to be carted from a distance, the transportation will generally render them more costly than other fertilizers. Factory wastes of various kinds frequently may be purchased at less cost near towns and cities. Night-soil, also, may be used with advantage. Peruvian guano contains many of the constituents required by crops, and when properly treated before use is an admirable manure; it should be finely ground and mixed with some divider, such as charcoal dust, woods-earth, or even the ordinary soil of the farm, and should

be wetted with dilute sulphuric acid, so as to render its phosphates more soluble and its carbonates less volatile; or, what is still better, it may form part of a well-made superphosphate of lime. The best of these is the nitrogenized superphosphate of lime, made by the admixture of 100 pounds of calcined bones, 56 pounds of sulphuric acid, 36 pounds of Peruvian guano, and 20 pounds of sulphate of ammonia, to which may be added an equal weight of dried blood, the whole to be thoroughly ground together. Six hundred pounds of this mixture will fully represent twenty-five cords of well-rotted farm and stable manure.

Lime.—Lime, as it is generally used, cannot be viewed as an *immediate* or *direct* food for plants; that which is contained in decaying organisms, or as resulting from the ashes of wood and other substances, when applied to the soil, is readily assimilated by plants; but the more crude kinds of lime, such as are made by the burning of the ordinary limestones, have their first action friendly to vegetable growth in their power to decompose all organic matter, and thus cause it to give up its inorganic constituents; in addition to which, it acts upon the inorganic constituents of the soil itself, forming silicate of lime; and by removing portions of the surface of particles, presents new surfaces for other chemical action and continued development.

Lime, when combined with salt, so as to form chloride of lime and carbonate of soda, before its use in soils, becomes materially more active and in a condition to be rapidly appropriated. Three bushels of lime, slaked with a solution of one bushel of salt, and then exposed to the atmosphere until the chlorine of the salt combines with the lime, forming chloride of lime, and setting free the soda, permitting it to combine with carbonic acid from the atmosphere, becoming carbonate of soda, form an admirable fertilizer. Four bushels of this mixture, sufficiently old for all the chemical changes to have occurred, if mixed with a cord of any cheap organic matter, such as swamp muck, wood-earth, etc., will decompose it to a powder in a very short space of time. It is therefore a valuable auxiliary to most composts.

Sulphate of Lime, (plaster of Paris,) usually known as gypsum, supplies to the soil not only lime, but also sulphuric acid, and previous to undergoing any change, it has the power of absorbing and giving off to water large amounts of the gaseous products of the atmosphere, as well as those consequent upon organic decay in the soil; it is found also to be valuable in deodorizing the effluvia of stables; compost heaps, etc. In soils containing very minute proportions of progressed inorganic materials, plaster is often used to assist in the growth of clover. This in turn throws down its deep roots, gathering from the subsoil large amounts of inorganic matter, elevating them to the surface soil, and on decaying, when ploughed under, enriching the soil, not, as has been frequently asserted, by the decomposition of matters abstracted from the

atmosphere alone, but by its power in progressing the inorganic materials of the soil, and rendering them fit for future assimilations.

Wood-ashes.—These supply to the soil large amounts of potash, with smaller quantities of the other constituents shown in their analysis. Thus leached ashes from which the potash is entirely removed, still exercise, on many soils, a friendly influence, by furnishing plants with the other constituents making up their composition, all of which, once having been in organic life, are progressed and fitted for entering a higher class of vegetable growth.

Lime, ashes, and other alkaline substances, tend to alter the mechanical conditions of soils; clayey soils are rendered more free by their use, while sandy soils become more compact, each being improved in degree.

Our space will not permit any further detail on the subject of fertilizers; however, it should be remembered that all those which are not of a volatile character may be applied to the more immediate surface with greater benefit than when ploughed deeply under; for, in the former case, as they become soluble by the combined effects of sun and air, and the consequent chemical changes, they are presented to a greater number of particles attacking their surfaces, and coming in contact with a larger quantity of roots, than if they had been originally placed more deeply in the soil. Thus we find that the top-dressing of grass and grain crops with phosphates, ashes, etc., is of material benefit, while lime, from the peculiar shape of its particles, descends from the effects of rains and dews; and in soils which have not been subsoiled, the accumulation of lime applied during many years, will be found coating the surface of the subsoil, and can be brought into activity again only by an increased depth of ploughing of the surface, or the disturbance of the subsoil. Lime, therefore, should always be applied in small doses, and more frequently than has been usually practised. The chief benefit to be derived from the ploughing in of green crops, the application of meadow muck, river mud, and other cheap organic substances, is as follows: they furnish large amounts of progressed inorganic materials; during their decay or subdivision, they leave interstices in the soil for the reception of atmosphere; the process of decay generates heat, and this accelerates growth; and they supply large amounts of carbon, evenly divided, which perform the offices in the soil to which we have before referred.

It should be remembered that a soil, surface-ploughed to a reasonable depth, then subsoil-ploughed and fully underdrained, containing fertilizers of the kinds suggested above, has advantages over soils differently prepared; among which are the *entire absence of any ill effect from drought*, greater ease of manipulation, and the presence of conditions by which all that class of plants, known as *tillering* plants, can increase the number of their bearing shoots. A single grain of wheat will sometimes, by *till-*

lering, throw up sixty separate standards, each bearing grain. This arises from *tiller roots* thrown out near the earth crown, but whenever any one root of a stool comes in contact with a cold subsoil, which has never been disintegrated, the tillering in the whole crown ceases. It is for this reason that grass crops frequently run out, in soils not so prepared; while with proper preparation, and the top-dressing we have named, a field once in grass may be maintained at its maximum of product for any length of time.

Recent Changes in Farm Crops.—Until within a very few years the American farmer has paid but little attention to the cultivation of roots as food for cattle. William Cobbett, the English statesman, was the first to introduce the culture of the rutabaga turnip as food for cattle in America. Its general adoption, however, until within a few years has been slow; it is now known that a proper variety of root crops is not only less exhausting to the soil than grass or grain crops, but that they are more economical as food for stock, securing a higher state of health, and producing results not attainable without their use in part.

Beets, parsnips, carrots, turnips, caulo-rapas, and many other roots, are now being raised by our dairy and stock farmers. The old style of cultivation, requiring laborious hand-work with hoes, spades, forks, etc., is fast passing away, also the hilling of potatoes, corn, etc., for which practice no good reason has ever been presented. The introduction of the various horse tools, for the cultivation of root and other crops, has materially lessened farm labor. Fifteen years ago, the writer required 20 men to cultivate properly a garden of 30 acres; now, by the use of a few judiciously chosen horse tools, he cultivates many times that area with but 8 farm hands, 4 of whom are boys. These tools include the digging machine, the lifting subsoil-plough, used as an instrument for cultivation, the carrot-weeder, the horse-hoe, in two modified forms, the roller, and the clod-crusher.

Seeds are now sown by machinery, and the variety of seed-sowers has been much increased within the last few years. For broadcast purposes, Cahoon's seed-sower is the best. It will sow with perfect evenness 35 acres a day; and the same instrument will spread manures, intended as top-dressings, over an equal number of acres. The corn-planters, drawn by a single horse, will do the work of 25 men; the ordinary seed-drills for the sowing of row crops, work with great exactness, and as they leave the seeds perfectly straight and equidistant from each other, the after cultivation of the surface is readily performed by a single mule or a horse.

With either of the following tools, a mule, with a boy driver, will represent many men with forks and spades. Thus, when row crops merely appear at the surface of the soil, a small-sized lifting subsoil-plough may be run half-way between the rows, disturbing the soil by a slight

lifting, so that soil and plants are both raised together, leaving the earth loosened to a depth of twelve inches, and more thoroughly than could be effected by many hoeings, without covering the plants at all; this, in addition to the original ploughings, constitutes the necessary manipulation of the soil for the sowing of seed; the carrot-weeder may then be run between the rows, embracing the whole surface from row to row, disturbing the upper two inches more thoroughly than can be done by repeated hoeings, and leaving all the weeds lying on the surface to be wilted by the sun, and at the same time effectually disintegrating the surface soil. In this way the crops may be kept clean until their completion, and with very much less labor than would be required in the use of hand-tools.

The larger row crops, or, as sometimes grown, hilled crops, should receive a somewhat similar treatment. Corn, for instance, may be thus cultivated; the lifting subsoil-plough is run in both directions transversely, when the hilling system is preferred, and on each side of the rows of corn, when two or three inches high, and before the roots have extended out into the paths between; the expanding horse-hoe is then run between the rows, keeping the whole surface clean of weeds, and at such depths as the operator may desire, rendering the tedious hand-hoeing unnecessary; for if the planting be straight and true, every inch of the soil may thus be cheaply and thoroughly disturbed.

The same may be said of the potato and of all other analogous crops.

One of the greatest improvements in the feeding of roots to stock, consists in *pulping* them by machinery. After being pulped, the roots are mixed with *chaffed hay* or other provender, doing away with the necessity of the use of large quantities of water, and presenting the food in the most acceptable form, and susceptible of greater variety; for all the roots that we have named may in turn be used, changing the kind each week. The carrot is perhaps the most valuable of the roots as food for all animals; with the cow, it increases the flow of milk, greatly improving its quality as well as that of the butter, cheese, etc. Horses fed in part with this vegetable are not liable to the heaves, and, as is the case with other cattle so fed, soon acquire a loose hide, smooth skin, shining coat. The value of the carrot does not consist alone in the amount of nutriment it furnishes, but rather in the pectic acid which it contains, and which is found in degree in many roots; this acid has the curious property of gelatinizing the contents of the stomach, thus enabling the peristaltic motion of the intestines to act more thoroughly in the process of digestion. When the stomach of an animal is filled with water containing cut hay and other materials, digestion is very incomplete; thus we find horses fed on cut hay and whole oats frequently voiding the oats unchanged, and always

some of the shells; while the dung contains so much starch as to cause fire-fanging in the compost heap.

Six quarts of oats, bruised, and six quarts of carrots, pulped, and the hay chaffed and mixed therewith, will sustain a horse as well as twelve quarts of oats with nearly a double portion of hay in the natural state, not chaffed, and without the use of carrots. Fattening cattle will flourish well with a less amount of grain when carrots are substituted in part. We should remember, however, that for the purpose of inducing appetite, a variety of roots is quite desirable. The cooking of food for cattle is becoming quite general, and many convenient steaming apparatus have been invented for this purpose. Hay is now chaffed instead of being cut; for it is well ascertained that 23 lbs. of hay, in the natural state, 19 lbs. cut one inch long, and 13½ lbs. finely chaffed, are equal in value as food for horses, cattle, etc.; and when this is steamed before use, its value is still further increased, particularly if mixed with the meal intended to be used before steaming, after which the pulped roots are added.

The feeding of cooked food to hogs is a material improvement now generally acknowledged and much practised; half the amount of corn, after being cooked, will fairly represent an entire quantity in the raw state, as food for hogs. Straw and corn-stalks, when used in place of hay, are found to be of high value if chaffed and steamed before use.

The thorough ventilation and proper temperature of stables are now recognized as adding materially to the economical keeping and healthful condition of the animals. The use of charcoal dust, plaster of Paris, and other deodorizers in and about the stalls of animals, is a material amendment in practice.

Mulching.—It is now well understood, that protecting the soil with a slight covering during the colder seasons, materially benefits the crops of the following year. If a board lie on the soil during fall and winter, and be removed in early spring, it will be found that the grass, during the following summer, will grow more profusely on that spot than elsewhere, and this fact has suggested the similar use of slight coatings of straw, salt hay, and other cheap materials, which may be removed with a horse-rake in the spring, and then used as bedding for animals. Grass and grain crops, by such treatment, are saved from the effects of winter, sometimes so disastrous to their growth. The sowing or freezing out of crops seldom or never occurs in soils properly prepared to a sufficient depth.

The use of mowing machines has of late become quite general, and farmers who formerly were constrained to keep no more stock than they could supply with the quantity of hay which they, and one or two laboring men, could cut and cure at the proper season, are now enabled to appropriate a greater breadth of land and raise a larger amount of stock.

Threshing-machines are just taking the place of the flail and barn-floor. Many farmsteadings are now supplied with a steam or caloric engine, enabling each farmer to grind his own corn, pulp his roots, chaff his hay, straw, and corn-stalks, saw his own wood, thresh, winnow, and clean his grain, etc., by machinery.

In the culture of small fruits the improvements have been very great, and the citizens of New York and other cities, can now vie with those of London and Paris in the quality of fruits of all kinds obtainable in their markets. The culture of dwarf pears has materially increased; and we have so advanced in grape culture that we shall soon become a wine-making country; California furnishing an amount almost as great as produced by all the rest of the Union. Ohio, Missouri, and other States, are wine producers on an extended scale, while all our markets are supplied with grapes as a dessert fruit. Improved kinds are fast being introduced, of this as well as of all other fruit.

In flax culture the increase is very great. The late improvements in machines for the dressing and preparation of flax, will soon enable us to become large exporters of this article.

Bones are no longer exported from our shores for the use of English and French farmers, but they are all manufactured into superphosphates. The agricultural societies in all our States and in almost all our counties, are fast disseminating agricultural truths throughout the breadth of the land; we find from the reports of fairs that, in many agricultural districts, staple crops are continually on the increase. The wasting system which caused the wheat crop of the State of Ohio to fall from 85 bushels to 12 per acre, and of New York from 80 to 10, as average crops, and Massachusetts to be entirely unable to supply her own population, is fast passing away, and we anticipate that the future census of the Government will show, that as agriculture becomes a science, the suicidal skinning of the soil will cease. American agricultural machinery is now fast supplanting that of England and other European countries; even their own colonies, the Cape of Good Hope, and many other African settlements, and Australia and all of Central America, are now our customers for agricultural implements. American ingenuity is fast furnishing advantages which equal that of the lower price of European labor, and enable the American farmer to compete in the world's markets at their prices.

In all the older States, worn-out soils are being resuscitated and swamps drained, bringing new lands into cultivation; underdraining and subsoil-ploughing are fast doubling the available power of soils, and when the same kind of enterprise shall become general in the cotton-growing States, the increase of produce will be immense. We find, in almost every county throughout the Union, some individual who raises double the average of the corn crop of his State, double the average of the cotton

crop, and, indeed, this may be said of any or all crops.

With the amount of capital and enterprise now being applied to agriculture, these improved results will become patent to all operators; and let us hope that with the present generation will die out the last vestige of that dogged resistance to agricultural progress from which the cause has already suffered so severely. An increase of one inch in the depth of ploughing, throughout the land, will do more to increase the national wealth than can the mines of California, and if we mistake not, this inch of soil, which would be a far richer acquisition than a new territory, will be enabled to yield up its treasure before many generations shall have passed away.

During the past year the United States Government has, more than ever before, recognized the great national importance of affording the largest facilities towards agricultural improvement, and the community are at present eagerly awaiting some tangible expression of that recognition in the formation of an Agricultural Department at Washington, with a secretary at its head, holding even rank with the Secretaries of State, of War, etc. The farmers of our country own more than half the wealth, pay more than half the taxes, and the principal business of our large cities is acting as their factors by importing their supplies and exporting their products. It is but proper that they should be fairly represented by a distinct department.

ALABAMA, one of the Southern States, is bounded on the north by Tennessee, east by Georgia, south by Florida and the Gulf of Mexico, and west by Mississippi. It is 330 miles in its extreme length from north to south, and 300 miles in its greatest breadth. The population of the State in 1860 was 960,296, of which 2,630 were free colored, and 435,132 were slaves. The Governor is elected for two years by the people. The Senate consists of thirty-three members elected for four years, and the House of Representatives of one hundred members elected for two years. The Legislature meets on the second Monday in November, biennially. (*See* NEW AMERICAN CYCLOPEDIA.)

The southern portion of the State was strongly in favor of secession from the United States. Early in December, 1860, State Commissioners were sent to the authorities and people of the other slaveholding States, to urge forward a movement in favor of secession, and a union of these States in a separate Confederacy. All represented that the purpose of Alabama was fixed to secede, even if no other State did. The announcement of the secession of South Carolina was hailed with great joy in Mobile. One hundred guns were fired. Bells were rung. The streets were crowded by hundreds expressing their joy, and many impromptu speeches were made. A military parade ensued.

The first official movement in Alabama towards secession was the announcement by Gov-

ernor Moore of his intention to order an election of Delegates to a State Convention. He advised the people to prepare for secession. This election was held on the 24th of December, 1860, and the Convention subsequently assembled on January 7th. At the election, the counties in North Alabama selected "coöperation" members. The members throughout the State were classed as immediate secessionists, and coöperationists. The coöperationists were divided into those who were for secession in cooperation with other cotton States, those who required the coöperation of a majority, and those who required the coöperation of all the slave States. Montgomery County, which polled 2,719 votes on the Presidential election, now gave less than 1,200 votes. The inference drawn from this at the time was, that the county was largely in favor of conservative action. The vote reported from all but ten counties of the State was, for secession, 24,445; for coöperation, 33,685. Of the ten counties, some were for secession, others for coöperation.

The popular vote at the Presidential election in November was: Douglas, 13,651; Breckinridge, 48,831; Bell, 27,875. Bell was the candidate of the American and Union party, Douglas, of the non-intervention Democrats, and Breckinridge of the Southern States.

The Convention met at Montgomery on the 7th of January. All the counties of the State were represented. Wm. M. Brooks was chosen President.

A strong Union sentiment was soon found to exist in the Convention. On the day on which it assembled, the Representatives from the State in Washington met, and resolved to telegraph to the Convention, advising immediate secession, stating that in their opinion there was no prospect of a satisfactory adjustment.

On the 9th the following resolutions were offered and referred to a committee of thirteen:

Resolved, That separate State action would be unwise and impolitic.

Resolved, That Alabama should invite the Southern States to hold a Convention as early as practicable, to consider and agree upon a statement of grievances and the manner of obtaining redress, whether in the Union or in independence out of it.

Mr. Baker, of Russell, offered a resolution requesting the Governor to furnish information of the number of arms, their character and description, and the number of military companies &c., in the State, which was adopted.

Also the following was offered and discussed:

Resolved, by the people of Alabama, That all the powers of this State are hereby pledged to resist any attempt on the part of the Federal Government to coerce any seceding State.

After a lively discussion of some days, a brief preamble and resolution refusing to submit to the Republican Administration, were proposed in such a form as to command the unanimous vote of the Convention. It was in these words:

Whereas the only bond of union between the several

States is the Constitution of the United States; and whereas that Constitution has been violated by a majority of the Northern States in their separate legislative action, denying to the people of the Southern States their constitutional rights; and whereas a sectional party, known as the Republican party, has, in a recent election, elected Abraham Lincoln for President and Hannibal Hamlin for Vice-President of these United States, upon the avowed principle that the Constitution of the United States does not recognize property in slaves, and that the Government should prevent its extension into the common territories of the United States, and that the power of the Government should be so exercised that slavery should in time be extinguished: Therefore be it

Resolved by the people of Alabama in Convention assembled, That the State of Alabama will not submit to the Administration of Lincoln and Hamlin, as President and Vice-President of the United States, upon the principles referred to in the foregoing preamble.

On the 10th, the ordinance of secession was reported, and on the 11th, it was adopted in secret session by a vote of ayes, 61; noes, 39. It was as follows:

AN ORDINANCE to dissolve the Union between the State of Alabama and other States united under the compact styled "the Constitution of the United States of America."

Whereas the election of Abraham Lincoln and Hannibal Hamlin to the offices of President and Vice-President of the United States of America, by a sectional party, avowedly hostile to the domestic institutions and to the peace and security of the people of the State of Alabama, preceded by many and dangerous infractions of the Constitution of the United States by many of the States and people of the Northern section, is a political wrong of so insulting and menacing a character as to justify the people of the State of Alabama in the adoption of prompt and decided measures for their future peace and security: Therefore,

Be it declared and ordained by the people of the State of Alabama in convention assembled, That the State of Alabama now withdraws, and is hereby withdrawn, from the Union known as "the United States of America," and henceforth ceases to be one of said United States, and is, and of right ought to be, a sovereign and independent State.

SEC. 2. Be it further declared and ordained by the people of the State of Alabama in convention assembled, That all the powers over the territory of said State, and over the people thereof, heretofore delegated to the Government of the United States of America be, and they are hereby, withdrawn from said Government, and are hereby resumed and vested in the people of the State of Alabama.

And as it is the desire and purpose of the State of Alabama to meet the slaveholding States of the South who may approve such purpose, in order to frame a provisional as well as permanent government, upon the principles of the Constitution of the United States,

Be it resolved by the people of Alabama in convention assembled, That the people of the States of Delaware, Maryland, Virginia, North Carolina, South Carolina, Florida, Georgia, Mississippi, Louisiana, Texas, Arkansas, Tennessee, Kentucky, and Missouri, be, and are hereby, invited to meet the people of the State of Alabama, by their delegates, in convention, on the 4th day of February, A. D. 1861, at the city of Montgomery, in the State of Alabama, for the purpose of consulting with each other as to the most effectual mode of securing concerted and harmonious action in whatever measures may be deemed most desirable for our common peace and security.

And be it further resolved, That the president of this convention be, and is hereby, instructed to transmit forthwith a copy of the foregoing preamble, ordinance, and resolutions, to the Governors of the several States named in said resolutions.

Done by the people of the State of Alabama in con-

vention assembled, at Montgomery, on this, the 11th day of January, A. D. 1861.

WILLIAM M. BROOKS,

President of the Convention.

A majority and minority report were presented on the ordinance of secession. Trouble arose in the Convention, because a portion of the members desired that the ordinance should not take effect until the 4th of March. A number refused to sign it for this reason, and as late as the 17th of January, a despatch was sent to the Senators and Representatives of the State in Congress at Washington, to retain their seats until further advised.

A proposition was also made in the Convention to submit their action to the people, for ratification or rejection. This was refused, and an exciting scene ensued.

Nicholas Davis, of Huntsville, declared his belief that the people of North Alabama would never abide the action of that Convention, if denied the right of voting upon it. Mr. Yancey thereupon denounced the people of North Alabama as tories, traitors, and rebels, and said they ought to be coerced into a submission to the decree of the Convention. Mr. Davis replied that they might attempt coercion, but North Alabama would meet them upon the line and decide the issue at the point of the bayonet.

The ordinance was adopted about two o'clock in the afternoon. Subsequently in the afternoon, an immense mass meeting was held in front of the Capitol, and many coöperation delegates pledged their constituents to sustain secession. A flag which had been presented by the ladies of the city to the Convention, was then raised over the building, amid the ringing of bells and firing of cannon.

In Mobile the news was received at once, and the day became one of the wildest excitement. The people were at the highest point of enthusiasm until a late hour at night. To add to the excitement, news was received that the State of Florida had passed a secession ordinance.

Immediately on the receipt of the news, an immense crowd assembled at the "secession pole" at the foot of Government street, to witness the spreading of the Southern flag, and it was run up amid the shouts of the multitude and thunders of cannon. One hundred and one guns for Alabama and fifteen for Florida were fired, and after remarks from gentlemen, the crowd repaired to the Custom-House, walking in procession with a band of music at the head, playing the warlike notes of the "Southern Marseillaise."

Arrived at the Custom-House, a lone star flag was waved from its walls amid enthusiastic shouts. The balcony of the Battle House, opposite, was thronged with ladies and gentlemen, and the street was crowded with excited citizens. Standing upon the steps of the Custom-House, brief and stirring addresses were delivered by several speakers.

The military paraded the streets. The Cadets

were out in force, bearing a splendid flag which had been presented to them a day previous, and, with the Independent Rifles, marched to the public square, and fired salvos of artillery. The demonstration at night was designed to correspond to the importance attached by the people to the event celebrated. An eye-witness declares the display to have been of the most brilliant description. When night fell, the city emerged from darkness into a blaze of such glory as could only be achieved by the most recklessly extravagant consumption of tar and tallow. The broad boulevard of Government street was an avenue of light, bonfires of tar barrels being kindled at intervals of a square in distance along its length, and many houses were illuminated. Royal street shone with light, the great front of the buildings presenting a perfect illumination. Rockets blazed, crackers popped, and the people hurraed and shouted as they never did before. The "Southern Cross" was the most favored emblematic design in the illumination, and competed with the oft-repeated 'Lone Star' for admiration and applause from the multitude."

By previous concert with the Governors of Georgia and Louisiana, "all the positions in these three States which might be made to follow the fashion set by Fort Sumter" were seized. The arsenal at Mt. Vernon forty-five miles above Mobile, was seized at daylight on the morning of January 4th; Fort Morgan was taken on the same day, without opposition. Previously, however, and on the 9th of January, five companies of volunteers, at the request of the Governor of Florida, left Montgomery for Pensacola. They were sent to assist in capturing the forts and other property there belonging to the United States. In order to place the city of Mobile in a better state of defence, the Mayor issued a call to the people for a thousand laborers. These were at once supplied, and also money sufficient to meet all demands. The Common Council of the city passed an ordinance changing the names of various streets. The name of Maine street was changed to Palmetto street; Massachusetts was changed to Charleston street; New Hampshire was changed to Augusta street; Rhode Island was changed to Savannah street; Connecticut was changed to Louisiana street; New York was changed to Elmira street; Vermont was changed to Texas street; Pennsylvania was changed to Montgomery street.

The Union feeling in the northern part of the State continued very strong. Many delegates from that region refused at first to sign the ordinance of secession which passed the State Convention, unless the time for it to take effect was postponed to the 4th of March. Some of them withheld their signatures entirely. The sessions of the Convention were conducted wholly in secret, and only such measures were made known to the public as were of such a character as to prevent secrecy.

On the 29th, the Convention adopted a reso-

lution instructing the deputies to the Southern Convention to insist upon the enactment of such laws as would forever prevent the reopening of the African slave trade; and, on the next day, they passed a supplemental ordinance authorizing the Governor to carry into effect the previous ordinance for the protection of the defences in the Gulf of Mexico; also, an ordinance adopting as the law of Alabama the laws of the United States relative to patents, and securing the right of invention to citizens of all the Slave States. It then adjourned till the 4th of March.

Thaddeus Sanford, collector of customs for the port of Mobile under the United States Government, was appointed to that office by the Convention, and directed to proceed, as heretofore, collecting duties, issuing clearances, &c., only in the name and by the authority of the State of Alabama, instead of that of the United States.

Upon its adjournment, the President made an address, expressing the most decided views upon the permanency of the secession of the State. He said:

"We are free, and shall any of us cherish any idea of a reconstruction of the old Government, whereby Alabama will again link her rights, her fortunes, and her destiny, in a Union with the Northern States? If any one of you hold to such a fatal opinion, let me entreat you, as you value the blessings of equality and freedom, dismiss it at once. There is not, there cannot be, any security or peace for us in a reconstructed Government of the old material. I must believe that there is not a friend or advocate of reconstruction in this large body. The people of Alabama are now independent; sink or swim, live or die, they will continue free, sovereign, and independent. Dismiss the idea of a reconstruction of the old Union now and forever."

After the adjournment of the Convention, a Commissioner, Thomas J. Judge, was sent by the State authorities to negotiate with the Federal Government for the surrender of the forts, arsenals, and custom-houses, within the limits of the State. It appears that the President declined to receive him in any other character, than as a distinguished citizen of Alabama. In this capacity he declined to be received, and returned home. The negotiations were conducted through Mr. C. C. Clay, to whom the Commissioner writes on the 4th of February:

"I acknowledge the receipt of your note of the 2d instant, enclosing the correspondence between yourself and his Excellency James Buchanan, President of the United States, relating to my mission as Commissioner from the State of Alabama.

"The President declines to give me an audience in the only character in which I sought it, as Commissioner for the State of Alabama, and thereby refuses to receive any proposals from that State for a settlement relating to the public debt of the United States, contracted whilst Alabama was a member of that Confed-

eracy, and relating to the property in the possession of Alabama, which belonged to the United States of America before the withdrawal of Alabama from that Union.

"From this course of the President it is to be presumed that he has abandoned all claim, or resolved not to make any, in his official character, to that property in behalf of his Government; or that, repelling every offer of amicable and peaceable adjustment, he desires that it shall be retaken by the sword.

"But, no matter what motive has prompted his unexpected treatment of me, I should be wanting in proper reverence for my State, and proper appreciation of my present relations to her, to sue for peaceful negotiations, since the right of Alabama to send me, and my right to speak for her, have been denied. And if negotiation is to settle our difficulties touching those forts and arsenals, it must be proposed by the President to the Governor at her capital, whither I shall go and report the result of my mission.

"Whilst I regret this action of the President, it is gratifying to know that the State of Alabama, by her prompt efforts to do that justice in the premises which has been thwarted by him, will stand justified before the world. And that State having now been placed right upon the record, and, under the circumstances, nothing more remaining for me to attempt to accomplish as her Commissioner, my mission ceases with this letter."

The State Convention again assembled on the 4th of March, and took up for approval the Constitution adopted by the Confederate Congress. In all the seceding States it was adopted by the State Convention, without being submitted to the people to vote for or against it. The Convention of Alabama was the first to adopt it, and almost immediately after its promulgation. At the time it was under consideration in that body, the following resolutions were offered, relative to the right of the people to express an opinion on the subject:

"Resolved, 1. That the political power in all free Governments is inherent in the people, and that an attempt to infringe this great principle is dangerous in policy and directly subversive of civil liberty.

"2. That the right of every people to frame the system of government under which they are to live is a fundamental doctrine in all free Governments, and should not be questioned or impaired.

"3. That the acknowledgment of these established principles, the spirit and genius of American institutions, and the well-ascertained precedents of republican usage, imperatively demand that the 'Constitution of the Confederate States of America' shall be submitted to the people of this State for their ratification or rejection."

They were rejected, by being laid on the table. Ayes, 54; noes, 33.

The vote in the Convention on ratifying the Constitution, was taken on the 13th of March, and was as follows: ayes, 87; noes, 5.

The Convention also adopted an ordinance transferring to the Provisional Government the arms and munitions of war acquired from the

United States, and also all authority over the forts and arsenals in the State. It also passed an ordinance substituting stocks of the Confederate States for those of the United States, to be held by the banks as a basis for their paper circulation, and allowing the issue of two dollars for one of capital. Foreigners and foreign corporations were forbidden to hold stocks belonging in the State. The Convention adjourned on the 20th of March.

The Legislature of the State met, and was organized on the 15th of January. Its action was confined, as far as possible, to business arising from the action of the Convention. The Governor in his message, urged the necessity of placing the State at once upon the most efficient war footing. It very promptly and efficiently, with large majorities, aided the secession movement by all such acts as were necessary. On the 19th of January, the House passed an act to provide against the invasion of the State by sea. It declared that pilots bringing vessels into Mobile should be liable to a fine and imprisonment in the penitentiary, and also authorized the commander of Fort Morgan to destroy the beacon and landmarks at his discretion, and contract for the construction of a telegraph line to Point Clear, in order to more speedily communicate with Fort Morgan.

On the 5th of February, an act was passed appropriating \$500,000 to aid the cause of Southern Independence.

* After the formation of the Confederate Government the charge of precipitation was made against it in the border States. To this the official press of the State took occasion to reply. The answer was, that so far from being precipitate, the movement had been in contemplation for ten years. The ordinance of secession of Alabama declares that the election of Abraham Lincoln was such a wrong as to require the adoption of prompt and decided measures for their future peace and security. (See also DIPLOMATIC CORRESPONDENCE OF CONFEDERATE STATES, and Letter of the Southern Commissioners to Lord Russell, p. 278.)

The reply to the charge of precipitation was in these words:

"Has it been a precipitate revolution? It has not. With coolness and deliberation the subject has been thought of for forty years; for ten years it has been the all-absorbing theme in political circles. From Maine to Mexico all the different phases and forms of the question have been presented to the people, until nothing else was thought of, nothing else spoken of, and nothing else taught in many of the political schools.

"Civil war, with its attendant disasters, may mar the happiness of the men of the present time; carnage and slaughter may convert our hitherto happy and beautiful homes into barren and dreary wastes for a time; they may become the rendezvous of a devastating enemy; but who would now forego all the enchantment of the present scene for the security and prosper-

ity of millions yet unborn? Beyond the gloomy prospect is to be seen an auspicious and an unclouded destiny of greatness for the 'Confederate States of America.'"

So reluctant were the minds of a portion of the people in the Gulf States to entertain the idea of a perpetual and absolute separation of the Union, that the views of a very respectable number turned now to reconstruction. The Commissioner from Alabama, in his address to the people of Baltimore, had put forth the statement that these political movements were designed to obtain better terms of Union. (*See BALTIMORE.*) It was only the authorities of the State and the principal public men, with a portion of the press, which had comprehended the dread reality in its full extent. Reconstruction was fatal to secession. Reconstruction would throw into political oblivion all the active leaders of secession. Reconstruction would bring over them again the power and sway of the North; absolute secession opened the only door of escape. Reconstruction would set at work again that silently-growing conviction in favor of greater personal liberty, which was spreading like leaven through the minds of the mass of the people. In Georgia every candidate for the Confederate Congress was required to give an assurance that he was not in favor of forming a Government having in view an immediate or ultimate union with the Northern States, before he could receive a vote at the polls. In Alabama the proposition was denounced in unscrupulous terms. The bitterness of those denouncing it is very fully manifested in the following paragraphs expressing their views:

"Any one who observes the indications of the day will readily conclude that some of those who, before the recent act of secession, only advocated 'coöperative action' to secure our rights, are now, since coöperation has been triumphantly secured, endeavoring to train the public mind in the direction of reconstruction. While this is an undeniable fact, it can be said that the leading members of the coöperation party in our own and the Conventions of adjacent States have signally vindicated their patriotism and their loyalty. No charge is made against them when it is said that an attempt is made to sell the South into worse than her former bondage, by a plan neatly phrased as 'reconstruction.'

"And what does 'reconstruction' mean? Its advocates, no less than its opponents, perfectly comprehend that it is the concession of all the rights sought to be maintained. It means, little as is said about it, the extinction of African slavery! It means negro equality—the surrender of the white man's right of domination. And most, if not all, the leaders who advocate it are aware of the ultimate effect to be produced.

"Then why, it is asked by the simple-minded, should large property-holders, large slave-holders, favor and foster such a scheme? Why,

the sharp property-holders who do not intend to adhere to the South, are desirous of patching up a compromise, so that a temporary respite from political troubles may enable them to convert their Southern property, and to go with the proceeds wherever inclination may lead them.

"The men of the South, rich and poor, who intend to remain within the South, in weal or woe, will not be deceived by this crafty plan to deliver the South into the hands of free negroism. They see that any thing short of a maintenance of our independence, absolutely, is a total surrender, 'to take effect' at such time as our Abolition masters may choose to designate. This is known to them and to the advocates of the Grecian Horse of Reconstruction, because no sane man, of ordinary intelligence, does or can believe that the Republican leaders could give any guarantees which would be respected by their people. The hate between the two sections is perfect; and everybody knows the fact. Abolitionism, pinched in its belly, might seem to concede something; once fill that belly and give into its hands the Treasury and the army and navy, and the South becomes a San Domingo. Even supposing that the Abolition Government at Washington, after 'reconstruction,' should affect to execute what it had promised, is there any Southern fool so utterly besotted as to suppose that that Government would not wink at and privately promote raids like that into Virginia?"

All thoughts of reconstruction were soon given up, and in its place sanguine hopes were encouraged of the future glory of the Confederacy.

At this time, previous to the surrender of Fort Sumter, a considerable Confederate force was, in a manner, besieging Fort Pickens at Pensacola, under the command of Gen. Bragg. Meanwhile, the Federal fleet lay off at anchor. Supplies having been taken to the fleet by the sloop *Isabella*, Capt. Jones, of Mobile, the vessel was seized and turned over to the military authorities, and the captain arrested. The charge was that he had attempted to convey supplies on his own private account, or that of his owners, to the United States vessels.

Capt. Jones, in vindication of his rights, afterwards sued out a writ of *habeas corpus*, through his wife, and had a hearing before the Judge of the Circuit Court at Mobile.

His counsel contended that his arrest was illegal and unauthorized, raising the points whether a state of war existed, which alone could justify such an arrest; and whether Capt. Jones had been arrested within a jurisdiction embracing Mobile; for if so, Gen. Bragg and not the Court should adjudge the offence. He demanded the discharge of the prisoner.

Counsel against the prisoner held that the arrest was made under the regulations of the Confederate States; that a state of war existed by the acts of the Administration; and if the army regulations were decided not to prevail,

then the Court would be protecting the enemy. He thought the case a leading one, and therefore important.

The Court confessing that the anomalous state of political and inter-State affairs surrounded the question with embarrassment, D. C. Green, in order to release the Court from all responsibility, discharged the prisoner from custody. The counsel for the defence insisted upon the Court's passing judgment, but his demand was not acceded to, and Capt. Jones was released.

The reputed owners of the sloop refused to receive her, intending to hold the captors responsible for all loss incurred.

Subsequently, in the month of June, after the relations of the North and South had changed, the Grand Jury of the District Court of the Confederate States found a true bill against three other persons, charging them with treason against the Confederate States, in having traitorously carried and delivered a cargo of fruit to the enemy's fleet off Pensacola. The Court, in its charge to the jury, stated the law to be, that furnishing provisions or important intelligence to the enemy was treasonable. The penalty for that offence, on conviction, was death.

The military operations consisted merely in enlisting and equipping soldiers, and sending them forward to the positions occupied by the Confederate forces in the other seceded States. No hostile soldier put his foot on the soil of Alabama during the year. This was entirely in consequence of her position. She is bounded by the other Confederate States except on the South, where her sea coast is small and less important than other points.

At the time of the secession of the State a small force was sent to aid the volunteers in Florida to capture and hold the Navy Yard and forts at Pensacola. On the 10th of April, President Davis made a requisition on the Governor for three thousand soldiers. On the 1st of May, the first battalion of the Third State Regiment left for Virginia; and on the 15th more troops were sent to Pensacola. Indeed, the business of preparing for the war became the all-engrossing subject in the principal cities, but especially Mobile. One of the public citizens, in rather enthusiastic language, describes the alacrity of the people:

"The like, where it has been left to the free volition of the people without any extraneous appliances to stir enthusiasm, and without the slightest compulsion of Government, the world has never witnessed. We saw men coming, when the news had been scattered abroad that their company had received 'marching orders,' by ones, twos, threes, to the place of rendezvous, on foot, on horseback, in mule wagons, and every way, without the slightest command or compulsion, save the commands of patriotism. They gather noiselessly at the electric summons of patriotism as the storms gather down behind the horizon of a clear, still day,

when mustering for a tornado, and their stillness to us is as portentous. Can a people moved by such stern, quiet impulses of patriotism be conquered? Never!"

Forts Morgan and Gaines were taken possession of by State troops under orders from the Governor, on the 4th of January, while the State continued a member of the Union. (*See FORTS.*)

On the 19th of January, four days after Secretary Dix took charge of the Treasury Department of the United States, he sent the Chief Clerk of the First Comptroller's Office, W. H. Jones, to Mobile and New Orleans, to save, if possible, the two revenue cutters stationed at those places. At Mobile Mr. Jones could not find the captain (Morrison) of the cutter *Lewis Cass*, but he discovered in the cabin the following letter, which explains the surrender of the vessel to the Alabama authorities:

STATE OF ALABAMA, Collector's Office.

J. J. Morrison:

SIR: In obedience to an ordinance recently adopted by a convention of the people of Alabama, I have to require you to surrender into my hands, for the use of the State, the revenue cutter *Lewis Cass*, now under your command, together with her armaments, properties, and provisions on board the same. I am instructed also to notify you that you have the option to continue in command of the said revenue cutter under authority of the State of Alabama, in the exercise of the same duties that you have hitherto rendered to the United States, and at the same compensation, reporting to this office and to the Governor of the State. In surrendering the vessel to the State, you will furnish me with a detailed inventory of its armaments, provisions, and properties of every description. You will receive special instructions from this office in regard to the duties you will be required to perform. I await your immediate reply.

Your obedient servant,

T. SANFORD, *Collector.*

The number of troops furnished by the State to the Confederate army during the year has been estimated at eighteen regiments, besides a number of companies of infantry and artillery. These independent or separate companies were sent to Pensacola, Charleston, and elsewhere, with too much despatch to admit of their remaining until a full regiment was formed.

The commerce of the State was paralyzed by the events of the year. The blockade was so effective that very few vessels were successful in entering or leaving the harbor of Mobile. The internal trade suffered from the same causes. The crops were as favorable as in any former year, but having no market for cotton which could be reached, no return was received from its cultivation, and it became valueless during the continuance of the blockade.

ALBERT, PRINCE, consort of Victoria, Queen of Great Britain, Duke of Saxe-Coburg-Gotha, born at Rosenau, Aug. 26, 1819, and died at London Dec. 14, 1861. He was the second son of Ernest, Duke of Saxe-Coburg-Gotha, under whose superintendence he received an admirable education, which he completed by attending for three sessions at the university at Bonn. In July, 1838, he visited

England, in company with Leopold, the king of Belgium, and spent some time at the court of Queen Victoria. In November, 1839, she formally announced to the Privy Council her intention to form a matrimonial alliance with Prince Albert. The marriage was solemnized Feb. 10, 1840. He was a man of refined taste, and an accomplished musician and draughtsman. The progress of the arts and sciences, and general philanthropic subjects, such as the "dwellings of the working classes," sanitary arrangements, &c., engaged his attention. He was also a patron and president of numerous charitable institutions. As President of the Society of Arts, he was the chief promoter of the Great Exhibition of 1851. With a single exception, for a brief space of time, he enjoyed great popularity with all classes.

The Prince was taken ill about the 1st of December. Symptoms of fever, accompanied by a general indisposition, made their appearance. For some days the complaint was not considered to be serious, but from the 7th the medical men in attendance and the persons about the court began to feel anxious. It was not until the 11th, when the fever gained head and the patient was much weakened, that the first bulletin was issued. Even then it was stated that the symptoms were not unfavorable. It is said that the death of the king of Portugal had an unfortunate influence over him during his illness, and possibly assisted the progress of the malady. On the 11th he is said to have expressed a belief that he should not recover. No material change took place on the 12th, and on the 13th the Queen took a drive, with no idea of danger. When she returned the patient's extremities were already cold, and from that time he was in the greatest danger. On that evening he was not expected to survive the night. On Saturday forenoon, the 14th, there was a rally, which so often precedes dissolution, but it gave great hopes to the physicians. At 4 P. M. a relapse took place, and the Prince, who, from the previous Friday, had been sustained by stimulants, began to sink gradually. Congestion of the lungs, the result of complete exhaustion, set in. The Prince's breathing became continually shorter and feebler, and he expired without pain at a few minutes before 11 o'clock. He was sensible to the last moment. Deep sympathy for the Queen and regret for the death of one so universally respected, was the only sentiment apparent throughout England. The warmest eulogiums were passed on the deceased Prince by the press and the public.

ALEXANDRIA is a city in Alexandria County, Virginia; it is on the right bank of the Potomac, and 8 miles below Washington. The river is here one mile wide, and forms a commodious harbor for the largest ships. The streets cross each other at right angles and are generally well paved. The Alexandria, Loudon, and Hampshire Railroad terminates here. This road extends to Leesburg, passing through the

following places: to Arlington Heights, 6 miles; Carlinville, 7 miles; Falls Church, 11 miles; Vienna, 15 miles; Hunter's Mill, 18 miles; Thornton, 21 miles; Herndon, 23 miles; Guilford, 27 miles; Farmwell, 31 miles; Leesburg, 38 miles. The Orange and Alexandria Railroad also terminates here. It extends from Alexandria through Manassas Junction to Gordonsville, 88 miles, where it unites with the Virginia Central. The distance to Springfield is 9 miles; Burke's, 14 miles; Fairfax, 18 miles; Union Mills, 23 miles; Manassas Junction, 27 miles from Alexandria. When the District of Columbia was ceded to the United States by Virginia and Maryland, Alexandria was in the part conveyed by the former. It was subsequently retroceded to Virginia by an act of Congress, passed July 2d, 1846. The city was occupied by Ellsworth's Zouave Regiment and a Michigan Regiment, on the morning of the 24th of May, 1861, and continued in the possession of the Federal troops through the year.

The effect of its military occupation is thus described: "Its trade was almost broken up. The Corn Exchange room was entirely deserted. The counters where the merchant exposed his samples of flour and grain, the little sample boxes lying here and there, the desk with the books of sales on it and the newspaper stand, all remained as they used to be; but there was no grain scattered around or in the boxes, no entry on the books of the Exchange since May, and the last newspapers bore date on May 23d, 1861. Of all the merchants who were accustomed to do business there only a few remained."

Six months previous to its military occupation, Alexandria was a thrifty, growing city, with an energetic, prosperous, and happy population. It occupied an enviable position, and in a social point of view stood preëminently high. Soon after its occupation a large number of the oldest and most respected families no longer remained, having left their homes at the beginning of the war; their houses were closed or occupied by others, and their wonted life and cheerfulness departed. The wharves, too, where once were crowded vessels from foreign and domestic ports, and where all was bustle and activity, were now, save when a transport or puny arrived, almost bare, and on the river no ships appeared, save those used in the service of the Federal Government. But very few warehouses on the wharves were open or occupied, and Union street, next to King the principal business street of the city, was now, except as a burden train passed, as quiet as on Sundays. Prince, Duke, Cameron, and Queen streets lost their vitality, and King alone resembled what it was wont to be. The city Government was no longer administered upon its chartered basis, the Mayor and night and day police having been deposed; and the sound of the watchman's horn heard in the town at 10 o'clock at night—"since time whereof the

memory of man runneth not to the contrary"—was now silenced, the bugle's signal and drum's tattoo having taken their time-honored place.

Among the appointments made after the military occupation of Alexandria, was that of Provost Judge Freese. In the exercise of his duties it was decided by him that Southern merchants within the Union lines should pay their debts to Northern merchants. The decision was received with much favor in commercial cities at the North, and the business of the Court in which the Judge presided, was rapidly increasing. But this involved a point within the sphere of the civil Government, rather than within the jurisdiction of a Provost-Judge, and instructions were given by the military authorities to their Judge to confine himself to the limits of his military jurisdiction.

ANNAPOLIS, the capital of Maryland, is situated on the right bank of the Severn River, two miles above its entrance into Chesapeake Bay. It is twenty-five miles south by east of Baltimore, and thirty-seven miles east by north of Washington. The Annapolis and Elkridge Branch Railroad connects it with the Baltimore and Washington Railroad, at a spot called the Junction. The United States Naval Academy was established here in 1845. After the attack at Baltimore on the Massachusetts Sixth Regiment, on the 19th of April, the troops then on their way to Washington were brought from Perryville by water, to Annapolis, and thence by railroad to the Junction, thus passing around Baltimore. When the order was sent from Baltimore, amid the exciting scenes of the 19th, to stop the progress of more troops towards that city, General Benjamin F. Butler, with a Massachusetts regiment numbering eight hundred men, then on his way to Washington, stopped at Havre-de-Grace, and taking the steam ferry-boat Maryland, reached Annapolis on the morning of the 21st. Governor Hicks sent a protest against the landing of the troops at Annapolis. To this General Butler replied that he would land at the Naval Academy, over which the Federal Government had exclusive jurisdiction. At the same time, the New York Seventh Regiment arrived by another boat from Perryville. There was now no communication by railroad with Washington. Some part of the track between Annapolis and the Junction had been torn up by disaffected inhabitants along the line. The Seventh Regiment proceeded on foot to the Junction, and thence by railroad to Washington. General Butler, with a force from his regiment, took possession of the frigate Constitution,

attached to the Naval School, and removed her beyond the danger of seizure by those sympathizing with the Confederate Government.

A consultation of officers was held at the Naval School on the 23d, and it was determined that the passage of troops through Maryland to the city of Washington should be conducted in such a manner as to give no cause of offence to the people of the State, and that nothing should be taken without prompt pay. Should the people, however, destroy the bridges, make a hostile attack, or offer any interruption to the troops, it should immediately be resented, and with proper severity.

The officers of the Seventh Regiment of New York conversed freely with the citizens of Annapolis and some from Baltimore, in relation to what they deemed the unexpected and inexplicable course of Maryland. They anticipated no hostile reception in Maryland, where each man claimed to have many intimate personal friends. "If, in the performance of duty," they added, "we shall be compelled to meet our old friends of the Baltimore City Guard and the Richmond Grays in hostile array, we shall return their first fire by presenting arms; but on the second fire we shall be compelled to defend ourselves."

On the 23d there were over 2,600 troops in the city, and on the same day 8,000 more arrived from New York and Pennsylvania. A detachment of the Massachusetts Volunteers, on the same day, took possession of the railroad leading from Annapolis to Washington and Baltimore. No resistance was offered; as soon as the demand was made, the gates were thrown open to them; and, after placing fifty men on guard, the remainder began to repair the engines and cars which had been disarranged by the company in order to prevent the troops from using them. In a few hours this object was accomplished, and a train run out by an engineer in one of the volunteer companies. Fifty men were detached to proceed in advance and examine the track, which resulted in finding that at various places it had been taken up. The damages were entirely repaired, the track put in working order, and the forwarding of troops and provisions commenced.

After these events the city relapsed into her former quiet condition.

ANTHRACITE. The progress of this trade and the production of the different coal districts are exhibited in the following table. For its history and production previous to 1857, see NEW AMERICAN CYCLOPEDIA.

YEARS.	Schuykill.	Lehigh.	Wyoming.	Shamokin.	Aggregate.	Annual Increase.

ANTIQUITY OF THE HUMAN RACE.

Among the interesting subjects that are occupying the attention of geologists is that of the greater antiquity of the human race than the historic period; and new arguments from various sources are brought to sustain this view, some of which will be presented below. The subject was first brought prominently before the public by the discoveries, made by M. Boucher de Perthes, of flints fashioned by hand, found in the drift in the valley of the Somme, in France. The localities have been examined by many distinguished geologists, as Joseph Prestwick, Sir Charles Lyell, Sir Roderick Murchison, and others, most of whom are satisfied, that the conclusions arrived at by M. de Perthes cannot be questioned. Mr. Murchison, in his address before the geological section of the British Association, 1861, not only expresses his full belief "in the commixture in that ancient alluvium of the works of man with the reliques of extinct animals;" but adds his gratification "in learning that England, in several localities, is also affording proofs of similar intermixture." Professor H. D. Rogers, who also examined the localities, while admitting that the flints were really shaped by human agency and are found buried together with bones of extinct mammalia, still questions the fact of the men who left the flints, and of the animals that possessed the bones, having necessarily lived together in the same epoch. Or, admitting that they were contemporaneous, it is not proved that the *Elephas primigenius* and the other mammals of the diluvium may not have belonged to the historic period. (See his paper in "Blackwood's Magazine" for October, 1860.)

Among other evidences adduced to establish a high antiquity for the human race, are the mounds of shells discovered of late years in numerous places along the coasts of Denmark. These are of vast extent, and contain, mixed up with the shells, broken bones of deer, beaver, wild boar, *bos*, *mus*, &c., together with charcoal, fragments of coarse pottery, stone hatchets, arrow-heads, and knives of flint, and various implements and ornaments of horns and bones, all indicating the existence at an unknown and very distant period of savage and populous tribes, of whom no other vestiges nor traditions remain. Bearing upon the same subject, Sir Charles Lyell has called attention to the large Indian mound of similar character at Cannon's Point, on St. Simon's Island, in Georgia. "This covers 10 acres in area, having an average height of 5 feet, and is chiefly composed of cast-away oyster-shells, throughout which arrow-heads, stone axes, and Indian pottery are dispersed." Similar mounds are scattered over the swamps near New Orleans, and their materials were employed by Gen. Joseph Swift, for constructing the foundation of the Lake Pontchartrain Railroad; and by his advice they have since been used for macadamizing the streets of New Orleans, and forming the

shell-roads in its vicinity. The vast extent of these mounds and their evident human origin have perplexed all who have studied them.

A paper was recently read by M. Lartet, before the London Geological Society, "On the Co-existence of Man with certain Extinct Quadrupeds, proved by Fossil Bones from various Pleistocene Deposits bearing incisions made by sharp instruments."

If, says the author, the presence of worked flints in the gravel and sands of the valley of the Somme, have established with certainty the existence of man at the time when those very ancient deposits were formed, the traces of an intentional operation on the bones of *Rhinoceros*, *Aurochs*, *Megaceros*, *Cervus somnensis*, etc., supply equally the inductive demonstration of the contemporaneity of those species with the human race. M. Lartet points out that the Aurochs, though still existing, was contemporaneous with the *Elephas primigenius*, and that its remains occur in preglacial deposits; and, indeed, that a great proportion of our living mammifers have been contemporaneous with *E. primigenius* and *R. tichorhinus*, the first appearance of which in Western Europe must have been preceded by that of several of our still existing quadrupeds.

The author also remarks, that there is good evidence of changes of level having occurred since man began to occupy Europe and the British Isles, yet they have not amounted to catastrophes so general as to affect the regular succession of organized beings.

Lastly, M. Lartet announced that a flint hatchet and some flint knives had lately been discovered in company with remains of elephant, aurochs, horse, and a feline animal, in the sands of the Parisian suburb of Grenelle, by M. Gosse, of Geneva.

The late discovery of ancient bronze implements near Moskowie, in Bohemia, also bears upon this interesting question. These are coated with successive layers of malachite, the copper derived from the bronze, and evidently very slowly produced. It has even been supposed that these prove that bronze instruments were in use in middle Europe at a period far beyond that of historical research.

Lastly, the "evidence of language" has been adduced to assign to man a high antiquity in the following paper, read before the British Association in 1861, by Mr. Crawford:

"The periods usually assigned for man's first appearance on earth, date only from the time when he had already attained such an amount of civilization as to enable him to frame some kind of record of his own career, and take no account of the many ages which must have transpired before he could have attained that power. Among the many facts attesting the high antiquity of man, the formation of language might be adduced, and his object was to give a few of the most striking facts which it yields. Language was not innate, but adventitious. Infants were without language, and

those born deaf were always dumb, for without the sense of hearing there would have been no language at all. Among the unquestionable proofs that language was not innate, was the prodigious number of languages which existed, some being of a very simple and others of a very complex character. If additional evidence were wanted that language was an adventitious acquirement, it was found in this—that a whole nation might lose its original tongue, and in its stead adopt any foreign one. The language that had been the vernacular of the Jews for three thousand years had ceased to be so for two thousand years, and the descendants of those who spoke it were now speaking an infinity of foreign tongues, European or Asiatic. Languages which were derived from a single tongue, Italy had superseded the many native languages which were once spoken in Spain, in France, and in Italy itself. A language of German origin had nearly displaced, not only all the native languages of England and Ireland, but the numerous ones of a large portion of America. Some eight millions of negroes were placed in the New World whose forefathers spoke many African tongues. It necessarily followed from this argument that when man first appeared on the earth he was destitute of language, and each separate tribe of men framed a separate one; hence the multitude of tongues. That the framers were arrant savages, was proved by the fact that the rudest tribes ever discovered had already completed the task of forming a perfect language. The languages spoken by the grovelling savages of Australia were so, and were even more artificial and complex in structure than those of many people more advanced. The first rudiments of language would consist of a few articulate sounds by which to make known their wants and wishes; and between that time and their obtaining completeness, probably countless ages had passed, even among the rudest tribes. In every department of language we find evidence of the great antiquity of man. The Egyptians must have attained a large measure of civilization before they had invented symbolic or phonetic writing, and yet these were found on the most ancient of their monuments. The invention of letters had been made at many different points, extending from Italy to China—a clear proof that civilization had many independent sources; but, such was everywhere the antiquity of the invention, that we could hardly in any case tell when or by whom it was made, though made in a hundred separate places. Epochs or eras, depending, as they must necessarily do, on the art of writing, were, of course, of still later origin. They were all, indeed, of comparatively recent origin. The Jews, Egyptians, Assyrians, and Persians had none at all; the Greek epoch dated only 776 and the Roman 753 before Christ. The oldest epoch of the Hindus, made the world, and of course man, up to the present time, 3,872,960 years old.

That was known to be a fable spun from faithless brains. The oldest era of the same people that had an air of authority, that of the Buddha, dates 544 years before Christ. The era of Vikramaditza, of better authenticity, dates but 57 years before Christ; and that of Saka, probably more authentic, only 79 years later than our own. The Chinese mode of reckoning was by cycles of sixty years, making the first year of the first cycle correspond with the year before Christ, 2397. Even this, if it could be relied on, would only carry us back to the time when the Chinese, a people placed, like the Hindus, under very unfavorable circumstances for development, had already attained a civilization which gave them the power of recording events, while it took no account of the long ages which must have elapsed before. After noticing the structure of various languages, and observing that there were many languages of simple structure, just as primitive as those of complex formation, the writer observed, that it appeared to him the structural character which languages originally assumed, would, in a great measure, be fortuitous, and depend on the whim or fancy of the first rude founders. Adam Smith, and he thought justly, supposed that the first rude attempts would consist in giving names to familiar objects, that is, in forming nouns substantive. Adjectives, or words expressing quality, as of a more abstract nature, would necessarily be of later invention; but verbs must have been nearly coeval with nouns; while pronouns he considered as terms very abstract and metaphysical, and as such not likely to have existed at all in the earlier period of language. 'Number,' Adam Smith said, 'considered in general, without any relation to any particular set of objects numbered, is one of the most abstract and metaphysical ideas which the mind of man is capable of forming, and consequently is not an idea which would readily occur to rude mortals who were just beginning to form a language.' And the truth of this view of the formation of numbers was corroborated by our observation of rude languages, in which the process seemed, as it were, to be still going on under our eyes. Among the Australian tribes, 'two,' or a pair, made the extent of their numerals. Other tribes had advanced to count as far as five and ten. Malayan nations had native numerals extending to a thousand. The two hands and the ten fingers seemed to have been the main aids to the formation of the abstractions which Adam Smith considered so subtle; and this would account for our finding the numeral scale sometimes binary, but generally decimal. However great the difficulty of constructing languages, there was no doubt they were all conquered, and that by rude savages; and the Sanscrit language, in all its complexity and perfection of structure, was spoken and written at least three thousand years ago, by men who, compared with their posterity, were certainly barbarians. The discovery of the art of writ-

ing implied an advanced state of civilization, the fruit of very long time; and from the sketch he had given of the formation of language, the conclusion was, he thought, inevitable that the birth of man was of vast antiquity."

APPLETON, NATHAN, died at Boston, July 14, 1861. He was born at New Ipswich, New Hampshire, Oct. 6, 1779, and was the seventh son of Isaac Appleton. At fifteen years of age he was examined and admitted to Dartmouth College. It was decided, however, that he should proceed no further in his collegiate studies. His brother Samuel, who had been in trade in New Ipswich and was about to remove to Boston, proposed that he should accompany him. This was accepted, and as he himself says, "It was determined that I should become a merchant rather than a scholar." His brother commenced business in a small shop in Cornhill; it consisted mostly in purchasing goods at auction and selling them to country traders for cash or short credit, for a small profit. In 1799, his brother made a voyage to Europe, leaving his business in the charge of Nathan. On the return of the former he removed to a warehouse in State street, and proposed to the latter, who had become of age, to be a partner. This was accepted, and Nathan now had at hand opportunities for enlarging his observation and experience. He was sent out to England to purchase goods while Europe was in a state of war. The news of peace reached him on landing, and changed the whole condition and current of trade. He postponed his purchases and travelled on the Continent; shortly afterwards returning to America, and resuming his mercantile career. In 1806 he married Maria Thebesa Gold, the eldest daughter of Thomas Gold, of Pittsfield, and for the health of his wife soon crossed the ocean again. In Edinburgh he met Francis C. Lowell at the moment the latter was first conceiving the policy to which the cotton manufacture of New England owes its origin; with him he held an earnest and encouraging consultation in regard to it.

As capital accumulated in his hands, he took a very active part in connection with Francis C. Lowell, Patrick T. Jackson, Paul Moody, and others, in establishing the cotton factory at Waltham, Massachusetts. He says: "When the first loom was ready for trial, many little matters were to be adjusted or overcome before it would work perfectly. Mr. Lowell said to me, that he did not wish me to see it until it was complete, of which he would give me notice. At length the time arrived, and he invited me to go out with him and see the loom operate. I well recollect the state of satisfaction and admiration with which we sat by the hour watching the beautiful movement of this new and wonderful machine, destined, as it evidently was, to change the character of all textile industry." He was also one of the chief associates in the company which made the first

purchases for a like purpose at Lowell. They purchased the water power at Pawtucket Falls, on the Merrimac River, and a large portion of the land adjacent, on which the city of Lowell now stands. He was also the projector and largest proprietor of the Hamilton Company, where new varieties of goods were first made in this country.

On different occasions he was elected a member of the Massachusetts Legislature, and in 1830 was chosen a member of the Twenty-second Congress. His first speech was an effort to show that South Carolina was the author of the system of minimums, which was only another name for specific duties and a system capable of defence, the tariff being under discussion. He writes: "I took the occasion to state, that we could convert a pound of our cotton into the common cloth we were making, for less money than the British could do. This being a fact well known to me, the statement was made advisedly, wishing the matter to stand on its true basis; but, being so contrary to the general impression, it quite alarmed some of the friends of the protective system, as I learned afterwards. My speech gave a new turn to the debate. It brought up McDuffie and Cambreleng, and the debate occupied the whole day. The vote showed a majority of about twenty in favor of the protective system."

In 1842 he was again sent to fill the vacancy occasioned by the resignation of Robert C. Winthrop in Congress. Though not a frequent debater in Congress, he was listened to with attention. His mind turned to the financial and commercial view of questions. He was a member of the American Academy of Science and Arts, and of the Massachusetts Historical Society. In February, 1833, his wife died, leaving to him four children. In 1839 he was again married to the daughter of Jesse Sumner of Boston. Their children were three in number.

AQUIA CREEK is located on the right bank of the Potomac, at the termination of the Richmond, Fredericksburg and Potomac Railroad. This was a part of the through route from New Orleans and Mobile to New York. The connection between Aquia Creek and Washington was made by steamboat, 55 miles. It is 15 miles from Fredericksburg. The creek itself, after which the railroad termination takes its name, flows through Stafford County into the Potomac, and is navigable for vessels of light draft for several miles from its mouth. Batteries were erected here by the Virginia troops, which were cannonaded by Commander H. J. Ward in the gunboat *Freeborn*, supported by the *Anacostia* and *Resolute* on the 31st of May. He thus reported the affair:

"After an incessant charge, kept up for two hours by both our 32-pounders, and the expenditure of all the ammunition suitable for distant firing, and silencing completely the three batteries at the railroad terminus, the fir-

ing from shore having been rapidly kept up by them until so silenced, and having been recommenced from the new batteries on the heights back, which reached us in volleys, dropping the shot on board and about us like hail for nearly an hour, but fortunately wounding but one man, I hauled the vessel off, as the heights proved wholly above the reach of our elevation.

"Judging from the explosion of our ten-second shells in the sand-batteries, two of which were thrown by the Anacostia, it is hardly possible the enemy can have escaped considerable loss. Several others of the Anacostia's shells dropped in the vicinity of the battery."

Another attack was made on the batteries on the 1st of June, by the Freeborn and Pawnee, gunboats.

Just as the firing opened the men at the batteries burnt the depot houses at the end of the wharf, probably to prevent them from being in the way of their shot. They continued burning throughout the whole engagement, as it was not safe for any one to leave the batteries to extinguish the fire. It also burnt the entire wharf to the water's edge.

A slight affair had taken place on the 29th of May, previous to these two attacks, which was the first hostile collision on the waters of the Potomac.

ARCHITECTURE. New York City has long been famous for her stores, excelling those of any other city either in this country or abroad, in their size, expense of construction, ornamentation, and their conveniences for the purposes of the trade to which they are to be adapted. The war has, during the past year, materially interfered with new enterprises of this kind; but a few, undertaken in the previous year, have been completed, and are superior to any stores before constructed. Of these, the largest is the store and warehouse of Messrs Claffin, Mellen & Co., extending from Church street to West Broadway, with a façade on one side of these streets of 80 ft., and 375 on Worth street. The façades are of the green tinted Nova Scotia stone, with pediments on the three streets. The first story is of iron, painted and sanded to the same color as the stone. The style may be called Italian, with no excess of ornamentation, but the whole is in good taste. Like most of the later stores in this city, there are five stories above the sidewalk on Church street, and two beneath, viz.: basement and sub-cellar. Owing to the descent in Anthony street, the basement becomes on West Broadway, a full story above the side walk; at this end, most of the goods are delivered. The whole store is appropriated to the business of one firm, for the jobbing of dry goods. At the corner of White street and Broadway, a store has been erected by Wm. B. Astor, 75 feet on Broadway, and 175 on White street. The façades are of white marble, with the first story of iron. The roof is finished, a la mansard, with a balcony at the top of galvanized wrought iron, of which material the cornice of the build-

ing is also composed. This store differs in style from those usually constructed here. Heavy 4 pilasters ornament the front above the first story on Broadway, which are supported, each on two columns of iron. The caps of the windows, and all the ornamentation are extremely bold, and by their depth of shadow on the material of which they are constructed, give a character to the building uncommon to the class. On Broadway, between 9th and 10th streets, a store is building for A. T. Stewart, probably for the retail dry goods trade. The façades are entirely of iron; not distinctive in character as to style, they strike one rather by their extent than by their architectural beauty.

In Boston, a few dry goods warehouses have been finished, which, in boldness and originality in their façades, are equal, if not superior to those in New York; but they do not equal them in capacity. Some private dwellings have also been built on the land reclaimed from the Back Bay, which are deserving of notice architecturally. They are mostly in the French style of architecture, with mansard roofs. Their façades are of Nova Scotia stone, and of brick; and they ornament a part of the city which has been heretofore a low-tide reservoir.

At Washington, the work on the Capitol has been in a measure suspended. Piece by piece is still slowly added to the ribbed skeleton of the dome. Each piece is raised by a steam derrick, placed on the roof at the base of the dome, and instead of steadying the load by a guy, a man rides up on the piece as it is hoisted, to preserve its balance, and returns resting on a small iron ball above the hook. In the interior, Leutze is maturing his design for the ornamentation of the stair-case of the House of Representatives. The bronze doors, designed and modelled at Rome by Rogers, have lately been cast at the Munich foundry. Each door—the whole forms a folding-door—is divided into four panels. Thus, with a semicircular space above, there are nine divisions, in each of which an important moment of Columbus' life is represented. The figures stand out in full relief. The crowning event of the discoverer's career occupies the commanding spot over the top of the doors. Here Columbus, standing on a mound, forms the central figure. He has just landed from a boat, and with the standard of Arragon and Castile planted upon the new soil, and with sword upraised in his right hand, he takes possession of the land in the name of his sovereigns. Some boatmen are still in the skiff, others are kneeling on the shore, while a group of Indians, peeping from behind a tree on the opposite side, look on in wondering astonishment. In one compartment is represented the triumphal entry of Columbus into Madrid, on his first return from America, amid crowds of gazers at him, the hero of the triumph, and at the Indians, who precede the procession, with parquets on their upraised arms. The next panel is occupied with a sadder story. Here, Columbus in chains, surrounded

by a sorrowing population, is about to embark for Europe. Then, the "last scene of all," accomplishing his "strange eventful history," we see him on his death-bed, attended only by a nun and some priests, who administer to him the consolations of religion. His son stands beside him. In the thickness of the door itself niches are formed at certain intervals, and in these are small whole-length figures of the great contemporaries of Columbus—kings, statesmen, ecclesiastics, and warriors. In the centre, close to each other, are two such lines of niches, while on both sides a single row of figures, one above the other, fills up the intermediate space between the outer edge of the panels and the door post. The large bosses, so often seen on doors, are here the heads of those historians who have written on the discovery of America. The ornaments below each niche are heads of animals indigenous to the country, with fruits and flowers entwined.

In London, a new building for the International Exhibition of 1862, is being hurried to completion. From the published view, architecturally, it cannot be considered a success; but the immensity of the space occupied, and the dimensions of some particular parts of the buildings, may produce an effect which cannot be even suggested by a drawing.

The following statistics are from the official account:

The buildings cover in the whole more than 26 acres. The principal picture gallery, which is in Cromwell road, is 1,150 feet long, 50 feet wide, and 50 feet high above the ground-floor; being about as long as the gallery at the Louvre in Paris. The construction of this is of brick-work. The walls are lined with wood, and pictures may be hung, if desired, to a height of 30 feet. The entrance to this gallery is through three very large recessed arcades, each 20 feet wide, and 50 feet high. The visitor enters a vestibule and hall, 150 feet long, and together 110 feet wide, which leads to the Industrial Halls and Galleries; whilst two flights of steps, 20 feet wide, lead on either side up to the picture galleries. The auxiliary picture galleries are 25 feet wide, and about 30 feet high, and jointly, 1,200 feet long.

The industrial buildings, constructed chiefly of iron, timber, and glass, consist of the following parts: two duodecagonal domes, which will be 160 feet in diameter, and 250 feet high,—the largest of ancient and modern times. The dome of the Pantheon is 142 feet in diameter, and 70 feet high; the dome in the Baths of Caracalla was 111 feet; Brunelleschi's, at Florence, is 139 feet in diameter, and 133 feet high; the dome of St. Peter's is 158 feet in diameter, and 263 feet high from the external plinth; the dome of St. Paul's Cathedral is 112 feet in diameter, and 215 feet high. The domes will be of glass, with an outer and inner gallery. The vista from dome to dome, through the nave, is 1,070 feet. Each of the domes springs from the intersections of the nave with the two

transepts. The nave and transepts are 100 feet high, and 85 feet wide; the nave is 800 feet long, and the transepts are each about 635 feet long, including the domes. They are lighted on both sides by clerestory windows, 25 feet high.

At 25 feet from the ground, a gallery runs at each side of the nave and transepts. There is more than a mile and a half of upper galleries, some 50 feet, and some 25 feet wide; two courts, each 250 feet by 86 feet; two courts, each 250 feet by 200 feet; two central courts,—that at the north, 150 feet by 86; that at the south, 150 feet by 150 feet. All these glass courts are 50 feet high, and lighted from above. The entrances to the industrial buildings are constructed in brick, and each entrance is 55 feet wide. The iron castings are estimated to weigh nearly 4,000 tons; the wrought-iron used chiefly in the great domes, and for the roofs, about 1,200 tons.

For the top lighting of the galleries, 45,000 feet superficial of frames and glass are in preparation. For the clerestory lights of the nave and transepts, nearly a mile length of frames, 25 feet high, is preparing; and for the courts, upwards of 30 miles of sash-bars and glass.

The roofs are covered with slates for the great picture galleries, and elsewhere with felt, except in parts, to show how ornamental roofing may be hereafter applied. The contract is of a threefold character: for the use and waste of the buildings, a sum of 200,000*l.* is to be paid absolutely; if the receipts exceed 400,000*l.*, then the contractors are to take up to a further sum of 100,000*l.*; and if this sum is fully paid, then the centre acre of the great picture galleries is to be left as the property of the Society of Arts, who will pay the "1851" Commissioners a ground-rent calculated at the rate of 240*l.* per acre, per annum. Lastly, the contractors are bound to sell, absolutely, the remaining rights over the buildings, for a further sum of 130,000*l.*, which may possibly be paid by the surplus receipts of the Exhibition, if the success be great.

Comparing the extent of the present building with that of 1851,—the latter occupied nearly 23 acres; that now erecting covers a little over 26. The flooring space in 1851 was just short of a million feet. In the new building there will be 1,140,000; but as it is intended to exhibit machinery and agricultural implements in a wing especially built for the purpose, practically there will be some 500,000 feet of flooring more in 1862, than in 1851. The greatest height in 1851 was 160 feet, and the main nave 60 feet high by 72 wide. The greatest height of the new building will be 260 feet, and the nave 85 feet wide and 100 feet high. The total length of the first exhibition building was 1,800 feet by 400 wide. The present one, 1,200 long by 700 broad, exclusive of the space set aside for the display of agricultural implements, which is, in rough numbers, 1,000 feet long by 220 broad.

ARIZONA. (See TERRITORIES.)

ARKANSAS, in its location, is one of the Western States, but its productions are similar to those of the Southern States. It is bounded on the north by Missouri, on the east by the Mississippi River, which separates it from the States of Tennessee and Mississippi, on the south by Louisiana and Texas, and on the west by Texas and the Indian Territory. The Governor is elected by the people once in four years. The Senate consists of twenty-five members elected for five years, and the House consists of seventy-five members elected for two years. The Legislature meets on the first Monday in November. The population of the State in 1860 was 435,427, of whom 137 were free colored, and 111,104 slaves. The views of the people of the State were strongly in favor of the Union, and no movement aiming at secession took place in the State until the 20th of December, when David Hubbard, a Commissioner from the State of Alabama, addressed the Legislature of Arkansas at Little Rock. He argued that Alabama would secede from the Union whether other States did or not.

The largest meeting ever held at Van Buren took place on the 5th of January. The resolutions adopted with great unanimity, opposed separate State action, and were in favor of coöperation. The election of Mr. Lincoln was regarded as not in itself a sufficient cause for a dissolution of the Union—reasonable time should be allowed to the non-slaveholding States to retrace their steps. A large majority of the people of all former party associations were considered, at this time, as in favor of making all honorable efforts to preserve the Union. The demonstrations to the contrary, thus far made, were looked upon as reflecting only a small fraction of the public sentiment.

On the 16th of January the Legislature unanimously passed a bill submitting the Convention question to the people on the 18th of February. If a majority were in favor of a Convention, the Governor should appoint the time for its election.

On the day appointed an election was held throughout the State, and the vote in favor of holding a Convention was 27,412; against it, 15,826. Majority for a Convention, 11,586. The vote of the State at the Presidential election in November was, for Douglas, 5,227; Breckinridge, 28,732; Bell, 20,094.

At the election of delegates to the Convention, the Union vote was 23,626; Secession, 17,927; Union majority, 5,699.

The Convention assembled on the 4th of March, and organized by the election of Union officers, by a majority of six. On the 6th, the inaugural of President Lincoln was received, and produced an unfavorable impression on the minds of the people. Secession was strongly urged upon the Convention, which had been regarded as containing forty members opposed to it, and thirty-five in favor of it.

Various resolutions were offered and referred to appropriate committees, looking to an endorsement, on the one hand, of the doctrine of

secession, and the right and duty of Arkansas to secede, and on the other to a clear definition of the position Arkansas should take, stopping short of secession, with a view to the security of her rights in the Union.

A conditional ordinance of secession was debated, with a clause referring it back to the people for ratification or rejection. This was defeated by a vote of ayes, 35; noes, 39. The Convention was disposed to pass resolutions approving the propositions of Missouri and Virginia for a conference of the border slave States, and providing for sending five delegates to said Conference or Convention, and agreeing with Virginia to hold said Conference at Frankfort, Kentucky, on the 27th of May.

At Van Buren a salute of thirty-nine guns was fired in honor of the thirty-nine members of the Convention who voted against the secession ordinance. The same number of guns were fired at Fort Smith.

On the 17th, an ordinance was reported by a self-constituted committee composed of seven secessionists, and seven coöperationists, as a compromise measure between the two parties. It was adopted as reported, unanimously, in the Convention. It provided for an election to be held on the first Monday of August, at which the legal voters of the State were to cast their ballots for "secession," or for "coöperation." If on that day a majority of the votes were cast for secession, that fact was to be considered in the light of instructions to the Convention to pass an ordinance severing the connection of Arkansas with the Union. If, on the other hand, a majority of the votes of the State were cast for coöperation, that fact would be an instruction to the Convention immediately to take all necessary steps for coöperation with the border or unseceded slave States, to secure a satisfactory adjustment of all sectional controversies disturbing the country.

The next session of the Convention was to be held on the 17th of August; and to secure the return of all the votes of each county, each delegate was made a special returning officer of the Convention to bring the vote of his county to the Capitol.

Besides this ordinance submitting the proposition of "secession" or "coöperation" to the vote of the people, resolutions were passed providing for the election of five delegates to the border slave State Convention, proposed by the States of Virginia and Missouri, to be held some time during the month of May. Thus the proceedings of that Convention would be before the people, amply canvassed and understood, when the vote of the State was cast on the first Monday of August.

The result of the labors of the Convention, although not exactly what either party desired, was regarded as probably more nearly satisfactory to the public than any other action which could have been taken by that body. Time was given for investigation and deliberation as to consequences.

Affairs remained quiet; the friends of the Union were hopeful; those who sympathized with the seceded States were sanguine that Arkansas would be one of them. The capture of Fort Sumter, and the subsequent events, roused Arkansas to take a stand either with the North or with the South. Together with the news of the fall of the fort, there came also the President's Proclamation, and the requisition of the Secretary of War for a quota of troops from Arkansas. The reply of the Governor to this requisition, was dated the 22d of April. It proved him to be decided in his friendship to the secession movement. He wrote to the Secretary of War thus: "In answer to your requisition for troops from Arkansas, to subjugate the Southern States, I have to say that none will be furnished. The demand is only adding insult to injury. The people of this Commonwealth are freemen, not slaves, and will defend to the last extremity, their honor, lives, and property, against Northern mendacity and usurpation."

The President of the State Convention, entertaining similar views, immediately issued a call requiring it to reassemble on the 6th of May. The call was dated on the 20th of April.

On the 6th of May the State Convention met, and immediately took the necessary steps to prepare an ordinance to sever the relations existing between the State and the other States united with her under the Constitution of the United States. The ordinance was prepared and reported to the Convention at three o'clock in the afternoon, and was passed immediately, with only one dissenting vote. There were sixty-nine votes in the affirmative, and one in the negative. An eye-witness describes the passage of the ordinance as "a solemn scene." Every member seemed impressed with the importance of the vote he was giving. The hall of the House of Representatives was crowded almost to suffocation. The lobby, the gallery, and the floor of the chamber were full, and the vast crowd seemed excited to the highest pitch. A profound stillness prevailed all the time as vote after vote was taken and recorded, except occasionally, when some well-known Union member would rise and preface his vote with expressions of stirring patriotic Southern sentiments, the crowd would give token of its approbation; but the announcement of the adoption of the ordinance was the signal for one general acclamation that shook the building.

A weight seemed suddenly to have been lifted off the hearts of all present, and manifestations of the most intense satisfaction prevailed on all sides. Immediate steps were taken by the Convention to unite with the Confederate States. The ordinance was as follows:

Whereas, in addition to the well-founded causes of complaint set forth by this Convention, in resolutions adopted on the 11th March, A. D. 1861, against the sectional party now in power at Washington City, headed by Abraham Lincoln, he has, in the face of resolutions passed by this Convention, pledging the State of Arkansas to resist to the last extremity any attempt on the part of such power to coerce any State that seceded

from the old Union, proclaimed to the world that war should be waged against such States until they should be compelled to submit to their rule, and large forces to accomplish this have by this same power been called out, and are now being marshalled to carry out this inhuman design, and to longer submit to such rule or remain in the old Union of the United States would be disgraceful and ruinous to the State of Arkansas;

Therefore, we, the people of the State of Arkansas, in Convention assembled, do hereby declare and ordain, and it is hereby declared and ordained, that the "ordinance and acceptance of compact," passed and approved by the General Assembly of the State of Arkansas, on the 18th day of October, A. D. 1836, whereby it was by said General Assembly ordained that, by virtue of the authority vested in said General Assembly, by the provisions of the ordinance adopted by the convention of delegates assembled at Little Rock, for the purpose of forming a constitution and system of government for said State, the propositions set forth in "an act supplementary to an act entitled an act for the admission of the State of Arkansas into the Union, and to provide for the due execution of the laws of the United States within the same, and for other purposes, were freely accepted, ratified and irrevocably confirmed articles of compact and union between the State of Arkansas and the United States," and all other laws and every other law and ordinance, whereby the State of Arkansas became a member of the Federal Union be, and the same are hereby in all respects and for every purpose herewith consistent repealed, abrogated, and fully set aside; and the union now subsisting between the State of Arkansas and the other States, under the name of the United States of America, is hereby forever dissolved.

And we do further hereby declare and ordain, that the State of Arkansas hereby resumes to herself all rights and powers heretofore delegated to the Government of the United States of America—that her citizens are absolved from all allegiance to said Government of the United States, and that she is in full possession and exercise of all the rights and sovereignty which appertain to a free and independent State.

We do further ordain and declare, that all rights acquired and vested under the Constitution of the United States of America, or of any act or acts of Congress, or treaty, or under any law of this State, and not incompatible with this ordinance, shall remain in full force and effect, in nowise altered or impaired, and have the same effect as if this ordinance had not been passed.

The Convention also passed a resolution authorizing the Governor to call out 60,000 men, if necessary. The State was divided into two grand divisions, eastern and western, and one brigadier-general from each appointed. Gen. Bradley was elected to the command of the eastern, and Gen. Pearce, late of the U. S. Army, to the western.

Among the other acts passed by the Convention, was an ordinance confiscating debts due persons residing in the non-slaveholding States of the United States, and also all the personal property belonging to such persons in Arkansas, on the 6th of May, 1861. All moneys collected for persons residing in any one of the non-slaveholding States of the United States were likewise confiscated to the State. By the provisions of this ordinance, it was made the duty of persons owing such debts to report them under oath to the Auditor of Public Accounts within sixty days from the passage of the ordinance. Failing to do this, or making a false report, they were subject to a heavy pecuniary fine and

imprisonment in the penitentiary. Persons throughout the State were required to give information of delinquencies, and judges were required to give the matter specially in charge to grand juries at each term of the Circuit Court.

The Governor was authorized to call out the military force, and two millions of dollars in bonds were ordered to be issued in sums of five dollars and upwards.

The first movement after the secession of the State, was to get possession of the property of the United States. The United States arsenal, located at Little Rock, became the first object for seizure. On the morning of February 5th, that city was thrown into high excitement by the unexpected arrival of a steamboat with a body of troops from Helena, with the avowed purpose of taking the arsenal. In a few hours another boat arrived with more troops, and on the next day others arrived, until a force of four hundred men was collected. The City Council was assembled, and on application to the Governor, it was informed that the troops were not there by his orders. The troops themselves were of a different opinion, and came there, as they thought, at his command; but whether so or not, they were there to take the arsenal, and they determined to accomplish that object before leaving. The Governor was then requested to assume the responsibility of the movement, and in the name of the State to demand the arsenal of the officer in command of it. It was believed that Captain Totten would surrender to the authorities of the State rather than have a collision, but would not to a body of men disavowed by the Governor and acting in violation of law, and that as the troops were determined on taking the arsenal at all hazards, there would of course be a collision, and probably much sacrifice of life. Consequently, the Governor consented to act, and immediately made a formal demand upon Capt. Totten.

To the Governor's demand for the surrender of the arsenal, Capt. Totten asked until three o'clock the next day to consider the matter, which was agreed to. At the time appointed, Capt. Totten made known his readiness to evacuate the arsenal, and, after the details were finally agreed upon, it was arranged that, at twelve o'clock the next day, the arsenal should be delivered to the authorities of the State, which was done.

About the same time, the public property at Fort Smith was seized in behalf of the State. (See FORRS.)

On the 18th of May, Arkansas was admitted as one of the Confederate States, and her delegates took their seats in Congress. They were R. W. Johnson, A. Rust, A. W. Garland, W. H. Watkins, and W. F. Thomason.

The military operations within the limits of the State during the year were fruitless in results. A difficulty early occurred between the Governor and Legislature on one side, and the State Convention on the other. It was charged upon the latter body that they had

overstepped their authority in an attempt to regulate the military affairs of the State by the appointment of a Military Board. The Governor, in his message to the Legislature at its session in November, said, that on the 10th of May, Gen. McCulloch was put in command of the Indian Territory west of Arkansas, and had with him two regiments, one from Louisiana and one from Arkansas. Before he could prepare for any offensive operations, Gen. Lyon, in pursuit of Jackson, approached near the south boundary line of Missouri, and the Military Board of Arkansas called out ten regiments for defensive purposes. On the 21st of June the Board despatched a messenger to Richmond, proposing to transfer the entire State force, with their arms, to the Confederate Government, making a condition precedent, however, that the arms were to be used for the protection of Arkansas. The Secretary of State was willing to receive the men and arms, but would make no promise as to their future disposition, and so the transfer was not then effected.

On the 4th of July the effort was again essayed, one of the members of the Board visiting Gen. Hardee, then recently appointed to the command of the northern border of Arkansas, and an agreement was made whereby a vote should be taken among the Arkansas troops, and if a majority of each company consented to be transferred, those consenting were to be turned over as a company; if, however, a majority declined, the company was to be disbanded altogether. One company of General Yell's division disbanded, and two or three hundred others, "from various motives, returned home." This was from the eastern division of the army.

The western division, under Gen. Pearce, however, was not so easily transferred. After the battle of Springfield, the Military Board despatched an agent to General Pearce to turn over his troops to Gen. Hardee. The agent proposed to submit the question of the transfer, but Gen. Pearce became angry, and refused to allow it to be done, following this insubordinate conduct up by writing a most abusive letter to the Board. Not content with this, Gen. Pearce separated his troops from McCulloch's command, and marched them back to Arkansas, where they were informally disbanded and sent home. Gov. Rector says, that without General Pearce's command, "General McCulloch was left too weak for any thing but passive inaction."

As soon as Gen. Pearce's return to Arkansas was known, the Military Board, fearing a disbandment, directed him to suspend all action in reference to the transfer, but the despatches were received too late, and only "in time to stay the waste of public property scattered in all directions."

His narrative showed that the Arkansas forces, claimed to be twenty-two thousand in number, were in a complete state of demoralization at that time.

On the subject of the increase of the army, the Governor suggested the following method:—"It is probable that the troops now in the field will meet present emergencies, whilst it may be safely calculated that a much larger number will have to go into service before spring. I beg to recommend that the executive authorities be authorized to organize two 'class regiments,' one of Germans and their immediate descendants, and another of Irish and their descendants. . . . These people, though brave and patriotic, have been deterred from entering the army mainly because for them there was little chance for promotion. . . . If I should be mistaken, however, in the causes that have deterred them, and it is found to proceed from a lack of inclination, then authority ought to be given to draft a regiment from each class. It is not a wise or just Government which, in a war like this, taxes native blood and energy alone, leaving the foreign-born at home, reaping the fruits of dear-bought victories."

The forces of the State in the field, at the time when the greatest number were in active service, were as follows:—

In Virginia, two regiments of infantry, one thousand strong each	2,000
Under Hardee, in regiments	6,000
Under McCulloch, in regiments	6,000
Seven new regiments just organized, and under marching orders	6,000
Independent companies and battalions of artillery and cavalry with Hardee and McCulloch	1,500
Total Arkansas force	21,500

The entire vote of the State at the Presidential election in November, was 54,063; consequently over one-third of the amount of her vote was in the field. The number of twelve-months men that entered the Confederate service from the State is stated at thirteen regiments. As late as October, all the pay which the troops had received was in Arkansas war bonds, and much murmuring existed among the soldiers, owing to the worthlessness of the bonds. Even as far back as June, some of the troops furnished by the State were very poorly equipped. Col. Hindman, writing to the Military Board about June 10th, says:—"I telegraphed you that the men of my regiment were without blankets and shoes, and requested you to allow me to apply to their benefit the proceeds of the sugar now in store which I seized from the Cincinnati steamboats, and turned over to the civil authorities before Arkansas seceded."

The expenditures of the State for military purposes, previous to the 6th of November, amounted to \$1,041,603. Thirty-seven thousand dollars of this sum were spent in the capture of the arsenal at Little Rock, and the post at Fort Smith, and the stores at Pine Bluff and Napoleon, before the State seceded. Apart from the regiments furnished to the Confederate army by the State, the stores and men supplied, at various times, to Gen. Sterling Price,

to enable him to maintain a foothold in Missouri, and thereby prevent the approach of the Federal forces into Arkansas, were the most important debts of her authorities and citizens.

The internal condition of the State was very far from being satisfactory to the authorities or to the people. On the 12th of June, several negroes were arrested in Monroe County, thirty miles west of Helena, upon a charge of attempted insurrection. Two men and one girl were hung. The plot was to murder the white male inhabitants, and to spare the women and children, if they did not resist.

The great cause of uneasiness, however, was the Union sentiment which was known to exist in the State. Of the fifty-four thousand votes polled at the Presidential election in November, 1860, over twenty thousand were given for the candidate whose platform was "the Constitution and the Union." In the State Convention, previous to April 15th, the secession party were not strong enough to pass an ordinance of separation, and were forced to compromise with the opposition. Even as late as December, 1861, within one week, a member of the Legislature of Arkansas, and forty other citizens of the State, came to Rolla, in Missouri, where thirty-five joined a regiment of Missouri troops. They represented that a surprising degree of loyalty to the Federal Government still existed in the northern part of the State.

The Governor, in his Message to the Legislature, at its session on the first Monday of November, alludes to the existence of "treason in the State," without stating any details. These were well known. On the 29th of October, twenty-seven persons were brought to Little Rock as members of a secret Union organization in Van Buren County. They were placed in jail to be brought to trial by the civil authority. At this time many others were also taken. It was publicly stated that they formed a regular organization, called a "Peace and Constitutional Society;" that there were 700 members in Searcy, Van Buren, Newton, and Izard Counties, and 1,700 in the whole State; that they had a regular system of signs and passwords, and were furnished with supplies of money. The Constitution made it obligatory upon every member to hazard his life in aid of another in distress, and the penalty of exposing any of the secrets of the organization was death. Those who were taken, were reported to have been well supplied with arms, and the others were supposed to be equally well equipped. The disaffection of the people in that section of the State was made known to the authorities by Gen. Burgevin, and the names of citizens given.

On the 23d of November, it was determined that, after a campaign of sixty days in Kansas and Missouri, Gen. McCulloch should fall back into Arkansas. Preparations were therefore made to accommodate five thousand army horses, and a number of mules, near Fort Smith Valley. A hundred thousand bushels of corn,

and three thousand seven hundred and fifty tons of hay, were procured for their forage. As this valley had been largely drawn upon during the summer and fall months of the year, it was feared that the encampment of such a large number of men and animals as composed McCulloch's force might distress the inhabitants. The campaign in Kansas was not carried out, and early in the spring Gen. McCulloch was driven out by the Federal force.

ARMY OF THE UNITED STATES. At the time of the attack on Fort Sumter, the entire military force at the disposal of the Government was 16,006 regulars. They were principally employed in the West to hold in check marauding Indians. It has always been the policy of the Government to maintain the army at the lowest number of privates which was practicable consistent with the interests of the country, and to rely upon volunteers whenever any emergency should arise. The effect of this policy was to place the forts and arsenals in seceding States in such a condition as to be entirely unprepared to make any defence when assaulted, even by armed citizens disposed to seize them. The nucleus of an army was always preserved by the education of officers at the military institution at West Point. The wisdom of this policy is now more severely tested than ever before.

The call of the President for troops for three months, in his proclamation of April 15th, asked for 75,000 men. This call amounted, in the aggregate, to ninety-four regiments, making 73,391, officers and men. Of the States called upon, the Governors of Virginia, North Carolina, Tennessee, Arkansas, Kentucky, and Missouri peremptorily refused to comply with the requirements made by the War Department. All the other non-seceding States promptly furnished the number required of them, except Maryland, whose Governor was prevented from so doing by the outbreak at Baltimore. The quota for each State under this call was as follows:

Maine.....	1	780	Virginia.....	3	2,340
New Hampshire	1	780	North Carolina.	2	1,560
Vermont.....	1	780	Kentucky.....	4	3,123
Massachusetts.	2	1,560	Arkansas.....	1	780
Rhode Island..	1	780	Missouri.....	4	3,123
Connecticut...	1	780	Ohio.....	13	10,153
New York.....	17	13,280	Indiana.....	6	4,683
New Jersey...	4	3,123	Illinois.....	6	4,683
Pennsylvania.	16	12,500	Michigan.....	1	780
Delaware.....	1	780	Iowa.....	1	780
Tennessee.....	2	1,560	Minnesota....	1	780
Maryland.....	4	3,123	Wisconsin....	1	780

The remainder, to constitute the 75,000 men, was composed of troops in the District of Columbia.

Notwithstanding the positive refusal of the Governors of Virginia and Missouri to coöperate with the Government, patriotic citizens voluntarily united together and organized regiments for the Government service. Virginia furnished a regiment, and Missouri raised a force of 11,445, officers and men, making in round

numbers twelve organized regiments. The citizens of the District of Columbia furnished no less than 2,813, officers and men, making in all four regiments. It was ordered that each regiment should consist of an aggregate of 780, officers and men. This was at a future day changed. Under the above-mentioned call the Government received, and had in service on the 1st of July, 77,875 men. These troops were infantry or riflemen.

On the 4th of May a second proclamation was issued by the President, calling for volunteers to serve during the war. So patriotic and enthusiastic were the people in favor of preserving the Union, that, under this call, two hundred and eight regiments had been accepted by July 1st. A number of other regiments were also accepted, on condition of being ready to be mustered into service within a specified time. All of those regiments accepted under this call were infantry and riflemen, with the exception of two battalions of artillery and four regiments of cavalry. Many regiments, mustered as infantry, had attached to them one or more artillery companies; and there were also some regiments partly made up of companies of cavalry. Of the two hundred and eight regiments above mentioned, one hundred and fifty-three were in active service on the 1st of July, and the remaining fifty-five within twenty days afterwards.

The total force in the field on July 1st, was computed as follows:—

Regulars and volunteers for three months and for the war.....	232,875
Add to this 55 regiments of volunteers for the war, accepted and not then in service.....	50,000
Add new regiments of regular army.....	25,000
	<hr/> 75,000
Total force at command of Government.....	307,875
Deduct the three-months volunteers.....	77,875
Force for service after the withdrawal of the three-months men.....	<hr/> 230,000

Of this force, 188,000 men were volunteers, and 42,000 men computed for the regular army.

The proclamation of the President of May 4th also called for an increase of the regular army. This increase consisted of one regiment of cavalry of twelve companies, numbering, in the maximum aggregate, 1,189, officers and men; one regiment of artillery of twelve batteries, of six pieces each, numbering, in the maximum aggregate, 1,909, officers and men; nine regiments of infantry, each regiment containing three battalions of eight companies each, numbering, in the maximum aggregate, 2,452, officers and men, making a maximum increase of infantry of 22,068, officers and men.

The system adopted for the organization of the volunteers was different from the one which had existed in the regular army. The French regimental system of three battalions to a regiment was adopted.

The appropriations asked of Congress at its

extra session in July for the support of the army, were as follows:—

Quartermaster's Department.....	\$70,289,200	21
Subsistence Department.....	27,278,781	50
Ordnance Department.....	7,468,172	00
Pay Department.....	67,845,402	48
Adjutant-General's Department.....	408,000	00
Engineer Department.....	685,000	00
Topographical Engineer Department.....	50,000	00
Surgeon-General's Department.....	1,271,841	00
Due States which have made advances for troops.....	10,000,000	00
Total.....	185,296,397	19

By an act of Congress of July 22d, the States were asked to furnish 500,000 volunteers to serve for three years, or during the war; and by an act approved July 29th, the addition of 25,000 men to the regular army was authorized. At the same session, five hundred millions of dollars were appropriated for the support of the army.

The enlistment and organization of troops were entered upon with great activity and warm popular approbation during the ensuing three months, when it was restricted. Many circumstances aided the enlistment. The cause of the Union was approved by every one; a general stagnation or inactivity pervaded all industrial pursuits, and multitudes were partially or wholly unemployed, and the wages offered to the soldier were extremely liberal. The pay offered to privates by the United States was \$13 per month, and a bounty of 100 acres of land at the close of the war. In addition, many of the States gave to each married citizen volunteer about one dollar per week for his wife, and in proportion for each child of his family between certain ages. Where such a sum was not given to the family of the private by the State, it was in numerous instances bestowed by the city or town in which he lived.

The clothing furnished to the private by the Government, is one uniform hat each year, price \$1; one forage cap each year, price 57 cents; one uniform coat each year, price \$6 56; three pair of trowsers the first year, two the second, and three the third, price \$2 82 per pair; two sack coats each year, price each \$2 10; three flannel shirts each year, price 90 cents each; one overcoat in five years, price \$6 40; three pairs of drawers the first year, two every other year, price 71 cents each pair; four pair of brogans each year, price \$2 20 per pair; two blankets in five years, price \$2 44 each.

A variety of other articles are supplied, but these are the chief. To encourage economy and cleanliness among the troops, every article not drawn according to the allowance will be paid for to the soldier.

For the ration, or amount and variety of food furnished to privates by the Government, *see* RATION.

The pay of officers was on an equally liberal scale; and civilians in profitable, social positions, as well as those in no position, aspired,

in the rawest state, to obtain the rank of officers. Too many unworthy persons were successful. It cost the Government millions, and required the efforts of all the military skill in the country to bring the accumulated mass up to the discipline and order of an approved army.

On the 1st of December, the entire strength of the army, both volunteers and regulars, was estimated as follows:—

		Volunteers for the War.
California.....		4,608
Connecticut.....		12,400
Delaware.....		2,000
Illinois.....		80,000
Indiana.....		57,332
Iowa.....		19,800
Kentucky.....		15,000
Maine.....		14,239
Maryland.....		7,000
Massachusetts.....		26,760
Michigan.....		28,550
Minnesota.....		4,160
Missouri.....		22,130
New Hampshire.....		9,600
New Jersey.....		9,342
New York.....		109,200
Ohio.....		81,205
Pennsylvania.....		94,760
Rhode Island.....		5,898
Vermont.....		8,000
Virginia.....		12,000
Wisconsin.....		14,153
Kansas.....		5,000
Colorado.....		1,000
Nebraska.....		2,500
Nevada.....		1,000
New Mexico.....		1,000
District of Columbia.....		1,000
		640,627
Estimated strength of the regular army, including the new enlistments under act of Congress of July 29, 1861.....		20,334
Total.....		660,971

This estimate, which was prepared at the War Department, as representing the force of the army, varied unquestionably from the amount of troops in the field. It was not to be expected that the precise force could be stated with strict accuracy while the enlistment was not closed. The quota of New York in the field was about the amount stated; the same was the case with the force assigned to other States.

The several arms of the service were estimated as follows:—

	Volunteers.	Regulars.	Aggregate.
Infantry.....	557,208	11,175	568,383
Cavalry.....	54,654	4,744	59,398
Artillery.....	20,380	4,308	24,688
Rifles and Sharpshooters.....	8,395	8,395
Engineers.....	107	107
	640,637	20,334	660,971

The appropriation asked for to sustain the army, by the Secretary of War, on the 1st of December, was \$360,159,986.

The appropriation was computed for a force

of 500,000 men. Some portion was to cover deficiencies arising from an excess of force in the field over the estimate for the previous six months.

The great mass of this force was calculated to operate in Virginia and in the West. Detachments were engaged elsewhere. That portion engaged in Virginia it was expected to subsist by supplies drawn chiefly from the cities of New York and Baltimore. That portion in the West would be supplied from St. Louis and the cities on the Ohio River. It is not possible to obtain the details of stores required for a military force until a campaign has closed, and the accounts of an army are made up by the respective officers. Some facts representing the unparalleled magnitude of these operations are of interest. At the very extensive warehouses occupied by the Government at Washington, there were on hand, on the 12th of October, an amount of stores represented by the following figures:

Pork, 3,000 barrels; beef, 6,000 barrels; beef tongues, 200 barrels; bacon, 800,000 pounds; hams, 50,000 pounds; flour, 11,000 barrels; hard bread, 3,000,000 pounds; beans, 4,000 bushels; rice, 1,000 pounds; hominy, 10,000 pounds; riced barley, 20,000 pounds; green coffee, 20,000 pounds; ground coffee, 40,000 pounds; tea, 1,000 pounds; sugar, 2,000,000 pounds; vinegar, 70,000 gallons; candles, 40,000 pounds; soap, 200,000 pounds; salt, 40,000 bushels; desiccated potatoes, 2,000 pounds; desiccated mixed vegetables, 17,000 pounds; pickles, 278 kegs; dried apples, 50,000 pounds; split peas, 4,000 bushels; molasses, 6,000 gallons; potatoes, 4,000 bushels.

The receipts at these warehouses, for the week ending the 12th of October, were as follows:

1,000 barrels of pork; 2,000 barrels of beef; 1,850 barrels of tongues; 76,000 pounds of bacon; 300 barrels flour; 850,000 pounds hard bread; 3,500 bushels beans; 34,000 pounds rice; 500 bushels hominy; 20,000 pounds riced barley; 150,000 pounds roasted and ground coffee; 100,000 pounds green coffee; 2,000 pounds tea; 750,000 pounds sugar; 9,000 gallons vinegar; 34,000 pounds candles; 80,000 pounds soap; 8,000 pounds desiccated potatoes; 10,000 pounds mixed vegetables; 30,000 pounds dried apples; 1,000 bushels split peas; 3,000 bushels potatoes; 5,000 gallons molasses.

For the previous three weeks the issues had been about equal to the receipts.

The following shows the prices paid by the Government for the specified articles:

Pork, \$19 per barrel; beef, \$15 per barrel; beef tongues, \$16 per barrel; bacon, 10 cents per pound; hams, 12 cents per pound; flour, \$7 50 per barrel; hard bread, 4 cents per pound; beans, \$2 per bushel; rice, 7 cents per pound; hominy, 2½ cents per pound; riced barley, 4½ cents per pound; ground coffee, 20 cents per pound; green coffee, 14 cents per pound; tea, 50 cents per pound; sugar, 8½

cents per pound; vinegar, 12½ cents per gallons; candles, 26 cents per pound; soap, 6 cents per pound; salt, 5 cents per pound; desiccated potatoes, 11 cents per pound; desiccated mixed vegetables, 24 cents per pound; pickle, \$3 75 per keg; dried apples, 5½ cents per pound; split peas, \$2 per bushel; molasses, 32 cents per gallon; potatoes, 60 cents per bushel.

When the necessity of a bakery became apparent, one was constructed in the exterior vaults of the Capitol, under the supervision of Lieut. Cate. From these ovens at least 50,000 loaves were sent out daily, during the winter, to the troops around Washington.

Infantry Arms.—On the commencement of the war the United States Government found itself scantily supplied with small-arms, the armories in the Northern States having been in great part stripped, and the arms removed to the Southern States. (See CONFEDERATE STATES.) The chief dependence for the supply of muskets was upon the Springfield armory and that at Harper's Ferry. The capacity of the few private armories was only a few thousand muskets annually; and on the destruction of the arsenal and armory at Harper's Ferry on the 19th of April, 1861, together with 15,000 muskets, to prevent their falling into the hands of the Confederates, the resources of the Government were seriously diminished. It was, no doubt, the want of arms that limited the call of the President for volunteers, on the 15th of April, to 75,000 men; and until muskets could be imported from Europe many regiments were detained in their camps in the different States. Orders were sent abroad by the Governors of States, and many arms were imported at high prices, although inferior, most of them very much so, to those of American manufacture. The Springfield armory, the capacity of which was rated at only about 25,000 muskets annually, was enlarged as rapidly as possible, and its production, assisted by outside machine shops, was brought up at the close of the year to about 8,000 muskets per month, and has since been increased to about 15,000 a month. These are rifled with three grooves, making one-half turn in the length of a barrel of 40 inches. The bore is 0.58 inch in diameter, and the projectile used is a hollow base cylindro-conical shot of lead. Including the bayonet, ramrod, and other appendages, the number of pieces belonging to the musket are 84 in number, 26 of which are of steel, 2 of wood, and the remainder of iron. All of them are made by machinery, and in all the guns the corresponding pieces are so precisely alike that they may be used indiscriminately, and, in case of damage, the injured parts may be replaced without any difficulty as to their fitting. By this system, which is purely American, the arms are made of uniform excellence, and are unsurpassed by any produced by the best armories in Europe. Their estimated cost, from the official reports, is \$13 25 each for the gun alone, and

\$1 68 for appendages, making a total of \$14 93. This, however, allows nothing for the general expenses, as salaries, interest upon the heavy cost of the establishments, etc. The barrels are made of the best kind of wrought-iron bars, each 14 inches long, $5\frac{3}{8}$ inches wide, and $\frac{9}{16}$ of an inch thick. These are rolled with bevelled edges, so as to make a perfect joint when they are turned over to form a tube. This is effected by passing them at a high heat through a succession of grooves in the curving rolls, each groove gradually bringing the bar nearer to the cylindrical form. The edges are brought together and welded in a machine, which also elongates the barrel. The machine is provided with 8 grooves, of decreasing sizes, through which the barrel is passed in succession, being kept in shape by a mandrel thrust through the barrel, and changed for a smaller one with each decreasing groove. After this, the barrel, without a mandrel rod, is passed through the finishing groove twice, to render it smooth and cylindrical. The straightening, which is the next operation, is effected in large dies of the same length as the barrel, into which this is gradually forced by the pressure given by an eccentric movement. The next operation is what is called coneseating, which is fixing and welding the seat for the nipple for a percussion cap. This is done by the action of tilt hammers. The polishing of the barrel is done by emery wheels, run by steam or water power. The manufacture of the nipples is one of the most difficult parts of the work, as the steel of which they are made has to be brought to the exact degree of hardness by tempering, adapted for receiving the concussion of the hammer without being either broken or flattened by the blow—the former effect resulting from too great, and the latter from too little hardness. The locks are extremely simple in their construction, while at the same time they are of the greatest efficiency. They contain but two springs, which are made of the best English cast steel. The other parts are of the best Norway iron, costing sometimes to import \$215 per ton. The lock-plate, like most of the smaller pieces of the gun—as the guards, triggers, etc.—is cut out at once of proper shape in a die, and the finishing is effected by a chisel, the movements of which are exactly regulated by machinery to the shape of the piece, so that it is not even necessary to use the file. The stocks are made of black walnut, well seasoned, and sawed into blocks, with rectangular edges, of the general shape of the stock. The shaping of them, and excavating the grooves for the barrel and ramrod, the screw-holes, and the receptacles for the lock and butt-plate, are all effected by machines of extraordinary ingenuity, developed from the principle of the lathe invented several years ago by Mr. Thomas Blanchard, of Massachusetts. Of these machines, some of which are also employed in shaping the outside of the barrel, as many as thirteen, each having its separate work to perform, are required for the completion of

the gun. An exact pattern in iron of the object to be produced regulates in its rotation the action of the cutters, planes, drills, etc., which excavate in the block depressions corresponding precisely to those of the pattern. The operation of the machines is wonderfully rapid, and so exact that the lock, mountings, etc., are found to fit precisely in their places, with their edges exactly flush with the wood. These machines are among the most expensive of those employed in the gun manufacture. All parts of the gun are subjected to rigid tests of gauge and inspection throughout the different processes, and the barrels are twice proved by firing with 360 and 240 grs. of powder, with an ovate ball double the weight of the service ball. Only about one gun in 100 or 150 is injured. The service charge is 60 grs. of powder, and the conoidal bullet weighs 500 grs. The final process for completing the gun is the rifling. The bayonets and ramrods also are made of the best English cast steel, and especial care is taken to give the former the exact temper adapted to them.

Similar rifles have been supplied to the Government for many years from the Whitney Armory, near New Haven, and other private establishments. Of the foreign arms imported the best are the Enfield rifles, made at the Government armory at Enfield, England, upon the same system as the American rifle, and with machinery, the models of which were obtained from the Springfield armory. In size these differ little from the Springfield muskets. The barrel is 3 ft. 3 in. long, and its bore of precisely 0.5777 inch. It weighs 4 lbs. 2 oz., and the whole piece, with the bayonet, 9 lbs. 3 oz. The bullet is of pure lead, compressed in dies, and is 1.05 inch long and 0.55 inch diameter; weighs 520 grains. The rifles are sighted to 900 yards. Many arms have also been imported from Prussia, of the kind known by the Germans as *Zündnadelgewehr*, or darting needle guns, with which all the armies of Prussia are armed. It is a peculiar breech-loading rifle, having a slide for the reception of the cartridge, which is introduced on its upper side when this slide is drawn out from the breech end of the barrel by its stout handle. It is then pushed forward into the barrel, and is secured by a catch. The firing is effected by the sudden release of a steel needle, which enters through a hole in the centre of the rear end of the slide, and, passing through the powder, strikes a fulminating composition contained in the base of the conical bullet. This rifle has found little favor with the American War Department, and all the muskets have been altered to muzzle-loading and percussion locks. The objections are: the liability of the pieces to become foul, in which state they are difficult to charge; and of the cartridges to explode in store, from their containing both the powder and the detonating compound. Breech-loading arms, of which a great variety have been invented, are not approved for general use so highly as the old

form; and the United States Government, in their contracts for muskets made with private parties, in 1861, requires that all shall be made of the Springfield pattern, with all their parts interchangeable with these.

The impending danger of a foreign war near the close of the year, together with the urgent necessities of the country, rendered it the part of prudence for the Government to adopt extraordinary measures for receiving supplies of arms. Every year the waste by loss and deterioration is estimated at 33 per cent. of all in use; and with European Governments it is found expedient to keep the arsenals stocked with at least as many as are in the hands of the army. Consequently the War Department at that time issued proposals for the manufacture of large numbers of muskets in separate contracts of 25,000, 30,000, 50,000, etc., each, as well to meet immediate demands as to be prepared for extraordinary and unforeseen future emergencies. The consequence of this will soon be the establishment of private armories adequate to the supply of all the arms that can be required for the country. The price of these is \$20 each, the minimum sum offered in response to previous proposals presented by the Government. The price paid for the inferior foreign arms imported has varied from \$5 to \$30 each, the low rates being for old smooth-bore muskets of the Prussian and Austrian service, and the higher prices for Enfield rifles. Most of these have been altered to bring them to the great simplicity and efficiency of the American arms. The Maynard, or percussion tape primer, has been dispensed with, and percussion caps are exclusively used. The only arms furnished to the infantry are the simple musket and bayonet, with cartridges prepared for service at the armories.

A few companies of sharp-shooters have been furnished with revolver rifles of superior construction, fitted with telescopic sights adapted for execution at long distances. Colt's and Sharp's rifles are selected for this purpose. The former are manufactured at the great establishment of the late Col. Colt, at Hartford, which is unsurpassed in extent and in the perfection of its machinery, and has a capacity to furnish more than 1,000 firearms, including rifles, carbines, and pistols, per day. The principle of Colt's revolvers is well understood to consist in a revolving breech of 6 chambers, which are brought in turn in line with the barrel by each successive working of the lock. Sharp's rifle is a breech-loading and self-priming piece, the barrel made of cast steel bored out. The breech is secured by a sliding cut-off or block of metal, which being drawn down by the guard to which it is attached, exposes a cavity on the upper side extending into the barrel. The cartridge is laid into this, and its rear end is cut off by the edge of the block on pushing this up to its place. The escape of the gases is prevented by a ring, so fitted in the face of the slide and against the end of the barrel, that

when the discharge takes place, this ring is forced closely against the barrel. Flat disks of copper, containing percussion powder, are used for priming, one being shoved forward upon the nipple by the movement of the lock, or percussion caps are used if preferred. The rifle was invented by Mr. C. Sharp, of Philadelphia, about the year 1852, and has been manufactured, together with pistols of a similar construction, upon an extensive scale, in the works of C. Sharp & Co., near Fairmount, Phila. The principal establishment for their manufacture at present is that of the "Sharp's Rifle Manufacturing Co.," at Hartford, Conn. All the materials used in their manufacture are made in the buildings, even to the screws that fasten the parts together.

Cavalry.—The fire-arms furnished the U. S. cavalry are of no regular pattern. They consist of a revolver, carbine, and pistols, the varieties of which supplied by private armories are very numerous, and soon after the commencement of the war the productions of these were altogether monopolized by the U. S. Government.

The carbine is a weapon intermediate between the rifle and pistol in weight and length, is usually breech-loading, and is sometimes furnished with a bayonet in the form of a sword. This has also an ordinary handle, and is carried as a side-arm, for which purpose it is well adapted, having a curved cutting edge as well as a sharp point. Those in common use, and which have been favorably reported upon by boards of officers, are Burnside's, Sharp's, and Maynard's. They are of steel barrels, which taper uniformly from breech to muzzle. The first, invented by Gen. A. E. Burnside, was formerly manufactured at Bristol, R. I., and is now made by Charles Jackson, at Providence, R. I. The chamber of this carbine opens by turning on a hinge; the cartridge is introduced with its case of sheet-brass, which in the explosion packs the joint, and prevents the escape of the gas. This arm is recommended on account of its strength, its perfectly tight joint, and water-proof cartridges; but it is objected to on account of its cost, and the difficulty of obtaining the cartridges. Sharp's carbines, made by the "Sharp's Rifle Manufacturing Company," Hartford, Conn., is like the rifle already described. Maynard's carbine, manufactured by the Maynard's Arms Co., Washington, D. C., has a fixed chambered piece, with the joint closed by a metallic cartridge case. Carbines, pistols, and muskets are manufactured to considerable extent for the army, at the works of Messrs. Remington, at Ilion, Herkimer Co., N. Y. Of the repeating pistols issued to the cavalry and to the light artillery, the following are among the most popular: Colt's; Savage's, made at Middletown, Conn.; Smith & Wesson's, made at Springfield, Mass.; Warner's, at New Haven, Conn.; and Allen's, at Worcester, Mass. Savage's pistol, which is a six-

barrel revolver, is constructed with a view of obviating the objection to most self-cocking pistols, of the aim being disturbed by the cocking movement. This is effected by the introduction of a double trigger, one part fitted for the middle finger, and the other for the forefinger of the right hand. As the first is pressed the hammer comes up, and a fresh chamber turns to its place. As the pressure is slackened, the cylinder springs forward, making a close connection with the barrel; when the aim is secured and the piece is fired by pressing the other trigger with the forefinger. The pistol is provided with two sights, and its size and length are such that, in the hands of a good marksman, it should prove a formidable weapon, even at 150 yards. The other pistols named, all have a revolving cylinder with several chambers. The cartridge employed is a copper cap, resembling a percussion-cap, exactly fitted to enter the open breech end of the chamber. At the close end it is enlarged by a flange, which affords a thin annular receptacle for the percussion priming, and at the same time prevents the cap from passing into the bore. In the base of the cap is placed the charge of powder, and over this, as a stopple, a Minié bullet, the pointed end of which projects out like the end of a cork from a phial. Different devices are adopted for releasing the cylinder, so that the cartridges may be introduced into the ends of the chambers. In Smith & Wesson's pistol, the barrel is hinged upon the stock, so as to be easily turned at right angles, thus making room for the cylinder to be slipped off the spindle upon which it revolves. It is then easily freed of the remains of the old cartridge cases, and new ones are introduced. In Allen's pistol the barrel is fixed, and the cylinder is slipped out to one side. In Warner's, too, the barrel is stationary, and the cylinder can be removed sidewise for cleaning, or it may be charged through an opening in the side of the stock. In discharging the pistol, the blow of the hammer is directly against the close end of the cartridge, driving its edge in upon the percussion powder. The explosive effect backward of the powder is, in some of the larger pieces, resisted by a fixed guard against the end of the barrel, leaving room only for the thin flange, and a slit through this guard admits a thin projecting portion of the hammer to strike the cap. These cartridges have the advantage of extreme portability, being carried even in the vest pocket; and being made perfectly tight by the close fit of the bullet stopple, they are always preserved dry, and are exceedingly convenient, as requiring no preparation nor even priming.

Artillery.—All the ordnance used by the United States Army for land service, is furnished by private armories in different parts of the country, and of the following kinds and calibres of cannon, as given in the "Ordnance Manual." There have been some recent modifications introduced in the new steel guns of

Mr. Wiard, and in the Parrott gun, both of which will be described below :

Kind of Ordnance.	Calibre.	Material.	Weight.	Weight of Round Shot.	
				lbs.	lbs.
GUNS.	6-pounder.	Bronze.	884	6.10	8.24
	12-pounder.		1,757	12.25	13.45
	18-pounder.	Iron.	3,590	18.30	16.80
	24-pounder.		4,913	24.30	22.10
HOWITZERS.	32-pounder.	Bronze.	7,200	32.40	31.80
	42-pounder.		8,465	42.60	42.50
	12-pounder.	Iron.	220	12.25	12.25
	24-pounder.		788	24.30	24.30
COLUMBIADS.	32-pounder.	Bronze.	1,918	32.40	32.40
	8-inch.		1,920	65.00	65.00
	24-pounder.	Iron.	2,614	24.30	24.30
	8-inch.		1,476	65.00	65.00
MORTARS.	10-inch.	Bronze.	9,500	127.50	101.67
	8-inch.		9,240	65.00	49.75
	16-inch.	Iron.	15,400	127.50	101.67
	8-inch.		8,900	44.12	44.12
MORTARS.	10-inch.	Bronze.	1,852	68.42	68.42
	16-inch.		5,773	107.30	107.30
	13-inch.	Iron.	11,500	107.30	107.30
	16-inch.		1,500	107.30	107.30
EPROUVETTE.	24-pounder.	Bronze.	1,664	107.30	107.30
	34-pounder.		220	107.30	107.30

Large columbiads of 12 and 15-inch diameter of bore are exceptional pieces, one of each of which only have been cast for trial. The cannon designated by this name were invented by Col. Bumford, U. S. A., and are recognized by their uniformly decreasing diameter from the breech to the muzzle. They are used for throwing solid shot or shells; and when mounted in barbette, their vertical range is from 5° depression to 39° elevation, around a complete horizontal circle. They are now made with a uniform bore; but were originally chambered. The 15-inch columbiad, now at Fortress Monroe, known as the Union or Rodman gun, was cast by Knapp, Rudd & Co., at Pittsburg, under the directions of Capt. T. J. Rodman, of the Ordnance Corps, who conceived the design of cooling the piece, cast hollow, by the introduction of a current of water flowing through the core, thus securing a uniform texture and maximum strength throughout. The dimensions of this great gun are as follows :

Total length.....	190 inches.
Length of calibre of bore.....	156 "
Length of ellipsoidal chamber.....	9 "
Total length of bore.....	165 "
Maximum exterior diameter.....	48 "
Distance between rimbases.....	48 "
Diameter at muzzle.....	25 "
Thickness of metal behind the chamber.....	25 "
Thickness at junction of bore with chamber.....	16 1/2 "
Thickness at muzzle.....	5 "
Diameter of shell.....	14.9 "
Weight of gun.....	49,100 lbs.
Weight of shell.....	320 "
Bursting charge.....	17 "

This gun has been fired several times at Fortress Monroe, and is manœuvred with great facility, managed by one sergeant and 6 negroes. The mean range at 6° elevation, of ten shots, was 1,936 yards, and the mean lateral deviation 2.2 yards: the charge was 35 lbs. of 0.6-inch grain powder, and the time of flight 7 seconds. At 10° elevation, with 40 lbs. of powder, the range was 2,700 yards, and time of flight 11.48 seconds. At 28° 35' elevation, the range was 5,730 yards, and time of flight 27 seconds, with very slight lateral deviation, as appeared through a telescope attached to one of the trunnions.

Parrott Gun.—This arm, named for its maker, Mr. R. P. Parrott, agent of the West Point Foundry, at Cold Spring, is perhaps the most effective for its weight as a field-piece and siege gun. The plan of its construction is the same in principle as was proposed by M. Thierry, of France, in 1834, and afterwards somewhat modified by other inventors, as Prof. Treadwell, of Cambridge, Mass., in 1845, Capt. Blakely, of England, in 1855, and others. It first came to be known in 1860, when the State of Virginia was supplied with twelve 10-pounders, and 16 more guns were made in the fall of the same year on an order from the State of Georgia. These, however, were not delivered. During the year 1861 there have been made at this establishment, for the U. S. Government, the following pieces:

Sizes.	No. of pieces.	No. of projectiles.
10-pounders.....	292	71,000
20-pounders.....	153	25,000
30-pounders.....	94	22,000
100-pounders.....	5	1,000

There were also made 115 smooth-bore guns, as 8 and 10-inch columbiads and Dahlgren navy guns, with 30,000 projectiles for these. The Parrott guns are manufactured of the strongest cast-iron, all of which is tested before use, and is required to bear a pressure of 30,000 lbs. upon a square inch. They are cast upright, with the breech down, which portion is thus rendered most dense by the pressure of the liquid iron above. After the pieces have been turned and bored, the breech is strengthened by a broad ring of wrought iron, which is put over it hot, and thus shrunk on so as to appear as of one piece with the gun. This ring is prepared from a bar of iron, 4 inches square and of any required length, which is brought to a

high heat, and is then wrapped around a cylinder of the size of the gun in a continuous coil, the spirals of which are then welded together by hammering. By this method the guns are made of a comparatively cheap material, and by the economical method of casting, while the wrapping of wrought iron secures the additional strength of this material at that portion of the gun only where extreme strength is required. To obtain the same strength with cast iron alone, would greatly increase the thickness and weight of the breech. The Parrott gun weighing 1,100 lbs., is considered stronger than a columbiad or Dahlgren of the same calibre weighing 1,500 lbs. The proportional weight of the powder used to that of the projectile is only $\frac{1}{10}$, while in other heavy guns it is $\frac{1}{4}$ or more. In trials made at Cold Spring with a 100-pounder Parrott gun, using 10 lbs. of powder, a projectile was thrown beyond 6,200 yards, the elevation being 20°; while a columbiad with the same elevation, and using 18 lbs. of powder, threw its projectile only 3,883 yards.

The original projectile for the Parrott gun, known as the Reed projectile, was made with a cast-iron body, furnished with a wrought-iron cup-shaped base opening towards the powder, and secured into the base of the body by being cast in with it. In the explosion the sides of this, being of a malleable material, were pressed out, filling the grooves of the bore. This is now replaced by a projectile entirely of cast iron, around the base of which is a depression of V-shaped section in which a brass ring is loosely fitted. This is forced by the powder, as it explodes, into the grooves, causing the projectile to follow their curve.

Whitworth Gun.—In June, 1861, there arrived in New York, from England, a battery of six Whitworth guns, with 3,000 rounds of ammunition, sent from England as a present to the United States Government, from patriotic Americans in Europe. These guns, which rank among the most efficient in England, are breech-loading, though they may also be loaded from the muzzle. Instead of being rifled the bore is hexagonal, with the angles of the hexagon rounded off, and the effect of rifling is produced by the twist of the sides of the hexagon. The guns are made of what is called homogeneous iron, which is wrought iron melted and cast in moulds, which thus assumes a homogeneous texture and the greatest strength. The projectile is hexagonal, accurately fitted to the bore of the gun with the same twist. It is made of cast iron, unless intended for penetrating hard bodies, as wrought-iron plates, when it is made of homogeneous iron and with a flat head. The charge is $\frac{1}{4}$ the weight of the projectile, and is placed in the bore in a tin cartridge, which remains behind when the gun is fired, and is then removed. The guns sent to the United States are 12-pounders, measuring 7 feet 9 inches in length, with the major axis of the bore 3.1 inches, and minor axis 2.8 inches,

and weighing 8 cwt. The high pitch of the twist, which is one turn in 5 feet, must present a powerful resistance to the exit of the projectile, especially when this is of an unyielding metal, and requires to overcome it the high charge of powder named above. This would seem to endanger the bursting of the piece, but no accidents of this kind appear to have attended the use of such a projectile. The range of the gun is very great, as is shown by the results obtained in trials with a 12-pounder, at Southport, England. At 2° elevation, with 14 lbs. of powder, the projectile was thrown from 1,208 to 1,281 yards; at 5°, from 2,298 to 2,342 yards; and at 10° the average distance was 4,000 yards. The 3-pounder, with 8 oz. charges, threw its projectile at 20°, from 6,300 to 6,800 yards; and at 33°, and 35°, from 9,400 to 9,700 yards, the last exceeding 5½ miles.

Steel Cannon.—The excellent qualities possessed by steel for cannon have long been understood, but the difficulties attending the casting or forging of large masses for this purpose, have been formidable obstacles in the way of this application. Three small pieces were brought to this country during the year, for the city of Philadelphia, made of cast steel at the great works of F. Krupp, at Essen, in Rhenish Prussia. Cast-steel cannon were first manufactured there about 17 years since, and from the trials to which they were subjected, at the arsenal of Vincennes, they were found to be superior to bronze cannon. Three thousand successive shots were made with one of them without any sensible vibration or any degradation in the bore. In the French army it is stated that these guns are now taking the place of the old bronze pieces, which are worth more to melt up than the steel. Other European Governments are also supplying themselves with these guns. The works in which they are produced are of very remarkable character for their extent and appliances. They are situated in close proximity to coal mines, and occupy a space of 1,600 by 1,800 feet. The roofs of the buildings cover 20 acres. The men employed are about 2,500 in number, and the coal consumed is about 200 tons daily. The products, besides cannon, are steamboat and other shafts, railroad axles and tires, and machinery rolls for mints, &c. The steel castings exceed in size any thing of the kind ever known. The largest yet made is of 40 tons weight, but the works are competent to make much heavier ones. A single hammer in use weighs 40 tons. The largest-sized steel cannon, intended for the London exhibition of 1862, was commenced in 1861, and employed in its casting the labor of 1,250 men in pouring the metal into the mould.

Wiard's Steel Cannon.—The first steel cannon produced in the United States was manufactured in June, 1861, from plans devised during the two preceding months, by Mr. Norman Wiard, of New York. It was a 6-pounder,

ready for service on the first of July, and on the 3d of the month mounted upon an improved field carriage, also of his invention; it was tested at Camp Scott, Staten Island, in fulfilment of a contract with Gen. D. E. Sickles, who had ordered 3 batteries, to consist of two 12 and four 6-pounders each. The contract being assumed by the War Department, the batteries were completed and delivered to the Government at Washington. Gen. Fremont next ordered 2 batteries for the department of the West, which, however, were afterwards diverted to the Burnside expedition, which at very short notice was supplied with twenty-four 6 and 12-pounders and two other rifled guns, all of which, up to the time of these sheets going to the press, have been of the most efficient service in the various actions engaged in by this expedition. The governor of Ohio, through the U. S. Ordnance Department, ordered and obtained four 6-gun batteries, which have been in active service in the important campaigns at the West. The guns bear a high reputation as being most accurate, substantial, and effective, and at the same time lighter than other pieces of the same calibre. They are forged under heavy steam hammers from puddled steel blooms, specially made for this purpose at the rolling mills at Troy, N. Y., and Trenton, N. J.; the puddling process being stopped at the point where the carbon expelled gives to the metal a steely character. The weight of the 6-pounders is 700 lbs., and of the 12-pounders 1,200 lbs. each. They are forged solid at the works of Messrs. Tugnot & Dally, New York, and bored by Messrs. Plass & Co. The trunnion bands are shrunk on, and do not affect the strength of the piece in resisting the explosive action. The 6-pounders are of 2.6 inch bore, and the 12-pounders 3.67 inches. The rifling turns to the left once in 9 feet in the 6-pounders, and once in 12 feet in the 12-pounders, the former having 8 and the latter 12 bands and furrows. The projectile preferred is the Hotchkiss. With a 6-pounder, at an elevation of 39°, a flight of 5½ miles has been obtained. The carriages, which are made by Messrs. Stephenson, of New York, are peculiar in the construction of the wheels with iron adjustable hubs and fellow wedges, so that by the aid of a small wrench the wheels can be set up or taken down, and the tire be set, and any shrinking of the wood be compensated for at any time. The corresponding parts of all the wheels in any number of batteries are counterparts of each other and interchangeable. The trail is hung under the axle, which admits of a much greater elevation being given to the piece than is practicable on the standard carriage. The forward portions of every part of the carriage are rounded off, so as to render it more secure against harm when struck by shot in action.

Beside the pieces named, Mr. Wiard has furnished to the United States navy several steel howitzers for boat service, of 3.4 inch calibre,

weighing 860 lbs. each; also 50-pounders of 5.1 inch calibre. These are the largest steel guns yet made in this establishment. Only about one gun in a hundred is found to be defective when tested. The steel is reported by the manufacturers as sustaining a strain of 107,000 to 118,000 lbs. to the square inch, thus showing a tensile strength of 3 to 4 times that of the best iron and bronze.

Mortars are used both for siege and navy service, of several dimensions, as given in the preceding table. The heavy siege mortar, weighing 11,500 lbs., is of 53 inches length, including 13 inches length of chamber, the superior diameter of which is 9.5 inches. When fired at the usual angle of elevation of mortars (45°), its shell weighing 200 lbs., is thrown, with a charge of 20 lbs. of powder, 4,325 yards. The heavy 10-inch mortar, for coast service, throws a 98-lb. shell about the same distance with half the charge of powder. The whole length of this piece is 46 inches, including 10 inches length of chamber. The light 10-inch siege mortar throws a 90-lb. shell, distances varying from 300 to 2,100 yards, according to the charge of powder, which varies from 1 to 4 lbs. The small mortars are also effective at various distances, according to the charge. The stone mortar is used to throw a charge of 120 lbs. of stones with $1\frac{1}{2}$ lb. of powder, to a distance of 150 to 250 yards. Its angle of elevation is 60°.

Shells are hollow shot of cast-iron, charged with sufficient powder to burst them, which is fired by a fuse, introduced through a hole in the shell. They are spherical for mortars and smooth-bore pieces, and generally of elongated form for rifled guns. The spherical-case shot is a thin shell of cast iron, containing, besides the powder for bursting it, a number of musket balls, which are kept in place by pouring in melted sulphur, the powder being in a separate compartment. The leaden balls raise the specific gravity of the shell, till it is about the same as a solid shot, and it will therefore have the same range and velocity. It is intended to be burst by a time fuse, from 50 to 130 yards in front of, and from 15 to 20 feet above the object at which it is fired. Spherical-case shot, thrown from rifled cannon, are said to be effective at over 2,000 yards. The fuse by which shells are fired, is either what is called a time or percussion fuse. The former is a hollow cylinder of paper, wood, or metal, enclosing a burning composition of such length, that the fire shall penetrate to the powder in the required time; or different compositions are used in cases of the same length, and designated by their different colors, as to the time they burn. The fuse is fired by the ignition of the powder by which the shell is thrown. The percussion fuse is a fulminating powder, placed in the cap, which closes the point of the projectile, and it is exploded by the concussion when this strikes the object at which it is thrown. The common safety fuse, such as is used by miners, is not

employed in military service except for exploding mines.

A field-battery on the war establishment consists of four 12-pounders or four 6-pounder guns, and two 24-pounders or 12-pounder howitzers, making 6 pieces. Carriages, including caissons, (ammunition wagons,) spare gun carriages, forges and battery wagons, accompany each battery, together with various implements and equipments, definitely specified in the Ordnance Manual. Each battery wagon and 12-pounder gun carriage is drawn by 6 horses, and each of the other carriages by 4 horses, and $\frac{1}{2}$ of the whole number of these horses is added to spare. The foot artillery carry a sword resembling a Roman sword, with a straight 2-edged blade 19 inches long. The swords and sabres used by the army are mostly made by James J. Ames, Chicopee, Mass. Field-artillery is also manufactured at his establishment.

The foundries for cannon are the South Boston, C. Alger & Co., Boston, Mass.; the West Point, R. P. Parrott, Cold Spring, N. Y.; the Tredegar, J. R. Anderson & Co., Richmond, Va.; the Bellona, J. L. Archer, Black Heath, Va.; and the Pennsylvania, Knapp, Rudd & Co., Pittsburg, Pa. The following are the arsenals for construction of carriages, &c., or repair: Kennebec Arsenal, Augusta, Maine; Watertown Arsenal, Watertown, Mass.; Champlain Arsenal, Vergennes, Vermont; Watervliet Arsenal, West Troy, N. Y.; New York Arsenal, New York; Alleghany Arsenal, Pittsburg, Pa.; Frankford Arsenal, Bridesburg, Pa.; Pikesville Arsenal, Pikesville, Md.; Washington Arsenal, Washington, D. C.; Fort Monroe Arsenal, Old Point Comfort, Va.; North Carolina Arsenal, Fayetteville, N. C.; Charleston Arsenal, Charleston, S. C.; Augusta Arsenal, Augusta, Ga.; Mount Vernon Arsenal, Mount Vernon, Ala.; Appalachiola Arsenal, Chatahoochee, Florida; Baton Rouge Arsenal, Baton Rouge, La.; Little Rock Arsenal, Little Rock, Ark.; St. Louis Arsenal, St. Louis, Mo.; Detroit Arsenal, Dearbornville, Mich.; Benicia Arsenal, Benicia, Cal.; Texas Arsenal, San Antonio, Texas. The following are the armories and arsenals that have remained in possession of the U. S. Government:

Armories and Arsenals.	State.	Commanding Officer.
Kennebec Arsenal.....	Maine.....	—
Springfield Armory.....	Mass.....	Major A. B. Dyer.
Watertown Arsenal.....	Mass.....	Capt. T. J. Rodman.
Champlain Arsenal.....	Vermont.....	—
Watervliet Arsenal.....	New York.....	Major W. A. Thornton.
New York Arsenal.....	New York.....	Maj. R. H. K. Whiteley.
Alleghany Arsenal.....	Penn.....	Col. J. Symington.
Frankford Arsenal.....	Penn.....	Lieut. T. J. Treatwell.
Pikesville Arsenal.....	Maryland.....	—
Washington Arsenal.....	D. C.....	Lt.-Col. G. D. Ramsay.
Fort Monroe Arsenal.....	Virginia.....	Lieut. T. G. Baylor.
St. Louis Arsenal.....	Missouri.....	Capt. F. D. Callender.
Leavenworth Arsenal.....	Kansas.....	Capt. J. McNutt.
Detroit Arsenal.....	Michigan.....	—
Benicia Arsenal.....	California.....	Capt. J. McAllister.

Projectiles.—A variety of projectiles have been devised for rifled guns, and introduced into the service of the army. Those made especially for the Parrott and Whitworth guns have already been noticed. The most promi-

nent at present are the projectiles of the Messrs. Hotchkiss, of Conn., of Mr. Silvanus Sawyer, of Fitchburg, Mass., of Mr. Schenkl, of Boston, and of Hon. C. T. James, of Providence, R. I.

The Hotchkiss projectile is composed of 3 distinct parts, a cast-iron conical head and base, which are tied together by a ring or zone of lead which forms the middle portion, and extends quite through in a sheet of lead between the two end pieces. The effect of the explosion is to crowd the base forward and cause the lead to bulge out round the middle and fill the grooves. This it does very efficiently, and the projectiles, when recovered, are generally found complete with the lead ridged to the full depth and width of the grooves. Sometimes, however, the pieces of the projectile have been torn apart by the explosion. The Sawyer projectile is a cylindro-conoidal shell of cast iron, with a brass cap screwed into the truncated apex of the cone. By this opening the powder is introduced, of which a 12-pounder shell holds 14 oz. Under the brass cap is the percussion powder. The outer surface of the projectile is first tinned over to cause adhesion of the coating of lead, which is next run on to the cylindrical part in a coating, nearly $\frac{1}{4}$ of an inch thick, with 6 ridges upon its surface, adapted to the grooves of the bore of the gun with its same twist. The Schenkl projectile, which is much used by the troops from Mass., is a cast-iron bullet, the greatest diameter of which is about $\frac{1}{2}$ the length from the front end. The posterior portion tapers off, terminating in a truncated apex, and is ridged longitudinally. To bring it up to cylindrical shape, a covering of papier mache is filled in between the ridges and around the cone. The effect of the explosion is to drive this forward and into the grooves of the barrel; and if it should be thrown off soon after it leaves the gun, it does no harm.

James' projectile is a cast-iron cylindrical bullet with a conical head, which may be solid, or for use as a shell, hollow. The cylindrical body, with the exception of a narrow band next the cone and another at the rear end, is $\frac{3}{4}$ of an inch, and the bands $\frac{1}{4}$ of an inch less than the diameter of the bore, (in the case of a 42-pounder;) and from the depressed portion 10 rectangular openings, like the mortices in the hub of a wheel, connect with a central cavity extending in from the rear end. A cylinder of sheet tin is laid round the central portion, and over the tin and around its edges is laid a wrapping of canvas saturated with tallow, and firmly secured by sewing, making the whole diameter equal to that of the bore of the gun; but there remains an open annular space between the tin and the cast-iron cone, which is filled with melted lead, poured in through the central cavity. This adheres to the tin and forms a compact band around the central portion of the projectile. In the discharge the gases rush into the central cavity and press out this band, forcing the canvas into the

grooves, thus preventing the escape of any portion of the gases past the bullet. In practice, the lead band sometimes separates from the iron projectile soon after leaving the gun, seriously disturbing the accuracy and efficiency of the shot; but in general it remains on, and takes such hold of the grooves as to cause the projectile to assume the spinning motion.

Gunpowder.—The gunpowder for the military service is made by private contractors, in mills in various parts of the country. The same proportions of ingredients are used for the several kinds designated musket, mortar, cannon, and mammoth, which differ from each other only in the size of the grain. The proportions of saltpetre are 75 to 76, of charcoal, 14 to 15, and of sulphur 10. The size of the grain is fixed by sieves, the musket powder being 1,100 particles in ten grains Troy weight, and the cannon powder 150 particles. It is packed in barrels of white oak with cedar hoops. Powder barrels made of strong sheet-iron, corrugated with heads formed by turning over the metal, have been made, and are now on trial. The mammoth powder is of coarsest grains, such as pass through a sieve with $\frac{9}{10}$ inch holes, but not through one of $\frac{1}{2}$ inch holes. Capt. Rodman, of the Ordnance Department, has recently invented a new powder, which is found very serviceable. The design of it is to produce the combustion increasing in intensity instead of diminishing from the first ignition, as is the case with ordinary gunpowder. This he effects by making cakes of dust powder, and perforating them with numerous small holes with wires. The ignition spreading through these holes occupies a sensible time, and spreads over an increasing surface of combustion. The effect of this is to exert the strongest impulse upon the projectile after it has once started from its seat and its inertia is overcome. The large-grained powder produces a similar effect. Gun-cotton, though having an explosive force, compared to gunpowder, as 8 to 3, is not approved of for military service for various reasons: as, the danger of preparing and keeping it in large quantities, its too violent action, its changeable character, &c.

Tents.—The military campaigns of 1861 have brought about important changes in the construction of tents for soldiers. Those previously in common use were altogether deficient in proper arrangements for warming and ventilation. They were made of a light sheet of duck, laid over a ridge-pole, which was supported upon two upright poles set in the ground about 6 feet apart. It was pinned down to the ground when stretched out to sufficient width; and the ends were closed by triangular pieces, which were drawn together and tied. Sometimes one end was made entirely close, while the other was furnished with the overlapping flaps, which could be opened or closed as desired. Such were the tents almost universally used by the French in the Crimean war, and called by them *tentes d'abri*, simplified by the

use of a rope instead of the ridge-pole. They were also made for convenience of transportation, in pieces that buttoned upon each other. When made close, for the sake of warmth in cold weather, these tents soon became filled with impure air, which proved very injurious to the health of those who lived and slept in them. A much better form was obtained from the Comanche lodge, the common tenement of the Indian tribes of the prairies, and of the traders, trappers, and hunters of the far West. These are conical-shaped tents, with hides or cloth laid upon long poles, set around a circle upon the ground, and meeting at a point over the centre, where they are secured together. The apex is left open, and a triangular wing is arranged, so as to take the wind in such manner as to produce an upward draught, thus admitting of the use of a fire in the tent, and securing without it a free circulation of air. The tent introduced by Major H. H. Sibley, and generally known in the army as the "Sibley tent," is the Comanche lodge, with an upright central standard set into an iron tripod, which takes the place of the poles and can be easily transported. This has been used with great satisfaction in exposed encampments, and in severe weather it is made more comfortable by a basement excavated in the ground to the depth of 3 or 4 feet. In the latest improved tents this form is still chiefly preserved, and the principal improvement is in the use of an iron pipe, 3 or 4 inches in diameter, for the central upright, which serves as a smoke-pipe for a small sheet-iron stove.

India-rubber cloth tents, on a plan invented by Mr. John Rider, and termed "tent knapsacks," are also much used. They are formed of separate pieces of the stuff, each 5 feet 3 inches long, and 3 feet 8 inches wide, made to button snugly together to form a tent, and when taken apart each piece makes a tight covering, in which to carry blankets, overcoats, clothes, &c., instead of in a knapsack. The pieces being all alike, any four men carry with them sufficient to form a cover that will shelter 5 to 7 men. Extra pieces are used with great advantage to spread on the ground as a protection against dampness. Various other tents, specially adapted to secure warmth and ventilation, are in use by the American army, and in general they are far superior to those of any other nation.

The sudden and large increase of the army made some modification of the system of organization connected with the supervision of the hygiene and comfort of the troops necessary. A commission of inquiry and advice was accordingly instituted, with the object of acting in cooperation with the Medical Bureau. This commission was appointed on the 9th of June, by the Secretary of War. The following persons accepted the duty assigned to them, viz.: Henry W. Bellows, D. D., New York; Prof. A. D. Bache, Washington; Elisha Harris, M. D., New York; George W. Cullum, Alex-

ander E. Shiras, Robert C. Wood, M. D., U. S. A., Washington; William H. Van Buren, M. D., New York; Wolcott Gibbs, M. D., New York; Samuel G. Howe, M. D., Boston; Cornelius R. Agnew, M. D., New York; J. S. Newberry, M. D., Cleveland.

To these were added by the commission itself others, to wit: George T. Strong, New York; Horace Binney, jr., Philadelphia; Thos. M. Clark, D. D., Providence, R. I.; Joseph Holt, Kentucky; R. W. Burnett, Cincinnati; Mark Skinner, Chicago; Frederick Law Olmsted, New York.

The order appointing the committee, vested in them no power beyond that of "inquiry and advice in respect of the sanitary interests of the United States forces." It was directed, especially, to inquire into the principles and practices connected with the inspection of recruits and enlisted men; the sanitary condition of the volunteers; to the means of preserving and restoring the health and of securing the general comfort and efficiency of troops; to the proper provision of cooks, nurses, and hospitals, and to other subjects of like nature. The office of the commission was thus purely auxiliary and advisory, created solely to give voluntary aid to the Department and Medical Bureau, in meeting the pressure of a great and unexpected demand on their resources. The services of competent physicians were secured, and sent into the field, each having a defined portion of the army under his observation.

Among the subjects to which their attention was especially directed, and on which they were required to make detailed written reports, were: the quality of rations and of water, the method of camp cooking, the ventilation of tents and quarters, the drainage of the camp, the healthfulness of its site, the administration of the hospital and the sufficiency of its supplies, the police of the camp, the quality of the tents and of the clothing of the men, the material used for tent flooring, if any, &c., &c. Whatever deficiencies or evils they found to exist by which the health, morale, or efficiency of the men might be endangered, they were instructed to indicate to the proper officer, at the same time offering advice, if it was needed, as to the best method of remedying them.

The results of their investigation, only for the half year since their appointments, have secured some valuable information, and increased the comfort and health of a portion of the army.

After the inspection of each camp or post, the inspector was required to make an elaborate report upon its condition. More than four hundred of these reports were received and compared, and digests prepared. The inspections made in the months of September and October, furnish the principal basis of the conclusions of the commission. Their statistics have been derived from more than two hundred regimental returns, of which thirty-seven were from regiments recruited in New England; one hundred and one from regiments re-

recruited in the Middle States, including Virginia, Maryland, and Delaware; sixty-two were from regiments recruited in the Western States, including Kentucky, Missouri, Kansas, and Nebraska. The time occupied in recruiting each of these regiments, averaged six weeks; the shortest period being ten days, the longest about three months.

In seventy-six and a half per cent. of the regiments inspected, native Americans were found to constitute the majority. In six and a half per cent. there was a majority of Germans; in five and a half, of Irish; and in five and a half the number of native born and foreign born was about equal. Of one per cent. the returns give no information on this point. It is considered as near the truth to state that about two-thirds of the volunteer soldiers are American born, and nine-tenths citizens, educated under the laws of the Union and in the English tongue. Sufficient investigation has not been made to determine this statement with complete accuracy.

From incomplete returns, the average age of the volunteers is judged to be a little below twenty-five years. Somewhat more than one-half of their number are under twenty-three. The average age of the officers is about thirty-four. The number of men of any age between eighteen and forty is not far from double the number of those five years older. For example, the number of those twenty years old is double the number of those at twenty-five.

It is important that the degree of liability to death from disease in war, at different ages, should be ascertained. Data are accumulating which will serve to determine this. It is still more important to determine the degree of liability to sickness at different ages in army life, especially as this affects the question of the relative efficiency of men, as soldiers, at different ages. For this purpose, no sufficient records are at present made by the surgeons of the army, and it was not practicable for the commission to supply the deficiency.

In fifty-eight per cent. of the regiments, there had been no pretence of a thorough inspection of recruits on enlistment. In only nine per cent. had there been a thorough re-inspection when or after they were mustered in.

In the month of October, 1,620 men were discharged from the army of the Potomac, as unfit for service, of whom three-fifths were thus discharged on account of disabilities that existed at and before enlistment, and which an intelligent surgeon should have discovered on their inspection.

Camp sites have been generally selected for military reasons alone, and with little if any regard to sanitary considerations. The regimental surgeon has seldom been consulted on the subject. In many instances, disease was directly traceable to this omission. One-fourth the regiments were found encamped on sites which had previously been occupied by others.

Except at Cairo and in the prairie region,

camp sites have been generally formed on the tops and sides of hills. During the hot weather nearly one-half were in the shade of woods—an objectionable circumstance.

Water of wholesome quality was found within convenient distance of the camp in all but two cases. The regiments encamped at Cairo were abundantly supplied with ice during the hot weather.

The average occupation of a camp site, up to the date of inspection, had been twenty-one days. In the east this period had generally been largely exceeded, and regiments frequently occupied the same ground much longer than was safe or advisable.

In those cases where the drainage by inclination was the most difficult, the soil and subsoil have been porous and favorable to drainage by filtration. As the immediate inconvenience occasioned by a shower of rain in these flat sites led to the practice of better judgment in artificial drainage than has generally obtained on the hill sites, there has been less prejudice to health from poor drainage in the fixed camps at the west than in those of the armies of the Potomac and Western Virginia, which have generally been upon clay soils or over retentive subsoils. There has been, for instance, not half as much rheumatism at Cairo as in the eastern camps and those of West Virginia.

Until recently, the artificial drainage of camps, when first visited by the inspectors, was found very imperfect—the men of each tent being left in most cases to form drains around it according to their own judgment. In consequence of their ignorance, unskilfulness, or indolence, the drains were often useless, and not unfrequently aggravated the evil they were designed to remedy. As soon, however, as good examples became frequent, the practice of a systematic arrangement began to be generally adopted. The majority of volunteer camps are now at least as well drained as those of the regulars. The average depth of the camp drains is about six inches. In about one-half the camps the drains were found more or less clogged, owing to their crookedness and imperfect construction, and to want of proper attention in keeping them clean.

The consequence of neglecting drainage was frequently apparent on inspection of the sick list.

In general, the plan for laying out a camp supplied in the *Army Regulations*, has been approximately followed; but the tents are placed more closely together than the minimum there prescribed. The difficulty of drainage is thus increased, and the narrow spaces between the tents, difficult to be swept, become half-concealed receptacles for rubbish. Six men are usually provided with lodging in one of the "wedge" tents. In the Sibley tent from twelve to sixteen; of late sometimes twenty.

Tents are seldom tolerably ventilated at night. Of the regiments under consideration occupying the wedge tents, none were found in which the inspectors were satisfied that proper

attention was paid to ventilation, and it was obvious in some cases that the men suffered in health in consequence. The Sibley tent is more convenient for ventilation, and cannot as well be tightly closed as the wedge form. It is now found that typhus is occurring more frequently in the regiments occupying these tents than in those that have the Sibley—the ratio being 29.5 to 23. The Massachusetts Seventh Volunteers, Colonel Davis, Surgeon Holman, is the only volunteer regiment reported, in which a thorough ventilation of the wedge tent had been generally established. It was here induced by the occurrence of typhoid fever, and by this, prominently among other means employed for the same end, the unusual result of banishing this formidable disease has been obtained. The inspectors have advised the striking of each tent once a week, for the purpose of giving it a perfect cleansing and airing.

Fifty-eight per cent. of the regiments had been provided with the wedge tent, ten with the wall tent, seven with the bell tent, nineteen with the Sibley, others not stated: Ninety per cent. of these were made of good canvas; the remainder were of twilled cotton or drilling, or so old as to be leaky.

Twenty-four per cent. of the regiments were provided with tent flooring of boards, twenty per cent. with india-rubber cloth; in twenty-one per cent. straw or branches were used for this purpose, and in thirty-five per cent. the men slept on the ground.

The following table shows the relative proportion of these several kinds of flooring in the three great divisions of the army.

The important influence it will be doubtless found to exert on the health of the men, justifies especial inquiry into the subject:

	Army of the Potomac.	Western Virginia.	Mississippi Valley.
Board flooring.	25	20	23
India-rubber cloth..	25	7	10
Straw or fir branches	19	23	23
None	31	50	44
	100	100	100

The following table shows the ratio of sick men per thousand, in regiments which had been supplied respectively with india-rubber blankets; wooden tent-floors; straw, fir boughs, or cedar boughs; and in those which have been sleeping on the bare ground. The data are taken from the returns of 120 regiments, and chiefly in November:

REGIMENTS SLEEPING ON—	ENTIRE NUMBER OF REGIMENTS.	THOSE IN WESTERN VIRGINIA EXCLUDED.
	Average ratio for 1000.	Average ratio for 1000.
Wood	75.7	61.5
India rubber. .	60.9	60.9
Bare ground ...	91.3	69.3
Straw or fir boughs }	77.5	45.8

As the forces in Western Virginia were, as a rule, unprovided with rubber blankets, and as they have suffered special hardships in other respects, they are excluded from the comparison in the second column.

A limited examination of the diseases of the army indicates that the largest proportion of those of typhoid type occur with regiments sleeping on rubber blankets, the least with those on straw or boughs; the largest proportion of catarrhal with regiments on wooden floors, the least with those on the ground; the largest of rheumatism with those on wood, the smallest with those on straw or boughs; the largest of malarial with those on the ground, the least with those on straw or boughs.

As had been presumed by the commission, it has been proved that the best bed for soldiers in camp can, with a little skill, be formed from fir or cedar spray, whenever it can be obtained in sufficient quantity. It should be frequently removed and burned, after a thorough cleansing of the tent floor, the tents being struck for the purpose.

Experienced officers generally object to the board floors in tents. They are thought to be more damp than the ground itself, and they offer an opportunity for the collection of rubbish and dirt, and make them difficult of removal.

Privies had been established in all the camps inspected, except those of two or three regiments recently mustered in.

In eighty per cent. of the camps, they are reported to be properly arranged and kept in proper order, no offensive odor drifting from them. In twenty per cent. proper attention was not given to them, and the health of the men was more or less seriously endangered in consequence.

In sixty-eight per cent. of the camps, the men seemed to be effectively restricted to the use of privies. In thirty-two per cent. the proper prohibition was found by the inspectors not to be strictly enforced.

In seventy-seven per cent. of the volunteer camps, slops, refuse, and offal are systematically removed to a distance from camp by a daily detail of men.

In twenty-three per cent. this duty was performed irregularly or very imperfectly. In nineteen of these twenty-three camps, the inspectors found odors of decay and putrefaction perceptible in and about the tents and streets.

The shirts used by the men were found to be of poor quality, in twenty-six per cent. of the regiments examined. In seventy-four per cent. they were of the Regulation quality. In ninety-four per cent. the men had been provided with two shirts each. In four and a half per cent. they had but one each, and in the remainder only a part were supplied properly.

Eighty-two per cent. of the regiments were well supplied with overcoats, and seven per

cent. partly so. In eleven per cent. there were none at the time of the inspection. In only three per cent. of the regiments were the overcoats of poor quality. Seventy-five per cent. of the regiments were provided with good cloth body coats; the remainder with flannel sack coats or cloth jackets.

Of two hundred regiments, all were provided with pantaloons—one hundred and seventy-five sufficiently, eight indifferently, seventeen very poorly.

Men have been frequently seen during the summer on duty and on parade in their drawers alone.

In seventy-five per cent. of the regiments, one good blanket had been issued to each soldier. In twenty per cent. two had been provided; these being, however, in most cases, of inferior quality. In five per cent. the men had never all received each a blanket.

In the army of the Potomac the average constant number of sick, per one thousand men, has been sixty-three; in the department of Western Virginia, one hundred and sixty-two; in the Valley of the Mississippi, one hundred and sixteen.

The average constant number of sick during the months of August, September, and October, in the regiments east and west, so far as visited, has been seventy-seven per thousand. In this number all relieved from duty, from any sort of physical indisposition, however slight, are included.

The average number of men constantly sick in the regiments, from several of the States respectively, is nearly as follows:

New York, (per thousand strong).....	55
Pennsylvania, " "	57
Massachusetts, " "	52
Connecticut, " "	49
Vermont, " "	88
Maine, " "	124
New Jersey, " "	36
Wisconsin, " "	76
Indiana, " "	42
Michigan, " "	76
Illinois, " "	156
Ohio, " "	192

The forces from Ohio and some other States have been, to a considerable extent, subject to unusual privations and exposure, during the campaign among the mountains of Western Virginia. A similar remark applies to those of Illinois, in Missouri. There is reason to think that the most sickness has occurred where regiments, raised in far northern and highland districts, have been removed to lowland, fluvial, and seaboard districts; those, for instance, from Maine and Vermont, the ridge counties of New York, and from Minnesota, being more subject to distinct disease, as well as to demoralization, or ill-defined nostalgia, than others in the army of the Potomac. The healthiest regiments, physically and morally, have been those from the seaboard, as of New Hampshire, Massachusetts, Rhode Island, Connecticut, and New Jersey; those from Rhode

Island being probably the most fortunate in this respect, which fact, however, is chiefly due to their superior discipline early in the campaign.

It is difficult to compare the rate of sickness of foreign armies with that of the volunteers, because it is uncertain what degree of sickness in them places a man upon the sick list. Our volunteer surgeons are, undoubtedly, very accommodating in this respect, probably more so than the surgeons of the regular army or of foreign armies. It has happened in more than one instance that upon an order to advance against the enemy being given, every man of a regiment then on the sick list immediately reported himself well, was discharged, and shouldered his musket in the line of battle. It is probable that at least one-half those returned as sick by the surgeons of volunteers would do the same, under similar circumstances; that proportion being excused from duty on account of a cold in the head, severe fatigue, or a slight indigestion.

In the whole British army, in time of peace, 6.5 per cent. of the force otherwise available, is reported constantly "in hospital." Of the British army in the Peninsula under the Duke of Wellington, 1808-1814, twenty-one per cent. (or 9,300 of an average force of 44,500 men) was constantly "sick in hospital." The number of sick ranged from nine to thirty-three per cent. of the whole force at different periods.

These rates were exceeded in the British army of the Crimea. To maintain 100 effective soldiers in the field, it there became necessary to provide for 26.6 sick men. The annual rate of mortality was three per cent. by wounds, and twenty per cent. by disease.

The annual rate of mortality in the British army, at home and in time of peace, was from one and a tenth to two per cent. in ten years preceding 1847.

The average mortality of the army of the Potomac has been, during the summer, at the rate of three and a half per cent., (allowance being made for those who die after their discharge, from causes connected with army life.) Imperfect data received from the West, indicate a considerably larger rate for the whole army; probably it will not be far from five per cent. if sweeping epidemics should be escaped.

The following is a statistical classification of the diseases and casualties of forty-seven regiments of volunteers and two of regulars, during periods averaging forty days for each regiment, between July 1st and October 1st, 1861.

The classification adopted is that used in the British army, and for civil registration in England, Australia, and several of the States of the Union.

The data are taken from the consolidated returns of the regimental surgeons to the medical directors of the military departments of the Potomac and of the West:

Diseases not specified.....	128	128

Diseases of a malarial type, which till recently have given most occasion for anxiety, are now beginning somewhat to decline. On the other hand, there is a slight but appreciable increase in cases of disease appropriate to the winter months, as severe colds, inflammations, pulmonary affections, and acute rheumatism.

To this must unfortunately be added a decided increase of typhus fever. This term is used to indicate not the typhoidal aspect occasionally assumed by other forms of disease,

but the formidable and infectious disorder, known, according to the conditions that produce it, as "camp fever," "ship fever," "hospital fever," &c. Its appearance is traceable to the natural disposition of soldiers to shut themselves up in their tents or huts as much and as closely as possible in cold weather. In many camps they have already been allowed to commence a system of suicide by excavating the ground within their lodgings, and throwing up banks of earth against their walls or curtains. This practice, which, as is well known, occasioned a great loss of life in the British army during the Crimean war, should be at once forbidden, and full ventilation of tents at night made compulsory, even at some real or imaginary expense of comfort.

Measles and small-pox are also common, the latter sufficiently so to justify uneasiness.

The following table shows the distribution, according to statistical classes, of the diseases and casualties of the same portion of the forces of the United States, (1861,) which may be compared with those of the British army when in the Crimea :

Number of Diseases and Casualties of each Class and Order to 1,000 cases treated.

NOTE.—This table may be read thus: Of every 1,000 cases of disease and casualty occurring in the army of the Potomac, 611 were of the class called the Zymotic (comprising epidemic, endemic, and contagious diseases.)

571 of these Zymotic diseases were of the Miasmatic order.

ARTESIAN WELL AT PASSY. The town of Passy is now one of the western suburbs of the city of Paris, France. It is in the department of the Seine, and enclosed within the new fortifications. The artesian well here was completed in 1861. It is the largest in the world, and, as such, the difficulties with which the engineer, M. Kind, had to contend are worthy of notice. These were brought before the attention of the Academy of Sciences by M. Dumas.

The idea of boring this well originated with the necessity of providing pure and wholesome water for the population of Paris, which in a short time had increased from 1,200,000 souls to 1,700,000, thus materially augmenting the causes of infection to which the waters of the Seine are necessarily subject. Paris rests upon a stratum of chalk about 1,500 feet in depth, covered with about 150 feet of various strata of tertiary soil, and itself resting on nearly 150 feet of marl or clay, which is in contact with the green sands from which the well of Grenelle derives its supply. The successful boring of the latter had established the fact that the water which these sands received from localities at a distance from Paris might be made to rise to the surface, and even to 100 and 130 feet above. But the experiment had only been tried for bores not exceeding a diameter of from 8 inches to 1 foot, yielding a supply of from 2,000 to 4,000 cubic metres of water per day. M. Kind came forward with an offer to bore a well of a diameter of 2 feet, yielding 400,000 cubic feet at an altitude of 80 feet above the highest point of the Bois de Boulogne. Though limiting his promises to the yield above stated, he declared his conviction that it would reach 1,200,000 cubic feet, an assertion which most engineers considered exaggerated, deeming it highly improbable that an increase in the diameter would increase the supply.

On the 23d of December, 1854, the works were resolved on, and the spot chosen in the neighborhood of the Bois de Boulogne, where the high temperature of the expected column of water might be turned to account. But the enterprise was fraught with difficulties which it required the unflinching perseverance of M. Kind to overcome.

On March 31, 1857, the bore had already reached 1,737 feet, and water was hourly expected, when suddenly the tube of sheet iron which supported the clay was crushed by its pressure at a depth of only 96 feet from the top. This accident it took nearly three years to repair; a shaft of the depth of 1,760 feet had to be dug close to the bore, through all the most dangerous strata, and lined partly with sheet, and partly with cast-iron and masonry. Its diameter was about 10 feet throughout the two-thirds of its depth and 1'70 for the rest. It was a work of extreme difficulty. Cast-iron tubes, of the thickness of four-fifths of an inch, were starred or cracked in all directions, as if they were mere glass. More than once the workmen refused to risk their lives in this work, and the

city engineers had to set the example of personal courage.

This stupendous labor was not brought to an end before the 13th of December, 1859. The old orifice was then cleared, and the boring recommenced, and continued without any further accident to the depth of 1,810 feet, when the tube, composed of wood strongly hooped with iron, and ending in a bronze pipe, $6\frac{1}{2}$ feet of which were fitted into the wood, the remaining $39\frac{1}{2}$ feet being free, stuck fast in such a way as to render all further progress nearly hopeless. However, M. Elie de Beaumont having, upon a mature examination of the specimens brought up by the borer, declared water to be close at hand, it was resolved that the bore should be continued with a small diameter, to be afterwards enlarged, if necessary. Water was found for the first time at 1,900 feet, but, as we know, remained a few feet below the level of the orifice. A second tube of sheet iron, $2\frac{3}{4}$ inches in diameter, $\frac{3}{4}$ in thickness, and 171 feet in length, 40 of which were looped in order to let the water pass, was sunk, and soon stopped in the clay. The boring was now resumed, to attain the largest diameter, until the 24th of September last, when M. Kind saw not only his promise fulfilled, but even his hopes to a certain extent realized. The bronze tube has remained where it was, but the concentric one of sheet iron has sunk to 1,250 feet. M. Dumas here quotes M. Michal, Inspector-General of the Works of the City, who has arranged in a table the relative variations experienced in the yield of the two wells of Passy and Grenelle; but on this score we have a later account, stating that the decrease in the latter does not exceed one-fourth of its prior yield. That of the well of Passy was 5,660,000 New York gallons in 24 hours. M. Dumas attributes the diminution of the yield at Grenelle to a diminution of pressure, and is inclined to believe that when the tube at Passy shall have been brought to its normal altitude of 256 feet above the level of the sea, the yield at Grenelle will again rise to its former figure, or nearly so. M. Elie de Beaumont has ascertained that the strata traversed at Passy are nearly the same as those met with at Grenelle. As to the chemical nature of the water at Passy, it seems, until further analysis, to be nearly the same as that of Grenelle; the temperature is also the same,—viz., 28 degrees centigrade. Whether other wells may be bored elsewhere in Paris without injury to the two existing ones is a question which experience alone can decide. The well at Passy has cost nearly \$200,000.

ASTRONOMICAL PHENOMENA. The year 1861 will be remembered in astronomical science for the brilliant comet which appeared in the month of July. It had been preceded by a smaller one which was discovered by A. E. Thatcher, of New York, on the night of April 4th. This was a telescopic object showing no tail, but with more than usual brightness. Its right ascension on the 10th, as calcu-

lated at Harvard University, was 17 hours, 7 minutes, 47.76 seconds, and its declination α 59 degrees, 30 minutes, 13.8 seconds.

The brilliant comet of July was first noticed at New Haven, Connecticut, on Sunday evening the 30th of June, between eight and nine o'clock, in the northern part of the heavens, in an opening between the clouds and at an elevation of about ten degrees. Its appearance, as described in the *American Journal of Science*, was similar to that of the planet Jupiter shining through a thin mist; and it was nearly as conspicuous an object in the heavens as Jupiter, although this was due not only to the intensity of its light, but partly to its extent of surface, its apparent diameter being about equal to that of the full moon. It was at once suspected that this body was a comet; but this conclusion was adopted with some reserve, on account of the unusual brilliancy and sudden apparition of the meteor. This light was soon concealed by a cloud; but about half an hour later, a larger opening in the clouds disclosed the tail of the comet, in the form of a bright streamer, with sides nearly straight and parallel, and pretty sharply defined. The head of the comet was now invisible; but a little later both head and tail were seen simultaneously, forming together one of the most brilliant comets of the last fifty years, and astonishing every one by the suddenness of its development.

On Monday it was ascertained that on Saturday evening several individuals had noticed in the north a bright streamer, rising to a great height above the horizon, and it was at once concluded that this was the tail of the same comet. The daily newspapers report, that the head of the comet was seen on Saturday evening at Columbus, in Ohio; but it is not known that any one made any accurate determination of its place.

On Monday evening, July 1st, it was observed at the Coast Survey Office, in Washington, and its appearance is thus described by Mr. W. P. Trowbridge:

"At eleven o'clock last night, while some gentlemen of the Coast Survey were engaged at the office, they observed a broad beam of light stretching up towards the zenith from behind a dark cloud extending over the north-western sky. It was supposed at first to be an auroral beam, and but little further attention was given to it till just before one o'clock, when, the clouds having blown off, a comet of extraordinary brilliancy was observed in the northwest, the nucleus brighter than a star of the first magnitude, at an altitude of about six degrees above the horizon, and the tail extending towards the stars of the Little Bear, and stretching over an area of at least eighty degrees, the line of the tail making an angle with the horizon of between seventy and eighty degrees. The tail was without sensible curvature, but in brilliancy and magnitude this comet rivals the great comet of 1858."

Professor Bond, at the Observatory of Harvard College, Cambridge, Mass., says:

"The suddenness of the apparition of the comet in northern latitudes was one of the most impressive of its characteristics. On the 2d of July, after the twilight had disappeared, the head, to the naked eye, was much brighter than a star of the first magnitude, if only the effective impression be taken into account, although as to intensity it was far inferior to a Lyrae, or even to a *Ursæ Majoris*. I should describe the head as nearly equal in brightness to that of the great comet of 1858, between the 30th of September and the 5th of October; it should be considered however that the present comet was better situated, from its higher position above the horizon at the end of twilight.

"The aspect of the tail suggested a resemblance to the comet of March, 1843. It was a narrow, straight ray projected to a distance of one hundred and six degrees (106°) from the nucleus, being easily distinguishable quite up to the borders of the milky way."

This comet was first seen in Europe on Sunday evening, June 30th, about ten o'clock, appearing with extraordinary splendor. At the same hour it became visible at Rome, Lisbon, Paris, and London. Its appearance in London is thus described:

"The comet is, in fact, a very small body—the diameter of the nucleus, according to Mr. Hind's measurement, being no more than four hundred miles. Its excessive brilliancy is due to its nearness to the earth. When first seen, it was no more than thirteen millions of miles from this planet—and this evening (Saturday, July 6) it will be under twenty-three millions from us. The rate at which it is moving from our point of vision is nearly thirty miles a second—more than a hundred thousand miles an hour. So small an object will very soon get beyond our view. French papers say that this is the comet of Charles the Fifth, which has been expected about this period; but this, it appears, is a mistake. Mr. Hind states that 'the comet arrived at its least distance from the sun about one o'clock on the morning of June 10, in heliocentric longitude $244^\circ 35'$, being then separated from him by 76,000,000 miles. It crossed the plane of the Earth's orbit from the south to the north side in longitude $279^\circ 1'$ on June 28, in a path inclined $85^\circ 58'$ to the ecliptic. The true orbital motion is direct."

The following communication on the subject was also published:

"CRANFORD, July 4, 1861.

"Although I watched diligently for a break in the clouds, on Monday, the 1st instant, I did not get a sight of the comet, and it was on the 2d, at 7 minutes past nine o'clock, that I first perceived the comet. The head of the comet was then as bright as a star of the second magnitude, but appeared to the naked eye fully as large as Jupiter, which was visible near the western horizon; the head was almost ver-

tically over Omicron, in the Great Bear's nose, and during the night retreated almost in the apparent direction of the tail. At about 11 o'clock the tail could be traced for fully ninety degrees; it consisted of a curved brush of light bending over to the direction of the two pointers. The light of this short brush was extremely diffuse on the western side; towards the eastern side a long narrow ray shot out, extended over the zenith, and passed through Draconis, where it again enlarged, and became very faint, but could be traced several degrees beyond an imaginary line, which would join a Lyrae and Arcturus. The appearance of the comet in my second Newton's reflector was on the 2d inst. very like a broken fan, supposing the two lower ribs to be considerably curved, and the height of the fan small in comparison with its width. The nucleus, which was situated at the joint of the ribs, was extremely small and elliptical, the longer axis of the ellipse being in the direction of the length of the tail. Last night the fan-shape of the coma was much more distinct and more generally filled with light; but there were several irregular brighter rays within it. The light of the coma and envelope is much more diffuse and less brilliant than Donati's comet of 1858. I made an attempt on the 2d to obtain a photograph of the comet in the focus of my reflector; but not the slightest impression was produced by an exposure of two minutes, although a fixed star was clearly depicted. Yesterday, the 3d, I made several attempts to photograph the comet by means of Rosse's No. 3 portrait lens mounted on the top of my telescope, and carried round by clockwork—not the slightest trace of the comet was depicted in fifteen minutes, although the fixed stars were depicted. As Donati's comet was photographed by similar means in seven seconds, (not by myself,) it follows that the present comet is considerably less actinic than Donati's.

WARREN DE LA RUE."

Other attempts were made to photograph the comet, but without success. The contiguous stars left a strong impression on the prepared glass, but the comet itself left no trace of its presence.

M. Le Verrier, of Paris, addressed the Academy of Sciences, as follows, respecting this comet:

"We do not know this comet; it is the first time it visits us, and those who have endeavored to predict its course, determine its distance from the earth, and measure its tail, have either deceived themselves or the public. Three elements are necessary to calculate the orbit of a comet: first, the exact position of the star; then its velocity; and, lastly, the variation of velocity produced by the mass of the sun. I caused the comet to be observed on the 30th of June, and then on the night of the 1st and the morning of the 2d inst., in order to determine the variation of velocity. These three observations would have followed too closely upon each other for the calculation to be attempted, were it not that the comet moves very

rapidly. On the 3d, at 10 A. M., M. Lévy brought me the result of his calculations, and we then obtained an insight into the orbit of the comet. Mr. Hind has since sent me the orbit calculated by the English astronomers, which perfectly agrees, in all but two minutes, with our results. It is now positive that this is not Charles V.'s comet; and, moreover, it resembles none of those already observed. This circumstance will contribute not a little to throw confusion upon the little we know of these erratic bodies. I cannot yet say whether this comet is periodical or not; its orbit up to this day has been too cursorily determined to enable us to pronounce it elliptical, parabolical, or even hyperbolical. At any rate, appearances are against its return, for the orbit is nearly perpendicular to the plane of the ecliptic, while those of periodical comets usually form a very small angle with that plane. It is only now we can determine the distance of the comet from the earth, and the length of its tail. On the 30th of June the line joining the centre of the sun with that of the comet made an angle of four degrees with that joining the centres of the sun and earth, the length of which is known. The angle which this line formed with the visual ray, drawn from the eye of the observer to the centre of the comet, was 24° . The triangle thus formed may, therefore, be calculated, and it gives us the distance of the comet from the earth, amounting to between 6,000,000 and 7,000,000 of leagues, (about 17,000,000 of miles English.) The length of the tail might be similarly calculated. The comet is rapidly moving away from us, and it is therefore not surprising that its brilliancy has diminished. On the 10th it will be equally distant from the sun and earth; we shall soon lose sight of it, and astronomers only will be able to follow it for a month longer. It presents a singular peculiarity. M. Chacornac has studied the nucleus with one of M. Foucault's telescopes of a diameter of forty centimetres; instead of its being hollow like the half of an egg-shell, like most of the comets already observed, it presents the appearance of a sun composed of fireworks, the bent rays of which burn in the same sense. Moreover, the comet has not drawn nearer to the sun. These are all circumstances calculated to introduce great complications into the theory of comets."

The comet as seen at Rome is described by Father Secchi in a communication to the French Academy. The most interesting fact which he relates is that on the 30th of June the polarization of the light of the tail and of the rays near the nucleus was very strong, and could be distinguished by the polariscope in bands, while the nucleus itself presented no traces of polarization, even with Arago's polariscope with a double colored image. But, however, on July 3d, and the following days, until the 7th, the nucleus, in spite of its extreme diminution, exhibited sensible indications of polarization. Father Secchi considers this fact of great im-

portance, since it thereby appears that the nucleus in the first days transmitted its own light, perhaps on account of the incandescence to which it was raised by its near proximity to the sun. M. Poey, the meteorological observer at the Havannah, Cuba, states that he has hundreds of times proved by his experiments that the polarization of luminous bodies in the celestial space is more or less combined with atmospheric polarization, especially so with the polarization of the clouds, except when they are black or stormy. This may combine with the light of a comet by reflection, but it is easy to eliminate it by means of Nicol's prism or a tourmaline.

At Peru a local paper, the *Bolsa*, thus speaks of it:

On the 9th of June there appeared within the horizon of this city a beautiful comet, with a nucleus of the size of a star of the second magnitude, a very distinct coma, and a tail about 2 degrees wide, extending diagonally across the heavens over a space of about 30 degrees. By observations taken on the 14th and 15th, it rose the first day at 4.26 A. M., the second at 4.24, the first appearance of the tail taking place 40 minutes previously. On the 14th its position was in 24 degrees south, i. e., outside the ecliptic, and close to the Tropic of Capricorn, occupying the constellation "River Eridanus," the tail extending as far as the star of the first magnitude, "Achernar." On the 16th it first appeared in 22 degrees, showing that its course is toward perihelion. This comet bears a great resemblance to that of 1860, the return of which was predicted by Newton for 2,255, and its position is identical with that occupied by the great comet which was visible in this city in March, 1843.

AREQUIPA, June 17.

Professor Bond further remarks:

"It is obvious from the elements computed by Professor Hubbard, of the U. S. Naval Observatory, Washington, that this comet is not the same as the comet of 1556, (called Charles the Fifth's comet,) whose return has been anticipated for several years; nor do these elements bear any resemblance to those of any comet in the published catalogues. We must conclude, then, that this comet is a new one, whose orbit has never before been computed.

"The nucleus admitted of very precise observations; indeed, it is a curious fact, that it would be quite possible, by means of proper comparisons with neighboring stars, to obtain the differences of terrestrial longitudes of the principal points at which it was observed with a degree of precision only surpassed by the more refined methods known in astronomy.

"The near approach of the present comet to the earth, and the sharply defined points of its nucleus, illustrate the practicability of a method of determining the solar parallax with perhaps greater exactness than can be attained by any other means. Many comets have stellar points for their nuclei, visible in the larger telescopes, which admit of as accurate comparisons with neighboring stars as is practicable in measurements among the stars themselves. Many such have appeared within the last fifteen years. Suppose such a comet to be suitably placed so as to be observed simultaneously in

different quarters of the globe, when at a distance from the earth of less than one-twentieth of the sun's distance; under favorable circumstances it would not be hazardous too much to say, that in the course of its apparition the probable error of the solar parallax could be reduced within smaller limits than is possible by means of transits of Venus or of any other method. Such an opportunity might possibly afford an improved value of the mass of the earth.

"From the elements computed at the observatory, by Messrs. Safford and Hall, the diameter of the nucleus may be variously estimated at from 150 to 300 or 400 miles. On July 2d, the breadth of the head at the nucleus was 156,000 miles, the height of the inner envelope 11,500 miles, and the length of the tail about 15,000,000 miles."

The discovery of Asteroid No. 66, (Maia,) on the 10th of April, was made at Harvard College Observatory. On April 17th, No. 67 was discovered at Madras, India, by Mr. W. R. Payson, lately appointed Director of that Observatory. It was then of the 11th magnitude, and has been named Asia. On April 29th, No. 68 was first seen by Luther, at Bilk, Germany, and named Lato; on the same day No. 69 was discovered at Milan, by Sr. Schiaparelli; and on May 5th, No. 70, at Paris, by Goldschmidt, and named Hesperia.

The display of meteors in August was quite brilliant. On the night of the 10th as many as twenty-nine were observed at Newark, New Jersey. Several of them were of unusual brilliancy. On the same evening the display was noticed at Providence, Rhode Island, of which an eye-witness remarks that they were visible at times in all parts of the heavens, being most numerous, however, in the southwest. Those observed in that quarter radiated from a point about ten degrees south of the zenith. Between eleven and twelve they were most numerous, appearing in rapid succession, and frequently two and three being visible at a time. One was very large and brilliant; the head or nucleus was about five times the apparent size of Venus, and emitted a very bright light. It was followed by a trail about five yards in length, which was visible nearly a minute. Others appeared like stars of the first magnitude, and were also followed by trails which were visible from ten to thirty seconds. Those which were smaller were not followed by any trails. At intervals throughout the night the portion of the heavens near the zenith described above continued to send off meteors. In other portions of the heavens they were not so numerous, and appeared at less regular intervals. Some were very small, and were visible only for a moment. Most of them shot downward, in different directions and at various angles.

ATHENS, a small village of Clarke County, in the extreme northeast of Missouri, on the Des Moines River, where a severe skirmish took

place on the 5th of August, between a body of Missouri Home Guards from 300 to 400 in number under command of Col. Moore, and a Confederate force of 1,200 to 1,500, commanded by Martin Green, brother of ex-Senator Green of Missouri. Green had been marauding through Clarke and Knox counties, and had finally expressed his determination to annihilate the little body of Home Guards at Athens. Col. Moore had at first about 400 men posted on the hill, on the slope of which the village stands, and with wings extending to the river, and on the opposite side of the river were about 70 Iowa soldiers from Keokuk; but he had no artillery. Col. Green had one eight-pounder, and two imitation cannon, and came on very confidently. About 100 of Moore's men were panic-struck, including a cavalry company, and fled; but the remainder stood their ground, and after a fight of an hour and a half, charged upon the Confederates, who broke and ran. They were mostly mounted, but they leaped from their horses and fled on foot. The result of the battle was a loss of 12 Unionists killed and 8 wounded; while the Confederate loss was 23 killed and 44 wounded. The Federal troops also captured forty horses, 5 wagon loads of supplies, the mock cannon, and a quantity of arms. They pursued the Confederates for several miles.

ATKINSON, THOMAS WITLAM, an English traveller and artist, born in Yorkshire, March 6, 1799, died at Lower Walmer in Kent, Aug. 13, 1861. He was early left an orphan, and compelled to obtain his education where and how he could. He was apprentice for some years to an architect, and acquired some distinction by his architectural designs; but his earnest love of high art led him to devote his whole time to landscape painting, in which he soon attained a high reputation. Humboldt's description of the sublime and majestic scenery of Higher Asia, impelled him to seek among the mountains and unexplored regions of Siberia and Chinese Tartary, landscapes hitherto unknown to the artist, and in 1846, having secured the approval and protection of the Czar, he set forth alone on a tour of exploration in regions unknown to civilized men. Seven years were spent in his wanderings in those distant and inclement lands; years of toil, privation, and danger, but replete with interest in the incidents which came under his observation, and the insight they afforded of human life and character under circumstances entirely diverse from those of civilized lands. After many perilous adventures, and hair-breadth escapes, he returned in 1854, with impaired health, but with a rich collection of sketches of the country he had visited, which he gave to the public four years later, in connection with his "Oriental and Western Siberia: a narrative of seven years' exploration," London, 1858; a work of highly fascinating character, though marked by a most provoking absence of dates.

In 1860, he published "Travels in the regions

of the Upper and Lower Amoor," a work of less merit, though containing many fine descriptive passages. From the time of his return from the East, his health had been steadily though gradually declining. His exposures and exertions had impaired his naturally vigorous constitution, and he succumbed to disease at the age of 62.

AUSTRIA, an empire of Central Europe, bounded north by Poland, Silesia, and the Kingdom of Saxony; west by Bavaria, Switzerland, and Sardinia; south by the Pontifical States, the Adriatic, and Turkey; east by Moldavia and Russia. It is 670 miles long by 420 broad, without reckoning its extreme prolongations; reckoning them, it is 800 miles in extreme length from east to west, and 690 in extreme breadth; area, 249,943 square miles; pop. in 1860, 36,401,864. It is divided into nine German, one Polish, one Italian, and six Hungarian provinces. The German provinces are Bohemia, Austrian Silesia, Moravia, Lower and Upper Austria, Salzburg, Styria, Illyria, and Tyrol and Vorarlberg. The Polish province is Galicia and Bukowina. The Italian, Venetia. The six Hungarian are Hungary proper, (divided into the five districts of Pesth, Ödenburg, Presburg, Kaschau, and Grosswardein,) Transylvania, the Banat and Servia, Croatia and Slavonia, Dalmatia, and the Military Frontier.

At the beginning of the year 1861, war seemed imminent. Victor Emanuel had not only succeeded in conquering and attracting to his sway all of Italy except Venetia and the small remnant of the States of the Church which still owned allegiance to the Pope, but he had assumed the title of "King of Italy," which was especially offensive to the Emperor of Austria, who had till lately exerted so large an influence in the affairs of Italy. Garibaldi, too, was believed to be only waiting for the opening of the spring to attack Austria in its weakest point, by assisting Hungary. Meantime, the Magyar race, who had for thirteen years been restive under the Austrian yoke, gave unmistakable signs of their determination to throw it off, and by their passive but determined resistance to all the measures of the Austrian Government seemed fast approaching a crisis in their history; and Venetia, though powerless to act alone, was ready at the slightest sign of aid from other quarters to revolt.

The Austrian emperor, with such probabilities of war before him, and the imperial finances in a condition which would make a long and expensive war inevitable ruin, was induced to take measures which have had the effect of postponing, if not of averting the conflict. On the 20th of October, 1860, he had issued a decree which conferred jointly upon the provincial diets and the Council of the Empire the power of making, modifying, and repealing laws; while it reserved to the Council alone the decision of all questions concerning the administration of the laws, finances, banks, posts, telegraphs, railways, military affairs, taxes, the management of the national debt, and the sale

or renting of the national estates. By this decree he had also reestablished with some modifications the ancient constitutions of Hungary, Croatia, and Transylvania; and restricted the action of the Council of the Empire to the other countries of the empire, in regard to many of those matters in which it had hitherto extended its power over these constitutional states.

On the 26th February, 1861, he issued a further decree, declaring the ordinance of October the fundamental law of the empire, and restricting the Council of the Empire, in its regulation of all matters of legislation, to the non-Hungarian provinces. This decree not only established provincial diets organized after a uniform model in each of the provinces of Austria proper, but provided for the organization of an elective legislative assembly or *Reichsrath* for the empire, in two Chambers; the first to be composed of the older princes of the imperial family, the heads of the principal families of nobles, and members named for life by the Government, among whom were to be included men who had been distinguished in science or literature. The Chamber of Deputies was composed of 340 members elected by the provincial diets.

He had already, on the 9th of Jan., 1861, published an amnesty for offences committed in Hungary, Transylvania, Croatia, and Slavonia, as an evidence of his intention to modify his former course toward those States. On the 16th of January, he addressed an imperial manifesto to all the county assemblies and civil magistrates of Hungary, rebuking them for the revolutionary measures they had adopted, such as the election of political refugees, the refusal to pay taxes, the suspension of existing courts of justice, &c., &c. This manifesto produced great irritation throughout Hungary, and each county assembly for itself (that of Gran, under the presidency of the Cardinal Primate of Hungary, leading in the movement) sent a solemn written protest to the emperor in reply. The Cardinal Primate himself counselled mild measures, and the confiding to the diet the regulation of the affairs of Hungary, but the people were too strongly incensed to listen to counsels of moderation. A change of the Austrian ministry followed on the 4th of February; and the new ministers were known or believed to sympathize more fully with Hungary.

On the 11th of February, the Court Chancellor for Transylvania, Baron Kemeny, opened a conference of the prominent men of the country at Karlsburg, Transylvania, to deliberate upon the introduction of a constitutional organization into Transylvania. The result of their deliberations was, that a majority declared for the validity of the laws of 1848, which could only be modified by the re-united diet. By this movement Transylvania was detached from the Hungarian movement.

On the 14th of February, the Court Chancellor for Hungary, Baron de Vay, held a conference with the president of the County Assembly of Pesth. The Assembly were cautious, but

firm; they declared their regard for the chancellor, but averred that it was contrary to their consciences and the national law, to render the payment of the taxes of the empire obligatory on Hungary. The same day the Hungarian diet was convoked to meet on the 2d of April at Buda-Pesth.

On the 26th of February, the emperor published the statutes of the new constitution of the Austrian monarchy, to which we have already referred.

On the 2d of March, the Austrian emperor, through his Minister of Foreign Affairs, Count Rechberg, protested, in a circular to the nations of Europe, against the adoption of the title of "King of Italy," by Victor Emanuel.

A national Servian congress was called for the 1st of April, to express the wishes of the people concerning the maintenance of their old privileges relative to their nationality and language.

On the 24th of March, the emperor by a decree gave his consent to the administration and political re-organization of the government of Transylvania.

On the 29th of the same month, the laws regulating the discussion of public affairs in the communes were relaxed in severity, independent provincial authority in minor matters re-established, and the ancient tribunals invested again with their former powers.

On the 8th of April, the emperor issued a decree that his Protestant subjects of the sects heretofore recognized, should enjoy the same civil and political rights with the Catholics. From this provision Hungary and its dependencies, and Venetia were excepted; previous regulations on this subject having been made for them in 1859, and rejected by the Protestant congregations of Hungary. Against this decree the diet of Tyrol protested, and demanded that it should not be applied to that government, in which a large majority were Catholics.

On the 29th of April, the *Reichsrath* met, and was formally opened by the emperor in person on the 1st of May; but no deputies were present from Hungary, Croatia, Transylvania, Venetia, or Istria.

In Hungary, at the session of the diet in May, the relations of the kingdom of Hungary to the empire were fully discussed, and an address representing to the emperor the demands of the nation was voted on the 5th of June, 155 years to 152 days. Meantime, the dissatisfaction which had long existed between the Slovaks of Upper Hungary and the Magyars was becoming more and more intense, and on the 6th of June a Slovak congress was convened at St. Martin, which, in the latter part of the month, decided against any fusion with the Magyars, even for the purpose of maintaining their national rights.

The Minister of State announced, on the 19th of June, that the emperor refused his consent to the petition or demand of the Tyrolese diet.

The address of the two Chambers of the Hungarian diet to the emperor offered by the

presidents of the Chambers, was refused recognition by the emperor, because it addressed him merely as monarch, and did not confer on him his legitimate title of "King of Hungary." The condition of excitement in Hungary still

continued, and on the 30th of September, the Assembly of the Comitatus or district of Pesth were prevented from meeting on their authorized day of assembling; a body of Austrian soldiers having taken possession of their hall.

B

BAKER, EDWARD D., an American Senator and soldier, born in England about the beginning of the present century, and killed at the head of his column, at the battle of Ball's Bluff, Va., Oct. 21, 1861. He came to this country when five years of age, and found a home in Philadelphia, to which place his father, who was a member of the Society of Friends, was attracted by the large number of Friends in that vicinity. Before he reached the age of early manhood his father died, and left Edward and a younger brother with no near relatives in this country and portionless. Stout-hearted and self-reliant, the boy found work by which he could support his brother and himself, as a weaver, in a small establishment in South street, Philadelphia. His leisure moments were earnestly occupied with reading, and most of his reading was of an instructive character. The West was then a region of romance, and its broad prairies and fertile soil presented attractions to those who looked forward to fortune in the future. Young Baker resolved to go thither, and taking his brother with him, the two youthful emigrants started westward with their packs upon their shoulders, with light hearts and purses as light. Crossing the then new States of Ohio and Indiana, they finally reached Springfield, Illinois, which Edward deemed the place for their future home. Here he soon commenced the study and the practice of law, and having a natural gift of oratory, to which his extensive reading had added a large vocabulary, he soon became one of the most popular advocates in the State. Uniting his fortunes with those of the Whig party, he soon won his way to political honors, and in 1846-'7 was elected to Congress from his district, and was fast becoming recognized as one of the leaders of his party, when the commencement of the Mexican war attracted his ardent spirit, and returning to Illinois, he raised a regiment, and took it to the Rio Grande. Availing himself of a brief furlough, he resumed his place in Congress long enough to press his views and give his vote in behalf of the war, and hastened back to his regiment, which he overtook on the march from Vera Cruz. He distinguished himself at every action on the route to Mexico, and when Gen. Shields was wounded at Cerro Gordo, he succeeded to the command of the brigade, and led it through all the subsequent conflicts of the war. Returning to Illinois, he was again elected to Congress, and served his district there till 1850, when he visited Panama on business, and though attacked by the Chagres fever and compelled to return, he had

learned too much of the new Eldorado of the West, California, to be contented to remain east of the Rocky Mountains, and in 1851 he removed to San Francisco, where he soon took rank as the leader of the California bar, and the most eloquent speaker in the golden State.

His impressive and touching oration over the body of his friend Broderick, will never be forgotten by those who heard it. He soon after removed to Oregon, where in 1860 he was elected to the U. S. Senate. He there distinguished himself as one of the firmest and loftiest patriots of the Senate, and in debate proved himself the most effective orator of that body. The taking of Fort Sumter fired his soul anew with military ardor, and on the 20th of April, at the mass meeting in Union Park, New York City, he delivered an address which thrilled the souls of all who heard it. He there pledged his personal services to the country as a soldier, and closed his speech with these impressive and eloquent words, which were greeted with a thunder of applause:

"And if, from the far Pacific, a voice feebler than the feeblest murmur upon its shore may be heard to give you courage and hope in the contest, that voice is yours to-day; and if a man whose hair is gray, who is well-nigh worn out in the battle and toil of life, may pledge himself on such an occasion and in such an audience, let me say, as my last word, that when, amid sheeted fire and flame, I saw and led the hosts of New York as they charged in contest upon a foreign soil for the honor of your flag; so again, if Providence shall will it, this feeble hand shall draw a sword, never yet dishonored—not to fight for distant honor in a foreign land, but to fight for country, for home, for law, for government, for constitution, for right, for freedom, for humanity, and in the hope that the banner of my country may advance, and wheresoever that banner waves, there glory may pursue and freedom be established."

The pledge thus made was speedily fulfilled. Though having a strong presentiment that he should fall in battle, he raised a fine regiment, called the California Regiment, which he led into the war, and had been nominated Brigadier-General, when the disastrous battle of Ball's Bluff occurred. He commanded a brigade in that battle, and after exhibiting the most heroic bravery and daring, exposing himself for some hours in the hottest of the fight, he fell pierced with six wounds. His colleague in the Senate, and Senators Latham and MacDonal of California, and Sumner of Mass., pronounced touching and eloquent eulogiums on his memory.

BALL'S BLUFF, OR, LEESBURG HEIGHTS, is the name given to a part of the bank of the Potomac River, on the Virginia side, east of Leesburg and opposite Harrison's Island. The height of the bluff is variable, in some parts being one hundred and fifty feet. It is steep, with brush, trees, rocks, and logs on its front, and at the point of ascent was, on the day of the battle there, rendered soft and muddy by the passage of the troops. Opposite the bluff and about one hundred yards distant is Harrison's Island, a long narrow tract of four hundred acres, between which and the Virginia shore the river runs with a rapid current. On the other side of the island, which is one hundred and fifty yards broad, the distance to the Maryland shore is two hundred yards, and the stream not quite so rapid. At the head of the island passes Conrad's Ferry from the Maryland to the Virginia shore. Six miles below is Edwards' Ferry, which is on the direct road from Poolesville to Leesburg.

On the opposite banks of the Potomac the hostile forces of the North and South had confronted each other for many months. The distance thus occupied extended from Great Falls up the river beyond Harper's Ferry. It was here that the Confederate Government contemplated an advance into the State of Maryland, and an opportunity to flank the force on the Virginia shore opposite Washington, placed for the defence of that city. The Federal Government, anticipating such intentions, had stationed a strong force to prevent them. This was in several divisions: the first under General Banks was stationed from Great Falls nearly to Edwards' Ferry. From that point to Conrad's Ferry was the division under General Stone; next was Colonel Lander's force and that of Colonel Geary. The principal points occupied by the Confederate troops on the Virginia borders of the Potomac were Dranesville, Leesburg, and Charlestown. It became an object to learn with what strength the former of these positions was then held. For this purpose a reconnaissance was ordered by the Commander-in-Chief, General McClellan, to be made toward Dranesville, and the duty was assigned to General McCall, who was in command of a division on the extreme right of the force beyond the Potomac opposite Washington. These orders were successfully executed on the 19th of October, and on the forenoon of the 20th he returned to his former position, in compliance with orders received the afternoon previous. At the same time notice was given to General Stone of this movement on the part of General McCall in the following despatch:

To Brigadier-General Stone, Poolesville:

General McClellan desires me to inform you that General McCall occupied Dranesville yesterday, and is still there. Will send out heavy reconnaissances today in all directions from that point. The General desires that you keep a good look-out upon Leesburg to see if this movement has the effect to drive them away. Perhaps a slight demonstration on your part would have the effect to move them.

A. V. COLBURN,
Assistant Adjutant-General.

Later in the day General Stone replied to this despatch as follows:

OCTOBER 20, 1861.

To Major-General McClellan:

Made a feint of crossing at this place this afternoon, and at the same time started a reconnoitring party toward Leesburg from Harrison's Island. The enemy's pickets retired to intrenchments. Report of reconnoitring party not yet received. I have means of crossing one hundred and twenty-five men once in ten minutes at each of two points. River falling slowly.

C. P. STONE, Brigadier-General.

On communicating General Stone's report of the battle to the Secretary of War, General McClellan, in a note, said: "My despatch did not contemplate the making an attack upon the enemy or the crossing of the river in force by any portion of General Stone's command."

Immediately upon the receipt of these instructions, General Stone went to Edwards' Ferry with General Gorman's brigade, the Seventh Michigan, two troops of the Van Alen cavalry, and the Putnam Rangers. This was at one o'clock P.M. At the same time he ordered four companies of the Fifteenth Massachusetts to proceed to Harrison's Island, under Colonel Devens, who already had one company on the island. To Conrad's Ferry above, which was in his department, he also ordered Colonel Lee with a battalion of the Massachusetts Twentieth, a section of the Rhode Island battery, and the Tammany Regiment. These three movements of troops were ordered—one to Edwards' Ferry, one to Harrison's Island, and one to Conrad's Ferry above. General Stone says that at this time General McCall's movement on Dranesville had evidently attracted the attention of the enemy, as a regiment appeared from the direction of Leesburg, and took shelter behind a hill about one mile and a half from his position at Edwards' Ferry. This day is Sunday, and at half-past four P.M. Van Alen's battery of two twelve-pound Parrott guns opens with shell upon the Confederate force upon the Virginia side. Their explosion can be distinctly heard. Seven are thrown within ten minutes, and no response comes across the water. The direction given to the shells is varied so as to find out the location of the force, which is supposed to be concealed in a thick wood to the southwest, on the hill. At five o'clock P.M. the battery in charge of Lieut. Frink, a quarter of a mile from the ferry, also opens with shell, and the two batteries keep up the fire with rapidity. Just as the sun is going down the First Minnesota and Second New York come down over the hill and take the road to the ferry. The sun sets gloriously, his rays reflecting from the thousands of bayonets which line the road.

Gen. Gorman is ordered to deploy his forces in view of the enemy, making a feint to cross the river with a view of trying what effect the movement may have upon the enemy. The troops evince by their cheering that they are all ready, and determined to fight gallantly when the opportunity is presented. Three flat-boats are ordered, and at the same time shell and

spherical-case shot are thrown into the place of the enemy's concealment. Elsewhere all around the air is perfectly still, and the close of the pleasant Sabbath is impressively beautiful, while the view of the Virginia hills is almost enchanting. Soon something resembling the sound of a drum corps is distinctly heard, and the shelling and the launching of the boats induces the quick retirement of the Confederate force. Three boat-loads of thirty-five men each from the First Minnesota crossed and recrossed the river, each trip occupying about six or seven minutes. At dusk Gen. Gorman's brigade and the Seventh Michigan returned to camp. The other forces at Harrison's Island and Conrad's Ferry remained in position.

Here the movement should have stopped. The orders of Gen. McClellan had been obeyed, and their object had been accomplished. The subsequent orders were not authorized by any superior authority to Gen. Stone, and the responsibility for their consequences must rest upon him. Had a brilliant achievement ensued, the honor of it would likewise have belonged to him.

Previous to one o'clock p. m. four companies of the Massachusetts Fifteenth, as above stated, had been ordered to Harrison's Island, which had for some time been guarded by one company of the same regiment. At night Col. Devens ordered Capt. Philbrick of Company H, and Quartermaster Howe of his staff, with a detachment of twenty men, to cross from Harrison's Island to the Virginia shore, and follow a bridle path which had been discovered, to the vicinity of Leesburg, and report what was seen. The party executed the order by approaching within three-fourths of a mile of Leesburg, and returned to the starting-point by 10 o'clock at night, after having discovered, as they supposed, a small Confederate camp one mile from Leesburg. There appeared to be about thirty tents. No pickets were out any distance, and the party approached within twenty-five rods without being challenged.

Upon receiving this report, Gen. Stone instantly ordered Col. Devens to cross over with four companies to the Virginia shore, and march silently under cover of night to the position of the camp, and to attack and destroy it at daybreak, pursue the enemy lodged there as far as would be prudent, and return immediately to the island—his return to be covered by a company of the Massachusetts Twentieth, to be posted over the landing-place. Col. Devens was ordered to make close observation of the position, strength, and movements of the enemy, and, in the event of there being no enemy there visible, to hold on in a secure position until he could be strengthened sufficiently to make a valuable reconnoissance. At this time orders were sent to Col. Baker to send the First California Regiment to Conrad's Ferry, to arrive there at sunrise, and to have the remainder of his brigade ready to move early. Lieut.-Col. Wood, of the Fifteenth Massachu-

setts, was also ordered to move with a battalion to the river bank opposite Harrison's Island by daybreak. Two mounted howitzers, in charge of Lieut. French, of Ricketts' battery, were ordered to the tow-path of the canal opposite Harrison's Island.

Col. Devens, in pursuance of his orders, crossed the river and advanced to the point indicated, while one company of the Massachusetts Twentieth, of one hundred men, took position at the landing-place on the bluff, to cover the return of Col. Devens, as ordered. Upon arrival at the point indicated as the position of the enemy's camp, Col. Devens found that the scouts had been deceived by the uncertain light, and had mistaken openings in the trees for a row of tents. He found, however, a wood in which he concealed his force, and proceeded to examine the space between that and Leesburg, sending back at the same time a report that thus far he could see no enemy.

In order to distract the attention of the enemy, during this movement of Col. Devens, and also to make a reconnoissance in the direction of Leesburg from Edwards' Ferry, Gen. Stone now directed Gen. Gorman to throw across the river at Edwards' Ferry two companies of the First Minnesota, under cover of a fire from Ricketts' battery, and send out a party of thirty-one Van Alen cavalry under Major Mix, with orders to advance along the Leesburg road westwardly until they should come to the vicinity of a battery which was known to be on that road, and then turn to the left and examine the heights between that and Goose Creek, and see if any of the enemy were posted in the vicinity, find out their numbers as nearly as possible, their disposition, examine the country with reference to the passage of troops to the Leesburg and Georgetown turnpike, and return rapidly to cover behind the skirmishers of the Minnesota First. This reconnoissance was most gallantly conducted, and the party proceeded along the Leesburg road nearly two miles from the ferry; and when near the position of the hidden battery came suddenly upon a Mississippi regiment, about thirty-five yards distant, received its fire and returned it with their pistols. The fire of the enemy killed one horse, but Lieut. Gouraud seized the dismounted man, and, drawing him on his horse behind him, carried him unhurt from the field. One private of the Fourth Virginia cavalry was brought off by the party a prisoner, who, being well mounted and armed, his mount replaced the one lost by the fire of the enemy.

While this was going on, Gen. Stone received the report of Col. Devens that no enemy could be seen. On the reception of this information, he immediately ordered a non-commissioned officer and ten cavalry to join Col. Devens, for the purpose of scouring the country near him while he was engaged in his reconnoissance, and to give due notice of the approach of any force. At the same time Col. Ward was ordered, with his battalion of the

Massachusetts Fifteenth, to cross over and move half a mile to the right of the landing-place of Col. Devens, and in a strong position to watch and protect the flank of the latter on his return, and secure a good crossing more favorable than the first and connected by a good road with Leesburg. Neither of these orders were carried out to their full extent, for which no reason has been given. The squad of cavalry crossed over to the Virginia side, but were sent back without having left the shore to go inland; thus Col. Devens was deprived of the means of obtaining warning of the approach of any hostile force. The battalion under Col. Ward was detained on the bluff instead of being directed to the right.

At an early hour, Col. Baker, in pursuance of the orders sent at ten o'clock at night, arrived at Conrad's Ferry with the First California Regiment. Leaving his regiment he went to Edwards' Ferry below, and reported to Gen. Stone that his regiment was at Conrad's Ferry, and the three other regiments of his brigade were ready to march.

The orders now given to Col. Baker are thus related in the words of Gen. Stone: "I directed him to Harrison's Island to assume the command, and in a full conversation explained to him the position as it then stood. I told him that Gen. McCall had advanced his troops to Dranesville, and that I was extremely desirous of ascertaining the exact position and force of the enemy in our front, and of exploring as far as it was safe on the right toward Leesburg, and on the left toward the Leesburg and Gum Spring road. I also informed Col. Baker that Gen. Gorman, opposite Edwards' Ferry, should be reinforced, and that I would make every effort to push Gorman's troops carefully forward to discover the best line from that ferry to the Leesburg and Gum Spring road already mentioned; and the position of the breastworks and hidden battery, which prevented the movement of troops directly from the left to right, were also pointed out to him. The means of transportation across, of the sufficiency of which he (Baker) was to be judge, was detailed, and authority given him to make use of the guns of a section each of Vaughan's and Bunting's batteries, together with French's mountain howitzers, all the troops of his Brigade and the Tammany Regiment, beside the Nineteenth and part of the Twentieth Regiments of Massachusetts Volunteers; and I left it to his discretion, after viewing the ground, to retire from the Virginia shore under the cover of his guns and the fire of the large infantry force, or to pass over reinforcements in case he found it practicable and the position on the other side favorable. I stated that I wished no advance made unless the enemy were of inferior force, and under no circumstance to pass beyond Leesburg, or a strong position between it and Goose Creek, on the Gum Spring, *i. e.*, the Manassas road. Col. Baker was cautioned in reference to passing artillery across the river, and I beg-

ged if he did do so to see it well supported by good infantry. I pointed out to him the position of some bluffs on this side of the river, from which artillery could act with effect on the other; and leaving the matter of crossing more troops or retiring what were already over to his discretion, gave him entire control of operations on the right. This gallant and energetic officer left me about nine A. M., or half-past nine, and galloped off quickly to his command."

The following orders have been received as true copies of the orders given to Col. Baker, the originals of which were found in his hat after his death. The first is of such date as to have been delivered to him on Sunday night, and the second was delivered to him on the battle-field by Col. Cogswell, who, perceiving that it had no bearing upon the then condition of affairs, said so to Col. Baker, who put it in his hat without reading. Some other order, it may be presumed, preceded these two.

H. Q. CORPS OF [Here the bullet struck and a word is missing.] EDWARDS' FERRY, October 21, 1861. }

Colonel E. D. Baker, Com. of Brigade :

COLONEL : In case of heavy firing in front of Harrison's Island, you will advance the California Regiment of your brigade, or retire the regiments under Colonels Lee and Devens, now on the (almost rendered illegible by blood) Virginia side of the river, at your discretion—assuming command on arrival.

Very respectfully, Colonel, your most obt. servt.,

CHAS. P. STONE, Brig.-Gen. Commanding.

The second order which follows, was delivered on the battle-field by Col. Cogswell, who said to Col. Baker, in reply to a question what it meant, "All right, go ahead." Thereupon Col. Baker put it in his hat without reading. An hour afterward he fell :

HEAD-QUARTERS CORPS OF OBSERVATION, }
EDWARDS' FERRY, October 22—11.50. }

E. D. Baker, Commanding Brigade :

COLONEL : I am informed that the force of the enemy is about four thousand, all told. If you can push them, you may do so as far as to have a strong position near Leesburg, if you can keep them before you, avoiding their batteries. If they pass Leesburg and take the Gum Springs road, you will not follow far, but seize the first good position to cover that road.

Their design is to draw us on, if they are obliged to retreat, as far as Goose Creek, where they can be reinforced from Manassas, and have a strong position.

Report frequently, so that when they are pushed, Gorman can come up on their flank.

Yours respectfully and truly,

CHARLES P. STONE,
Brigadier-General Commanding.

The following are the copies said to have been made by General Beauregard's order and sent to General Stone, of the orders given to Devens and Baker at Ball's Bluff and found on the field by the Confederates.

HEAD-QUARTERS CORPS OF OBSERVATION, }
POOLESVILLE, October 20, 1861—about 11 A. M. }

COLONEL : You will please send orders to the canal to have the two new flat-boats now there, opposite the island, transferred at once to the river, and will at 2 o'clock P. M. have the island reinforced by all of your regiments now on duty at the canal and at the New

York battery. The pickets will be replaced by the companies of the Nineteenth Massachusetts there.

Very respectfully, your obedient servant,

CHARLES P. STONE, Brigadier-General.

Col. CHARLES DEVENS, Commanding Fifteenth Regiment Mass. Vols.

A true copy.

WM. R. HYSLOP, Lieut. and A. D. C.

HEAD-QUARTERS CORPS OF OBSERVATION, }
POOLESVILLE, Oct. 20, 1861—10½ P. M.

SPECIAL ORDERS, No. —. Colonel Devens will land opposite Harrison's Island with four companies of his regiment, and proceed to surprise the camp of the enemy discovered by Captain Philbrick in the direction of Leesburg. The landing and march will be effected with silence and rapidity.

Colonel Lee, Twentieth Massachusetts Volunteers, will immediately after Colonel Devens' departure occupy Harrison's Island with four companies of his regiment, and will cause the four-oared boat to be taken across the island to the point of departure of Colonel Devens.

One company will be thrown across to occupy the heights on the Virginia shore, after Colonel Devens' departure to cover his return.

Two mountain howitzers will be taken silently up the tow-path, and carried to the opposite side of the island, under the orders of Colonel Lee.

Colonel Devens will attack the camp of the enemy at daybreak, and having routed, will pursue as far as he deems prudent, and will destroy the camp, if practicable, before returning.

He will make all the observations possible on the country, will under all circumstances keep his command well in hand, and not sacrifice this to any supposed advantage of rapid pursuit.

Having accomplished this duty, Colonel Devens will return to his present position, unless he shall see one on the Virginia side, near the river, which he can undoubtedly hold until reinforced, and one which can be successfully held against largely superior numbers. In such case he will hold on and report.

CHARLES P. STONE, Brigadier-General.

Great care will be used by Colonel Devens to prevent any unnecessary injury of private property, and any officer or soldier straggling from the command for curiosity or plunder will be instantly shot.

CHARLES P. STONE, Brigadier-General.

A true copy.

WM. R. HYSLOP, Lieut. and A. D. C.

The following is given as the last order to Col. Baker. It could never have reached him. It shows what report he sent to Gen. Stone, and indicates under what orders he was acting:

HEAD-QUARTERS CORPS OF OBSERVATION, }
EDWARDS' FERRY, Oct. 21—3.45 P. M.

Colonel E. D. Baker, Commanding Right Wing:

COLONEL: Yours of 2.30 is received. I am glad you find your position tenable. If satisfied with it, hold on, and don't let the troops get fatigued or starved while waiting.

Please detail plenty of officers to attend to the food of the men. Do you need more artillery than the eight pieces now at your disposition?

Respectfully, your obedient servant,

CHAS. P. STONE, Brig.-Gen. Com'g.

A true copy.

WILLIAM R. HYSLOP, Lieut. and A. D. C.

In the morning a skirmish took place between the command of Col. Lee, of the Massachusetts Twentieth, who had been ordered to cover Col. Devens' retreat, and about one hundred Mississippi riflemen. Col. Devens then fell back in good order on Col. Lee's position. Presently he again advanced, his men behaving admirably, fighting, retiring, and advancing

in perfect order, and exhibiting every proof of high courage and good discipline. Had the cavalry scouting party sent to him in the morning been with him, then he could have had timely warning of the approach of the superior force which afterward overwhelmed his regiment.

Between twelve and one P. M. the enemy appeared in force in front of Col. Devens, and a sharp skirmish ensued, and was maintained for some time by the Fifteenth Massachusetts, unsupported; and finding he would be outflanked, Col. Devens retired a short distance, and took up a position near the wood, half a mile in front of Col. Lee, where he remained until two o'clock, when he again fell back, with the approval of Col. Baker, and took his place with the portions of the Twentieth Massachusetts and First California which had arrived.

The movement of troops now to the Virginia side was constant—until 700 of the Fifteenth and three companies of the Twentieth Massachusetts, the First California battalion, and some companies of the Tammany Regiment had crossed, and four pieces of artillery.

At one o'clock the order had been given to the right battery detached from the New York Ninth to report to Gen. Baker at the Maryland side of the Potomac, opposite Harrison's Island. In half an hour the four pieces arrived at the spot, in command of Lieut. Bramhall. At this time but little firing was heard upon the opposite shore, and that only desultory.

At about half-past two P. M., however, the firing of musketry suddenly became very brisk, accompanied by occasional discharges of artillery. At this time Col. Baker, who had been actively engaged in superintending the despatch of reinforcements, crossed himself, accompanied by but one officer, Major Young, of his command, leaving word to forward the artillery with all despatch. The means provided for this purpose consisted of two scows, manned by poles, and which, owing to the swiftness of the current, consumed a great deal of time in the trip from the mainland to the island.

Lieut. Bramhall thus describes the crossing in his report: "I took command, and ordered the immediate embarkation of the pieces. I crossed with the first piece, (which happened to be a Rhode Island piece,) accompanied by Col. Cogswell, of the Tammany Regiment, arriving upon the island after a half hour's hard labor to keep the boat from floating down the stream. We ascended the steep bank, made soft and sloppy by the passage of the troops, and at a rapid gait crossed the island to the second crossing. At this point we found only a scow, on which we did not dare to cross the piece and the horses together, and thus lost further time by being obliged to make two crossings. Upon arriving on the Virginia shore we were compelled to dismount the piece and carriage, and haul the former up by the prolonge, the infantry assisting in carrying the parts of the latter to a point about thirty feet up a precipitous ascent, rendered almost impassable with soft mud,

where we remounted the piece, and, hitching up the horses, dragged it through a perfect thicket up to the open ground above, where the fighting was going on.

"During all this time the firing had continued with great briskness, and that the enemy's fire was very effectual was evident from the large number of wounded and dead who were being borne to the boats. But a few moments previous to coming into position the firing had ceased, and when I arrived I found that our men were resting, many with arms stacked in front of them. The ground upon which was such of the fight as I engaged in was an open space, forming a parallelogram, enclosed entirely in woods. Our men were disposed in a semicircle, the right and left termini of which rested upon the woods, with, as near as I could discern, skirmishers thrown out upon each flank, while the convexity of our lines skirted the cliff overhanging the river. The ground sloped from a point about forty yards from the cliff sufficiently to afford a very tolerable cover for our men."

The field was about seventy-five yards in breadth by two hundred in length. At the distant front and down the right and left, a thick dark forest skirted its sides. Behind, the bluff fell steeply off to the river. A winding spur of the field extended a few rods into the woods on the left, half way between the opposing lines. Directly on the left, and near where a crooked path led the Federal force to the fight, a ravine fell slightly off, its opposite bank ascending to the thicket of woods which thus totally surrounded the field. About four o'clock P. M., Col. Baker formed his line for action. At this time no enemy was anywhere visible in rank, but from the woods in the extreme front a galling irregular fire poured out upon his men. They were then ranged, in no very exact order, from right to left, the wings partially covered by the thicket—portions of the centre lying close to the edge of the hill—while others boldly stepped forward, delivered their fire at the woods, returned to load, and advance again and again. The men of the Fifteenth and Twentieth Massachusetts were placed on the right, the Californians on the left, while the artillery, with the Tammany companies, were posted in the centre. A quick consultation was held. Intimations of a large hostile force near were received. No retreat could be effected in safety. The fire was growing hot. A retrograde movement would only bring seven hundred men to the river's brink, with two boats, capable of carrying sixty persons each, to transport them over a swift channel, while it would cause a rush of the enemy upon them. Their only hope was in maintaining their ground until troops by the Edwards' Ferry could force a way to their aid. The enemy had evidently concentrated here under the apprehension that the principal attack would come from this quarter. The battle now commenced in earnest on the left, and was

brought on by pushing two companies forward to feel the enemy in the wood. They advanced half the distance, and were met by a murderous fire from the enemy, which was followed by a terrific volley along their whole front. They still kept their cover, but the bullets rattled against the whole Federal line, which gave a quick reply. Instantly both ends of the field were clouded in smoke, and the contest raged hotly for an hour. Feeling their strength, the enemy pressed down the sides of the field, and the fight grew close until Col. Baker fell while cheering his men, and by his own example sustaining them in the obstinate resistance they were making. The command soon devolved on Col. Cogswell, who saw that the day was lost, and that the time for retreat had come.

The enemy pursued to the edge of the bluff, over the landing-place, and poured in a heavy fire as the Federal force were endeavoring to cross to the island. The retreat was rapid, but according to orders. The men formed near the river, maintaining for nearly half an hour the hopeless contest rather than surrender.

The smaller boat had disappeared, no one knew where. The larger boat, rapidly and too heavily loaded, swamped at fifteen feet from the shore, and nothing was left to the soldiers but to swim, surrender, or die. With a devotion worthy of the cause they were serving, officers and men, while quarter was being offered to such as would lay down their arms, stripped themselves of their swords and muskets and hurled them out into the river to prevent them falling into the hands of the foe, and saved themselves as they could, by swimming, floating on logs, and concealing themselves in the bushes of the forest, and to make their way up and down the river bank to a place of crossing.

The fate of the piece of artillery which had been so effective, is thus described by Lieut. Bramhall, who commanded it:

"Finding that the battle was lost to us, and with but one man left to aid me, (Booth, of the California regiment,) and growing weak and stiff from my wounds, of which I received three, none dangerous, I caused the piece to be drawn down to the edge of the cliff, whence it was afterward thrown down, lodging in the rocks and logs, with which the descent was cumbered, and, assisted by two privates of the Fifteenth Massachusetts Regiment, made my way to the boat and over to the island. Here I found my own section and the other piece belonging to the Rhode Island section, one of which I had had; and leaving directions to command the ford at the upper end of the island with two pieces, and to hold the other in reserve to act where circumstances might require aid to cover the retreat of our own infantry, I crossed to the mainland. I had first despatched a messenger for Lieut. Clark, of our battery, who soon after arrived and took command. The only projectile with which the ammunition chest was provided was the James

shell, I have been told by those from the right and left who could correctly observe their effect, that they burst, and with great effect. The short range at which they were fired would of course hardly admit of any very appreciable deviation from a direct course, such as has been remarked of the projectile. The piece, I have since learned, was taken by the enemy; with it there were but eight or ten rounds of shell, and about twenty blanks. I do not think it was possible to have saved the piece from capture, for it would have required a full half hour to have gotten it down to the river, when if it were shipped upon the boat it would have been necessarily to the exclusion of the wounded, who were being conveyed to the opposite shore. Indeed, I very much doubt if it could have crossed at all, for the scow sunk with its weight of men the next trip after I returned in it. The horses belonging to the piece were all shot; and I learn from Capt. Vaughan, who has since been over to bury the dead, that five of them lay dead in one heap. I regretted that the canister which was to be sent over to us did not reach us, as with it I might have at least kept the enemy sufficiently in check to have given time to many of the wounded who were left on the Virginia side to have escaped."

The report of the Confederate General Evans states his killed and wounded at three hundred. He speaks of his force as twenty-five hundred men, without artillery, engaged against ten thousand with five batteries. The force to which he was opposed was about twenty-one hundred, with one piece of artillery that was served effectively, the other three being fired only at intervals. The Confederate forces engaged were the Eighth Virginia, and Seventeenth and Eighteenth Mississippi Regiments. The First Mississippi was held in reserve.

The Massachusetts Fifteenth lost, in killed, wounded, and missing, three hundred and twenty-two, including a Lieut-Colonel and fourteen out of twenty-eight line officers who crossed. The Massachusetts Twentieth lost, in all, one hundred and fifty-nine. The Tammany companies lost one hundred and sixty-three. The First California Regiment lost three hundred, killed, wounded, and missing.

Meantime at Edwards' Ferry, where the facilities for transportation consisted of two scows and a yawl boat, Gen. Stone was preparing to push forward to the road by which the enemy's retreat would be cut off, if driven. He says:—"The additional artillery had already been sent, and when the messenger, who did not leave the field until after three o'clock, was questioned as to Colonel Baker's position, he informed me that the Colonel, when he left, seemed to feel perfectly secure, and could doubtless hold his position in case he should not advance. The same statement was made by another messenger half an hour later, and I watched anxiously for a sign of advance on the right, in order to push forward Gen. Gorman. It was, as had been explained to Colonel Baker,

impracticable to throw Gen. Gorman's brigade directly to the right by reason of the battery in the woods, between which we had never been able to reconnoitre.

"At four P. M., or thereabouts, I telegraphed to General Banks for a brigade of his division, intending it to occupy the ground on this side of the river near Harrison's Island, which would be abandoned in case of a rapid advance; and shortly after, as the fire slackened, a messenger was waited for, on whose tidings should be given orders either for the advance of General Gorman to cut off the retreat of the enemy, or for the disposition for the night in the position then held.

"At five P. M. Captain Candy arrived from the field and announced the melancholy tidings of Colonel Baker's death, but with no intelligence of any further disaster. I immediately apprised General Banks of Col. Baker's death, and I rode quickly to the right to assume command. Before arriving opposite the island, men who had crossed the river plainly gave evidence of the disaster, and on reaching the same I was satisfied of it by the conduct of the men then landing in boats.

"Orders were then given to hold the island and establish a patrol on the tow-path from opposite the island to the line of pickets near the Monocacy, and I returned to the left to secure the troops there from disaster, and make preparations for moving them as rapidly as possible.

"Orders arrived from Gen. McClellan to hold the island and Virginia shore at Edwards' Ferry at all risks, indicating at the same time that reinforcements would be sent, and immediately additional means of intrenchments were forwarded, and Gen. Gorman was furnished with particular directions to hold out against any and every force of the enemy."

The crossing was ultimately continued, and by Tuesday morning four thousand infantry, a section of Ricketts' battery, and Van Allen's cavalry detachment were safely on the Virginia shore. Five hundred feet of intrenchment was thrown up. At 3 A. M. on Tuesday, Gen. Banks arrived and took command.

All Tuesday night the whistles of the locomotives bringing Confederate reinforcements to Leesburg were distinctly heard. On Tuesday morning Gen. McClellan was disposed to hold the position on the Virginia side, but further information caused a change of purpose. A bridge of boats taken from the canal, together with others passing up and down which were stopped, was formed, and on Wednesday the entire force returned to the Maryland shore.

The first cause of failure consisted in the lack of suitable means of transportation. The Federal force at Ball's Bluff was evidently outnumbered and overpowered. The crossing was at an exceedingly unfavorable spot; it was the same as crossing two ferries at a point where the current being narrow, becomes swifter. The movement should have ceased with what had been done on Sunday night. No suitable preparations were made for that afterward undertaken.

BALTIMORE is the principal city of Maryland, having in 1860 a population of 212,418. It is situated on a small bay or estuary which extends about two and a half miles inland from the north side of Patapsco river, about twelve miles from its entrance into Chesapeake Bay. It is about two hundred miles by ship channel from the ocean, and thirty-eight miles by railroad northeast from Washington, and ninety-eight miles southwest from Philadelphia. Its central position and admirable situation has made it a place of large trade with the Northern and Southern States. Possessing slaves like the Southern States, the citizens were nevertheless quiet spectators of the agitations in the extreme North and South. A handful of votes were cast in favor of Mr. Lincoln for President, but the sentiment of the people assimilated rather with that of Virginia, on the South, than with Pennsylvania, on the North.

A public meeting was held on the evening of the 19th of December to listen to an address from A. H. Handy, the Commissioner sent to Maryland by the State of Mississippi. His view of the object of the seceding States was thus presented to the meeting: "Secession is not intended to break up the present Government, but to perpetuate it. Our plan is for the Southern States to withdraw from the Union for the present, to allow amendments to the Constitution to be made, guaranteeing our just rights; and if the Northern States will not make these amendments, by which these rights shall be secured to us, then we must secure them the best way we can. This question of slavery must be settled now or never. Many remedies have failed, we must try amputation to bring it to a healthy state. We must have amendments to the Constitution, and if we cannot get them we must set up for ourselves." This was followed in a few days by movements for a Union meeting. At the preliminary meeting, for completing the arrangements, Archibald Sterling, upon taking the chair, made this pithy address: "Gentlemen, I thank you for the honor you have done me. I cannot hesitate when my countrymen call on me at such a time as this, for I hold every thing I possess, property, family, and life, of slight value when compared with country; and I consider the maintenance of its Union as our only safeguard." The meeting which ensued upon the completion of these arrangements, was one of the most impressive and influential assemblages convened in Baltimore for political purposes. The Union and Major Anderson were greatly cheered, and the word "secession" appeared to be very repugnant to the feelings of the assemblage.

The following, one of a large number of resolutions passed, is expressive of the position of those present:

Resolved, That the present condition of our country demands of all who love her a spirit of fairness, of candor, of conciliation, of concession, and of self-sacrifice; and that we hail with thankful and hopeful hearts the patriotic efforts now being made in Congress for the settlement, as we trust forever, of the

dangerous questions at issue, on some constitutional, just, and equitable principle; and that such of our statesmen and States, whether of the North or of the South, as may contribute most to this holy end, will challenge the highest place in the affections of our country; and those who may refuse to lend their aid to this holy purpose may justly expect, as they will be sure to receive, the condemnation and reprobation of the present, as well as of future ages.

The city, however, remained an inactive spectator of the progress of events, until the attack upon Fort Sumter. The excitement then aroused was most intense, and efforts were made by the friends of the seceded States to turn it to their benefit, and even, if possible, secure the secession of Maryland.

Through Baltimore passed the only line of railway from the North and East to Washington. New England, New York, New Jersey, and Eastern Pennsylvania, in response to the President's proclamation, might arm every man for the defence of Washington; but, as the only line of communication by land was through Baltimore and Maryland, an obstruction here might delay their progress until forces from the South seized the National city. Apprehensions of disturbance upon the passage of troops through the city for Washington were excited. On the 18th of April the Marshal of Police issued his orders to cause a vigilant eye to be kept on all persons attempting to incite riot or disorder, and to have them followed and arrested. He also received from the officers of the "State-Right Association" the most solemn pledge that no demonstration would be made against the Federal troops expected to pass through the city. He said, "the peace of Baltimore will be maintained at all hazards."

The Mayor of the city issued a proclamation invoking all good citizens to uphold and maintain the peace and good order of the city, and to refrain from the expression of sentiments that might have an irritating effect.

On the 19th, a body of troops from the North were expected to arrive by the Philadelphia and Baltimore Railroad. At the depot a crowd of two or three thousand persons gathered. Soon after 11 o'clock in the forenoon, the train from Philadelphia, comprising twenty-nine cars, arrived. Without disembarking the soldiers from the train, horses were attached to the several cars, which were drawn along Pratt street to the Camden station. Six cars were permitted to pass without any particular disturbance except hooting and yelling. The horses attached to the seventh car becoming restive, were detached, and the car moved without their aid nearly to Gay street, where a body of laborers were engaged in repairing the bed of the street, and for this purpose removing the cobble stones.

Some thirty or forty men assembled at this point, having followed the car from the depot, and with cheers for President Davis and the Southern Confederacy, hurled bitter taunts at the Northern Black Republicans, as they termed them. The troops remained in perfect silence.

This continued for several minutes, when, as the horses were again attached and the car moved off, it was proposed to stone it. Before the car had gone twenty yards, almost every window therein was broken to pieces, and a portion of the crowd followed a considerable distance hurling paving-stones. The eighth car was treated in the same manner, but the ninth car, apparently being empty, or at least no person being visible except the driver of the team, escaped with only one stone thrown.

The tenth car was observed approaching from Pratt street bridge, when a number of persons, seizing the picks in the hands of the laborers, made an ineffectual effort to tear up the track. Finding that they could not succeed, as a last resort they took up the paving-stones, and threw them on the track, almost covering it from observation. They also dumped a cart-load of sand on the bed of the track, placing also four or five large anchors thereon, having bodily removed them from the sidewalk. This being accomplished, they, with loud hurrahs, dared the troops to come on; but the latter, observing the posture of affairs, deemed it more prudent to turn back to the President street depot.

Mayor Brown hastened to the President street depot, and endeavored to prevent any disturbance. At this point there still remained upwards of twenty cars filled with the troops, and five or six cars which had been used for the reception of ammunition, baggage, &c.

After the lapse of a quarter of an hour, the command was given for the troops to disembark and form on the outside. While forming, they were surrounded by a dense mass of people, who impeded their march, up President street by every possible means. Stones were thrown in great numbers. At Fawn street two of the soldiers were knocked down by stones and greatly injured.

After the cars had been checked and returned to the depot, as above stated, the military formed and prepared to march through the city.

From the President street depot to Pratt street bridge they were pursued by the excited crowd, who continued to hurl stones, and, it is stated, fired at them with muskets, &c. Mayor Brown had put himself at the head of the column, with a strong body of police. The soldiers continued on up Pratt street over the bridge, where several more were badly injured by the stones thrown at the rear ranks. They came along at a brisk pace, and when they reached Market Space, an immense concourse of people closed in behind them and commenced stoning them.

When they reached Gay street, where the track had been torn up, a large crowd of men armed with paving-stones showered them on their heads with such force that several of them were knocked down in the ranks. These, after lying a few moments crawled on their hands and knees into some of the stores on Pratt street. After they fell there was no further attack made on them, and those thus

wounded were taken to apothecary stores for medical attendance.

At the corner of South and Pratt streets a man fired a pistol into the ranks of the military, when those in the rear ranks immediately wheeled and fired upon their assailants, and several were wounded. The guns of the soldiers that had fallen wounded were seized, and fired upon the ranks with fatal effect in two instances.

After they reached Calvert street they succeeded in checking their pursuers by a rapid fire, which brought down two or three, and they were not much molested until they reached Howard street, where another large crowd was assembled. Some stones were thrown at them, but their guns were not loaded, and they passed on through the dense crowd down Howard street towards the depot.

The scene on Pratt street, as stated, was of a startling character. The wounded soldiers, three in number, were taken up carefully and carried to places of safety by the citizens along the street.

The rear portion of the troops received the brunt of the attack of the assailants. The paving-stones were dashed with great force against their backs and heads, and marching thus in close ranks, they were unable to effectually defend themselves. When they did turn and fire, it was without halt, and being thus massed together, their shots took effect mostly on innocent spectators who were standing on the pavement. They stood the assault with stones without resistance, the entire distance from the President street depot until they reached the vicinity of South street, and then fired obliquely on to the pavements, rather than turning on their assailants. The police did their utmost to protect the troops from assault, and partially succeeded until they reached Gay street, where the crowd, armed with paving-stones, were collected. They rushed in between the police and the rear ranks, driving them back, and separating them from the military. After the firing commenced, the assaulting party dispersed, and for the balance of the route there was no attack upon them. The four soldiers who fell wounded in the street, were struck down between Gay and Calvert streets, where the fiercest of the attack was made on them. The troops composed the Sixth regiment of Massachusetts Infantry, commanded by Colonel E. F. Jones, in all eleven companies, with an aggregate of eight hundred and sixty men, rank and file.

It was about half-past twelve o'clock when the train left the Camden station. A few minutes afterwards, a discharge of firearms attracted the attention of the crowd to the corner of Pratt and Howard streets, where a body of infantry from one of the Northern States, about one hundred and fifty strong, were seen rapidly approaching the depot, and no doubt anxious to reach the cars.

The excitement now was beyond description, and a man displaying the flag of the Confeder-

ate States seemed to be the rallying point of the disaffected people. Some of these assaulted the command with stones, when a number of the latter discharged their muskets. At least twenty shots were fired, but it happily proved that no person was injured. There seemed to be but little discipline among the troops, especially as they rushed along pell-mell. Whilst they were entering the cars a crowd of young men gave them several volleys of bricks and stones, some of which demolished the windows of the cars, whereupon three or four of the privates pointed their muskets through the car windows and fired, but no one was injured.

The baggage and munitions, in two cars, were seized by the crowd, but rescued by the police. Other troops were sent back to the borders of the State by orders of Gov. Hicks. The military of the city were called out, and quiet was restored at evening. Among the killed was Robert W. Davis, a member of a mercantile firm, and a person held in high esteem by a large circle of friends and acquaintances. Nine citizens of Baltimore were killed, and many wounded. Twenty-five of the wounded Massachusetts troops were sent to the Washington hospital.

During the night following a report prevailed that more Northern troops were approaching by the Northern Central Railway. It was immediately resolved to destroy the bridges nearest the city, on both the Northern roads ending in Baltimore. The bridge at Canton was thus destroyed, and two bridges between Cockeysville and Ashland; also the bridges over Little Gunpowder and Bush rivers. This was ordered to be done by the authorities of Baltimore. Upon a representation of the events to President Lincoln, he ordered that "no more troops should be brought through Baltimore, if, in a military point of view, and without interruption or opposition, they can be marched around Baltimore."

The public mind continued in a feverish state from the excitement of Friday, when unfounded reports that Northern troops were approaching the city, aroused a most indescribable tumult, like ten thousand people bereft of reason. The error of the rumors becoming finally known, peace and order were restored.

The transmission of the mails, and the removal of provisions from the city, however, were suspended by the orders of the Mayor and Board of Police. Four car loads of military stores, clothing, tents, and other army equipments, sufficient for the accommodation of a thousand men, and the property of the Government, were thus detained. On the 24th, the city presented much the appearance of a military camp. The number of volunteers there enlisted, was put as high as 25,000. Large quantities of provisions were seized, and its departure from the city stopped. About four hundred picked men left the city for the Relay House, on the Baltimore and Ohio Railroad, for the purpose of seizing and holding that important strategic point. They were followed by a force of about

two hundred men, having with them four field-pieces and an abundance of ammunition. It was the intention of the military authorities to concentrate there about 1,200 men. The object of the seizure was to cut off the communication of the Pennsylvanians with Washington by that route.

The troops at Cockeysville were removed to York, Pennsylvania.

Immediately upon the departure of the train, the authorities of Baltimore County despatched a body of armed men to follow in the rear, and destroy the bridges, which they did; burning all the bridges, large and small, from Ashland to the Maryland line, with one exception, the "Big Gunpowder Bridge."

The turnpike from Ashland to York was literally black with vehicles of every description, containing whole families from Baltimore, who were hurrying to the country. A great many strangers were also proceeding to Pennsylvania, for the purpose of getting into the more Northern States.

Unparalleled as was the excitement in Baltimore, after one week quiet was not only restored, but a counter-revolution took place, which by its mere moral force reestablished the control of reason and judgment.

On the 5th of May, the volunteer militia were dismissed by the authorities.

On the 10th of May, thirteen hundred troops landed near Fort McHenry from transports, and were thence transferred by trains to Washington.

The Board of Police Commissioners had at noon detailed a large police force, who were present at Locust Point, and acted with great efficiency, under the direction of Marshal Kane. The Board of Commissioners were present in person, as also the Mayor. Few spectators were present at Locust Point, but the wharves on the city side were filled with persons, who quietly looked on the scene of the disembarkation, which was very tedious, and was not concluded until between six and seven o'clock in the evening.

The troops were Sherman's Battery, five companies of the Third Infantry from Texas, and a Pennsylvania Regiment.

On the 5th of May, the United States Volunteers under the command of General Butler, had taken possession of the Relay House on the Baltimore and Ohio Railroad, and proceeded to fortify their position. Subsequently, on the 13th, he moved a portion of his troops to Baltimore. It soon became known in the city, and a number of people went to the Camden station to witness the arrival.

About half-past seven o'clock a long train came, containing a portion of the troops. They disembarked in good order, and marched from the depot down Lee street and other streets to Federal Hill, and, moving to the high ground surrounding the Observatory, stacked arms, and made preparations for a long rest.

The force under command of General Butler was composed of a portion of the Boston Light Artillery, Major Cook; a strong detachment

of the Sixth Massachusetts Regiment, Colonel Jones, and about five hundred of the Eighth New York Regiment, Lieutenant-Colonel Waltenburg.

On the route to the Hill the streets were thronged with people, who greeted the military with cheers at every step, the ladies at the windows and the doors joining in the applause by waving their handkerchiefs.

Thus quietly was military possession taken of the city of Baltimore. On the next day considerable reinforcements arrived.

On the same day, the commanding General issued a proclamation to the citizens. He thus states his object in marching troops within the city:

DEPARTMENT OF ANNAPOLIS, }
FEDERAL HILL, BALTIMORE, May 14, 1861. }

A detachment of the forces of the Federal Government under my command have occupied the city of Baltimore for the purpose, among other things, of enforcing respect and obedience to laws as well of the State, if requested thereto by the civil authorities, as of the United States—laws which are being violated within its limits by some malignant and traitorous men—and in order to testify the acceptance by the Federal Government of the fact that the city and all the well-intentioned portion of its inhabitants are loyal to the Union and the Constitution, and are to be so regarded and treated by all. To the end, therefore, that all misunderstanding of the purposes of the Government may be prevented, and to set at rest all unfounded, false, and seditious rumors, to relieve all apprehensions, if any are felt by the well-disposed portion of the community, and to make it thoroughly understood by all traitors, their aiders and abettors, that their rebellious acts must cease, I hereby, by the authority vested in me as commander of the department of Annapolis, of which the city of Baltimore forms a part, do now command and make known that no loyal and well-disposed citizen will be disturbed in his lawful occupation or business; that private property will not be interfered with by the men under my command, or allowed to be interfered with by others, except in so far as it may be used or be in course of preparation to be used to afford aid and comfort to those in rebellion against the Government, whether here or elsewhere; all which property, munitions of war, and that fitted to aid and support the rebellion, will be seized and held subject to confiscation; and therefore all manufacturers of arms and munitions of war are hereby requested to report to me forthwith, so that the lawfulness of their occupations may be known and understood, and all misconception of their doings avoided.

Other suggestions and requests were contained in the proclamation, which were of inferior importance. The first assertion of military authority over the city authorities took place soon after.

General Butler detailed Colonel Hare, of Elliott's Mills, with a force of thirty-five soldiers of the Massachusetts Regiment, to demand a surrender of the arms which were stored by the city authorities in the warehouse corner of Gay and Second streets. The Colonel with his command marched from Federal Hill through various streets, and reached the warehouse at about a quarter of four o'clock. Three policemen were on guard at the corner, and were immediately accosted by Colonel Hare, who demanded possession of the warehouse and its contents in the name of the Gen-

eral Government. The appearance of the military at that point attracted at first but a small crowd, but in the course of a few minutes, it rapidly increased in numbers. The policemen stated that they had no authority to yield to the demand of Col. Hare, until ordered to do so by Marshal Kane, who was immediately informed of the demand. The Marshal, accompanied by Deputy Marshal Gifford, and Captain Bowen and several policemen, repaired to the warehouse, where the same demand, in the name of Gen. Butler, acting by order of the President, was made. The Marshal stated that without the orders of the Police Commissioners possession could not be given. A lengthy conversation ensued between him and Colonel Hare, while Mr. John W. Davis, one of the Commissioners, hastened to the office of the Board, where, after consideration of the demand, it was determined to surrender the arms under a protest. The military force was during this time drawn up in double file on the pavement in front of the warehouse. Charles D. Hinks, Esq., one of the Commissioners, after a delay of a half-hour, drove in his carriage to the corner, and, after alighting, gave Marshal Kane a note, informing him of the result of the action of the Board, and which was communicated to Colonel Hare, who wrote on the envelope an acceptance of the terms.

The doors of the warehouse were then opened, and immediately thereupon a number of furniture wagons and drays were drawn to the front, and laborers commenced the work of loading them with boxes containing arms. After being loaded, the vehicles passed along Second street, until that street from South to Gay was nearly filled, when they were driven over to Federal Hill and thence to Fort McHenry. In all there were thirty-five wagons and drays thus loaded with 110 boxes, containing 2,200 muskets, and sixty-seven boxes, each containing 60 pikes or spears, making a total of 4,020 spears. While the vehicles were loaded, the crowd was increased by persons who, on hearing the seizure, were somewhat desirous of provoking a collision, but fortunately wiser counsels prevailed, and but little disorder was manifested.

On the 16th of May, the regular passenger trains between Baltimore and Washington resumed their usual trips. Baltimore subsided into one of the most quiet cities of the Union. The military encampment was, however, maintained.

Subsequently, on the 27th of June, a military force was sent to the house of the Marshal of Police, Kane, by whom he was arrested and escorted to Fort McHenry. A Provost Marshal was appointed by Gen. Banks, now in command of this military department, and a proclamation issued, in which the commanding General thus stated his designs:

It is not my purpose, neither is it in consonance with my instructions, to interfere, in any manner whatever, with the legitimate government of the people of Balti-

more or Maryland. I desire to support the public authorities in all appropriate duties; in preserving peace, protecting property and the rights of persons, in obeying and upholding every municipal regulation and public statute consistent with the Constitution and laws of the United States and of Maryland.

But unlawful combinations of men, organized for resistance to such laws, that provide hidden deposits of arms and ammunition, encourage contraband traffic with men at war with the Government, and, while enjoying its protection and privileges, stealthily wait opportunity to combine their means and force with those in rebellion against its authority, are not among the recognized or legal rights of any class of men, and cannot be permitted under any form of government whatever.

Such combinations are well known to exist in this department. The mass of citizens of Baltimore and of Maryland, loyal to the Constitution and the Union, are neither parties to, nor responsible for them. But the Chief of Police is not only believed to be cognizant of these facts, but, in contravention of his duty, and in violation of law, he is, by direction or indirection, both witness and protector to the transactions and the parties engaged therein. Under such circumstances the Government cannot regard him otherwise than as the head of an armed force hostile to its authority and acting in concert with its avowed enemies.

This arrest was made for the reason stated in the proclamation: "Under such circumstances the Government cannot regard him otherwise than as the head of an armed force hostile to its authority, and acting in concert with its avowed enemies." If the opinion of the Government was correct, the arrest was doubtless justly made. But how shall the opinion of the Government be decided to be correct? By the Government itself who makes the arrest, or by an impartial tribunal? These questions excited much discussion at the time, but the public acquiesced in the proceedings of the Government, not only in this instance, but in many others.

The captains of the different police stations were directed to report themselves to the Provost Marshal, and, upon obeying the summons, they were notified that they and their officers would be continued in service, while the strictest injunction was imposed upon them to arrest every one who might attempt to disturb the peace.

The functions of the Board of Police were suspended as soon as Colonel Kenly entered upon his duties as Provost Marshal.

In the mean time, however, a meeting was held by the Police Commissioners and the Mayor—consisting of Chas. Howard, Wm. H. Gatchell, Charles D. Hinks, John W. Davis, and George Wm. Brown, Esqs.—who, after agreeing upon a protest against the suspension of their functions, adopted the following resolution:

Resolved, That whilst the Board, yielding to the force of circumstances, will do nothing to increase the present excitement, or obstruct the execution of such measures as Major-General Banks may deem proper to take on his own responsibility for the preservation of the peace of the city and of public order, they cannot, consistently with their views of official duty, and of the obligations of their oaths of office, recognize the right of any of the officers and men of the police force, as such, to receive orders or directions from any other authority than from this Board.

The Commissioners further resolved that the suspension of their own functions, suspended at the same time the active operation of the police law and relieved the officers and men from duty; and, in pursuance of this decision, they issued a notice to the police captains of the several stations announcing that they had determined upon the disbanding of the force, and directing them to carry out the provisions of that resolve. The men were accordingly summoned to the station-houses and notified that their services as police officers were suspended for the present, though it was intimated that their pay would continue, and that they were to hold themselves in readiness to resume their duties at a moment's notice.

Notwithstanding a notice issued by Colonel Kenly, that every man would be continued on duty, the force was disbanded, and a temporary police force of about four hundred men, immediately enrolled and placed on duty. Munitions of war in considerable quantities were found secreted in the city. In some instances they were the property of the city, in a few others they belonged to citizens.

On the 1st of July, the Commissioners of Police were arrested. The reasons for this arrest are thus stated by the commanding officer, General Banks, who ordered it:

In pursuance of orders issued from the Headquarters of the Army at Washington for the preservation of the public peace in this department, I have arrested and do now detain in custody of the United States the late members of the Board of Police—Messrs. Charles Howard, William H. Gatchell, Charles D. Hinks, and John W. Davis.

The incidents of the past week afforded full justification for this order. The head-quarters under the charge of the Board, when abandoned by the officers, resembled in some respects a concealed arsenal. After public recognition and protest against the "suspension of their functions" they continued their sessions daily. Upon a forced and unwarrantable construction of my proclamation of the 28th ultimo, they declared that the police law was suspended, and the police officers and men put off duty for the present, intending to leave the city without any police protection whatever. They refused to recognize the officers or men necessarily selected by the Provost Marshal for its protection, and hold subject to their orders, now and hereafter, the old police force, a large body of armed men, for some purpose not known to the Government, and inconsistent with its peace or security.

On the 19th of July, General Dix was ordered to the command of the troops stationed at Baltimore, and the city thenceforth remained peaceful and tranquil. The troops have continued there throughout the year. The usual election in October for city officers was very quietly conducted. The vote was 9,587. This exceeded the vote at the previous election for members of the Legislature by 338. Except a few scattering votes there was no opposition to the Union candidates. The State election took place in November, in a quiet and peaceable manner. In Baltimore a number of arrests were made on the charge of disloyalty, which prevented a full vote for the opposition party. The total vote polled was 21,069, of which the Union candidates received 17,722.

BALTIMORE AND OHIO RAILROAD. This costly and important railway, extending from Baltimore to the Ohio River at Wheeling, and by its connection with Western roads forming one of the four great trunk roads between the Atlantic and the Mississippi, has suffered severely from the destruction of its track, bridges, locomotives, and cars by order of the Confederate Generals, who seemed determined to so far destroy it as to prevent its being used during the war for the transportation of Union troops or stores. On the 16th of May several bridges on the road were destroyed, and portions of the tracks torn up; on the 14th of June the village of Harper's Ferry was burned and the costly railroad bridge there destroyed; on the 23d of the same month, by order of General J. E. Johnston, then in command of the Confederate forces in that section, 46 locomotives and 305 cars were gathered at Martinsburg, Va., and wood from the Railroad Company's supplies piled around them and set on fire, thus ensuring their complete destruction. The property thus burned was valued at \$400,000 or \$450,000. Still later, orders were issued, about the 20th of October, by the Confederate General commanding, directing the destruction of bridges and tunnels as far as the south branch of the road. A part of these orders were executed, but the mischief intended was checked before its full consummation by the capture of the colonel who was directed to superintend it at Romney, Va., Oct. 25. In Dec., after the occupation of the line of the railroad by the Federal troops, and the commencement of its repair by the Railroad Company under their protection, efforts were again made to obstruct the work and destroy some of the bridges and tunnels yet remaining. These efforts were unsuccessful, and on the 31st of December only 50 miles of its entire length (379 miles) remained un-repaired.

BANKS, U. S. The general stagnation that overtook the business of the country in 1861, produced a great change in the condition and operations of the banks through which that business is for the most part conducted. The banking business had been very prosperous for a period running back to the close of the Mexican war. When the famine in Ireland and Western Europe caused an unprecedented demand for breadstuffs and provisions, the activity imparted to trade by that occurrence was attended by a demand for currency and banking facilities, which manifested itself in the increased profits of the existing institutions, and in a rapid multiplication of new banks, following the law of trade by which profitable employment attracts capital.

The settlement of California was, in 1849, followed by the gold discoveries which powerfully excited all civilized countries, sent a crowd of emigrants to the new mines, and imparted a new impulse to trade in the United States. Raw products and merchandise were

largely shipped to profit by the gold production, and the spirit of enterprise was not slow in affecting the banks. They soon showed signs of a greater degree of prosperity than ever before. New York City, as the financial centre of the Union, added rapidly to the number of its banks, and all of the States, to a greater or less extent, followed in the same direction. The banking system underwent a change, however. In 1838, when all the banks of the country were involved in a common disaster and the system became very unpopular, the State of New York projected the "free banking system," by which all banks of circulation in the State were required to deposit with the State Comptroller security in the public stocks to an amount equal to their circulation. In case they failed to redeem their notes in specie, the stocks were to be sold and the redemption made good. The law was from time to time amended until it approached as near perfection as was possible. The principle of it was embodied in the State Constitution of 1846, which required "ample security" from all banks of circulation. It seems to be a misnomer to call that "free banking," where restrictions were imposed where there had been none before; but the ingenuity of legislators had been taxed to make banking secure by legislation, and the chartered banks had been restricted in the amount of their loans and liabilities in proportion to their capitals, while there was no restriction upon the circulation. That plan failed. It was now thought if the circulation should be made entirely secure, the associations might organize under a general law without a charter, and be unlimited as to the amount of capital or loans. This system working well in New York, became popular, and under the favor with which it was received banks began to multiply in the Western States. The law was adopted by several States at the following dates:

	Year of adoption.	Stocks held 1860.	Circulation.
New York.....	1838	\$26,897,874	\$29,959,506
Michigan.....	1849	192,381	222,197
New Jersey.....	1850	962,911	4,511,582
Virginia.....	1851	3,584,073	9,512,197
Illinois.....	1851	9,226,691	8,951,723
Ohio.....	1851	2,153,552	7,983,589
Indiana.....	1852	1,849,546	5,390,246
Wisconsin.....	1854	5,081,504	4,429,855
Missouri.....	1856	725,620	7,584,885
Tennessee.....	1857	1,235,432	5,535,875
Louisiana.....	1858	6,342,096	11,579,213
Iowa.....	1858	101,849	568,806
Minnesota.....	1858	50,000	50,000
		\$57,951,954	\$97,212,527

The multiplication of banks was thus rapid in the Northern and Southwestern States during a period when railroad expenditure in those sections was very great, and their operations became extended, but apparently not more so than the general increase of population and business warranted. The following table will show the general state of affairs at various periods:

BANKS OF THE UNITED STATES—FOREIGN TRADE—POPULATION.

	No. of Banks.	Capital.	Loans.	Specie.	Circulation.	Imports and Exports.	Population.
1880.....	830	145,192,268	200,451,214	22,114,917	61,328,598	144,726,428	12,866,020
1840.....	901	353,444,692	462,896,527	33,105,155	106,963,572	239,227,465	17,069,458
1848.....	691	228,861,945	254,544,937	33,515,806	58,563,603	149,070,279
1850.....	572	227,469,074	412,607,635	48,671,183	155,012,911	330,037,083	23,191,876
1860.....	1,562	421,880,095	691,945,980	53,594,587	207,102,477	762,288,550	31,676,267

The great speculative expansion during the decade ending with 1840 had increased the number of banks by 571, and their aggregate capital by \$213,000,000, or a far larger amount than the increase of business as indicated in the sum of imports and exports. The collapse which then took place reduced the capital by \$130,000,000, and from that time recovery commenced. The increase of business was considerable up to 1850, and following that increase the bank loans rose \$158,000,000, without any increase in capital, thus affording large profits. An interest of 7 per cent. on the loans of

1848 would give 8 per cent. on the capital employed in that year. 7 per cent. on the loans of 1850 would give 13½ per cent. on the capital employed in that year, showing an increase of 70 per cent. in bank profits. It is therefore not surprising that the banks began rapidly to multiply, not only to partake of existing business, but to compete for the large increase indicated in the sum of the external trade in 1860.

The following table indicates the increase of loans and circulation according to geographical divisions.

States	No. of Banks.		Loans.		Circulation.	
	1851.	1861.	1851.	1861.	1851.	1861.
Eastern.....	313	506	\$108,504,955	\$194,866,619	\$32,229,921	\$44,991,955
Middle.....	309	483	109,579,769	304,227,203	45,625,089	52,573,551
Southern.....	90	147	50,437,459	79,252,290	36,176,977	39,552,760
South-Western.....	32	133	51,011,473	69,069,505	25,607,465	34,090,755
Western.....	77	233	22,773,997	29,332,504	15,379,509	29,957,056
	871	1,567	\$412,607,635	\$696,788,421	\$155,012,911	\$202,005,767

There is no doubt but that, notwithstanding the apparently large increase of banking up to 1861, it was not generally unsound in its operations. At that time, through political causes, the vast trade on which it was based suddenly ceased. The Southern States were producers of an annual value of \$400,000,000 of cotton, tobacco, rice, sugar, naval stores, lumber, &c.; all raw products which they exported and sold. They were not manufacturers or importers to any considerable extent, and the proceeds of their sales were appropriated to the payment of the articles that were purchased at the North. The produce of the West, the manufactures of the East, and the imports of the Middle States, all found their way south for sale to an extent equal to the production of that region. This vast interchange, with all the ramifications, of raw materials into the hands of manufacturers, and of the completed goods to the consumers, hinged upon bank credits. The political events at the close of 1860 annihilated that exchange of commodities and with it the functions of the banks. The condition of all the banks, Jan. 1, 1861, was as is shown in table, p. 62.

It was inevitable that when the business which called this banking movement into action ceased, the bank credits should rapidly diminish. Where the institutions were based simply upon credit as were those banks of circulation that had sprung up at the West under the new laws, they were swept out of existence by the revulsion, and those which were pos-

sessed of real capital found their means returning upon their hands in great volume and without any regular opening for its employment. This was the case with the Atlantic cities. Their loans were, as the merchants collected in their accounts, paid off without the usual amount of new business paper being created. Hence the discount line ran down while the deposits increased. The above table indicates that while the Western and Interior bank circulation increased the most rapidly, the loans or actual deposits advanced to commerce increased, in the three cities of Boston, New York, and Philadelphia, \$150,000,000 out of an aggregate increase of \$284,000,000, for all the banks in the Union. Of an increase of \$47,000,000 in circulation, 24,000,000, or one-half, was south and west. When, through the cessation of business, new paper ceased to be created and old was paid as it matured, the advances of the eastern banks returned into their vaults.

The tables of the official weekly returns of the banks of the cities of New York, Boston, and Philadelphia, throughout the year 1861, showing the weekly clearings in New York, are shown in pp. 63, 64, 65.

Notwithstanding the large subscription made to the Federal and State loans, amounting to nearly \$50,000,000, the loans of all the banks up to August had decreased some \$26,000,000, and the deposits had increased nearly \$5,000,000, up to the 17th August, when the institutions came forward to assist the Government. Con-

**GENERAL STATEMENT OF THE CONDITION OF THE BANKS OF THE UNITED STATES ACCORDING TO RETURNS DATED NEAREST TO
JANUARY 1, 1861.**

Name of State or Territory.	Number of banks.	Number of branches.	Date of returns.	Capital.	Loans and discounts.	Stocks.	Real estate.	Other investments.	Due by other banks.	Notes of other banks.	Cash items.	Specie.	Circulation.	Deposits.	Due to other banks.	Other liabilities.

gress had passed a law authorizing a loan of \$250,000,000 in 6 per cent. 20 years' stock, or three-year bonds at 7 $\frac{3}{8}$ per cent. per annum interest, or in notes to be issued on demand, to circulate as money to the extent of \$50,000,000, of denominations of not less than \$5. The banks of the three cities, after various consulta-

tions, agreed to take \$50,000,000 of the three-year 7 $\frac{3}{8}$ bonds, not as an absolute purchase but to re-sell to the public; to have the privilege of taking \$50,000,000 more Oct. 15, and a third amount of \$50,000,000 Dec. 1—the Secretary in the mean time to appeal to the people, and open agencies for the sale of the notes on

account of the banks. The bonds were to draw interest from Aug. 19, and the Secretary to draw for the money no faster than he wanted it. The amount to be divided among the banks of the three cities according to their capitals; New York \$30,000,000, Boston, \$15,000,000, and Philadelphia \$5,000,000. Boston subse-

quently refused to take more than the proportion of \$10,000,000, and New York therefore took \$35,000,000. Accordingly, the bank returns of Aug. 24 show the increase of the loans to the Government, and the corresponding increase of deposits against which the Department drew, at the rate of about 10 per cent.

PHILADELPHIA.

per week. The loan, being offered to the public, went off slowly, and when the time to take the second instalment came round a large portion of the first remained on hand. The second \$50,000,000 was, however, placed to the credit of the Government. When, however, the 1st of December approached, and the Government

wanted the third amount of \$50,000,000, the banks began to hesitate. The three-year bonds did not sell, and they hoped, by changing the shape to 6 per cent. twenty years' stock at a rate 89-32 per cent. equal to par for a 7 per cent. stock, to be able to sell some of it in Europe or England. Accordingly they took

\$50,000,000 of the stock. There remained then \$100,000,000 of the authorized loan, but the Secretary had issued \$25,000,000 in demand notes, and the banks claimed the right to take \$50,000,000 more three-year bonds in Jan. if they should then elect to do so. In all this time there had been no steps taken to place the Government finances on a sound and permanent footing; the arrangements with the banks were justly regarded as mere makeshifts. The institutions had advanced the money of their depositors for Government securities, in the hope of being able to get the money back by selling them to the public. The public had not purchased them, however, and they had depreciated on the hands of the banks, while

capitalists stood aloof. The meeting of Congress was anxiously looked forward to for a means of relief. It was supposed that the annual report of the Secretary would present some practical and well-digested plan of finance that would restore confidence. When the document appeared, however, public expectation was disappointed at a moment when the greatest anxiety prevailed in respect to the relations with England, growing out of the capture of the Trent. The Secretary had no plan, a foreign war threatened, and the banks were loaded with securities they could not sell. The effect of this state of things upon the banks is manifest in the following figures:

The depositors made rapid drafts on the specie,

DATE.	Loans.	Specie.	Weekly Decrease.	Deposits.	Weekly Decrease.
Dec. 7.....	\$159,793,958	\$42,818,610		\$133,618,787

which ran down \$18,334,732 in four weeks, and the banks suspended Dec. 30. They were followed by those of other cities. The condition of the banks in respect to the loan was as follows:

BANKS OF	Capital.	Subscribed.	Sold to the Public.	Balance in Bank.
N. York..	\$69,907,000	\$102,056,835	\$35,000,000	\$67,056,835
Boston ..	38,231,700	29,159,095	10,000,000	19,159,095
Phila....	11,811,485	14,579,548	5,000,000	9,579,548
Total..	\$119,950,185	\$145,795,478	\$50,000,000	\$95,795,478

When the number of banks in the city of New York began to multiply in the years 1852-'3, and from 31 soon reached 55 in number, the labor of keeping the mutual accounts was immensely increased; it was requisite for each institution to keep as many as there were banks, and to settle daily. It became apparent that the work might be simplified, and the clearing-house system was adopted. By this each bank sends every morning to the clearing-house all the checks, drafts, and demands that it may have received the day previous in the course of business; all these are mutually exchanged, and those institutions against which there are balances pay the amount. This was adopted in 1853, and has since been in successful operation. The banks of Boston and Philadelphia adopted subsequently the same plan. The settlement in balances was effected by each bank making a proportionate deposit of specie in a common fund, and receiving for it certificates of convenient size, and these were used in the payment of balances. The amount of these clearings was annually as follows in New York:

	Clearings.	Balances.
1854.....	\$5,750,455,987 06	\$297,411,493
1855.....	5,362,912,098 37	289,694,137
1856.....	6,906,213,828 47	334,714,489
1857.....	8,383,226,718 06	365,318,901
1858.....	4,756,664,386 09	314,238,910
1859.....	6,443,005,956 01	363,984,682
1860.....	7,281,148,056 69	308,693,438
1861.....	5,915,742,758 05	353,333,944
Total eight years.....	\$50,704,304,288 80	\$2,627,434,994

These figures not only indicate the immense increase of transactions in a series of years, but show also the violent fluctuations which take place in business from year to year. The largest amount was in the year of panic 1857, and it fell off nearly one-half in the next year as a consequence of the panic.

In November, 1860, the banks agreed to lodge with the clearing-house committee a portion of the loans, on which each was to receive 75 per cent. of the amount in a "loan certificate" bearing 7 per cent. interest, which certificates were to be used in the payment of balances. When the institutions had taken the Government loan, the $7\frac{3}{10}$ Treasury notes were deposited for certificates, and subsequently when the demand notes of the Government became currency, the banks under the law of Congress deposited these with the assistant treasurer, and received 5 per cent. certificates of deposits, which were used in place of the loan certificates, for the adjustment of clearing-house balances.

While the growth of bank facilities had been very rapid at the East, it was for the most part actual capital to be loaned or advanced upon actual business paper, or such as represented commodities *in transitu*. The increase at the West, however, represented credits, and took the shape rather of circulation than loans. The basis of the circulation was Western and Southern stocks, and they kept afloat as long as exchange remained in favor of the section. The political events changed the current of exchange and greatly depreciated the value of the stocks held, which were as follows (p. 67) in three Western States.

Such was the magnitude of free banking in three States only. The effect of the war panic was to drive the circulation in faster than the banks could redeem it, under which circumstance it became the duty of the State officers to close up the banks and sell the securities. This was done at the moment the expedition

" circulation	11,010,887	4,550,682	1,160,851	16,752,320

to Fort Sumter, by making war inevitable, ruined the value of the securities, and prices fell heavily: Missouri, from 70 to 36; Tennessee, 78 to 34; Virginia, 78 to 40; Louisiana, 80 to 51; N. Carolina, 80 to 44; Georgia, 100 to 53; and other stocks to a greater or less extent. It is no doubt the case that a large portion of the decline was due to the forced sales of the stocks, since it was the duty of the State officers to sell the stocks and redeem the circulation as far as the proceeds would do it. It is a vice of the free banking system that it requires the sales of stock at the moment when the market is the least able to bear them. Hence, unless the margin is very large, the circulation cannot be paid in full. At the close of the year the banks stood as follows:

	Illinois.	Wis'n.	Indiana.	TOTAL.	
	Jan. 1862.	Jan. 1861.	Jan. 1862.	Jan. 1862.	Jan. 1861.
Stocks.....	599,975	2,153,270	1,370,086	4,123,281	20,374,871
Circulation.	503,719	1,634,262	579,164	8,469,733	16,752,320

In Illinois the circulation of 3 of the closed banks was redeemed at par, and that of 57 at from 50 to 80 cents on the dollar. In Wisconsin 23 were redeemed at par, and others at 46 to 80 cents on the dollar. The result has been sales of \$16,251,090 of State stocks upon the Eastern market throughout a year, during which the Government and the several States were also sellers of stocks for war purposes. This operation, originating in the war panic, inflicted a loss of nearly \$5,000,000 upon the holders of notes in those three States.

The State Bank of Indiana, an old chartered institution, did not suspend its payments.

Most of the Southern banks had suspended soon after the election of Nov., 1860, and reliable returns of their movements have not been received.

New York.—March 15, a meeting of bank officers was held, and the resolution of non-intercourse adopted in Nov. against the Chemical Bank was rescinded.

March 19, James M. Cook resigned as su-

perintendent of the Banking Department at Albany.

April 25, the banks of the city renewed the measure of making the specie a common fund.

On the 11th of May the Bank of Albany, having lost a large portion of its capital in unauthorized loans, suspended; it was followed on the 18th by the Bank of the Capital and the Bank of the Interior; and on the 23d the National Bank suspended. In Nov. Mr. Van Alen, receiver of the Bank of Albany, paid a dividend of 46½ per cent. on the liabilities of the bank.

The bankers of Albany addressed a circular to the various banks in the State, to organize an association for the detection of counterfeiting; one means proposed was to offer a standing reward of \$250 for instrumentality in bringing counterfeiters to punishment.

Vermont.—There were many applications for re-charters before the Legislature.

Pennsylvania.—The banks of Pennsylvania had suspended Nov. 19, 1860, and in Jan., 1861, a bill was introduced into the Legislature to relieve the banks from the penalties incurred by that act.

The auditor-general reported that the exact amount of relief notes issued at the general suspension in 1837 was \$2,243,015; of these there were still outstanding \$102,336.

The Legislature discussed a bill requiring the banks west of the Alleghany Mountains to redeem in Pittsburg, and those east, in Philadelphia.

May 16, a bill was passed supplementary to the act for equalizing the currency of the State. It required all banks to receive the notes of all other banks that had paid specie Nov. 19, and to pay theirs out. The resumption of specie payments was fixed for Feb., 1862; the bank notes to be taken for taxes and tolls; the banks were required to redeem in specie as much of their circulation as is required to meet the August interest of the State debt.

Minnesota.—March 8, an act was passed allowing United States stocks, bearing not less than 5 per cent. to be taken as security for bank circulation.

New Jersey.—The Legislature, which was in session in Jan., 1861, had bills before it for the creation of new banks.

Wisconsin.—By the law the banks were exempted from paying specie until after Dec. In Sept. the bankers held a convention at Milwaukee, and resolved to commence the redemption of Wisconsin currency at that city and Madison, Oct. 15, thus anticipating the action of the Legislature. Some of the banks failed to comply with these resolutions, and in Nov. the convention again assembled and resolved that such banks as failed to resume, according to law, December 1, should be wound up. If it was found necessary to make a temporary reduction in the currency of the State, the bankers' committee were authorized to make a requisition on the banks for the purpose.

Illinois.—A bill was introduced into the Legislature in Jan. to create a new banking system for the State. It was to consist of a mother bank at Springfield, with 30 branches in different parts of the State, on a specie basis. This plan was submitted to the people in Nov. and voted down by a large majority.

The bank commissioners notified the auditor of the failure of 17 banks, and that they must be placed in liquidation.

The Legislature passed a bill that no checks or paper of any kind payable at sight, should be allowed grace. All new banks were required to redeem their notes in Chicago or Springfield, at not more than $\frac{3}{4}$ of 1 per cent. discount.

Virginia.—The Governor in January sent a Message to the Legislature on the subject of the banks refusing to supply sufficient specie circulation to meet the July interest on the State debt in specie. The circulation of all the banks was stated at \$9,476,355, and he advised measures to compel them to furnish the required means; the banks, however, subsequently met the requirement of the Governor. The Legislature legalized suspension until March 1st, 1862, on condition of their furnishing specie funds, \$1,024,440, to meet the interest of the State debt, and \$1,284,567 for the January interest.

April 18, the city of Richmond issued small notes, and a great many corporations, towns, and villages pursued the same course.

Louisiana.—The Board of Currency, in January, urged upon the Legislature the propriety of suppressing all notes under \$10. This proposal was approved by the Governor in his Message to the Assembly.

Kentucky.—There were various schemes before the Legislature to increase the bank capital of the State. One, by Senator Andrew Johnson, proposed to the State to start a bank, "the State Bank," with a capital of \$15,000,000, to be made up from stock owned by the State in existing banks, the issues from \$1 to \$100. The profits to go to increase the capital until the fifteen millions should be paid. The bank to keep 33 per cent. of the circulation on hand, and if, by any cause, the amount should fall below, the institution might suspend payments until the quota is recovered.

S. Carolina.—The State Bank issued notice that the bonds of the State authorized for the war of independence, were ready for sale by the institution.

Missouri.—Governor Jackson, in March, signed the bill legalizing suspension of the Missouri banks, and made some important changes in the banking law.

August 16, the 11 banks of St. Louis made a loan of \$250,000 on behalf of the Federal Government.

Ohio.—May, a petition to the Legislature to legalize suspension was reported against unanimously in the Senate Committee. The Board of Control of the State Bank agreed to take \$300,000 of the war loan at par.

Massachusetts.—April 18, the Boston banks addressed the Governor of the State offering 10 per cent. of their capital in aid of the Commonwealth. A law was passed, to take effect June 1, 1861, requiring all banks out of Boston to keep on hand 15 per cent. of their circulation, and deposit balances due a bank in specie in Boston and New York shall be deemed specie after July in each succeeding year; each bank is to add 1 per cent. to its specie, until the aggregate reaches 20 per cent. of the circulation and deposits.

Georgia.—The Bank Convention met at Atlanta, June 3d, and recommended to all banks to receive as currency the Treasury notes of the Confederacy, and to advance their own notes to the Treasury until the Treasury notes could be prepared. The convention adjourned to meet at Richmond, July 24, when they passed resolutions to support the Government.

BARBOURSVILLE, the county seat of Cabell County, in the extreme west of Virginia, situated on the Guyandotte River, a tributary of the Ohio, was the scene of a brilliant skirmish on the 13th July, 1861, which resulted in the expulsion of the Confederate forces from the village. Five companies of Colonel Woodruff's Regiment, belonging to General Cox's division of Federal troops on the Great Kanawha River, started at midnight, on the 12th, from their camp, and marched silently but rapidly upon Barboursville, which, however, they did not reach till two hours after sunrise. On coming in sight of the town they found the Confederate troops drawn up in order of battle, in a very strong, and apparently inaccessible position, commanding their route for two miles. Between them and the Federal troops was a covered bridge, which must be crossed, and which was commanded by the enemy's cannon. The Federal troops entered the bridge at double-quick-step, but found that the planks had been removed from the farther end, and after a moment's delay, were compelled to cross it in single file on the string pieces, subjected to a galling fire. Though necessarily disordered by this movement, they rallied at once, and under a succession of volleys from the Confederate troops, charged bayonets up the precipitous side of the hill, pulling themselves up by the bushes and jutting turf, and rushed, yelling at the top of their voices, upon the enemy, who fled panic-stricken, without attempting any further resistance. The Federal forces occupied the town at once, and fired upon the retreating foe, wounding one or two, but were too much exhausted to pursue them.

BAUR, FERDINAND CHRISTIAN, a German professor of theology, born June 21, 1792, at Tübingen, died in the same city Jan. 4, 1861. He became professor ordinarius of evangelical theology at Tübingen in 1826. He early distinguished himself as a theological writer, and was regarded as the founder of the Tübingen school of theology, a modified rationalism.

His eloquence and power of vivid illustration attracted numerous pupils to his lectures, and many of the eminent scholars of Germany embraced his views—among them, Zeller, Schweigger, Korblin, and others. He was a voluminous writer on theological topics, and many of his treatises give evidence of profound research and thorough appreciation of the subjects which he discusses. His "Historical Manual of Christian Dogmas," published in 1847, is regarded as a work of great value, and his investigations of Gnosticism threw much light on the history of that early heresy. At the close of his career he is said to have expressed regret that his teachings should have led so many of his pupils into what he then regarded as error.

BEALINGTON. A small village at the foot of Laurel Hill, near Beverly, Randolph County, in Western Virginia, where a severe skirmish took place on the 8th of July, between a detachment of the 14th Ohio and 9th Indiana regiments and the Georgia 8d, one of the finest regiments in the Confederate service, numbering 1,260, and supported by portions of several Kentucky and Tennessee regiments.

The Confederate troops, a considerable portion of whom were cavalry, advanced from a wood near their camp, to attack the Federal force, when their progress was arrested by a sharp volley from the latter. They rallied, and put forward their cavalry to charge upon the Unionists, when Colonel Barrett's (Ohio) battery threw a couple of shells into the midst of the troop with such effect that they retreated into the wood; the Federal skirmishers pursued, and the battery shelled the woods till the Confederate force broke and fled, and could not be rallied, and the Federal troops advanced and occupied their camp. The Union loss in the engagement was 2 killed and 6 wounded; the Confederate loss, 20 killed and 40 wounded.

BEAUFORT. (See ST. HELENA PARISH.)

BENNETT'S MILLS. At this small village, in Dent Co., Missouri, a small body of the Dent Co. Home Guard having their head-quarters there, and numbering only 38 men, were attacked about the dawn of day, Sunday morning, Sept. 1, by a body of 350 Confederate troops, belonging to Schnabel's regiment. The Confederates advanced stealthily in two divisions, having first picketed their horses on the Salem road, and crept around the pickets, and had nearly reached the camp before the alarm was given. The little band of Home Guards, taken by surprise, caught up their guns and resisted bravely for half an hour, driving the Confederate troops back at their first rush up the ravine. At length, finding themselves in danger of being overpowered by the greatly superior force of the enemy, they retreated under the order of Sergeant Bay, the highest officer left, and escaped up another ravine. The Confederates did not pursue them. The Federal loss was 3 killed and 6 wounded. The Confederate loss was not ascertained, but their killed and wounded filled a large Michigan

wagon which they seized, and in which they carried them from the field.

BEVERLY, the county seat of Randolph County, Western Virginia, a considerable village, situated east of Laurel Hill, on an affluent of the east fork of Monongahela River. On the 12th July, Gen. McClellan, then in command in Western Virginia, and having his head-quarters at this place, received propositions of surrender from Col. Pegram, commanding the Confederate force in Tygart's Valley, six miles distant, which force Gen. McC. had been pursuing for some days. The following was the correspondence preceding the surrender:

NEAR TYGART'S VALLEY RIVER, SIX MILES FROM {
BEVERLY, July 12, 1861.

To Commanding Officer of Northern Forces, Beverly, Va.:

SIR: I write to state to you that I have, in consequence of the retreat of Gen. Garnett and the jaded and reduced condition of my command, most of them having been without food for two days, concluded, with the concurrence of a majority of my captains and field officers, to surrender my command to you tomorrow as prisoners of war. I have only to add, I trust they will only receive at your hands such treatment as has been invariably shown to the Northern prisoners by the South.

I am, sir, your obedient servant,

JOHN PEGRAM,

Lieut.-Col. P. A. C. S. Comd'g.

To this letter Gen. McClellan replied by his aid, Lieut. Williams, U. S. A., as follows:

HEAD-QUARTERS, DEPARTMENT OF THE OHIO, {
BEVERLY, Va., July 13, 1861.

John Pegram, Esq., styling himself Lieutenant-Colonel P. A. C. S.:

SIR: Your communication, dated yesterday, proposing the surrender as prisoners of war of the force assembled under your command, has been delivered to me. As commander of this department, I will receive you and them with the kindness due to prisoners of war, but it is not in my power to relieve you or them from any liabilities incurred by taking arms against the United States.

I am, very respectfully, your obedient servant,

GEO. B. MCCLELLAN,

Maj.-Gen. U. S. A., Comd'g Department.

The number of prisoners thus surrendered was about 600.

BINGHAM, KINSLEY S., an American statesman, born in Camillus, Onondaga Co., New York, Dec. 16, 1808, died at Green Oak, Livingston Co., Michigan, Oct. 5, 1861. He received a good academic education in his native State, and was placed at an early age in a lawyer's office, where he served as clerk for three years. In 1833 he emigrated to Michigan and settled upon a farm. In 1837 he was elected to the Michigan Legislature, and continued for five years a member of that body, and subsequently for three years was Speaker of the House of Representatives of the State. In 1849 he was elected a Representative in Congress, and served during the 30th Congress on the Committee of Commerce. In 1854 he was elected Governor of the State, and retained in that position till 1859, when he was chosen United States Senator, which office he held at the time of his decease. Mr. Bingham was an able and judicious legislator, a patriot, and an estimable man.

BLOCKADE. This closing of a port of an enemy to all commerce, which has been defined by some writers as the conquest by a belligerent of the naval territory of his enemy around the place or port which he wishes to close to commerce, was reduced to precision by the Congress of Paris. That body, consisting of the representatives of the principal powers of Europe, after discussion, pledged their Governments to observe this principle relative to blockades: "Blockades, in order to be binding, must be effective; that is to say, maintained by forces sufficient really to prevent access to the coast of the enemy." This principle first became a part of maritime law in the war declared by Great Britain and France against Russia in 1854.

In a declaration relative to neutral rights, concerted between the cabinets of Paris and London, and officially published on the 29th of March, 1854, they proclaimed their rights, as powerful belligerents, to prevent neutrals from violating every effective blockade which should be maintained by a sufficient force before the forts, harbors, and coasts of an enemy. So far as regards the manner of conducting the blockade, it was determined as follows: "Every blockade, to be respected, should be effective," etc. The violation of the blockade consisted as well in an attempt to enter the port as in an attempt to go out from the same, after the declaration of the blockade, except, in the latter case, that this should not embrace a vessel light or loaded before the blockade, in the interval fixed by the commander of the blockading squadron—an interval which should always be sufficient to protect, in good faith, the interests of navigation and commerce. Besides, a blockade was not to be considered as known by a vessel approaching the blockaded port, until a special notice thereof had been inscribed upon the vessel's register or papers by one of the vessels forming the blockade. The consequences of this agreement between the two cabinets were, that any point of an enemy's territory could be blockaded; that a notice of the blockade should be given to each neutral vessel attempting to enter a blockaded port, although her Government should have been previously formally notified thereof; and that every blockade should be maintained with sufficient force. Thus paper or cabinet blockades were suppressed. These consisted in a simple diplomatic notice, declaring that such or such a place was blockaded.

This form of blockade was first introduced by Holland as far back as 1584. For the last one hundred and fifty years that she has enjoyed the first rank at sea, Great Britain has followed the same system, but developing it for her own benefit, so that, whenever she happened to be at war, the position of neutral nations became more precarious than that of the enemy himself. The right of blockade had also received extension in complete opposition to the most fundamental principles of international law.

In her wars with Napoleon I., the whole French coast was declared under blockade by Great Britain.

The proclamation was notified to all the neutral nations, who thenceforth must abstain from any trade with the territory thus placed under interdict. Such is what has been described as the paper blockade.

The proclamations of President Lincoln, declaring the ports of the seceded States blockaded, were issued on the 19th and 27th of April.

The Courts of Great Britain and France determined to assume a strict neutrality. The Queen issued her proclamation, and the Emperor also made a public notification thereof. Assuming this ground, both North and South were regarded as belligerents, and treated as such. Hence it became the duty of those nations to respect the blockade, if it was consistent with the principles promulgated by them in 1854, and subsequently ratified by the European powers in 1856.

In the case of Great Britain, letters were addressed by merchants of Liverpool to Lord John Russell on the 29th of August and 4th of September, stating that they held it in contemplation to fit out a number of vessels for the purpose of trading with the port of New Orleans and other ports of the United States of America; and that, looking to the undisturbed state of friendly relations between her Majesty and the United States, they apprehended that British ships had a right, under the law of nations, upon the strict principle of reciprocity, to enter into and depart from the ports and harbors of the United States.

They also asked and expressed the hope that these vessels would be protected by her Majesty's cruisers; but that, if such protection, from reasons of State policy, should be withheld, they would be prepared to defend themselves as best they might in the pursuit of their legitimate trade, and that all parties hindering them in the same would become responsible for the consequences.

They contended that the blockade of certain ports of the United States, as against the ships of Great Britain, was an infringement of international law, nugatory and unavailable, and claimed the protection of their Government, and at the same time asked permission to defend themselves in case of need.

Lord John Russell, through his secretary, replied in these words:

Understanding, from the tenor of your letters, that the ports to which your vessels are to proceed are ports which are or may be blockaded by the naval forces of the United States, Lord Russell directs me to warn you of the serious consequences which the measures contemplated, as stated in your letters, will entail on all concerned therein, and to inform you that her Majesty's Government will not afford the slightest protection or countenance to the projected enterprise.

The United States and the so-called Confederate States are engaged in a civil war, and her Majesty's Government have recognized that state of things, and have taken up a position of neutrality between the

contending parties. Under these circumstances, if any British ship, being a neutral, knowingly attempts to break an effective blockade, she is liable to capture and condemnation. If such ship defends herself by force against a national vessel enforcing such blockade, such defence is a breach of the law of nations, and will expose the ship and cargo to condemnation as a prize, and those persons who commit the act to personal responsibility and severe treatment, according to the laws of war, the act of such persons being considered by the law and usage of nations as one of unjustifiable hostility.

I am to state that the general rule as to trading by neutrals in time of war with belligerents is, that they may freely trade, but that they are bound to respect every effective blockade, and that if they carry contraband of war to either belligerent, they do so at the risk of capture and condemnation by the other, if discovered.

In France, also, application was made to the Minister of Commerce, M. Rocher, for information. In reply, he states that he informed them, on the 5th of June, "of the principles of international law which the Imperial Government desired to establish, in the war that has broken out between the North and the South of the United States." He then adds: "I consider it my duty to lay before you some explanations, agreed upon with the Department of Foreign Affairs, and which make known the limitations within which commerce has a right to reckon on the protection of the Imperial Government."

In these explanations he thus expresses that which must be regarded as the views of the French Government at this time:

The admission by all the Powers of this principle, that the blockade, to be obligatory, must be effective, has remedied the abuse which formerly sprang from the right of excluding neutrals from points that were declared blockaded. The effectiveness of the blockade is, to-day, for all the world, the essential condition of its validity. But so soon as there are, at the places to which a belligerent wishes to interdict access, forces sufficient to prevent their being approached without exposure to a certain danger, the neutral is compelled, no matter how prejudicial to him it may be, to respect the blockade. If he violates it he exposes himself to being treated as an enemy by the belligerent with respect to whom he has deviated from the duties of neutrality.

Another error of the claimants is to believe that the blockade does not exist until it is notified diplomatically, and that it does not apply to neutral vessels that have quitted their country previously to the notification. A blockade is obligatory from the moment that it is effectively established; being the material result of a material fact, it commences with the real investment of the place, continues so long as that investment remains, and ceases with it.

It matters little that neutrals are ignorant of the fact. If one of their vessels presents itself at the place, the belligerent has the right to forbid its entrance. The general usage is doubtless for a government to inform other governments of the measures of blockade to which it has recourse; but this notification, which is not by an absolute rule, is of no value by itself; it is only the announcing of an existing fact, which would already produce its effects. It may sometimes serve, it is true, to diminish the losses which neutrals may have to sustain in consequence of the state of war, by preventing them from undertaking useless commercial expeditions for places really blockaded; but it is evident, on the other hand, that if neutrals suspended or modified, according to this notification, their commercial operations, they would be exposed to the danger of doing so inappropriately, in case the

blockade did not actually exist, or in case it had already closed at the time their expeditions might have arrived.

It is by erroneously attributing to the diplomatic notices of blockade a value and a signification which they have not in themselves, that it might be pretended to exclude neutrals from an entire territory, the access to which could not in reality be interdicted; and it is for the purpose of rendering these fictitious blockades entirely impossible that the agreement has been entered into at present not to consider a neutral as entitled to notice of the existence of a blockade except at the blockaded places themselves. This practice, which leaves a belligerent the faculty of acting with all the promptitude often required by operations of war, which permits a military chief to blockade, according to necessity, places distant from his country before he has instructed his government of the fact, has this advantage for the neutral, that it does not impose upon him obligations inevitably onerous, except, at least, under circumstances where he must inevitably submit to them.

In the blockade of the Southern ports, neutral vessels were allowed fifteen days to leave port after the actual commencement of the blockade, whether such vessels were with or without cargoes. But it was declared that the law of blockade did not permit a vessel in a blockaded port to take on board cargo after the commencement of the blockade.

For the views of the Government on the blockade of its own ports, see DIPLOMATIC CORRESPONDENCE, Mr. Seward's letter to Mr. Adams, dated July 21st.

It was considered in London that an infallible test was furnished that the blockade was effective, by the fact that cotton was 5*d.* per pound in New Orleans and 12*d.* per pound in Liverpool.

Several minor questions arose in the courts of the United States out of this blockade, one or two of which are worthy of notice.

The authority of the President to institute the blockade was denied, and it was insisted that this power, under the Constitution of the United States, could only be exercised by the National Legislature. The views of the Circuit Court at Washington were that the President was commander-in-chief of the army and navy, and, as such, he was authorized to direct the movements of the naval and military forces, placed by law at his command, and to employ them in the manner he may deem most effectual to harass and conquer and subdue the enemy.

As chief of the navy, nobody can doubt the right of its commander to order a fleet or a ship to capture an enemy's vessel at sea, or to bombard a fortress on shore; and it is only another mode of assault and injury to the same enemy to shut up his harbors and close his trade by the same ship or fleet. The same weapons are used. The commander only varies the mode of attack.

In cases of invasion by a foreign power, or insurrection at home, it is exclusively with the President to decide whether the exigencies for calling out the militia have arisen. These are political questions, determinable by the Executive alone, and the Courts follow that branch of the Government.

The facts set forth in the President's proclamation, with the assertion of the right of blockade, amount to a declaration that civil war exists.

Blockade itself is a belligerent right, and can only legally have place in a state of war; and the notorious fact that immense armies are in hostile array against each other in the Federal and Confederate States, the latter having organized a Government and elected officers to administer it, attests the Executive declaration that civil war exists; which, if it must go on, can only be governed by the laws of war.

The right to proceed against privateers, under the laws of the United States, as pirates, does not militate with these views. A sovereign nation, engaged in the duty of suppressing an insurrection of its citizens, may, with entire consistency, act in the twofold capacity of sovereign and belligerent, according to the several measures resorted to for the accomplishment of its purpose. By inflicting, through its agent the judiciary, the penalty which the law affixes to the capital crimes of treason and piracy, upon those who shall be found guilty of levying war against the nation, or of committing depredations upon its commerce, it acts in its capacity as a sovereign, and its courts are but enforcing its municipal regulations. By instituting a blockade of the ports of its rebellious subjects, and thereby interdicting their commercial intercourse with the world, and enforcing this measure by capturing its vessels and cargoes wheresoever found, and by capturing the vessels of all nations that shall violate or attempt to violate the blockade imposed, or shall supply or attempt to supply them with any means whatever to enable them to continue their rebellion, the nation is exercising the right of a belligerent, and its courts, in their adjudications upon the captures made in the enforcement of this measure, are organized as courts of prize, governed by and administering the law of nations.

The question was also separately raised, whether the public disturbances existing, constituted a state of war under the law of nations. In the District Court of New York it was maintained that a state of war did exist, and, under the law of nations, the rights in a war waged by a Government to subdue an insurrection or revolt of its own citizens or subjects, were the same in regard to neutral Powers as if hostilities were carried on between independent nations, and applied equally in captures of property for municipal offences or as prizes of war. It is sufficient to establish the legality of the blockade to show that the ports blockaded were under the power and use of the enemies of the United States. So far as their own acts could make them so, the insurgents who held these ports were as alien and foreign to the United States Government as if they had declared themselves citizens and subjects of various South American States. They thus made themselves avowed enemies of the United States, and were waging a war for the dis-

memberment of the nation and destruction of the Government. No pretension on their part, however, can change the intrinsic nature of things, and transform the residents of particular States into any thing else than citizens and subjects of the United States. As such they were subordinate to its Constitution and laws, in regard to which there were no State lines. State sovereignty was a nonentity. The whole extent of the country was one nation and one Government. The outbreak in the Southern States, therefore, the Judge considered an open and flagrant act of civil war against the United States. "The President possessed full competency, under the Constitution and existing laws, to call into service and employ the land and naval forces of the United States to put down this rebellion, and had rightly the power to establish blockades of ports held by the insurgent enemies, and enforce those blockades according to the law of nations."

A question was also raised, whether a citizen of the Confederate States, being also a citizen of the United States, had a right to come into a prize court and make claim to a vessel and cargo, and establish that the vessel was not attempting to run the blockade. This was denied on the ground, that the object of all hostilities was to cripple the resources of the opposing party, whereas the return of the vessel to the owners in such case would be adding wealth to them, and thereby add to their power to cripple the resources of the Government. (FOR STONE BLOCKADE, *see* CHARLESTON.)

BOONE COURT HOUSE. At this little village, the capital of Boone Co., Virginia, on the Little Coal River, 245 miles west of Richmond, a skirmish took place on the 1st of September, between the Confederate and Federal troops, which resulted in the rout of the former, with a loss of 30 killed, a large number wounded, and forty taken prisoners. None of the Federal troops were killed, and but six wounded. The village was burned by the United States troops.

BOSQUET, PIERRE FRANÇOIS JOSEPH, a marshal of France, born at Mont de Marsan, in the department of Landes, France, Nov. 8, 1810, died at Pau, Feb. 4, 1861. Marshal Bosquet was educated at the Polytechnic schools of St. Cyr and Metz, and in 1834 sent as second lieutenant in the 10th Regiment of Artillery to Algeria. In that country he served in twenty campaigns, rising by successive promotions to the rank of general of division. The Zouaves, or *chasseurs d'Afrique*, that formidable corps which accomplished so much in the Crimea and in the Italian war, were first organized by him, in part from natives of Algeria, and instructed in a system of tactics which enabled them to cope successfully with the Arab and Berber bands of the mountains of Algeria. He returned to France in 1853. In the Crimean war he was placed in charge of the 2d division of infantry, in the "army of the Orient," and Marshal St. Arnaud testified that his skill decided the bat-

tle of the Alma. At Inkermann he also rendered efficient service, for which he received the thanks of the British Parliament and high honors from the Sultan of Turkey. On the 23d of February, 1855, he stormed the enemy's works on one side of the harbor of Sebastopol. On the 5th of June he aided in storming the redoubts of the Mamelon Vert. In the charge on the Malakoff he was wounded by a shell and borne from the field, as it was supposed, mortally wounded. His vigorous constitution, however, enabled him to rally, and regain partial, though never complete, health. He was chosen in 1856, on his return to France, Senator, and in March, 1857, Marshal of France. Queen Victoria bestowed on him the Grand Cross of the Order of the Bath in 1855, in token of her appreciation of his abilities as a commander; and Napoleon III. gave him the order of the Legion of Honor the same year. No one of the marshals had so completely won the love of the French people, and it was with great sorrow that they learned in the Italian campaign that their favorite general was incapacitated by ill health for leading the army.

BOWLING GREEN has been a flourishing town. It is the capital of Warren County, Kentucky, situated on the Barren River, an affluent of Green River, 145 miles southwest of Frankfort. Its situation is at the head of navigation. Steamboats of medium size make regular passages, in all stages of the water, hence to Louisville. Population in 1860, about 3,000. It was, in 1861, a point of much strategic importance. Being at the junction of two Kentucky railroads which enter Tennessee, it possessed facilities for transportation to an almost unlimited extent, and could secure supplies to the full capacity of the Confederate States to spare. The approaches to the town can be commanded by a small force, as the railroad crosses a bridge over Barren River. General Buckner with a force of nearly ten thousand men occupied the town in September.

It was his plan to march upon Louisville without delay, after breaking up the encampment at Camp Boone, but he was delayed by the tearing up of a portion of the railroad track near Cave City, by which the train drawing a portion of his troops was thrown from the track.

Subsequently, it became the head-quarters of a large Confederate army, assembled to defend the approach to Nashville. It was estimated, at one period, at 25,000 men. By the capture of Fort Henry, the flank of the army stationed here was turned, and they were forced to evacuate the town. A large body of the troops, under General Buckner, retreated to Fort Donelson, and were made prisoners on the surrender of that position in February, 1862.

BRIGGS, GEORGE NIXON, LL.D., an American statesman and philanthropist, born in Adams, Mass., April 12, 1796, died at Pittsfield, Mass., Sept. 12, 1861. His father served under Stark and Allen at Bennington. At the age of 13, he was apprenticed to a hatter at

White Creek, N. Y., where he remained for two years, when an elder brother had him taken from the shop and sent him to an academy for a year. Notwithstanding the death of this brother at the close of that year, young Briggs resolved to obtain a professional education, and at the age of 16 commenced the study of law, which he prosecuted for 5 years, when he was admitted to the bar of Berkshire Co., and soon distinguished himself as an advocate, and in 1827, in the defence of a Stockbridge Indian, who was tried for murder at Lenox, established his reputation as one of the ablest criminal lawyers in the State. In 1830 he was elected to Congress from the Berkshire district, and was reelected for six successive terms. Here he soon became known as an able and efficient legislator, and an eloquent and effective debater. In 1843 he was elected Governor of Massachusetts, and was continued in office by annual reelection till 1851. During his administration, the murder of Dr. Parkman by Prof. Webster occurred, and the most extraordinary efforts were made to induce the Governor to extend the executive clemency to the wretched offender, either in the way of pardon or commutation of sentence. To a person of Gov. Briggs' amiable disposition the trial was a severe one, but believing that the good of the community required the maintenance of the law and the execution of the offender, he was firm and refused to interpose. On his retirement from the gubernatorial office in 1851, Gov. Briggs was appointed one of the Judges of the Court of Common Pleas, which office he continued to fill till the reorganization of the Courts of the State in 1856. In 1861 he was appointed one of a commission to adjust the claims between the United States and New Granada; but his death, which was the result of the accidental discharge of a fowling piece, occurred before he had entered upon his duties in the commission. He had taken a deep interest in the great struggle upon which the nation had just entered, and one of his last public acts was the addressing a regiment of Massachusetts Volunteers, of which his son was the commander. Gov. Briggs had taken through life an active interest in the religious and benevolent enterprises of the age, and at the time of his death was president of the American Baptist Missionary Union, of the American Tract Society at Boston, the American Temperance Union, and the Massachusetts Sabbath School Union, and director in several other benevolent societies.

BROWNING, ELIZABETH BARRETT, an English poetess, born in London in 1809, died at Florence, Italy, July 29, 1861. Her education was conducted mostly at home, her father being a man of fortune and of high culture, and was of a more masculine character than is often bestowed on females. She early acquired a thorough familiarity with the writings of the Greek dramatists, which has had its influence in her subsequent writings. She also acquired

a critical knowledge of the Hebrew and other Oriental languages. She commenced writing, at an early age, her "Essay on Mind, and other Poems," appearing when she was but 17 years of age. In 1833 she published "Prometheus Bound, and Miscellaneous Poems," a volume displaying much genius, though the version of the Greek tragedy so little satisfied her that she subsequently replaced it by another and better one. In 1838 appeared "The Seraphim and other Poems," a work which gave her a high reputation, though at a period when literary reputation was of but little value to her. About the time of its publication, the rupture of a blood-vessel in the lungs had induced a critical state of her health, which was still further impaired by the drowning of her eldest brother, who had accompanied her to Torquay for the benefit of the sea air. For several years she was confined to a darkened room, and for a long time her life seemed to hang quivering in the balance. On her partial recovery from this condition, she renewed her literary efforts, and the first fruits of it were seen in a series of erudite and brilliant essays on the Greek Christian poets, published in the *Athenæum*; this was followed by the "Drama of Exile," "Lady Geraldine's Courtship," "The Cry of the Human," "The Lost Bower," &c. In 1844 a collection of her poems was published, and almost immediately reproduced in this country. In 1846 she married Robert Browning, a poet of high reputation, and immediately after accompanied him to Pisa, subsequently removing to Florence, which was their permanent residence during the remainder of her life. Her works were republished with large additions in 1850, and in 1851 she gave to the public a new volume with the title of "Casa Guidi Windows," which contains some of her best poems. In 1856 appeared her "Aurora Leigh," and in 1859 a volume of shorter poems; a posthumous collection of her later poems not previously gathered has been published the present year, (1862.) Her health had gradually declined, and her death was rather an exhaustion of the vital forces than a struggle. For a more full account of her works and a critical estimate of her writings, see *NEW AMERICAN CYCLOPEDIA*, vol. 3, pp. 765, 766.

BUCKHANNON, a town of Western Virginia, the capital of Upshur Co., situated on the east fork of Monongahela River. On the 1st July, Brig.-Gen. Morris, commanding the Third and Fourth Ohio regiments, attacked a division of Confederate troops, under command of Gen. Henry A. Wise, at this place, and routed them completely; killing, as was reported, 23, and taking 200 prisoners. Federal loss not stated, but small.

BULL RUN, in the northeastern part of the State of Virginia, forms the boundary between Fairfax and Prince William counties, until it enters the Occoquan River, about fourteen miles from its mouth. The Occoquan empties into the Potomac, about twenty-five miles below Wash-

ington. It is formed by the junction of Broad Run and Cedar Run, about one mile below Brentsville in Prince William County, and some miles above the mouth of Bull Run. The distance by railroad from Alexandria to Manassas Junction is twenty-seven miles. The route pursued by the Federal army from Arlington Heights to Centreville is nearly parallel with the railroad, and a few miles north of it. The distance from Manassas Junction to Bull Run where a battle took place, is about seven or eight miles; and the distance from the latter place to Centreville about three miles. The distance from Centreville to Fairfax Court House is ten miles. The distance from Fairfax Court House to the Potomac is about twelve miles.

The Confederate Government having adopted the defensive policy as that upon which they should act, their first object was to prevent an advance of any Federal force into Virginia. Early in the month of May, troops were assembled in Virginia and pushed forward towards the northeastern boundary of the State, to a position known as Manassas Junction. The name is given to this hilly region, as it is here that a railroad from Alexandria, another from Staunton up the valley and through Manassas Gap, and another from Gordonsville unite. At Gordonsville the railroad from Richmond and the line from East Tennessee unite. As a point for concentration none more eligible exists in northeastern Virginia. The advantages for fortification are naturally such that the place can be rendered impregnable. Here the centre of the northern Confederate army was posted, with the left wing pushed forward to Winchester, and the right extended to the Potomac, and sustained by heavy batteries which served to blockade the river.

The Federal force, the advance of which was assembled at Washington for the defence of that city against any attack by the Confederate troops, was posted on the Virginia side of the Potomac, on Arlington Heights, which were strongly fortified. Their right was pushed some distance up the Potomac, and chiefly on the Maryland side, while their left occupied Alexandria. The armies of both sides consisted of raw militia hastily brought together, and of volunteers who for the first time had put on the uniform, and taken up the weapons of the soldier. On both sides the forces were constantly accumulating. On the morning of June 27th, the consolidated report of Gen. Mansfield commanding the Department of Washington, gives the number of troops in that city and vicinity. The privates, including regulars and volunteers present for duty, numbered 22,846 men. The grand aggregate of the force, including officers &c., present and absent, was 34,160 men. The force of Gen. Patterson commanding in Maryland above Washington, and also on the Virginia side of the Potomac, on the 28th of June, was returned, embracing officers and men enlisted and present for duty, 15,923. Of these about 550 were reported as sick.

The Confederate force was largely increased by troops from South Carolina, Georgia, Mississippi, Alabama, and Texas. On the night after the battle, President Davis sent a despatch to Richmond by telegraph, saying: "The battle was mainly fought on our left. Our force was 15,000; that of the enemy estimated at 35,000.

General McDowell in his official report says: "We crossed Bull Run with about 18,000 men, of all arms." "The numbers opposed to us have been variously estimated. I may safely say and avoid even the appearance of exaggeration, that the enemy brought up all he could, which were not kept engaged elsewhere."

The force under Gen. McDowell, on the 8th of July, was organized into five divisions. The first division, under Brig.-Gen. Tyler, consisted of four brigades. The regiments in each brigade were as follows: First brigade, under Col. Keyes, First, Second, Third, Connecticut; Fourth Maine; Varian's battery, and Company B, Second Cavalry. In the second brigade, under Col. Schenck, the regiments were as follows: First, Second, Ohio; Second New York, and Company E, Second Artillery. In the third brigade, under Colonel W. T. Sherman, were the Thirteenth, Sixty-ninth, Seventy-ninth, New York; Second Wisconsin; and Company E, Third Artillery. In the fourth brigade, under Colonel Richardson, Second, Third, Michigan; First Massachusetts; Twelfth New York.

In the second division, under Col. David Hunter, were two brigades. These contained the following regiments: In the first brigade, under Col. Porter, were the Eighth, Fourteenth, New York; battalion of regular infantry; Companies G and L, Second Cavalry; Company —, Fifth Artillery. In the second brigade, under Col. Burnside were the First, Second, Rhode Island; Seventy-first New York; Second New Hampshire; battery of Light Artillery, R. I.

In the third division, under Col. Heintzelman, were three brigades with the following regiments: In the first brigade, under Col. Franklin, were the Fourth Pennsylvania; Fifth Massachusetts; First Minnesota; Company E, Second Cavalry; Company I, First Artillery. In the second brigade, under Col. Wilcox, were the First Michigan; Eleventh New York; Company D, Second Artillery. In the third brigade, under Col. Howard, were the Second, Fourth, Fifth, Maine; Second Vermont.

In the fourth division, under Brig.-Gen. Runyon, as a reserve, were the following regiments: First, Second, Third, Fourth, New Jersey three-months volunteers, and First, Second, Third, New Jersey three-years volunteers.

In the fifth division, under Col. Miles, were two brigades. In the first brigade were the following volunteers: Col. Blenker commanding, Eighth, Twenty-ninth, New York; Garibaldi Guard, and Twenty-fourth Pennsylvania. In the second brigade under Col. Davies, were the Sixteenth, Eighteenth, Thirty-first, Thirty-second, New York; Company G, Second Artillery.

The movement of troops to attack the centre of the Confederate army commenced on the 16th of July. It was first made known to the inhabitants of Washington by their sudden disappearance from the opposite or Virginia side of the Potomac. The force comprised in this movement consisted of five divisions, as above mentioned, but a few of the details were altered. A body of five hundred marines was also added. On the 17th, the advance of Gen. McDowell's entire command was begun. It was made by four different routes. The right wing, composed of the first division of four brigades under Gen. Tyler, moved by the Georgetown road. The centre, composed of the second division of two brigades under Col. Hunter, advanced by the Leesburg and Centreville road. The left wing, consisting of the third division of three brigades, under Col. Heintzelman, moved by the Little River turnpike, and the other part of the wing, consisting of the fifth division of two brigades, under Col. Miles, proceeded by the old Braddock road. The reserve consisted of the fourth division of New Jersey troops, under Gen. Runyon.

The following order, issued by General McDowell from his head-quarters at Arlington on July 5th, shows the condition of the men when ready to march:

When troops are paraded in light marching order, they will be equipped as follows: Their arms, accoutrements, and ammunition—the cartridge-boxes filled. Their haversacks, with three days' cooked rations; their blankets in a roll, with the ends tied to each other, across the shoulder; and where it is possible, a pair of stockings inside of the blanket. Their canteens and cups; knapsacks will be packed and left in the tent under a guard of the regiment, consisting of those men least able to march, and to the number to be specially designated for each corps. Knapsacks should be numbered or marked in such way as will enable them to be readily claimed by their owners. Commanding officers of brigades will take measures to diminish as quickly as possible the baggage of the regiments under their commands, by sending away every thing not absolutely necessary. This will apply to the personal effects of the officers and men, as well as to military property.

Near Fairfax Court House obstructions had been placed by the Confederate troops upon all the roads upon which the divisions advanced. The division of the centre marched with the left brigade in front. This placed the Rhode Island troops, under Colonel Burnside, in advance. The Second Regiment was employed as skirmishers in front of the division. Their lines extended from half a mile to two miles on each side of the road. The Confederate troops retired as fast as the head of the advancing column made its appearance. Within three miles of the Court House, the division encountered the first barricade, consisting of trees felled and thrown across the road. The second was of a similar character. They occasioned only a few moments' delay. The third barricade was more formidable. It was at the entrance of a deep cut, about half way up a steep hill, crowned on one side by a thick wood, and on the other by an open field. A road was made through the field, and the

army passed around. When the central division reached the village of Fairfax Court House, an order was sent to the left wing to halt, and General McDowell with his staff, escorted by a squadron of dragoons, proceeded to Germantown, where the right wing was halted. It was his desire to push forward without delay to Centreville.

Germantown is a small village on the road from Fairfax Court House to Centreville, and about one-fourth of the distance beyond the former.

The order to move forward was first given to all divisions of the army on the 15th. Gen. Tyler, of the right wing, communicated it to his troops that evening, with orders to be ready to move at 2 p. m. on the 16th, provided with cooked rations for three days. Precisely at that hour, the right wing began to move forward, and reached Vienna, and encamped for the night.

At 5 o'clock the next morning, the onward march was renewed. It was necessarily slow, owing to the obstructions placed by the Confederate troops in the road. These troops, although constantly seen during the day, rapidly retreated upon the approach of the Federal army. Germantown was reached soon after noon. Col. Miles' division of the left wing was at the crossing of the old Braddock road with the road from Fairfax Court House to Fairfax Station, on the railroad, when ordered to halt. On the 18th it was ordered forward to Centreville by the old Braddock road. The other brigades of this wing halted at Fairfax Station and below. Eleven of the enemy's force were made prisoners at this Station.

A few buildings were burned a short distance from Fairfax Court House, on account of a rumor that a soldier had been fired on from them. In Fairfax, the soldiers, under excitement, had seized many things in and about the houses, some of which were deserted by their owners. These acts caused General McDowell to issue the following orders from his head-quarters at Fairfax Court House, on the morning of the 18th:

General Orders, No. 18.—It is with the deepest mortification the General commanding finds it necessary to reiterate his orders for the preservation of the property of the inhabitants of the district occupied by the troops under his command. Hardly had we arrived at this place, when, to the horror of every right-minded person, several houses were broken open, and others were in flames, by the act of some of those who, it has been the boast of the loyal, come here to protect the oppressed, and free the country from the domination of a hated party. The property of this people is at the mercy of troops who, we rightly say, are the most intelligent, best educated, and most law-abiding of any that ever were under arms. But do not, therefore, the acts of yesterday cast the deepest stain upon them? It was claimed by some that their particular corps were not engaged in these acts. This is of but little moment; since the individuals are not found out, we are all alike disgraced. Commanders of regiments will select a commissioned officer as a provost-marshal, and ten men as a police force under him, whose special and sole duty it shall be to preserve the property from depredations, and to arrest all wrong-doers of whatever regiment or corps they may be. Any one found committing the slightest depredations, killing pigs or

poultry, or trespassing on the property of the inhabitants, will be reported to head-quarters, and the least that will be done to them will be to send them to the Alexandria jail. It is again ordered that no one shall arrest, or attempt to arrest, any citizen not in arms at the time, or search or attempt to search any house, or even to enter the same without permission. The troops must behave themselves with as much forbearance and propriety as if they were at their own homes. They are here to fight the enemies of the country, not to judge and punish the unarmed and defenceless, however guilty they may be. When necessary, that will be done by the proper person.

The right wing, Gen. Tyler, resumed its march from Germantown to Centreville at 7 o'clock on the morning of the next day, the 18th. Upon coming in sight of Centreville, the town proved to have been evacuated. Part of the division proceeded through the village, and turning into a by-road to the right, advanced a short distance towards Bull Run, a valley traversed by a creek about three miles from Centreville. A halt was then commanded, and the whole division encamped on both sides of the road.

About 11 o'clock, General Tyler proceeded to make a reconnoissance in force. He took the fourth brigade of his division, composed of the Second and Third Michigan, First Massachusetts, and Twelfth New York, under Colonel Richardson, together with Ayres' battery, and four companies of cavalry. Advancing south on the road from Centreville to Manassas, which crosses Bull Run at Blackburn's Ford through a long stretch of timber, for about two miles, they came to an opening, when sight was caught of a strong body of the enemy. Ayres' battery was ordered to advance and open on them from a commanding elevation. Hardly had the firing well commenced, when it was replied to by a battery which had not been seen, at a distance down the road. Some of the grape shot from this battery killed two horses of the cavalry drawn up in a body on a hill, and wounded two of the men. A vigorous response being kept up by Ayres' battery, the enemy soon retired into the woods, when the firing ceased. The Second Michigan was then ordered to deploy as skirmishers on the left of the road, and advance into the wood. They briskly moved forward, and entered the timber, and quickly after their disappearance a lively exchange of rifle shots took place for a few minutes. This was soon followed by a succession of volleys, evidently discharged by large bodies of men. The Third Michigan, the First Massachusetts, and the Twelfth New York, composing the remainder of the brigade, were then ordered to advance towards the wood. This was promptly done. They then drew up in battle array in front and on the right of the timber. All this time the firing in the woods went on in the liveliest style. Companies G and H of the First Massachusetts, and some companies of the New York Twelfth and of the First Massachusetts, were then ordered into the woods as skirmishers, at the same time the cavalry and two howitzers advanced to their edge. Meanwhile the firing within was

kept up. The howitzers then threw some grape shot into the timber, when a terrific series of volleys of musketry was discharged from the woods upon the troops outside. At the same time a battery opened from an elevation in the rear, and poured a storm of grape and canister at the Federal troops. Fortunately the fire was aimed too high, and few outside the woods were hit. A retreat was now ordered, and the whole brigade retired, and formed behind their battery on the hill. In doing this, the Twelfth New York and a portion of the First Massachusetts broke ranks and scattered in different directions for some distance on their retreat.

At this time the third brigade, under Colonel Sherman, came up, headed by the Sixty-ninth New York. The fire was now reopened from the battery, and continued about an hour, to which the enemy's battery vigorously replied. Their shot and shells struck the houses in front of the battery, and raked the woods in the rear for a considerable distance. A retreat was then ordered by General McDowell, who had come up, and the entire force fell back, having suffered a loss of one hundred killed and wounded.

This reconnoissance developed a degree of strength and preparation on the part of the enemy, greater than had been anticipated. During the day the centre and left wings came up, and the whole force was concentrated at Centreville.

The next two days were passed by the Federal force in strengthening its position. Meantime the Commander-in-Chief was occupied in obtaining more accurate knowledge of the position and strength of the enemy, and arranging his plans for an attack. The result of these reconnoitings is shown in the order of battle subsequently issued.

Meanwhile it would appear that an attack upon the Federal forces was contemplated by the Commander of the Confederate army. Probably he was anticipated by the attack of General McDowell. This appears from documents found in the camp at Manassas, after its evacuation by the Confederate force early in 1862. One of these papers contains the plan of battle, and shows by the details that the Confederate force was not inferior to that of the Federal army. It is as follows:

[CONFIDENTIAL.]

HEAD-QUARTERS ARMY OF POTOMAC, }
July 20, 1861. }

SPECIAL ORDER NO. —

The following order is published for the information of division and brigade commanders:

1. Brigadier-General Ewell's brigade, supported by General Holmes' brigade, will march via Union Mills Ford and place itself in position of attack upon the enemy. It will be held in readiness either to support the attack upon Centreville, or to move in the direction of Santer's Cross Roads, according to circumstances. The order to advance will be given by the Commander-in-Chief.

2. Brigadier-General Jones' brigade, supported by Colonel Earl's brigade, will march via McLane's Ford to place itself in position of attack upon the enemy on or about the Union Mills and Centreville road. It will be held in readiness either to support the attack

on Centreville, or to move in the direction of Fairfax Station, according to circumstances, with its right flank towards the left of Ewell's command, more or less distant, according to the nature of the country and attack. The order to advance will be given by the Commander-in-Chief.

3. Brigadier-General Longstreet's brigade, supported by Brigadier-General Jackson's brigade, will march via McLane's Ford to place itself in position of attack upon the enemy on or about the Union Mills and Centreville roads. It will be held in readiness either to support the attack on Centreville or to move in the direction of Fairfax Court House, according to circumstances, with its right flank towards the left of Jones' command, more or less distant, according to the nature of the country. The order to advance will be given by the Commander-in-Chief.

4. Brigadier-General Bonham's brigade, supported by Colonel Bartow's brigade, will march via Mitchell's Ford to the attack of Centreville. The right wing to the left of the third division, more or less distant, according to the nature of the country and of the attack. The order to advance will be given by the Commander-in-Chief.

5. Colonel Cooke's brigade, supported by Colonel Elzy's brigade, will march, via Stone Bridge and the fords on the right thereof, to the attack of Centreville. The right wing to the left of the fourth division, more or less distant, according to the nature of the country and of the attack. The order to advance will be given by the Commander-in-Chief.

6. Brigadier-General Bee's brigade, supported by Colonel Wilcox's brigade, Colonel Stuart's regiment of cavalry, and the whole of Walton's battery, will form the reserve, and will march via Mitchell's Ford, to be used according to circumstances.

The light batteries will be distributed as follows:

1. To Brigadier-General Ewell's command—Captain Walker, six pieces.

2. To Brigadier-General Jones—Captains Alberts' and Stanwood's batteries, eight pieces.

3. To Brigadier-General Longstreet's—Colonel Pendleton's and Captain Imboden's batteries, eight pieces.

4. To Brigadier-General Bonham's—Captains Kemper's and Shields' batteries, eight pieces.

5. To Colonel Cooke's—Colonel Hemton's and Captains Latham's and Beckwith's batteries, twelve pieces.

Colonel Radford, commanding cavalry, will detail to report immediately, as follows:

To Brigadier-General Ewell, two companies cavalry.

To Brigadier-General Jones, two companies cavalry.

To Brigadier-General Longstreet, two companies cavalry.

To Brigadier-General Bonham, three companies cavalry.

To Colonel Cooke, the remaining companies of cavalry, except those in special service.

9. The fourth and fifth divisions, after the fall of Centreville, will advance to the attack of Fairfax Court House via the Braddock and Turnpike roads, to the north of the latter. The first, second, and third divisions will, if necessary, support the fourth and fifth divisions.

10. In this movement the first, second, and third divisions will form the command of Brigadier-General Holmes. The fourth and fifth divisions, that of the second in command.

The reserve will move upon the plains between Mitchell's Ford and Stone Bridge, and, together with the fourth and fifth divisions, will be under the immediate direction of General Beauregard.

By command of General BEAUREGARD.

THOMAS JORDAN, A. A. Adjutant-General.

SPECIAL ORDER NO. —

HEAD-QUARTERS ARMY OF THE POTOMAC, }
July 20, 1861. }

The plan of attack given by Brigadier-General Beauregard, in the above order, is approved, and will be executed accordingly.

J. E. JOHNSTON, General C. S. A.

Mitchell's Ford, spoken of in the above orders, is a short distance above Blackburn's Ford. McLane's Ford is about the same distance below Blackburn's Ford. Union Mills is still further below, near the crossing of the Alexandria and Orange Railroad. The Stone Bridge is the crossing for the Warrenton turnpike.

The result of observations on the part of General McDowell convinced him that the mass of the Confederate force had not been advanced from Manassas to the back of the creek called Bull Run. This tortuous stream runs from northwest to southeast, through the entire field of battle. At the extreme part on the northwest, is Sudley's Spring, where it is fordable; three miles lower down is a crossing known as the Stone Bridge, and still lower is Blackburn's Ford; further down is Union Mills, mentioned in General Beauregard's order. Centreville is a village of a few houses, mostly on the west side of a ridge running nearly north and south. The road from Centreville to Manassas Junction was along this ridge, and crossed Bull Run about three miles from the former place. Through Centreville, running nearly east and west, passes the Warrenton turnpike, and crosses Bull Run about four miles distant.

The conviction of General McDowell was that the mass of the Confederate force was at Manassas. He says in his report: "On the evening of the 20th, my command was mostly at or near Centreville. The enemy was at or near Manassas, distant from Centreville about seven miles to the southwest." He was looking to the intrenchments at Manassas to find the body of the Confederate army; and there, it was anticipated, would be fought, in one or two days after crossing Bull Run, the great battle, or the enemy would retire. Every effort was made by the Confederate officers to conceal their strength at Bull Run. In the reconnaissance of the 18th, they did not appear outside the wood. On the 19th, when a flag of truce was sent by General McDowell to the Confederate lines, in order to recover the dead and wounded of the day previous, admission was refused to it. Thus conceiving the mass of the Confederate army to be at Manassas, the order of battle was prepared accordingly, and issued on the night of the 20th, to be executed the next day. It was manifest that the crossing of Bull Run would be disputed; but the greatest contest, anticipated the next day, was expected to come when the attempt should be made to destroy the railroad leading from Manassas to the valley of Virginia. The orders for the 21st were as follows:

HEAD-QUARTERS, DEPARTMENT ARMY EASTERN VA., }
CENTREVILLE, July 20, 1861. }

The enemy has planted a battery on the Warrenton turnpike to defend the passage of Bull Run; has seized the Stone Bridge and made a heavy abatis on the right bank, to oppose our advance in that direction. The ford above the bridge is also guarded, whether with artillery or not is not positively known, but every indication favors the belief that he proposes to defend the passage of the stream.

It is intended to turn the position, force the enemy from the road, that it may be reopened, and, if possible, destroy the railroad leading from Manassas to the valley of Virginia, where the enemy has a large force. As this may be resisted by all the force of the enemy, the troops will be disposed as follows:

The first division, (General Tyler's,) with the exception of Richardson's brigade, will, at half-past two o'clock in the morning precisely, be on the Warrenton turnpike to threaten the passage of the bridge, but will not open fire until full daybreak.

The second division (Hunter's) will move from its camp at two o'clock in the morning precisely, and, led by Captain Woodbury, of the Engineers, will, after passing Cub Run, turn to the right and pass the Bull Run stream above the ford at Sudley's Spring, and then turning down to the left, descend the stream and clear away the enemy who may be guarding the lower ford and bridge. It will then bear off to the right and make room for the succeeding division.

The third division (Heintzelman's) will march at half-past two o'clock in the morning, and follow the road taken by the second division, but will cross at the lower ford after it has been turned as above, and then, going to the left, take place between the stream and second division.

The fifth division (Miles') will take position on the Centreville Heights, (Richardson's brigade will, for the time, form part of the fifth division, and will continue in its present position.) One brigade will be in the village, and one near the present station of Richardson's brigade. This division will threaten the Blackburn Ford, and remain in reserve at Centreville. The commander will open fire with artillery only, and will bear in mind that it is a demonstration only he is to make. He will cause such defensive works, abatis, earthworks, &c., to be thrown up as will strengthen his position. Lieutenant Prime, of the Engineers, will be charged with this duty.

These movements may lead to the gravest results, and commanders of divisions and brigades should bear in mind the immense consequences involved. There must be no failure, and every effort must be made to prevent straggling.

No one must be allowed to leave the ranks without special authority. After completing the movements ordered, the troops must be held in order of battle, as they may be attacked at any moment.

By command of

Brigadier-General McDOWELL.

JAMES B. FRY, Adjutant-General.

The position of the Federal forces on the night previous to the battle can be briefly told. The first division, which had been the right wing thus far, was stationed on the north side of the Warrenton turnpike and on the eastern slope of the Centreville ridge, two brigades on the same road and a mile and a half in advance, to the west of the ridge, and one brigade on the road from Centreville to Manassas, where it crosses Bull Run at Blackburn's Ford, where the engagement on the 18th was. The second division was on the Warrenton turnpike, one mile east of Centreville. The third division was about a mile and a half out on the old Braddock road, which comes into Centreville from the southeast. The fifth division was on the same road as the third division, and between it and Centreville. The orders given to the respective divisions are thus described by General McDowell in his report:

"On Friday night a train of subsistence arrived, and on Saturday its contents were ordered to be issued to the command, and the men required to have three days' rations in

their haversacks. On Saturday orders were issued for the available force to march. As reported to you in my letter of the 19th ultimo, my personal reconnaissance of the roads to the south had shown that it was not practicable to carry out the original plan of turning the enemy's position on his right. The affair of the 18th at Blackburn's Ford showed he was too strong at that point for us to force a passage there without great loss, and if we did, that it would bring us in front of his strong position at Manassas, which was not desired. Our information was that the Stone Bridge, over which the Warrenton road crossed Bull Run, to the west of Centreville, was defended by a battery in position, and the road on his side of the stream impeded by a heavy abatis. The alternative was, therefore, to turn the extreme left of his position. Reliable information was obtained of an undefended ford about three miles above the bridge, there being another ford between it and the bridge, which was defended. It was therefore determined to take the road to the upper ford, and after crossing, to get behind the forces guarding the lower ford and the bridge, and after occupying the Warrenton road west of the bridge, to send out a force to destroy the railroad at or near Gainesville, and thus break up the communication between the enemy's forces at Manassas and those in the valley of Virginia, before Winchester, which had been held in check by Major-General Patterson.

"Brigadier-General Tyler was directed to move with three of his brigades on the Warrenton road, and commence cannonading the enemy's batteries, while Hunter's division, moving after him, should, after passing a little stream called Cub Run, turn to the right and north, and move around to the upper ford, and there turn south and get behind the enemy. Colonel Heintzelman's division was to follow Hunter's as far as the turning-off place to the lower ford, where he was to cross after the enemy should have been driven out by Hunter's division; the fifth division (Miles) to be in reserve on the Centreville ridge.

"I had felt anxious about the road from Manassas by Blackburn's Ford to Centreville, along the ridge, fearing that whilst we should be in force to the front, and endeavoring to turn the enemy's position, we ourselves should be turned by him by this road; for if he should once obtain possession of this ridge, which overlooks all the country to the west to the foot of the spurs of the Blue Ridge, we should have been irretrievably cut off and destroyed. I had, therefore, directed this point to be held in force, and sent an engineer to extemporize some field-works to strengthen the position.

"The fourth division (Runyon's) had not been brought to the front further than to guard our communications by way of Vienna and the Orange and Alexandria Railroad. His advanced regiment was about seven miles in the rear of Centreville.

"The divisions were ordered to march at

half-past two o'clock A.M., so as to arrive on the ground early in the day, and thus avoid the heat which is to be expected at this season. There was delay in the first division getting out of its camp on the road, and the other divisions were in consequence between two and three hours behind the time appointed—a great misfortune, as events turned out. The wood road leading from the Warrenton turnpike to the upper ford was much longer than we counted upon, the general direction of the stream being oblique to the road, and we having the obtuse angle on our side."

At half-past two, on the morning of the 21st, the division under General Tyler, which had heretofore been the right wing, moved, with the exception of Richardson's brigade, to threaten the passage of the Warrenton turnpike bridge, or Stone Bridge, on Bull Run. After moving a short distance Col. Keyes' brigade was halted by order of General McDowell, to watch the road coming up from Manassas. This was about two miles from the run. The two remaining brigades of this division, being those of Cols. Schenck and Sherman, with Ayres' and Carlisle's batteries, proceeded on and arrived in front of the bridge about six A.M. An examination of the position was made, and the brigades and artillery got into position. The first gun, as a signal that they were in position, was fired at half-past six o'clock. As the design was to threaten the bridge, Col. Schenck's brigade was formed into a line, with its left resting in the direction of the bridge and the Confederate battery, which had been established to sweep the bridge and its approach, so as to threaten both. Col. Sherman's brigade was posted to the right of the turnpike, so as to be in position to sustain Colonel Schenck or to move across Bull Run, in the direction to be taken by Col. Hunter's division.

A 30-pounder gun attached to Carlisle's battery was posted on the turnpike, with Ayres' battery considerably in its rear, while Carlisle's battery was posted on the left of Col. Sherman's brigade. In this position they were ordered to remain, awaiting the appearance of the divisions of Cols. Hunter and Heintzelman on the other side, until such time that the approach to the bridge could be carried and the bridge rebuilt by the engineers, who had on the spot materials for that purpose.

While this had been going on with the first division, the first brigade of the second division, under Col. Porter, had been silently paraded in light marching order at two o'clock in the morning. Owing to frequent delays in the march of troops in front, it did not reach Centreville until half-past four. It proceeded out on the Warrenton turnpike, and it was an hour after sunrise when its head was turned to the right to commence the flank movement by crossing at Sudley's Spring. The second brigade of the division, which was now in advance, made such slow and intermittent progress through the woods, that it was four hours be-

fore the head of the division reached Bull Run. This was about half-past nine o'clock, and intelligence was here received that the Confederate troops were in front with considerable force. A halt of half an hour was now ordered, to obtain a supply of water, and to rest and refresh the men. The shade of the green and waving foliage of the trees, and the water of the creek, on this hot summer morning, were delightful to the perspiring men. Only the gleam of bayonets and the equipments of war in sight on every side, indicated the terrific conflict so close at hand.

Not only was the intelligence received that the enemy was in front with a considerable force, but from the heights where the troops rested, a vast column could be plainly descried, at the distance of a mile or more on the left, moving rapidly towards the line of march in front, which the halting troops were about to resume. Skirmishers were now thrown out upon either flank and in front, by Col. Slocum, of the Second Rhode Island. The column moved forward, however, before this was completed, and in about thirty minutes emerged from the timber, whence the rattle of the musketry and occasional crash of round shot through the branches of the trees indicated the opening of the battle. The Second Rhode Island, of the second brigade, under Col. Burnside, was immediately sent forward with its battery of artillery, and the balance of the brigade was formed in a field to the right of the road. At the same time the head of the first brigade was turned slightly to the right, in order to gain time and room for deployment on the right of the second brigade. Griffin's battery found its way through the timber to the fields beyond, followed promptly by the marines, while the Twenty-seventh took a direction more to the left, and the Fourteenth followed upon the trail of the battery—all moving up at double-quick step.

Since this division left the Warrenton turnpike by turning to the right, it had moved in a semicircle, crossing Bull Run at Sudley's Spring, and it was now approaching the turnpike again. Along this turnpike the enemy now appeared drawn up in a long line, extending from a house and haystack upon the extreme right of the advancing division to a house beyond its left. Behind that house there was a heavy battery which, with three others along the Confederate line, but on the heights behind it, covered with all sorts of projectiles the ground upon which the Union force was advancing. A grove in front of the enemy's right wing afforded it shelter and protection, while the shrubbery in the fences along the road screened somewhat his left wing. The battery of Griffin advanced within a thousand yards, and opened an unerring and deadly fire upon the enemy's batteries, (on the right,) which were soon silenced or driven away. The right of the Union force was now rapidly developed by this first brigade of the second division—the marines, the Twenty-seventh, Fourteenth,

and Eighth, with the cavalry in the rear of the right. The enemy retreated in more precipitation than order, as this part of the line advanced. Meanwhile, it appearing that the Second Rhode Island, of the second brigade, was closely pressed by the right of the enemy, Col. Burnside ordered the Seventy-first New York and Second New Hampshire to advance, intending to hold the First Rhode Island in reserve; but, owing to delay in the formation of the Seventy-first and Second, the First Rhode Island was at once ordered on the field. It performed most efficient service in assisting its comrades to repel the attack of the enemy's forces, which the Second Rhode Island had steadily borne, and had bravely stood its ground, even compelling him to give way. Soon the Seventy-first came into action, planting the two howitzers belonging to the regiment upon the right of its line, and working them most effectively. Next came the Second New Hampshire into the field; and the whole of the second brigade was engaged in action on the right of the enemy.

The enemy now clung with so much tenacity to the protecting wood, and the Rhode Island battery became so much endangered, as to impel the commander to call for the battalion of regulars. This battalion was composed of two companies of the Second, five companies of the Third, and one company of the Eighth U. S. Infantry. It was a part of the first brigade, and was at once ordered to support the second brigade, under Col. Burnside, which was now suffering from a severe fire in its front. The line of the battalion was rapidly formed, opening fire, and a column under Col. Heintzelman appearing at the same moment on the left of the battalion, the enemy fell back to the rising ground in his rear.

The third division, consisting of three brigades, under Col. Heintzelman, was under arms, in light marching order, with two days' cooked rations in their haversacks, and commenced the march at half-past two in the morning. It followed immediately in the rear of the second division, Col. Hunter, and with that division, turning to the right from the turnpike by a country road, and crossing Bull Run at Sudley's Spring. It was the intention that this division should turn to the left and cross a ford about midway between the Warrenton turnpike and Sudley's Springs. But the road was either missed or did not exist. Probably missed, as there is a ford called "Poplar or Red Hill Ford," midway between the Stone Bridge and Sudley's. Before the third division reached Sudley's the battle had commenced. Smoke could be seen rising on their left from two points a mile or more apart. Two clouds of dust were also visible, showing the advance of troops from the direction of Manassas. Two regiments were at this time ordered forward, to prevent the enemy from outflanking the second division, under Col. Hunter. Accordingly, the Minnesota advanced on the left of the road

which crossed the run, the Eleventh Massachusetts moved up it, followed by the remainder of the division, except Arnold's battery, which, supported by the First Michigan, was posted a little below the crossing of the run as a reserve.

The advance of the battalion of regular infantry and the regiment detached from Col. Heintzelman, to support the second brigade, under Col. Burdette, above mentioned, caused the enemy to come flying from the woods towards the right, and the Twenty-seventh completed their retreat by charging directly upon their centre in the face of a scorching fire, while the Fourteenth and Eighth moved down the turnpike to cut off the retiring foe, and to support the Twenty-seventh, which was standing the brunt of the action, with its ranks thinning in the dreadful fire. Now the resistance of the enemy's left became so obstinate that the beaten right retired in safety. This retreat of the enemy's right afforded an opportunity for the brigades of Cols. Sherman and Keyes, belonging to Gen. Tyler's division, to cross over, as will be presently noticed.

The appearance of the head of Col. Heintzelman's column upon the field at the moment of the obstinate resistance of the enemy's left, enabled the Fifth Massachusetts and Eleventh New York (Fire Zouaves) to move forward to support the centre of the first brigade of Col. Hunter's division, which had been on the right and constantly engaged. At this time the Eighth New York, under Col. Lyons, of this brigade, had broken. They were only partially rallied again. This was the first regiment to break ranks and retire on the field that day. The Fourteenth also broke, but was soon rallied in rear of Griffin's battery, which soon took a position further to the front and right, from which its fire was delivered with such precision and rapidity as to compel the batteries of the enemy to retire far behind the brow of the hill in front.

At this time the first brigade of Col. Hunter's division occupied a line considerably in advance of that first occupied by the left wing of the enemy. The battery was pouring its withering fire into the batteries and columns of the enemy wherever exposed. The cavalry were likewise engaged in feeling the left flank of the enemy's position, during which some captures were made. Early in the action Gen. Hunter had been wounded and conveyed from the field, and the command of the division had devolved on Col. A. Porter.

The orders to Gen. Tyler were to threaten the passage of the Stone Bridge. Soon after getting into position, it was discovered that the enemy had a heavy battery with infantry in support, commanding both the road and bridge approaches, on which both Ayres and Carlisle at different times tried the effect of their guns without success. The banks of the run proving impracticable for the passage of artillery, the batteries remained comparatively useless until the approach to the bridge was

cleared. During this period of waiting, the 30-pounder was occasionally used with considerable effect against bodies of infantry and cavalry, which could be seen from time to time moving in the direction of Col. Hunter's column, and out of the range of the ordinary guns. When it appeared that the divisions of Cols. Hunter and Heintzelman were arrested in their progress, and the enemy seemed to be moving heavy reinforcements to support their troops, the brigade of Col. Sherman was ordered by Gen. Tyler to cross over and support the columns engaged. The brigade of Col. Keyes was also ordered to follow. This brigade, on reaching the high ground across the run, was ordered to form on the left of Col. Sherman's brigade, which was done with great steadiness and regularity. After waiting a few minutes, the line was ordered to advance and come into conflict on its right with the enemy's cavalry and infantry, which, after some severe struggles, it drove back, until the further march of Keyes' brigade was arrested by a severe fire of artillery and infantry, sheltered by some buildings standing on the heights above the road leading to Bull Run. A charge was here ordered, and the Second Maine and Third Connecticut, which were opposed to this part of the enemy's line, pressed forward to the top of the hill until they reached the buildings which were held by the enemy, and drove them out and for a moment held possession. The gallantry of this charge upon infantry and artillery, says Col. Keyes, "was never, in my opinion, surpassed." At this point, finding the brigade under the fire of a strong force behind breastworks, it was ordered to march by the left flank across an open field until the whole line was sheltered by the right bank of Bull Run, along which the march was conducted, with a view to turn the battery, which the enemy had placed on the hill below the point at which the Warrenton turnpike crosses Bull Run. The enemy were forced to retire for a considerable distance below the Stone Bridge, and an opportunity was afforded to Capt. Alexander to pass over the bridge, cut out the abatis which had been placed there, and prepare the way for Col. Schenck's brigade and two batteries to pass over.

Meanwhile Col. Sherman's brigade, which had been ordered by Gen. Tyler to cross over in advance of Col. Keyes, found no difficulty in the movement and met no opposition in ascending the steep bluff with the infantry. Advancing slowly and continuously with the head of the column to give time for the regiments in succession to close up their ranks, the brigade proceeded with caution towards the field, and soon formed in rear of Col. Porter's brigade. Here orders were given to Col. Sherman to join in pursuit of the enemy, who were falling back to the left of the road by which the army had approached from Sudley's Spring. The brigade moved in the following order: Thirteenth New York in advance, followed by the Second Wisconsin, Seventy-ninth and Sixty-

ninth New York. The Thirteenth advanced steadily down the hill and up the ridge, from which it opened fire upon the enemy who had made another stand on ground very favorable to him, and the regiment continued advancing as the enemy gave way.

The position which the battle had now attained was as follows: Early in the morning the force of the enemy had been stationed along Bull Run, from the Stone Bridge down to the Union Mills, below Blackburn's Ford. But owing to the crossing of the Federal troops at Sudley's Spring, further up than the extreme left of the enemy at the Stone Bridge, the line of the latter was entirely changed. It formed, as has been stated, along the Warrenton turnpike, which crosses at the Stone Bridge, and continues on in a due western course. In this position the enemy was found by the first troops that crossed over. On the Federal side, Col. Richardson's brigade, of the first division, was posted at Blackburn Ford, to prevent the enemy from crossing, and also to make a feint to cross when the firing of Gen. Tyler at the Stone Bridge above should be heard, which was so done. Gen. Hunter's division opened the attack upon the enemy's line formed on the Warrenton turnpike. The brigade of Col. Porter on the right had been strengthened by Col. Heintzelman's division, consisting of Cols. Wilcox's and Howard's brigades and a part of Col. Franklin's. To these was now added Col. Sherman's brigade, from Gen. Tyler's first division. Further on the left the attack was commenced by Col. Burnside, with the second brigade of Col. Hunter's division, and sustained with great gallantry and resolution, especially by the First and Second Rhode Island and the Rhode Island battery, until strengthened by Major Sykes' battalion of regulars, and still further by a portion of Col. Heintzelman's force and Keyes' brigade, of Gen. Tyler's division. All the Federal force was now on the field of battle, excepting the division of Col. Miles, consisting of Cols. Blenker and Davies' brigades, and also the brigade of Col. Richardson at Blackburn's Ford, and the brigade of Col. Schenck at the Stone Bridge, with the accompanying batteries. The effect of this strong and firm attack on the enemy's line had caused it to yield at all points. The Federal force was in possession of the Warrenton turnpike from the Stone Bridge westward. On their right the enemy had retreated nearly a mile and a half. On the left they had also given way so that Col. Schenck's brigade was about to cross over the Stone Bridge.

The road taken by the troops from Sudley's Spring down to the Warrenton turnpike, deflects to the left somewhat, near the turnpike, and crosses it at about right angles. On the left of this road, after it crosses the turnpike, is a hill with a farm-house on it, where the enemy had, early in the day, planted some of his most annoying batteries. Across the road from this hill was another hill, or rather elevated ridge,

or table land. The hottest part of the contest was for the possession of this hill, with the house on it. General McDowell thus describes it: "The force engaged here was Heintzelman's division of Wilcox's and Howard's brigades on the right, supported by part of Porter's brigade, of Hunter's division, and the cavalry under Palmer, and Franklin's brigade, of Heintzelman's division, Sherman's brigade, of Tyler's division, in the centre, and up the road, whilst Keyes' brigade, of Tyler's division, was on the left attacking the batteries near the Stone Bridge. The Rhode Island battery, of the Burnside brigade, also participated in this attack, by its fire from the north of the turnpike. Ricketts' battery, together with Griffins' battery, was on the side of the hill and became the object of the special attention of the enemy, who succeeded, through a mistake by which one of his regiments was thought to be a Federal force, in disabling the battery, and then attempting to take it. Three times was he repulsed by different corps in succession, and driven back, and the guns taken by hand, the horses having been killed, and pulled away. The third time, it was supposed by us all that the repulse was final, for he was driven entirely from the hill, and so far beyond it as not to be in sight, and all were certain the day was ours.

"The enemy was evidently disheartened and broken. But we had been fighting since half-past 10 o'clock in the morning, and it was after 3 o'clock in the afternoon; the men had been up since 2 o'clock in the morning, and had made what to those unused to such things, seemed a long march before coming into action, though the longest distance gone over was not more than nine and a half miles; and though they had three days' provisions served out to them the day before, many no doubt did not eat them, or threw them away on the march, or during the battle, and were therefore without food. They had done much severe fighting. Some of the regiments which had been driven from the hill in the first two attempts of the enemy to keep possession of it, had become shaken, were unsteady, and had many men out of the ranks."

Colonel Porter, in command of Hunter's division after Colonel Hunter was wounded, thus reports the same scenes: "The flags of eight regiments, though borne somewhat wearily, now pointed towards the hill, from which disordered masses of the enemy had been seen hastily retreating. Griffin's and Ricketts' batteries were ordered by the Commanding General to the top of the hill on the right, as supporting with the Fire Zouaves and marines, while the Fourteenth entered the skirt of wood on their right, to protect that flank as a column composed of the Twenty-seventh New York, and Eleventh and Fifth Massachusetts, Second Minnesota, and Sixty-ninth New York moved up towards the left flank of the batteries; but so soon as they were in position, and before the flanking supports had reached theirs, a murderous fire of musketry and rifles opened at pistol range, cut down every cannon-

ier and a large number of horses. The fire came from some infantry of the enemy, which had been mistaken for our own forces; an officer in the field having stated that it was a regiment sent by Colonel Heintzelman to support the batteries.

"The evanescent courage of the Zouaves prompted them to fire perhaps a hundred shots, when they broke and fled, leaving the batteries open to a charge of the enemy's cavalry, which took place immediately. The Marines, in spite of their gallant officers, gave way in disorder. The Fourteenth, on the right, and the column on the left, hesitatingly retired, with the exception of the Sixty-ninth and Thirty-eighth New York, who nobly stood and returned the fire of the enemy for fifteen minutes. Soon the slopes behind us were swarming with our retreating and disorganized forces, while riderless horses and artillery teams ran furiously through the flying crowd."

Colonel Sherman, in his report of this part of the conflict, says: "At the point where the road from Sudley's Spring crossed the bridge to our left, the ground was swept by a most severe fire, by artillery, rifle, and musketry, and we saw in succession several regiments driven from it, among them the Zouaves and battalion of marines. Before reaching the crest of the hill, the roadway was worn deep enough to afford shelter, and I kept the several regiments in it as long as possible. But when the Second Wisconsin was abreast of the enemy, it was ordered to leave the roadway by the left flank, and attack the enemy. This regiment ascended to the brow of the hill steadily, received the severe fire of the enemy, returned it with spirit, and advanced, delivering its fire. It was repulsed, rallied, and repulsed again. By this time, the Seventy-ninth New York had closed up, and in like manner it was ordered to cross the brow of the hill, and drive the enemy from cover. It was impossible to get a good view of the ground. In it there was one battery of artillery, which poured an incessant fire upon our advancing column, and the ground was irregular, with small clusters of pines, affording shelter, of which the enemy took good advantage. The fire of rifles and musketry was very severe. The Seventy-ninth, headed by its Colonel, charged across the hill, and for a short time the contest was severe. They rallied several times under fire, but finally broke, and gained the cover of the hills. This left the field open to the Sixty-ninth New York, Colonel Corcoran, who, in his turn, led his regiment over the crest, and had in full open view the ground so severely contested. The firing was very severe, and the roar of cannon, rifles, and musketry incessant. It was manifest the enemy was here in great force, far superior to us at that point. The Sixty-ninth held the ground for some time, but finally fell back in disorder. At this time, the Thirteenth New York occupied another ridge to our left, overlooking the same field of action, and similarly engaged. Here, at 3½ p. m., began the scene of disorder."

Colonel Burnside reports from another part of the field:

"The battery of the Second Rhode Island changed its position into a field upon the right, and was brought to bear upon the force which Colonel Porter was engaging. The enemy's infantry having fallen back, two sections of Captain W. H. Reynolds' battery advanced, and succeeded in breaking the charge of the enemy's cavalry, which had now been brought into the engagement. It was nearly 4 o'clock p. m., and the battle had continued for almost six hours since the time when the second brigade had been engaged, with every thing in favor of our troops, and promising decisive victory, when some of the regiments engaging the enemy upon the extreme right of our line broke, and large numbers passed disorderly by my brigade, then drawn up in the position which they last held."

The position of the battle described in these extracts was its turning point. The view taken of the contest at this time, by the Commander-in-Chief of the Confederate forces, is of great interest. In his official report, General Beauregard thus speaks:

"The topographical features of the plateau, now become the stage of the contending armies, must be described in outline. A glance at the map will show that it is enclosed on three sides by small water courses, which empty into Bull Run within a few yards of each other, half a mile to the south of the Stone Bridge. Rising to an elevation of quite one hundred feet above the level of Bull Run at the bridge, it falls off on three sides, to the level of the enclosing streams in gentle slopes, but which are furrowed by ravines of irregular direction and length, and studded with clumps and patches of young pines and oaks. The general direction of the crest of the plateau is oblique to the course of Bull Run in that quarter, and on the Brentsville and turnpike roads, which intersect each other at right angles. Completely surrounding the two houses before mentioned, are small open fields, of irregular outline, and exceeding 150 acres in extent. The houses, occupied at the time, the one by widow Henry, and the other by the free negro, Robinson, are small wooden buildings, densely embowered in trees and environed by a double row of fences on two sides. Around the eastern and southern brow of the plateau, an almost unbroken fringe of second-growth pines gave excellent shelter for our marksmen, who availed themselves of it, with the most satisfactory skill. To the west, adjoining the fields, a broad belt of oaks extends directly across the crest, on both sides of the Sudley road, in which, during the battle, regiments of both armies met and contended for the mastery. From the open ground of this plateau the view embraces a wide expanse of woods and gently undulating open country of broad grass and grain fields in all directions, including the scene of Evans' and Bee's recent encounter with the enemy—some twelve hundred yards to the northward. In reply to the play of the enemy's batteries, our own artillery had not been idle or unskilful.

The ground occupied by our guns, on a level with that held by the batteries of the enemy, was an open space of limited extent, behind a low undulation, just at the eastern verge of the plateau, some 500 or 600 yards from the Henry house. Here, as before said, some thirteen pieces, mostly six-pounders, were maintained in action. The several batteries of Imboden, Starnard, Pendleton, (Rockbridge Artillery,) and Alburtis', of the Army of the Shenandoah, and five guns of Walton's, and Heaton's section of Rogers' battery, of the Army of the Potomac, alternating to some extent with each other, and taking part as needed; all from the outset displaying that marvellous capacity of our people as artillerists which has made them, it would appear, at once the terror and the admiration of the enemy. As was soon apparent, the Federalists had suffered severely from our artillery, and from the fire of our musketry on the right, and especially from the left flank, placed under cover, within whose galling range they had been advanced. And, we are told in their official reports, how regiment after regiment, thrown forward to dislodge us, was broken, never to recover its entire organization on that field. In the mean time, also, two companies of Stuart's cavalry (Carter's and Hoge's) made a dashing charge down the Brentsville and Sudley road upon the Fire Zouaves—then the enemy's right on the plateau—which added to the disorder wrought by our musketry on that flank. But still the press^{ure} of the enemy was heavy in that quarter of the field, as fresh troops were thrown forward there to outflank us; and some three guns of a battery, in an attempt to obtain a position apparently to enfilade our batteries, were thrown so close to the Thirty-third Regiment, Jackson's brigade, that that regiment, springing forward, seized them, but with severe loss, and was subsequently driven back by an overpowering force of Federal musketry.

"Now, full 2 o'clock P. M., I gave the order for the right of my line, except my reserves, to advance to recover the plateau. It was done with uncommon resolution and vigor, and at the same time, Jackson's brigade pierced the enemy's centre with the determination of veterans, and the spirit of men who fight for a sacred cause; but it suffered seriously. With equal spirit the other parts of the line made the onset, and the Federal lines were broken and swept back, at all points, from the open ground of the plateau. Rallying soon, however, as they were strongly reinforced by fresh regiments, the Federalists returned, and by weight of numbers pressed our lines back, recovered their ground and guns, and renewed the offensive. By this time, between half-past 2 and 3 o'clock P. M., our reinforcements pushed forward, and directed by General Johnston to the required quarter, were at hand just as I had ordered forward to a second effort for the recovery of the disputed plateau, the whole line, including my reserves, which, at this crisis of the

battle, I felt called upon to lead in person. This attack was general, and was shared in by every regiment then in the field, including the Sixth (Fisher's) North Carolina Regiment, which had just come up and taken position on the immediate left of the Forty-ninth Virginia Regiment. The whole open ground was again swept clear of the enemy, and the plateau around the Henry and Robinson houses remained finally in our possession, with the greater part of the Ricketts and Griffin batteries, and a flag of the First Michigan Regiment, captured by the Twenty-seventh Virginia Regiment, (Lieutenant-Colonel Echolls,) of Jackson's brigade. This part of the day was rich with deeds of individual coolness and dauntless conduct, as well as well-directed embodied resolution and bravery, but fraught with the loss to the service of the country, of lives of inestimable preciousness at this juncture. The brave Bee was mortally wounded, at the head of the Fourth Alabama and some Mississippians, in an open field near the Henry house; and a few yards distant, the promising life of Bartow, while leading the Seventh Georgia Regiment, was quenched in blood. Colonel F. J. Thomas, Acting Chief-of-Ordnance, of General Johnston's staff, after gallant conduct, and most efficient service, was also slain. Colonel Fisher, Sixth North Carolina, likewise fell, after soldierly behavior, at the head of his regiment, with ranks greatly thinned. Withers' Eighteenth Regiment, of Cocke's brigade, had come up in time to follow this charge, and, in conjunction with Hampton's Legion, captured several rifle pieces, which may have fallen previously in possession of some of our troops; but if so, had been recovered by the enemy. These pieces were immediately turned, and effectively served on distant masses of the enemy, by the hands of some of our officers.

"While the enemy had thus been driven back on our right entirely across the turnpike, and beyond Young's branch on our left, the woods yet swarmed with them, when our reinforcements opportunely arrived in quick succession, and took position in that portion of the field. Kershaw's Second, and Cash's Eighth South Carolina regiments, which had arrived soon after Withers', were led through the oaks just east of the Sudley-Brentsville road, brushing some of the enemy before them, and, taking an advantageous position along and west of that road, opened with much skill and effect on bodies of the enemy that had been rallied under cover of a strong Federal brigade posted on a plateau in the southwest angle, formed by intersection of the turnpike with the Sudley-Brentsville road. Among the troops thus engaged, were the Federal regular infantry. At the same time, Kemper's battery, passing northward by the S.-B. road, took position on the open space—under orders of Colonel Kershaw—near where an enemy's battery had been captured, and opened with effective results upon the Federal right, then the mark

also of Kershaw's and Cash's regiments. Preston's Twenty-eighth Regiment, of Cocker's brigade, had by that time entered the same body of oaks, and encountered some Michigan troops, capturing their brigade commander, Colonel Wilcox.

"Another important accession to our forces had also occurred about the same time, at 3 o'clock p. m. Brigadier-General E. K. Smith, with some 1,700 infantry of Elzey's brigade, of the Army of the Shenandoah, and Beckham's battery, came upon the field, from Camp Pickens, Manassas, where they had arrived by railroad at noon. Directed in person by General Johnston to the left, then so much endangered, on reaching a position in rear of the oak woods, south of the Henry house, and immediately east of the Sudley road, General Smith was disabled by a severe wound, and his valuable services were lost at that critical juncture. But the command devolved upon a meritorious officer of experience, Colonel Elzey, who led his infantry at once somewhat further to the left, in the direction of the Chinn house, across the road, through the oaks skirting the west side of the road, and around which he sent the battery under Lieutenant Beckham. This officer took up a most favorable position near that house, whence, with a clear view of the Federal right and centre, filling the open fields to the west of the Brentsville-Sudley road, and gently sloping southward, he opened fire with his battery upon them with deadly and damaging effect.

"Colonel Early, who, by some mischance, did not receive orders until two o'clock, which had been sent him at noon, came on the ground immediately after Elzey, with Kemper's Seventh Virginia, Hay's Seventh Louisiana, and Barksdale's Thirteenth Mississippi regiments. This brigade, by the personal direction of General Johnston, was marched by the Holkham house, across the fields to the left, entirely around the woods through which Elzey had passed, and under a severe fire, into a position in line of battle near Chinn's house, outflanking the enemy's right. At this time, about half-past 3 p. m., the enemy, driven back on their left and centre, and brushed from the woods bordering the Sudley road, south and west of the Henry house, had formed a line of battle of truly formidable proportions, of crescent outline, reaching on their left from the vicinity of Pittsylvania, (the old Carter mansion,) by Matthew's, and in rear of Dogan's, across the turnpike near to Chinn's house. The woods and fields were filled with their masses of infantry, and their carefully preserved cavalry. It was a truly magnificent, though redoubtable spectacle, as they threw forward in fine style, on the broad, gentle slopes of the ridge occupied by their main lines, a cloud of skirmishers, preparatory for another attack. But as Early formed his line, and Beckham's pieces played upon the right of the enemy, Elzey's regiments, Gibbon's Tenth Virginia, Lieutenant-Colonel Stuart's First Maryland, and

Vaughn's Third Tennessee regiments, and Cash's Eighth, and Kershaw's Second South Carolina, Withers' Eighteenth, and Preston's Twenty-eighth Virginia, advanced in an irregular line almost simultaneously, with great spirit, from their several positions upon the front and flanks of the enemy, in their quarter of the field. At the same time, too, Early resolutely assailed their right flank and rear. Under the combined attack, the enemy was soon forced, first over the narrow plateau in the southern angle made by the two roads, so often mentioned, into a patch of woods on its western slope, thence back over Young's branch and the turnpike, into the fields of the Dugan farm, and rearward, in extreme disorder, in all available directions, towards Bull Run. The rout had now become general and complete."

In his report, General McDowell thus remarks on the position of the battle:

"It was at this time that the enemy's reinforcements came to his aid, from the railroad train, understood to have arrived from the valley with the residue of Johnston's army. They threw themselves in the woods on our right, and opened a fire of musketry upon our men, which caused them to break, and retire down the hillside. This soon degenerated into disorder, for which there was no remedy. Every effort was made to rally them, even beyond the reach of the enemy's fire, but in vain."

A line drawn through the battle-field to Manassas Junction, would run about due south. The railroad from Winchester to Manassas Junction comes in on a southeast course. Consequently, the line above mentioned, and the railroad, converge, and meet at the Junction. The Dumfries road, bounding the west side of the battle-field, and running straight south, crosses the Winchester railroad about two miles from the Junction. Up this road came the last reinforcements of the enemy, from General Johnston's command at Winchester. This was nearer than to proceed to the Junction, and caused the clouds of dust seen.

Colonel Porter, commanding the division of Colonel Hunter, thus continues his report:

"All further efforts were futile. The words, gestures, and threats of our officers were thrown away upon men who had lost all presence of mind, and only longed for absence of body. Some of our noblest and best officers lost their lives in trying to rally them. Upon our first position, the Twenty-seventh New York was the first to rally, under the command of Major Bartlett, and around it the other regiments engaged soon gathered their scattered fragments. The battalion of regulars, in the mean time, moved steadily across the field from the left to the right, and took up a position where it held the entire forces of the enemy in check until our forces were somewhat rallied.

"The Commanding General then ordered a retreat upon Centreville, at the same time directing me to cover it with the battalion of regulars, the cavalry, and a section of artillery.

The rear-guard thus organized followed our panic-stricken troops to Centreville, resisting the attacks of the Confederate cavalry and artillery, and saving them from the inevitable destruction which awaited them, had not this body been interposed."

Colonel Burnside, commanding the other brigade of Colonel Hunter's division, which commenced the attack, thus reports this part of the battle:

"When the general retreat was ordered, the First Rhode Island passed on to the top of the hill, where it was joined by the remainder of the brigade, and formed into column. Large bodies of stragglers were passing along the road, and it was found impossible to retain the order which otherwise would have been preserved. Yet the brigade succeeded in retiring in comparatively good condition, with Arnold's battery of artillery and Captain Armstrong's company of dragoons bringing up the rear. The retreat continued thus until the column was about emerging from the woods and entering upon the Warrenton turnpike, when the artillery and cavalry went to the front, and the enemy opened fire upon the retreating mass of men. Upon the bridge crossing Cub Run,* a shot took effect upon the horses of a team that was crossing. The wagon was overturned directly in the centre of the bridge, and the passage was completely obstructed. The enemy continued to play his artillery upon the trains, carriages, ambulances, and artillery wagons that filled the road, and these were reduced to ruin. The artillery could not possibly pass, and five pieces of the Rhode Island battery, which had been safely brought off the field, were here lost. The infantry, as the files reached the bridge, were furiously pelted with a shower of grape and other shot, and several persons were here killed or dangerously wounded. As was to be expected, the whole column was thrown into confusion, and could not be rallied again for a distance of two or three miles."

Colonel Schenck, stationed at the Stone Bridge, thus reports:

"It was not long after this that the unpleasant intelligence came of our army being in retreat from the front across the ford above, and the order was received to fall back on Centreville. The retreat of my brigade, being now in the rear of our division, was conducted in the reverse order of our march in the morning, the Second New York moving first, and being followed by the Second and First Ohio, the two latter regiments preserving their lines in good degree, rallying together, and arriving at Centreville with closed ranks, and sharing comparatively little in the panic which characterized so painfully that retreat, and which seemed to be occasioned more by the fear of frightened teamsters and of hurrying and excited civilians, (who ought never to have been there,) than

even by the reckless disorder and want of discipline of straggling soldiers. Near the house which was occupied as a hospital for the wounded, about a mile from the battle-ground, a dashing charge was made upon the retreating column by a body of the rebel cavalry, which was gallantly repelled, and principally by two companies of the Second Ohio, with loss on both sides."

The reserve, consisting of two brigades under Col. Miles, was stationed at Centreville. The most important of its movements were made by Col. Blenker's brigade, who thus reports these passing scenes:

"In this position the brigade remained until about 4 o'clock P. M., when I received orders to advance upon the road from Centreville to Warrenton. This order was executed with great difficulty, as the road was nearly choked up by retreating baggage wagons of several divisions, and by the vast number of flying soldiers belonging to various regiments. Nevertheless, owing to the coolness of the commanding officers and the good discipline of the men, the passage through the village was successfully executed, and the further advance made with the utmost precision, and I was thus enabled to take a position which would prevent the advance of the enemy and protect the retreat of the army. The Eighth Regiment took position one and a half miles south of Centreville, on both sides of the road leading to Bull Run. The Twenty-ninth Regiment stood half a mile behind the Eighth, enchequier by companies. The Garibaldi Guard stood in reserve in line behind the Twenty-ninth Regiment. The retreat of great numbers of flying soldiers continued until 9 o'clock in the evening, the great majority in wild confusion, and but few in collected bodies. Soon afterwards, several squadrons of the enemy's cavalry advanced along the road, and appeared before the outposts. They were challenged, "Who comes here?" and, remaining without any answer, I being just present at the outpost, called "Union forever!" whereupon the officer of the enemy's cavalry commanded, "*En avant! en avant!*" knock him down!" Now the skirmishers fired, when the enemy turned around, leaving several killed and wounded on the spot. About nine prisoners who were already in their hands were liberated by this action. Afterwards we were several times molested from various sides by the enemy's cavalry. At about midnight the command to leave the position and march to Washington was given by Gen. McDowell. The brigade retired in perfect order, and ready to repel any attack on the road from Centreville to Fairfax Court House, Annandale, to Washington."

A prompt retreat of the fragments of his army was resolved upon by Gen. McDowell, and while the stragglers had pushed on from the battle-field to Washington without halting, the organized masses commenced leaving about nine o'clock that night. By midnight all but

* Cub Run is a small stream running south and southwest, and crossing the Warrenton turnpike midway between Centreville and the stone bridge over Bull Run.

the wounded and the dead of that well-found army which commenced its march from Washington five days previous, proud, exultant, and confident of victory, was panic-stricken, groping its way, under the cover of the darkness of night, to the intrenchments opposite Washington. Never had the flag of the Union trailed so low in the dust before; never was so brilliant a career opened before it as that which commenced on the day after that dreadful night. About six months from that hour the fugitives became victors in every contest, and the triumphant foe were fleeing from every point.

Fortunately for the remnants of the Federal army, the Confederate forces did not pursue their flying foe. The reasons for this omission are thus stated by Gen. Johnston in his official report:

"The apparent firmness of the United States troops at Centreville who had not been engaged, which checked our pursuit; the strong forces occupying the works near Georgetown, Arlington, and Alexandria; the certainty, too, that General Patterson, if needed, would reach Washington, with his army of thirty thousand men, sooner than we could; and the condition and inadequate means of the army in ammunition, provisions, and transportation, prevented any serious thoughts of advancing against the capital. It is certain that the fresh troops within the works were, in number, quite sufficient for their defence; if not, General Patterson's army would certainly reinforce them soon enough."

After the affair at Blackburn's Ford on the 18th, Gen. McDowell became convinced that the nature of the country to the left or southward to Manassas was unfit for the operations of a large army, and he determined to move by the right, turning the enemy's left. An examination was made during the next day, and in consequence of the information thus obtained, the following plan of attack was determined upon: (See orders, p. 78.)

1st. A false attack to be made by Richardson's brigade (temporarily attached to Miles' division) on Blackburn's Ford, the rest of that division remaining in reserve at Centreville.

2d. Tyler's division to move from its camp at 2½ A. M., (the 21st,) towards the stone bridge of the Warrenton turnpike, to feign the main attack upon this point.

3d. The divisions of Hunter and Heintzelman (in the order named) to leave their camps at 2 and 2½ A. M., (they were encamped about two or three miles behind Tyler,) and, following his movement, to diverge from the Warrenton turnpike at the by-road beyond Cub Run, and take the road for Sudley's Spring; or, rather, it was provided that Hunter's division should proceed to Sudley's Spring, and Heintzelman take the lower ford. These matters, however, were to be regulated by circumstances.

It was intended that the head of Hunter's division should be at the turn-off at early day-

light, or about 4 A. M., and that it should reach Sudley by six or seven.

The two leading brigades of Tyler's had not cleared the road for Hunter to this point until half-past five, and the guide, alleging that a nearer route to the ford would bring the column in sight of the enemy's batteries, led them by so circuitous a way that Hunter did not reach Sudley's Spring until half-past nine or thereabouts.

The explanation given by Gen. McDowell for the disasters of the day, although rather lengthy, is entitled to full consideration. He thus reports:

"As my position may warrant, even if it does not call for some explanation of the causes, as far as they can be seen, which led to the results herein stated, I trust it may not be out of place if I refer in a few words to the immediate antecedents of the battle. When I submitted to the General-in-Chief, in compliance with his verbal instructions, the plan of operations and estimate of force required, the time I was to proceed to carry it into effect was fixed for the 8th of July, Monday. Every facility possible was given me by the General-in-Chief and the heads of the administrative departments, in making the necessary preparations. But the regiments, owing, I was told, to a want of transportation, came over slowly. Many of them did not come across till eight or nine days after the time fixed upon, and went forward without my even seeing them, and without having been together before in a brigade. The sending reinforcements to General Patterson, by drawing off the wagons, was a further and unavoidable cause of delay. Notwithstanding the Herculean efforts of the Quartermaster-General, and his favoring me in every way, the wagons for ammunition, subsistence, &c., and the horses for the trains and the artillery, did not arrive for more than a week after the time appointed to move. I was not even prepared as late as the 15th ultimo; and the desire I should move became great, and it was wished I should not, if possible, delay longer than Tuesday, the 16th ultimo. When I did set out, on the 16th, I was still deficient in wagons for subsistence. But I went forward, trusting to their being procured in time to follow me. The trains thus hurriedly gathered together, with horses, wagons, drivers, and wagon managers, all new and unused to each other, moved with difficulty and disorder, and was the cause of a day's delay in getting the provisions forward, making it necessary to make, on Sunday, the attack we should have made on Saturday. I could not, with every exertion, get forward with the troops earlier than we did. I wished to go to Centreville the second day, which would have taken us there on the 17th, and enabled us, so far as they were concerned, to go into action on the 19th, instead of the 21st; but when I went forward from Fairfax Court House, beyond Germantown, to urge them forward, I was told it was impossible for the men to march further. They had

only come from Vienna, about six miles, and it was not more than six and a half miles farther to Centreville—in all a march of twelve and a half miles; but the men were foot-weary, not so much, I was told, by the distance marched, as by the time they had been on foot, caused by the obstructions in the road, and the slow pace we had to move to avoid ambuscades. The men were, moreover, unaccustomed to marching, their bodies not in condition for that kind of work, and not used to carrying even the load of light marching order.

"We crossed Bull Run with about 18,000 men of all arms, the fifth division (Miles' and Richardson's brigades) on the left, at Blackburn's Ford to Centreville, and Schenck's brigade of Tyler's division on the left of the road, near the Stone Bridge, not participating in the main action. The numbers opposed to us have been variously estimated. I may safely say, and avoid even the appearance of exaggeration, that the enemy brought up all he could which were not kept engaged elsewhere. He had notice of our coming on the 17th, and had from that time until the 21st to bring up whatever he had. It is known that in estimating the force to go against Manassas, I engaged not to have to do with the enemy's forces under Johnston, then kept in check in the valley by Major-General Patterson, or those kept engaged by Major-General Butler; and I knew every effort was made by the General-in-Chief that this should be done, and that even if Johnston joined Beauregard, it would not be because he could be followed by General Patterson, but from causes not necessary for me to refer to, you knew them all. This was not done, and the enemy was free to assemble from every direction in numbers only limited by the amount of his railroad rolling-stock and his supply of provisions. To the forces, therefore, we drove in from Fairfax Court House, Fairfax Station, Germantown, and Centreville, and those under Beauregard at Manassas, must be added those under Johnston from Winchester, and those brought up by Davis from Richmond, to other places at the South, to which is to be added the *levy en masse* ordered by the Richmond authorities, which was ordered to assemble at Manassas. What all this amounted to I cannot say—certainly much more than we attacked them with.

"I could not, as I have said, more early push on faster, nor could I delay. A large and the best part of my forces were three-months volunteers, whose term of service was about to expire, but who were sent forward as having long enough to serve for the purpose of the expedition. On the eve of the battle the Fourth Pennsylvania Regiment of volunteers, and the battery of volunteer artillery of the New York Eighth militia, whose term of service expired, insisted on their discharge. I wrote to the regiment, expressing a request for them to remain a short time, and the Hon. Secretary of War, who was at the time on the ground, tried to induce the battery to remain at least five days.

But in vain. They insisted on their discharge that night. It was granted, and the next morning, when the army moved forward into battle, these troops moved to the rear to the sound of the enemy's cannon.

"In the next few days, day by day, I should have lost ten thousand of the best armed, drilled, officered, and disciplined troops in the army. In other words, every day, which added to the strength of the enemy, made us weaker."

The loss on the Federal side, according to the official returns, was 481 killed, 1,011 wounded, and 1,216 missing. Among the killed were Col. Cameron, of the New York Seventy-ninth; Lieut.-Col. Haggerty, of the New York Sixty-ninth; Col. Slocum, Second Rhode Island; also Major Ballou and Capt. Tower.

The artillery lost was as follows:

Company D, Second Artillery, 6 rifled guns.

Company I, First Artillery, 6 rifled Parrott ten-pounders.

Company E, Second Artillery, 2 rifled guns and 2 howitzers.

Company —, Fifth Artillery, 1 rifled gun.

Company G, First Artillery, 1 thirty-pounder Parrott gun.

Rhode Island battery, 5 rifled guns.

To this should be added 180 boxes of small arm cartridges, 87 boxes of rifled cannon ammunition, 30 boxes of old fire-arms, 12 wagons loaded with provisions, and 3,000 bushels oats, a large number of muskets thrown away, and an immense number of blankets and knapsacks.*

* The following documents, found in the camp at Manassas after its evacuation by the Confederate troops, contain returns embracing the period of the battle, and extending to the 16th of August ensuing. They correspond so very nearly with the statements of other documents entitled to the highest credit, that they should be considered in estimating the results of this battle.

The following is a list of captured Quartermaster's property turned in to the Quartermaster's Department of the Confederate Army of the Potomac up to August 16, 1861:

- 870 axes, spades, and trenching tools.
- 2 sets carpenter's tools and blacksmith's tools.
- 12 sets harness, 28 extra traces for artillery.
- 1 platform and other scales.
- 1,650 camp cooking utensils.
- 700 camp mess utensils.
- 802 pairs pants, drawers, and socks.
- 700 blankets.
- 22 tents and dies.
- 21 wagons and 28 horses.
- 24 trunks and carpet-bags.
- 1 lot of rope.

Incomplete returns of many miscellaneous articles, such as bedticks, buckets, coffee mills, halters, saddles and bridles, and 15 barrels commissary stores.

E. P. ALEXANDER,
Captain Engineers, General Staff, C. S. A.

The following is a return of hospital equipments and supplies captured from the enemy and turned into the Medical Department of the Confederate States Army of the Potomac up to August 16, 1861:

- 5 medicine chests, partially filled.
- 6 cases surgical instruments.
- 2 sets panniers.
- 7 ambulances.
- 1 lot of medicines, lint, bandages, &c.

Returns of litter, instruments, supplies, &c., are all very incomplete, so much having been appropriated by surgeons.

Gen. Beauregard, in his report, states the number of his force on the 18th of July at 17,000 effective men; and on the 21st 27,000, which includes 6,200 sent from Gen. Johnston, and 1,700 brought up by Gen. Holmes from Fredericksburg. The report states the number killed to have been 269, wounded 1,483, aggregate, 1,852. The same report states the number of prisoners taken at 1,460.

On the left the Confederate force was commanded by Brig.-Gens. Evans, Jackson, and Cocke, and Col. Bartow. The centre was under Gens. Jones, Longstreet, and Benham. On the extreme right was Gen. Ewell. Early in the day an order was sent to him by Gen. Beauregard to attack and attempt to turn the left flank of the Federal force. The messenger was killed, and the orders were not received.

It is manifest that this battle was well fought. In the fore part of the afternoon the Confederate troops were nearly outflanked. At three o'clock the Federal force believed they had the victory; and that, indeed, they had, and would soon have reached and obtained possession of the railroad leading to Winchester.

of regiments, &c., besides the loss from plundering by privates and citizens.

E. P. ALEXANDER,
Captain Engineers, General Staff.

Abstract list of prisoners and wounded of the enemy sent to Richmond and the hospitals at other places since the battle at Manassas, July 21, 1861:

PRISONERS NOT WOUNDED.

Sent to Richmond..... 871

WOUNDED PRISONERS.

Sent to hospitals since July 27..... 420

Estimated number sent previous to July 27..... 130

Total..... 550

Grand total..... 1,421

These prisoners represent themselves as belonging to forty-seven different volunteer regiments, nine regiments of the regular army, and the marine corps. Besides these regiments, in the reports and orders of the enemy are mentioned by name, one regiment of volunteers, and companies from two regiments of regulars in Hunter's Division; six volunteer regiments in Mill's division, and Runyon's entire division of at least five regiments from New Jersey, from which we have neither prisoners nor wounded.

E. P. ALEXANDER, Capt. Engineers, General Staff.

Returns of captured ordnance and ordnance stores turned into Ordnance Department, Army of the Potomac, up to August 16, 1861:

- 1 30-pounder Parrott gun, with 800 rounds ammunition.
- 9 10-pounder Parrott guns, with 100 rounds each.
- 8 6-pounder brass guns, with 100 rounds each.
- 8 12-pounder brass howitzers, with 100 rounds each.
- 2 12-pounder boat howitzers, with 100 rounds each.
- 9 James' rifled pieces, with 100 rounds each.
- 37 caissons.
- 6 travelling forges.
- 4 battery wagons, splendidly equipped.
- 64 artillery horses, with harness, &c.
- 500,000 rounds small arms ammunition.
- 4,500 sets of accoutrements, cartridge-boxes, &c.
- 4,000 muskets.

No accurate returns of drums, swords, pistols, knapsacks, haversacks, canteens, saddles, bridles, &c., can be obtained. One six-pound gun and one twelve-pound howitzer were found spiked, but they were easily withdrawn. One of the enemy's caissons was exploded on the field in addition to those captured.

E. P. ALEXANDER,
General Staff, Captain Engineers, C. S. A.

The report of General Beauregard states the number of field-pieces captured as follows: "Twenty-eight field-pieces of the best character of arm, with over one hundred rounds of ammunition to each gun, thirty-seven caissons, six forges, four battery wagons, sixty-four artillery horses completely

But the arrival of four fresh regiments, who entered the field with great spirit and energy, changed the result. At the session of the Confederate Congress, held at Richmond on the next day, the 22d, the following despatch was read:

MANASSAS JUNCTION, SUNDAY NIGHT.

The night has closed upon a hard-fought field. Our forces were victorious. The enemy were routed, and precipitately fled, abandoning a large amount of arms, knapsacks, and baggage. The ground was strewn for miles with those killed, and the farm houses and grounds around were filled with the wounded. Pursuit was continued along several routes towards Leesburg and Centerville until darkness covered the fugitives. We have captured many field batteries and stands of arms, and one of the United States flags. Many prisoners have been taken. Too high praise cannot be bestowed, whether for the skill of the principal officers, or the gallantry of all our troops. The battle was mainly fought on our left. Our force was 15,000; that of the enemy was estimated at 35,000.

JEFFERSON DAVIS.

Great indignation was manifested against Gen. Patterson in consequence of the successful movement of Gen. Johnston from Winchester, by which he was enabled to reinforce the Confederate army at Manassas. On the 16th he

equipped, five hundred thousand rounds of small arms ammunition, four thousand five hundred sets of accoutrements, over five thousand muskets," &c., &c.

HEAD-QUARTERS, ARMY OF THE POTOMAC. }
August 23, 1861. }

COLONEL: In accordance with your request, I send you a list of the regiments actually in the battle of the 21st of July, 1861:

Jackson's brigade, consisting of the
Second Regiment Virginia Volunteers, Col. J. H. Allen commanding.

Fourth Regiment Virginia Volunteers, Col. James F. Preston commanding.

Fifth Regiment Virginia Volunteers, Col. Kerton Harper commanding.

Twenty-seventh Regiment Virginia Volunteers, Colonel Gordon absent, Lieutenant-Colonel Echols commanding.

Thirty-third Regiment Virginia Volunteers, Col. A. C. Cummings commanding.

Under General Bee, consisting of a part of his own and a part of Colonel Bartow's brigade—

Seventh Regiment Georgia Volunteers—Bartow's.

Eighth Regiment Georgia Volunteers—Bartow's.

Second Regiment Mississippi Volunteers—Bee's.

Fourth Regiment Alabama Volunteers—Bee's.

Sixth Regiment North Carolina Volunteers—Bee's.

Two companies Eleventh Mississippi Volunteers—Bee's.

E. R. Smith's brigade.

Tenth Regiment Virginia Volunteers, Colonel Elzey.

Third Regiment Tennessee Volunteers.

Maryland Volunteers.

BATTERIES IN ACTION.

Colonel Pendleton's—four pieces.

Captain Imboden's—four pieces.

Captain Alburtt's—four pieces.

Captain Stanard's—four pieces.

Lieutenant Beekham's—four pieces.

CAVALRY.

Colonel J. E. B. Stewart, with twelve companies.

I cannot furnish the strength of the regiments, companies, &c. Respectfully, your obedient servant,

THOMAS G. RHETT, Acting Adjutant-General.

Colonel THOMAS JORDAN, Acting Adjutant-General, First Corps, Army of the Potomac.

This statement of the Confederate force in action evidently does not include the reinforcements brought by General Johnston. Neither does it mention the Fourth South Carolina, known to have been badly cut up, or Hampton's Legion.

The loss of the North Carolina Sixth was stated at home to have been as follows: Killed, 15; wounded, 53; missing, 1. The cannon captured at Bull Run were twenty-five pieces. The report of the Captain of Engineers makes the number turned over to the Ordnance Department of the Potomac Army to the 16th of August, at twenty-seven pieces.

broke up his camp at Bunker Hill and retired upon Winchester and strongly intrenched himself. On the afternoon of the 17th he took the road to Berry's Ford, on the Shenandoah, and thence to Piedmont station, on the Manassas Gap Railroad, fifteen miles, making twenty-eight miles in two days, thence from Piedmont to Manassas Junction by railroad, about thirty-eight miles. The last of his force arrived on the battle-field in the afternoon. There can be no doubt these reinforcements saved the Confederate army from a total defeat.

The term of Gen. Patterson's command expired with the time of the three-months volunteers, when he retired from active service. No investigation has ever been made of the circumstances, nor explanation given beyond what was made by Gen. Patterson in a public speech soon after. He said: "On the 9th of July a council was held, at which all the commanders of divisions and brigades, and chiefs of staff, were present. Col. Stone, the junior line officer, spoke twice and decidedly against an advance, advocating a direct movement to Shephardstown and Charlestown. All who spoke opposed an advance, and all voted against it. On the same day he informed the General-in-Chief of the condition of affairs in the valley, and proposed that he should go to Charlestown and occupy Harper's Ferry, and asked to be informed when he would attack Manassas. On the 12th he was directed to go where he had proposed, and informed that Manassas would be attacked on Tuesday, the 16th. On the 13th he was telegraphed: 'If not strong enough to beat the enemy early next week, make demonstrations so as to detain him in the valley of Winchester.' He made the demonstrations, and on the 16th, the day General Scott said he would attack Manassas, he drove the enemy's pickets into his intrenchments at Winchester, and on the 17th marched to Charlestown.

"On the 18th he telegraphed the General-in-Chief that Johnston was in a position to have his strength doubled just as he could reach him, and that he would rather lose the chance of accomplishing something brilliant than by hazarding his column, to destroy the fruits of the campaign by defeat, closing his despatch thus: 'If wrong, let me be instructed.' But no instructions came. This was eight days before the battle of Manassas. On the 17th General Scott telegraphed: 'McDowell's first day's work has driven the enemy beyond Fairfax Court House. To-morrow, probably, the Junction will be carried.' With this information he was happy. Johnston had been detained the appointed time, and the work of Gen. Patterson's column had been done.

"On the 18th, at half-past one in the morning, he telegraphed Gen. Scott the condition of the enemy's force and of his own, referring to his letter of the 16th for full information, and closed the despatch by asking 'Shall I attack?' This was plain English, and could not be misunderstood, but he received no reply. He expected to be attacked where he was; and if Manassas was not to be attacked on that day, as stated in General Scott's despatch of the day previous, he ought to have been ordered down forthwith to join in the battle, and the attack delayed until he came. He could have been there on the day that the battle was fought, and his assistance might have produced a different result.

"On the 20th he heard that Johnston had marched with thirty-five thousand Confederate troops and a large artillery force, in a southeasterly direction. He immediately telegraphed the information to General Scott, and knew that he received it the same day.

"In accordance with instructions, he came to Harper's Ferry on the 21st, which place he held until relieved."

C

CAIRO is situated at the southern extremity of the State of Illinois, on a point of land formed by the confluence of the Ohio and the Mississippi rivers. It is one hundred and seventy-five miles below St. Louis.

The ground immediately above the city, as far as the crossing of Cache River, about one mile, is low, and flooded at high water, completely insulating Cairo. At such times the only land communication with the back country is by the causeway of the Illinois Central railroad; but much of the year, at least ten months out of the twelve, the ground is dry, and good communications can be made with the interior of the State by ordinary roads. Six miles above Cairo, on the line of the Illinois Central Railroad, is a fine rolling country, extending some sixty miles north, heavily timbered, and filled with sparkling springs of water. This triangular tract, bounded on the

southeast by the Ohio, and on the southwest by the Mississippi, comprehends most of what is called "Egypt." It is wonderfully adapted to the culture of grapes and fruits of all kinds. North of the tract described the interminable prairies commence, extending to Chicago.

The levees at Cairo are forty-two feet above ordinary low water, fifty feet above extreme low water, and average ten feet above the natural surface of the land. If kept to their proper grade they will be at least four feet above the highest flood of which there is any knowledge or tradition at the confluence of the Ohio and Mississippi rivers.

The ordinary rise of water at this point, from floods in either river, is about thirty-five feet.

The position is commanded by "Bird's Point," in Missouri, whence shot and shell can be thrown to the utter annihilation of Cairo. Troops can cross the Mississippi from old Fort

Jefferson, on the Kentucky shore, (situated at the mouth of Mayfield Creek, four miles below Cairo,) into Missouri, and thence, by an excellent road, practicable for artillery at all times, go direct to "Bird's Point." They would be unobserved and unmolested by any force stationed at Cairo, for the reason that the peculiar bend in the Mississippi River below Cairo, and the formation of the banks, would screen them from all observation.

Again, the land directly opposite Cairo, in Kentucky, is generally low, and flooded at ordinary high-water; the first high ground or appearance of bluff below is in the vicinity of Fort Jefferson; the river banks shelve, without depth of water, in low stages sufficient for steamboat landings, the channel being entirely on the Cairo side. Back of this low land there extends, for a long distance, a chain of muddy lakes, bayous, and canebrakes. But about two miles above there is a height of land or ridge extending to the margin of the Ohio River, which is seldom or never overflowed, and could be made entirely safe from high water by a small levee. Here batteries can be established which will accomplish any result not attainable by those on the Missouri shore at Bird's Point, and the two, properly placed, would command every point in Cairo, including the levees and railroads, both of which they could sweep for miles. The width of the Ohio at Cairo is about three-fourths of a mile; the Mississippi is not much wider.

Cairo was occupied in April by Illinois troops, to protect it against invasion. Two thousand troops had arrived as early as the 25th. It soon became a position of great importance for the concentration of men and the equipment of gunboats. The expeditions against the military posts of the Confederates in Kentucky and Tennessee were chiefly fitted out at this point.

In August, the railroads in Western Tennessee were taken possession of by the State authorities for the purpose, it was supposed, of conveying troops towards Cairo. About eight thousand troops crossed the Mississippi to New Madrid, where they were joined by others from Tennessee, Arkansas, and Missouri, forming a large aggregate, and well supplied with artillery. These troops, it was feared, were to make a speedy attack on Cairo, where the National forces were considerably reduced, in consequence of the expiration of the term of the three months' volunteers.

Active measures, however, were taken by Gen. Fremont to reinforce the place. He hastily fitted out at St. Louis a fleet of eight steamers, laden with some four thousand troops and a large quantity of provisions and munitions of war, with all of which he safely landed at Cairo. The reinforcements thus opportunely taken to this point increased the National forces there to about eight thousand men, sufficient to hold the secessionists in check, and eventually to frustrate their plans.

CALIFORNIA, one of the United States, lying on the western side of the continent, is bounded north by Oregon, east by Utah (from which it is partly separated by the Sierra Nevada Mountains) and New Mexico, south by the Mexican Territory of Old California, and west by the Pacific. Its greatest length in a northwest and southeast direction is about 720 miles, and its breadth about 240 miles. Its area is 188,982 square miles. Along the coast is a low range of mountains, which in many instances approach the water's edge, and form a bluff iron-bound shore. In other parts, the coast is broken and hilly, to which succeeds the range entering from Oregon. It is the most important mineral region in the world, particularly in its deposits of gold. The population, in 1860, was 376,200, of whom 3,816 were free colored persons. (*See NEW AMERICAN CYCLOPEDIA.*)

During the year 1861, commercial affairs were subject to the same depression which prevailed throughout the United States. (*See COMMERCE.*) The measures of the Federal Government were warmly sustained by the people of the State. No volunteers were sent to the Atlantic States as State troops, although numbers of citizens of the State joined regiments formed in those States. Her distant location from the scene of conflict served to preserve her from many of its embarrassing influences, while it did not diminish her ardor for the Union cause, or her anxiety for its ultimate triumph.

California was visited, during the autumn and early winter of the year 1861, by a most disastrous flood. The streams, swollen to a great height by protracted and heavy rains throughout California, Oregon, and Nevada territory, flooded the valleys, inundated towns, swept away mills, dams, flumes, houses, fences, and domestic animals, and ruined fields and destroyed property to the estimated value of \$10,000,000. The rainy season commenced on the 8th of Nov., and the rain continued to fall with scarcely any intermission for four weeks. The north fork of the American River at Auburn, rose 55 feet, and in many other of the mountain streams the rise was almost as great. On the 9th the flood reached the lowlands of the Sacramento Valley, and Sacramento City was the greatest sufferer from the flood.

This city is situated between the American and Sacramento rivers at their junction, and has been subject to floods. In the summer of 1853, the grade of the streets was raised 4 feet, and a levee, from 4 to 20 feet high, built for 2 miles along the bank of the Sacramento, and for 3 miles along the bank of the American River; and believing themselves protected by these precautions against a flood, the inhabitants had spent large sums in beautifying the city. The railroad from Folsom to Sacramento passes near the American River its whole distance, and enters the latter city about 2 miles from the river, on a high embankment. This had been made solid a year or so before, and thus the water coming in full flood down the

American River and hemmed in by the railroad embankment and the levee, rose till it poured over the top of the levee, being 10 feet higher inside the levee than on the outside in the bed of the river. There was no way of relief except by cutting the levee. This was a hazardous enterprise, but was accomplished, and the water fell at once 5 or 6 feet. It still remained several feet deep for two or three weeks in the lower part of the city, and three times rose again to a considerable height. As the flood began to subside, its direful results became manifest; a number of lives had been lost, houses and stores had been twisted, overturned, undermined, and seriously injured; cattle, horses, and hogs had been drowned in large numbers, gardens and fences destroyed, and every thing made desolate. The city, previously burdened with an enormous debt, had lost at least \$2,000,000, and ruin stared every man in the face. Repudiation was openly determined upon by the City Council, but was prevented by the firmness of the city officers and the indignation of the other cities of the State. Liberal subscriptions were made for their aid in other cities, San Francisco sending \$30,000 in money, besides large quantities of provisions and clothing, and other cities smaller amounts, and the citizens took courage and began to rebuild their city again. On the Trinity River the loss of property was more than \$150,000; in Marysville, \$40,000; on the Feather River the canals and dams of the Ophir Water Company, and their bulkhead apron and flume were carried away, and an immense boom of saw logs and large quantities of lumber swept away. In Grass Valley the mines were seriously injured. Throughout all the mountain region of California and Nevada a similar scene of destruction was witnessed.

CAMP ALLEGHANY. In the vicinity of this camp, which was situated on the Greenbrier River, in Pocahontas Co., Western Virginia, a valley lying between the Flat Top and Kittatinny ranges, there was a sharp action on the 18th of December. The Union troops were commanded by Gen. Milroy, and consisted of portions of the Ninth and Thirteenth Indiana, the Twenty-fifth and Thirty-second Ohio, and the Second Virginia, numbering in all 1,750 men. The Confederate force was under the command of Gen. Johnson, of Georgia, and was estimated at 2,000. The action commenced about daylight and lasted till 3 o'clock in the afternoon, when the Confederates set fire to their camps and retreated to Staunton, in the valley of Virginia, thus vacating Western Virginia, at least that portion west of the Kittatinny range. The loss, as officially reported, was about equal on both sides; the Federal troops having 20 killed and 107 wounded, and the Confederates 25 killed, 97 wounded, and about 30 of their men being taken prisoners.

CAMPBELL, JOHN, Lord Chancellor of England, an English jurist, statesman, and author, born at Springfield, near Cupar, Fifeshire, Scot-

land, Sept. 15, 1781, died in London, June 28, 1861. His father was a Scottish clergyman, and long minister of the kirk at Cupar. John was educated at the University of St. Andrews, and migrated early to London, where he was entered as a student of law at Lincoln's Inn, in 1800, and admitted to the bar in 1806. He supported himself while studying his profession by writing law reports and theatrical criticisms for the "Morning Chronicle." His success as a lawyer was slow but steady, and he aided his income and reputation by publishing reports of the principal cases decided in the Courts of King's Bench and Common Pleas. In 1821 he married the eldest daughter of Sir James Scarlett, afterwards Lord Abinger. In 1827 he received the appointment of King's Counsel. In 1830 he was elected member of parliament for the borough of Stafford, and in 1832 that of Dudley; and in November of the latter year, appointed solicitor-general, which office he retained till Feb. 1834, when he was raised to the position of attorney-general. He left office when the Grey Ministry resigned in Nov. 1834, and at the next general election was returned to parliament by the city of Edinburgh, which he continued to represent till he was raised to the peerage. In 1835, on the accession of Peel's Ministry, he was again appointed attorney-general, and remained in that office till June 1841, when he was appointed Lord Chancellor of Ireland, and raised to the peerage as Baron Campbell, his wife having previously become a peeress as Baroness Stratheden. In Sept. 1841, he went out of office with the Melbourne Administration. For the next five years he was on the judicial committee of the Privy Council, and one of the committee of appeals in the House of Lords. During this interval he devoted much attention to literary pursuits, and prepared a series of elaborate biographies of the "Lord Chancellors and Keepers of the Great Seal, from the earliest times to the reign of George IV." (7 vols. 8vo., London, 1846-'7,) which he afterwards followed with 2 volumes of the lives of the "Chief Justices of England from the Norman Conquest to the death of Lord Mansfield," (London, 1832.) He afterwards added a third volume, bringing the biographies down to 1832. These were all republished in this country. In 1836 he was called to the post of Chancellor of the Duchy of Lancaster, and a seat in the Russell Cabinet. In 1850 he succeeded Lord Denman as Chief-Justice of the Court of Queen's Bench, which post he held till 1859, when Lord Palmerston appointed him Lord Chancellor, which office he held till his death. Besides the reports and biographies already mentioned, a collection of his speeches at the bar and in the House of Commons was published in 1842. His efforts during the closing months of his life in the House of Lords, over which he presided, were directed to the simplification and improvement of the statutes, so as to render the administration of justice more equitable and accessible to all.

For this purpose he had procured the repeal of a large number of obsolete laws, the more extended application of the divorce bills, and the extension of education.

CANADA, and BRITISH AMERICA. The British possessions in North America embrace all that portion of the continent, except Russian America in the N. W., lying north of the line of 49° N. latitude; thence following Rainy River and Lake to Lake Superior, thence following the centre of Lake Superior, Huron, St. Clair, Erie and Ontario and the St. Lawrence to the 45th parallel, which it maintains to the Connecticut River, where it follows the crest of the Highlands, and the circuitous N. E. boundary of the Ashburton treaty, to the mouth of the St. Croix River. Of this vast territory only a small portion, including the tract lying along the St. Lawrence, and extending from 30 to 120 miles north of that river, and of Lakes Erie and Ontario, portions of New Brunswick, Nova Scotia, and Prince Edward's Island, the coasts of Newfoundland, a few settlements on Vancouver's Island, and some scattered forts, &c., in British Columbia, is inhabited. The remainder is as yet a wilderness, much of it cold and sterile, though some portions, such as for instance the basis of the Red River of the North, have a fertile soil, though but a brief summer. Canada, which is a government by itself, and under a Governor-General, is the largest and most important of the North American possessions of Great Britain. It is divided into an Upper and Lower province, or as they are often called, Canada West and Canada East. In the former a majority of the population are of British origin, and of the Protestant religion; in the latter the majority are of French origin, and the Catholic faith. Upper Canada is divided into 44 counties, having in 1861 a population of 1,395,222 inhabitants, a gain of 443,218 since 1851. Its principal cities were Toronto, with 44,743 inhabitants; Hamilton, 19,096; Ottawa, the new capital, 14,669; Kingston, 13,743; and London, 11,555.

Lower Canada has 60 counties, which in 1861 had 1,106,666 inhabitants, a gain since 1851 of 216,405. Its principal cities and towns are Montreal, with a population of 90,498; Quebec, with 51,108; Three Rivers, 6,028; and Sherbrooke, 5,899. The total population of Canada was in 1861, 2,501,888. New Brunswick had a population of 233,727; Nova Scotia, 330,699; Prince Edward's Island, 80,648, and Newfoundland 124,608, making a grand total of 3,271,570. The returns of British Columbia and Vancouver's Island had not been received, but would not probably vary the result more than from 40,000 to 50,000.

The exports of Canada of wheat, flour, corn, and other agricultural products, timber, lumber, and animals, were in 1861 \$34,717,248, of which \$14,386,427 came to the United States. The imports from the United States for the same year, consisting mainly of cotton, woollen goods, silks, satins, velvets, iron and hardware

of all kinds, earthen and glass ware, and fancy goods, amounted to \$21,069,388, yielding a customs revenue of \$1,584,892. The total imports of the year were \$43,054,836, and the total customs revenue \$4,768,192. The finances of Canada were not in a desirable condition. The total government expenditure for the year 1861 was \$14,742,834 28, and the total receipts (including \$2,764,002 58 bonds issued) \$12,655,581 48, showing a deficit of \$2,087,252 80 still to be met. In December, 1861, the Government debt, aside from the above deficit, was \$65,626,478 less the amount of the imperial sinking fund, \$7,300,000, giving a net indebtedness of \$58,326,478. A large proportion of this debt, as well as a very considerable additional one for English subscriptions to the same enterprise, has accrued from the immense expenditure for railroad construction, far in advance of the means of the colonies, or their capacity for profitable traffic. The cost of the new parliament buildings, now in course of erection at Ottawa, which is to be the capital of the provinces after 1865, amounting on the 1st of January, 1862, to \$2,603,410 67, has also been a heavy addition to the expenditure of the Government. In addition to these, the efforts made to arm and equip a militia force for the defence of Canada against a professed danger of invasion from the United States, produced a heavy expenditure, most of which, however, would come into the exhibit of 1862.

The census of 1861 indicates material progress in Canada, both in population and in material wealth. The growth of the Upper Province or Canada West, in the decade has been 46.55 per cent.; of the Lower Province (Canada East) 24.31 per cent.

The following table gives the origin of the population as ascertained by the census:

Origins.	Lower Canada.	Upper Canada.	United Canada.

The statistics of the religious denominations

in Lower and Upper Canada present the following results: Church of England, 374,987; Church of Rome, 1,200,865; Established Church of Scotland, 132,649; Free Church do., 157,813; Presbyterian, 56,527; Wesleyan Methodist, 244,246; Episcopal Methodist, 74,152; New Connection do., 29,492; other Methodists, 24,209; Baptists, 9,310, &c.

The trade with the United States has been largely increased, mainly through the influence of the Reciprocity Treaty of 1854. The imports from the United States, which in 1851 were \$8,365,765, had risen in 1856 to \$22,704,509, and notwithstanding the disastrous financial reverses of 1857-60, and the war in 1861, amounted in the latter year to \$21,069,388. The exports of 1851 were \$4,071,544, in 1856 they had increased to \$17,979,752; in 1860 they were \$18,427,968, and amid all the disturbing influences of last year, \$14,386,427. The movement of goods outward and inward on the St. Lawrence, a traffic which has been greatly increased by the abolition of tolls and transit duties on that river in 1859, shows an even more rapid augmentation. In 1859 the exports, *via* that river were \$8,821,662, while in 1861 they were \$22,524,733. The imports by way of the St. Lawrence in 1859 were \$11,549,068, and in 1861 they had risen to \$17,249,055. The inward tonnage of 1859 was 641,662 tons, and that of 1861, 1,087,128; the outward tonnage in 1859, 640,471 tons, and in 1861, 1,059,667. Of the exports of 1861 no less than \$3,505,511 were grain, &c., exported from the Western United States to Europe by that route.

The postal revenue has increased in ten years from \$230,000 to \$658,000, or 213 per cent., and the number of letters mailed from 2,000,000 to 9,000,000.

Several of the leading Canadian journals manifested bitter hostility toward the Government of the United States at the outbreak of the war, and sought to inflame the feelings of the people against that government; but they became convinced after a time that they were not representing the sentiments of the Canadian people, and for the most part desisted from their efforts.

At the time of the excitement in regard to the seizure of Messrs. Mason and Slidell, a zealous attempt was made to revive this hostile feeling, and under the pretence that the United States Government designed the invasion and conquest of Canada, a force of several thousand troops from England was sent to Canada to aid in its protection, and a call was made for volunteer troops, of which it was alleged 300,000 could be raised and enrolled in the province to repel invasion. Public meetings were held, and earnest appeals made for volunteers. The result was that 248 corps were returned, *viz.*, 34 corps of cavalry, 27 of artillery, 182 of infantry, and 5 of engineers. Had these all been full, the number of officers would have been 829, and of men 13,390; but 62 corps made no report of their numbers, and others reported more than

were actually enrolled; so that Mr. Galt, the Canadian Minister of Finance, estimates that the whole number who actually volunteered did not exceed 10,000. The excitement soon passed away, and those who were enrolled, were not called into service.

Strenuous efforts were made the past year to encourage the sale and settlement of new lands. Roads were opened at government expense into unsettled districts. The sale of lands from these efforts during the year amounted to 174,588 acres, for the gross sum of \$108,626.

An effort was also made, and has been continued during the present year, to effect an amalgamation of all the railroad lines of the province into one company, whose bonds, or their interest, should be guaranteed by the British Government, but thus far the attempt has not been successful.

Railways have made immense progress during the past ten years. The following table exhibits their length and cost at the close of the year 1861:

Corporate Titles.	Total.	Open.	Cost of road and equipment

* Under this deduction are included—that part of the Grand Trunk in Vermont, 13 miles, and the Detroit District of the same in Michigan, 59 miles.

CARNIFEX FERRY, over the Gauley River, eight miles southwest of Summerville, Nicholas Co., Virginia, crosses the river at the only point for several miles where the river, which flows mainly through a deep ravine, is accessible for a ford or ferry. On the west bank of the river near this ferry, on the 10th of Sept., Gen. Floyd, with a Confederate force of about 5,000 troops, had a strongly fortified camp, flanked by deep and marshy ravines on each side, and in front, west of the river, protected by a dense forest, which, at a distance of 300 yards, completely concealed his camp. Gen. Rosecrans, with a force nearly equal, marched seventeen miles, and about three o'clock in the afternoon sent forward Gen. Benham, with his brigade, to make a reconnoissance in force. They were soon engaged with the enemy, and after a severe action were about being reënforced, when, from the great difficulties of the position rendering night fighting almost impossible, Gen. Rosecrans ordered his men to form in order of battle and rest upon their arms, intending to renew the attack in the morning. During the night Gen. Floyd and his force escaped across the Gauley, leaving their camp, baggage, small arms, and munitions of war, and burning the bridge which he had constructed, and the ferry boats. Being unable to effect a crossing of the river, Gen. Rosecrans could not pursue them, but took a few prisoners. The Federal loss was, according to official report, 15 killed and 80 wounded; that of the Confederates was less, as they were protected by the forest and their fortifications. But for some misunderstanding of the orders given to two or three regiments, the Confederate camp might have been taken at the time of the first attack, though probably not without a heavy loss.

CARTHAGE is the capital of Jasper County in Missouri. It is situated on Spring River, about 220 miles southwest of Jefferson City. On the prairie, about seven miles east of the town, a small force of about one thousand or eleven hundred men, under Gen. Sigel and Salomon, attacked a Confederate force under Gen. Rains and Price, with Governor Jackson, about the 5th of July. The battle was hotly contested, and resulted in the Union forces retiring. The spot is known under the name of Brier Forks.

The forces engaged were about twelve hundred Nationals, with ten pieces of artillery, against a large Confederate force, with five pieces of cannon, and having the advantage of a considerable body of cavalry. Gen. Sigel commenced the attack on the enemy's line of battle at half-past nine o'clock in the morning, and succeeded, after about two hours' fighting, in silencing his artillery. The Confederate cavalry then made a movement to outflank him, and make an attack upon his baggage train, but Gen. Sigel manœuvred in such admirable style that the attempt entirely failed. The National forces retired until a point was reached where

the road ran between two high bluffs, the opening being occupied by the Confederate cavalry, when, by a ruse, he drew them in a solid body to within a hundred and fifty yards of his position, where he opened upon them with a cross-fire of artillery and charged them at a double-quick step with his infantry, scattering them in every direction. The enemy finally retired to Carthage, and Gen. Sigel fell back on Sarcoux, and the next day went to Mount Vernon to await reinforcements.

The loss on the Federal side was reported at thirteen killed and thirty-one wounded. On the Confederate side it was much larger.

CAVOUR, CAMILLO BENSO, COUNT DI, the greatest of Italian statesmen in modern times, was born at Turin, Italy, Aug. 10, 1810, and died in the same city June 6, 1861. He was the second son of the Marquis Michael Joseph di Cavour, the representative of one of the oldest and most illustrious families of Piedmont, the descendant of that Thomas I. Count di Maïenne, who, in 1244, as conqueror of Piedmont, assumed the title of Prince of Achaia and Morea. His mother was of the no less noble Genevese family of Sellon. The financial services of the father to the Sardinian Government had led to his elevation to the highest rank of the Sardinian nobility by Charles Albert. He was, however, one of the most bigoted and aristocratic of the old Sardinian nobles, and hated with an almost insane detestation every movement towards liberal opinions. A sister of the first Napoleon, the Princess Maria Borghese, stood sponsor for the count at his baptism, and his early education, up to his fourteenth year, was committed to the Abbé Trezet, a Jesuit father, and author of a History of Savoy. At the age of fourteen (some authorities say even earlier) he was sent to the military college of Turin, in accordance with the policy of the ancient Piedmontese nobility, which required that every member of the aristocracy should pass some years in the military service of the State. For a time he was a page of Charles Felix, the last king of the elder line of the House of Savoy, but his independent bearing and his free expression even then of liberal opinions, led to his dismissal, and he returned to his military studies, and devoted himself especially to mathematics, under the astronomer Plana, and in 1828 left the school with the rank of lieutenant of engineers. His proficiency in mathematics and engineering science led to his speedy employment in the survey of the passes of the Alps and Apennines, and the construction of a fortress to guard the road from Genoa to Nice. But his mind was occupied with higher topics than those of a merely professional character. He had acquired already a thorough knowledge of the English language, and his leisure hours were occupied in the study of Adam Smith's works and other treatises on political economy and finance, and already visions of future political eminence were passing before him.

These studies naturally tended to confirm the liberal opinions he had already begun to entertain, and in 1832 the unguarded expression of these opinions led to his consignment, as a punishment, to the gloomy garrison of the Fort du Bard, in the valley of Aosta. It was from this dismal prison that he wrote to a noble lady of Turin that remarkable letter, which in such express terms predicted his future, at a time when nothing seemed more improbable than that he, the younger son of a noble house, a mere lieutenant of engineers, but twenty-two years of age, and already undergoing punishment for his liberal opinions, should rise to the position of premier of a nation whose existence was yet in the hardly possible future. We give the letter in full, premising that it was in reply to one from the Marchioness, condoling with his misfortunes: "I thank you, Madame la Marquise, for the interest you take in my disgrace; but you may be assured that my career will not be changed by it. I have a great ambition, an enormous ambition, and when I shall become Minister of State, I hope that I shall justify it; since in my dreams I already see myself Minister of the Kingdom of Italy.—O. Cavour." That ambition, enormous, as he styled it, never left him from that day forward; but it was not a rash ambition, or one seeking only personal aggrandizement; it was the Kingdom of Italy he desired to see, and of that alone that he hoped to become premier, and for that end he could labor and wait. Soon after this letter was written he resigned his commission in the army, and being denied by the Austrian Government, ever suspicious of men of liberal opinions, admission to Lombardy, which he desired to visit, though subsequently allowed under strict surveillance to visit Milan, he soon returned home, where, however, his views were extremely unpalatable to his father, who held fast the old aristocratic traditions of his race and rank. In 1835, Count Cavour left Italy for the first time, and spent the next seven years in Switzerland, France, and England. The last was the country of his choice; he studied its institutions with the utmost care and thoroughness, suffering nothing either of principle or detail to escape him. The debates of the House of Commons, during the passage of Sir Robert Peel's modifications of the commercial policy of the nation, the development of agriculture, the measures of finance, and the extension of commerce, were all carefully and critically observed; and to his own country were addressed two political pamphlets of great ability, embodying the results of his observations—the one, an essay on "The influence which the New Commercial Policy of England will exert upon the Economy of the World, and particularly on Italy;" the other, a noble defence of a constitutional government, in a treatise on "Communitistic Ideas and the means of Combating their Development." His observations on political matters in France were equally thorough and searching. In the over-

throw of the monastic system, with its vast landed estates which had formerly escaped taxation, he saw the true policy for his own country; but its overthrow by violent convulsions and the upheaval of the very foundations of society, was not to his liking; he preferred milder and more constitutional methods of procedure. In 1842 he returned to Italy, where still the government was despotic, the monks idle and licentious, the people poor and sorely oppressed by taxes, and the threatening power of Austria hanging like an incubus over the national spirit and ready to repress the slightest movement. There was no opening for him to act directly on the legislation of the country, but he possessed his soul in patience. In connection with some of his friends he organized an Agrarian or Agricultural Society, and assumed the editorship of an Agricultural Journal in connection with it, which had a wide circulation in Sardinia, and introduced greatly improved methods of culture, which were much needed; and under the pretext of discussing the rotation of crops, or the value of different manures, occasionally broached social problems and enunciated principles, which sunk the deeper into the hearts of his readers from the apparently accidental way in which they were introduced. On the accession of Pius IX. to the Papal See, when the strong cry of liberty was aroused, the Agrarian Society became the focus of the liberal movement in Sardinia, and Cavour, in connection with Cesare Balbo, D'Azeglio, Santa Rosa, Alfieri, Buoncompagni, and others, established a liberal paper, under the title of the "*Risorgimento*," (Resurrection.) The party which Cavour and his friends represented, were the advocates of constitutional freedom, in distinction from an aristocratic and ecclesiastical despotism on the one hand, and the anarchy of red republicanism on the other. The ability of the journal, and the position occupied by its editor and contributors, were soon manifest, and brought down upon it the bitter hatred of Austria and the equally intense hostility of the extreme democrats. Early in 1848, Cavour and Santa Rosa presented to the king a petition for a constitution, which was granted two days later. Cavour was elected for the first time to the Sardinian Chamber of Deputies in the spring of 1848. He was at first unpopular, for he opposed extreme measures, and the extremists were in the majority. His maiden speech was greeted with hisses, because he attacked in it the wild excesses of the red republicans of France, and opposed the principle that Italy was able then to defend itself against its foreign foes. But either in the Chamber of Deputies or in the columns of the *Risorgimento*, he was constantly and powerfully discussing the great questions of the day. In the election of 1849, the prejudice of the extremists against him was so strong that an unknown radical of low birth and small capacity was elected in his place. But he made himself even more powerfully felt

in the nation in the columns of his journal than in the tribune; and when the mad passion of the people subsided they saw it, and reinstated him at the beginning of 1850, in the Chamber of Deputies; and bold as some of his subsequent measures seemed, and unpalatable as they often were at the time, the public confidence, once bestowed on him, was never again withheld. On the 7th of March, 1850, he made a speech in which he indicated the purpose which he afterwards carried into effect, while advocating the abolition of the ecclesiastical tribunals, of the establishment of a free church in a free State. In October of the same year, Massimo d'Azeglio, then Premier, proposed to the king the nomination of Cavour as Minister of Commerce. "Take care," said Victor Emanuel, "if Cavour enters the cabinet, he will soon be master of you all." From the moment of his entering the cabinet he was indeed its master spirit. He had found his mission, and he labored in it with a zeal and a capacity for comprehending not only the great principles, but the minutest details of each department, which was truly marvellous. He was not satisfied with one department, but always had charge of two, much of the time of three, and during the great emergencies of the Crimean war, and the war with Austria, of four; and in every case he accomplished far more in each than any minister had ever before done who had devoted his whole energies to one. His first portfolio was that of commerce and agriculture, to which was added almost immediately that of the marine, and early in 1851, that of finance. Here he commenced the peculiar work of his life, that organization of the physical and social forces of his country, which should fit it for the great part it was to play in the coming future of Italy. His position at the beginning was one of great difficulty. Piedmont was isolated from the other nations of the peninsula, and equally so from the great powers of Europe. Her constitution offended the despotic powers by its liberality, and her own radicals by its conservatism; her finances were almost hopelessly disordered. To undertake, under these circumstances, commercial treaties with every State in Europe; to inaugurate a system of free trade, which should in five years increase the exports of the country fivefold and its imports more than threefold; to encourage the manufactures and agricultural productions of the State so that the growth and manufacture of silk should increase threefold in the same time, and the cotton manufacture five times; the construction of 450 miles of railway; the thorough and effective reorganization of the army; the establishment of a great naval depot, amply provided with all the material of war at Spezzia; the organization and putting in practice an admirable and comprehensive system of national education, and the retrieval of the national credit to such an extent that though the debt of the nation was largely increased, all the money needed for his purposes was obtained

for from three to five per cent. without bonus of any kind, and by rapidly increasing the wealth of the nation, enabling them to bear the burden of an increased taxation with greater ease than before; all these, had they been ends instead of means for something beyond them, would have been deemed colossal projects, and their successful accomplishment sufficient to entitle the projector to an immortality of fame and the lasting gratitude of his nation. But to him these were but the steps by which his "enormous ambition" would climb to the goal which he had ever kept in sight since his imprisonment in the Fort du Bard; "the Kingdom of Italy" was yet to be achieved, and his prescient eye saw that the time was not far distant. His treaties of commerce had bound England, France, Holland, Belgium, and the Scandinavian States, to Sardinia as with bands of steel; and the time was coming when the alliance was to be still further tested. He visited, at the close of 1852, England and France, and in the latter country had an interview with Napoleon III., which led to important consequences. He had for a short period left the cabinet on the ground that Azeglio and the majority of his colleagues were tampering with interests that admitted of no compromise; but in November, 1852, he was recalled and given *carte-blanche* in the formation of his cabinet, of which thenceforth he was really sole minister. The Chamber of Deputies, like the people, had faith in him; and though they could not comprehend all his far-reaching plans, they were satisfied that "papa Camillo," the affectionate term by which he had come to be generally known, loved his country and understood her interests. He saw that it would not be long before Austria, now secretly hostile, would become openly so; and he desired the coming of that event. For this purpose he spared no pains in disciplining his army, obtained from the Chamber of Deputies permission to remove the Naval Arsenal from Genoa to Spezzia; on this occasion, only, unveiling his hopes of the future by his reply to the deputy who opposed its removal, as perilling the safety of the navy by putting it within a few miles of a hostile frontier: "Who assures the honorable deputy that La Spezzia will not one day be rather in the centre than at the extreme point of our territory?" Early in 1854, France and England concluded their offensive alliance against Russia, and in December of that year a formal invitation, probably provoked by Cavour, was given to Sardinia to join in the league. He accepted the invitation on condition that Sardinia should be allowed to assume a footing of equality with her colossal allies. The apparent rashness of this proposition astonished all Europe. The presumption of a little State like Piedmont in attempting to take rank with France and England, was loudly denounced; and at home the popularity of Cavour, his patriotism, and his hold on the affections of the people, were alike submitted to a fiery test. The King stood

by him, but the most eminent patriots of the nation denounced the measure without stint as tending to plunge the nation into irretrievable financial ruin and calling away those troops to a foreign and distant quarrel, who were wanted at home to defend their own firesides. Amid all these denunciations Cavour stood firm, refusing to give up one iota of his plan, and declaring that "the independence of Italy must be conquered in the Crimea." In a speech of the most burning eloquence he defended his course, and though not deeming it prudent to lay bare the motives which prompted the measure, he appealed so successfully to the hearts of the Deputies, that spite of the most gloomy forebodings, they trusted once more their great statesman, and by a small majority ratified the treaty. Within a few months their fears were exchanged for rejoicing, for the beneficial results of the treaty were so evident that even those who had most vehemently opposed it, acknowledged their error. Meanwhile the suppression of the convents, and the applying of the surplus lands to the maintenance of the parochial clergy and educational institutions, a measure Cavour had long had at heart, drew down upon him the denunciations of the monks and the thunders of the Vatican. Here, again, he was firm, and carried the bill through the Chamber of Deputies triumphantly; thus ridding the kingdom of the intolerable burden which had so long paralyzed its energies. The Sardinian contingent had distinguished itself by its bravery in the Crimea, and Count de Cavour entered heartily into the negotiations for a peace. In the winter of 1856 he accompanied Victor Emanuel on a visit to the courts of England and France, and it was on this occasion that Napoleon III. first inquired of him, "What can be done for Italy?" a question to which he replied in his celebrated memorandum of March 27, 1856. At the Conferences of Paris, which led to the peace with Russia, and the adjustment of some other great European questions, Cavour represented Sardinia in person, and exerted an influence so powerful that he was able to announce on his return, on the 6th of May, that England and France had pledged themselves to seek the solution of the Italian question, and that Austria had occupied the position of a culprit at those conferences. The news was hailed with delight throughout Italy, and from all quarters addresses of congratulation and medals of honor poured in upon him who, according to the legend of the Tuscan medal, "had defended Italy with raised vizor." A national subscription was raised, throughout the peninsula, for arming the new fortifications at Alessandria, and the entry of the Sardinian regiments into Turin, on their return from the Crimea, was everywhere celebrated as a day of national festivity. This inflamed the hatred of Austria to fury; and the diplomatic agents and press of that country denounced, with the utmost virulence, the Piedmontese Government and its minister. This vituperation affected

him as little as the praise he had just received had done; his replies to the attacks of Austria were dignified and courteous, and put his enemy entirely in the wrong. For two years the crisis, long delayed, was evidently drifting nearer and nearer, but as yet there was no decided action. In September, 1858, Count de Cavour visited Napoleon III. at the baths of Plombières; and, after long and frequent conferences with him, returned apparently satisfied. The agreement had been made that France should aid Sardinia in expelling Austria from Lombardy and Venetia, and receive Savoy and Nice in return; and the families of Napoleon and Victor Emanuel were to be allied by marriage. The war with Austria was thenceforth a fixed fact, and that power, by taking the initiative, showed no disposition to protract the delay. The part taken by Cavour in this war was a vital one. He was president of the council and minister of war, marine, foreign affairs, and the interior. He rose at four, and worked almost incessantly till past midnight; and by this incessant toil accomplished more in each department, than any other minister with but a single portfolio had been able to do. All the wants of the army were instantly and abundantly supplied; the ships destined to join the French fleet in the Adriatic were equipped as soon as needed; the envoys of Sardinia to foreign powers were kept in a position to make all needful explanations to the foreign courts to which they were accredited; on the death of Ferdinand of Naples, an extraordinary ambassador was despatched to endeavor to persuade the young king to embrace a constitutional system and the alliance with Piedmont; and as fast as Lombardy was conquered, the benefits of the liberal Sardinian Government were extended over it; while Tuscany and the smaller States were influenced by his emissaries. The peace of Villafranca, leaving the work proposed but half completed, fell with stunning force on the overworked minister, and, unwilling to set his hand to a treaty which condemned Venetia to further servitude, he resigned and retired to his country-seat. For six months he remained in retirement, fretted almost into a fever at the incapacity of the ministry who had succeeded him, and awaiting with deep anxiety the action of the States of Central Italy. In January, 1860, the Rattazzi Cabinet fell under the weight of its errors, and Cavour returned to power. He commenced his work by dissolving the old parliament and convoking a new one, in which Lombardy should be represented; and provided for a popular vote on the question of annexation in Tuscany and the Emilian provinces. The annexation of Savoy and Nice to France, claimed as the reward of the annexation of Italian territory to Sardinia made through the French alliance, was a difficult matter to manage, for the king was grieved at it, and the parliament opposed; but Cavour saw that, once accomplished, it pledged France to acknowledge the principle of Italian unity,

and was therefore a wise measure, and he carried it over all opposition. The revolution in Naples, and Garibaldi's participation in it, required the highest order of statesmanship to manage it in such a way as to bring order out of confusion, and a compact united Kingdom of Italy out of the discordant elements thus developed. He proved competent to the work. Garibaldi and Napoleon III., neither of them his friends, and both of stubborn stuff, were compelled against their will by his adroit management to accomplish his purposes, the former effectually signing the death-warrant of his own power, by ordering a universal suffrage in Naples on the question of annexation to Sardinia. On the 27th of January, 1861, the elections had taken place for a new parliament, in which all the annexed States should be represented, and had resulted everywhere favorably to the Government. It was opened on the 18th of February, but business did not commence till the middle of March. The first bill presented was one constituting the new monarchy under the title of "The Kingdom of Italy." It was passed almost unanimously, and the dream of Cavour in 1832 had been fulfilled; he was prime minister of the Kingdom of Italy! The winning from the unwilling grasp of the pope the territory of Rome, so absolutely necessary to the completion of the kingdom, for all felt that Italy without Rome for its Capital, would not be Italy, was a matter of difficulty; but Cavour, in opposition to the more radical, who proposed proclaiming a state of siege there, counselled delay, and dissuaded from forcible measures; closing his harangue, with the memorable words, "No state of siege, no exceptional laws;—liberty must not sully her cause by assuming the arms of tyrants!"

The question of the volunteer or Southern army was one of still greater difficulty. Garibaldi, who was a member of the parliament, was irritated and vindictive, and on the 18th of April he attacked Cavour in a written speech of great bitterness, accusing him of being "the enemy of Italy and the would-be fosterer of civil war." The Chamber was indignant, and the friends of Garibaldi begged him to retract, and Cavour to pardon the unjust charge. Cavour offered his hand to Garibaldi, asking him "to come and grasp it as that of a patriot, who if trained in a different school, was no less ardent than himself." Garibaldi half rose to comply, but again sat down, and it was not till after the large majority of the parliament in favor of Government, and his abandonment by his own friends and officers had convinced Garibaldi of the necessity of a retraction, that he sought it through the king. Cavour assented to a reconciliation, but the shock of such an attack coming upon a frame overtasked by extraordinary labors, was more than he could sustain. His health visibly failed, and though he made several able speeches, and transacted his business with the same promptness as before, it was with far greater fatigue. On the

29th of May he was seized with apoplexy; he was partially relieved, and on the 31st transacted some business, but the exertion brought another attack. From this he recovered so far as to regain his consciousness, but the copious bleedings to which he was subjected, together with the exhaustion of nature, brought on a prostration from which he did not rally.

CHARLESTON, the largest city in the State of South Carolina, is situated on a point of land between the Ashley and Cooper rivers, which unite immediately below the town and form a spacious harbor, communicating with the ocean at Sullivan's Island, seven miles below. The population of the city in 1861 was 40,554.

The harbor has six entrances, which, beginning with the one farthest north, are in order: Maffit's, or the Sullivan's Island channel, with eleven feet; the North channel, with eight feet; the Swash, with nine feet; the Overall channel, which is not used; the main ship channel, with eleven feet; and Lawford's channel, which gives eleven feet at mean low water. The entrance by the North channel is extremely precarious to vessels drawing seven feet of water, and impassable at low tides to any other. Swash channel varies in depth from seven to ten feet. Maffit's channel is narrow at the bulkhead near Fort Moultrie jettee.

The first open and public movement in favor of the dissolution of the Union was made in Charleston. The step had been long contemplated, and the time had been fixed for its commencement. Nevertheless affairs apparently remained peaceful and quiet, although ripening for a desperate future. The military aspect of the United States was unchanged. A few soldiers, as usual, were at Fort Moultrie, and no repairs were known to be in progress upon that or either of the other forts, more than might be made at any ordinary period. The public property of the United States, however, was early seized by the authorities, acting under the State Convention, which resolved to secede from the Union on the 20th of December.

So long as Major Anderson apparently remained thus quiet at Fort Moultrie, his presence with a small military force was, at the utmost, only a slight annoyance to the citizens. But when it was discovered that he was at work to place that old fort in a more effective state for defence, the public attention was at once attracted. An impetus was given to the work on these repairs at first by speeches which were made by some of the members in the South Carolina Convention. Fears were thereby aroused that the time would shortly come, which would call into exercise the use of force in protecting the public property. Public feeling was gradually becoming more excited, and had assumed a threatening aspect at the time the troops were removed to Fort Sumter. By this act Charleston was thrown into a state of the wildest excitement. A spectator thus describes it:

"It was at first currently reported and believed that Fort Moultrie had been laid in ruins; that the guns were spiked, and the carriages, together with the barracks, burned, and that the post had been entirely abandoned. The reports spread like wild fire, and soon gained currency in every part of the city. Instinctively, men flew to arms. Orders were immediately issued to the military companies to hold themselves in readiness for service; and all of them, thus ordered out, promptly obeyed the summons.

"About noon the excitement in the streets had attained the highest pitch. The State Convention was known to be in secret conclave, and it was believed that this was the subject-matter of their deliberations. The streets swarmed with people. Additional flags were displayed from the stores and houses on the principal streets. The custom-house and other buildings, formerly in the possession of the United States Government, displayed the bunting of the infant Republic of South Carolina. Every one looked upon the 'war as actually begun.'

"Later in the day, however, the excitement was somewhat abated, when it became known that the movement on the part of the forces of the United States at Fort Moultrie was not at the instance of the Administration at Washington, but was merely a precautionary measure taken by Major Anderson, under the conviction that his position within the fort on Sullivan's Island would not be tenable if attacked by well-organized and disciplined troops. The contradiction of the first report in relation to the damage done the fort by the troops that had evacuated it, also had a tendency to allay the excitement of the occasion."

Castle Pinckney, a small fort near the city, was immediately occupied by the troops of the State. These troops also took full possession of the United States Arsenal, over which, for some weeks previous, they had acted as a guard. The United States officer hitherto in command was relieved by them. It contained, at the time, seventy thousand stand of arms and other military stores, which were estimated in value at half a million of dollars. About the same time Capt. N. L. Coste, who had been appointed to the revenue service in 1845, abandoned the cutter *Wm. Aiken* and discharged his crew. Captain, crew, and vessel afterwards passed into the service of South Carolina. At this time, also, the mob set at liberty the captain of a slave ship recently brought into Charleston in charge of a prize crew. The delivery of cement, stone, and other supplies for the United States officers was prevented. Military preparations were actively commenced, and companies of volunteers from other Southern States were tendered. At the custom-house, notice was given to the masters of all vessels from ports outside of South Carolina that they must enter and clear at Charleston. Precautions were likewise taken in and around the harbor

to prevent any reinforcement to Fort Sumter. In consequence of these proceedings, trade was almost entirely stopped, and money became scarce enough to alarm the most sanguine. Anxiety was depicted in the faces of those whose interests were most seriously involved, and the brisk air of many of the inhabitants was gone.

Such measures were adopted to prevent all vessels of an offensive character entering the harbor of Charleston, that even those belonging to that city could not get out without aid. All the buoys were removed, and some, if not all, of the beacons taken down. All lights were extinguished at night except that at Fort Sumter, which, for the purposes of navigation, might as well have been a hundred miles off, and the light-ship was withdrawn. From Cumming's Point to the lighthouse, a distance of several miles, sandbank batteries were erected and well manned, and vessels laden with paving stones and other heavy substances were placed at important points to sink, so that any vessels of an opposing character that might be disposed to prowl in would be stopped. Pilots were firmly charged not to pilot vessels of war into the harbor, but no restrictions were placed upon vessels of commerce and trade. When the steamship *Columbia* was ready for sea, although she belonged to the city of Charleston, so completely had all marks of the channel been obliterated that it cost the sum of one hundred and fifty dollars to get her clear of the harbor. It was estimated that the value of the vessel and cargo, which consisted of cotton, rice, domestic produce, &c., was not less than \$450,000, and yet this large amount was "locked up" for some time rather than allow chances for the vessels of the enemy to make their way to the fort or the city. The new manifests and clearances were but slightly altered from the original ones, the only difference being that the words "United States of America" were struck out, and the words "Sovereign State of South Carolina" substituted.

The movements in Charleston and in the State had been of such a character that commercial men now began to feel their influence. Indications were manifest of a strong expression of dissatisfaction from that portion of the people. The trade of Charleston, and, in reality, that of the whole State, had ceased to exist. The port of Charleston was, for the time, blotted from the charts, its lighthouse dark, its beacons destroyed, the channel to its harbor a pathless maze.

Meantime, the work of fortifying the harbor was carried steadily forward by the South Carolina authorities. Steamers watched Fort Sumter constantly, and mortars were planted on Cumming's Point, the nearest land to the fort.

At Morris Island three large Columbiads were mounted and intrenched in sand-bags, with a forty-two-pounder and a formidable mortar.

The batteries at Fort Johnson were made quite formidable, and it was intended to keep up a fire upon Sumter from the three forts for twenty-four hours before an attempt was made to assault the stronghold. The impression was that a breach could be made in the walls, and that Major Anderson's limited garrison would be so worn out by the severe labors of working the guns incessantly for so long a time, that the storming party on rafts would be able to accomplish the escalade without much difficulty or loss of life.

Such were the plans then rife in Charleston. Meantime the work of military preparation steadily moved on. The military review held on the 28th was the largest parade which had taken place. On the same day two Dahlgren guns, of the heaviest calibre, arrived from Richmond, Virginia. They were put immediately into a proper battery. Five ten-inch mortars accompanied the Dahlgrens, and two more were expected in a day or two. Fifty thousand pounds of powder were also received the same day from Pensacola, (Fla.), and twenty thousand pounds from Wilmington, North Carolina. It was said that they would have, in a few days, ready for an emergency, from three to four hundred thousand pounds of powder.

The rate of taxation at this time in Charleston was, on real estate and on stocks of goods, 1 4-10 per cent. On interest on bonds, on dividends, commissions, annuities, and on gross income, it was 2 5-10 per cent. The tax on slaves was \$3; on horses, \$10; on dogs, \$2; on single carriages \$20; on double carriages, \$30; and this is without reference to the value of the above kinds of property. The State tax was levied in addition to this city tax. Persons of Indian descent and free colored persons held a separate place among the tax-payers. It appears that the highest taxes paid by the former class (Indians) were, respectively, \$384, \$242, \$227, &c.; by persons of color, \$618, \$491, \$202, &c. Many of these paid taxes for the negroes whom they owned—the number owned by single persons varying from one to fifteen or twenty. The entire number of slaves thus held was over four hundred. Premiums of insurance were charged 1 25-100 per cent. The city expenditures were large, but the item of interest on the city debt was the most formidable and onerous. The city had within a few years, in the face of heavy taxes, increased its tax for public school purposes.

On the 7th of April such a force had been gathered at Charleston, and preparations for an attack on Fort Sumter had been so nearly completed, that the commanding officer, Gen. Beauregard, now issued an order prohibiting all intercourse between the city and Fort Sumter. Notice of this order was also given to Major Anderson. On the next day five thousand more troops were ordered out. Companies of volunteers, which were constantly arriving, were stationed in different positions around the harbor. At this time all vessels were ordered

to keep out of range of the fire between Fort Sumter and Sullivan's Island. Business was entirely suspended, and the most intense excitement prevailed. About five thousand troops were assembled on Sullivan and Morris Islands and along the coast. On the 9th a messenger from Washington was at Charleston and in conference with the authorities, but was not permitted to communicate with Fort Sumter. The attack on the fort was commenced at half-past 4 in the morning of the 12th, and continued thirty-three hours. (See SUMTER.) The highest excitement existed in Charleston while this took place. Citizens of all classes were spectators of the scene.

On the 16th troops were still pouring into the city, and it was estimated that 10,000 were present. They were in a half-disciplined state, and were immediately subjected to a rigid drill. The state of affairs, however, soon became quiet, and business was to some extent resumed, until the blockade of the port commenced, about the 1st of May. So stringently was this maintained that all foreign commerce ceased, and utter stagnation ensued except in military affairs. These were conducted with much vigor.

At 9 o'clock on the night of the 11th of December a fire broke out in a sash factory at the foot of Hazel street, which extended to machine shops on the opposite side of the street, and fanned by a stiff breeze, with a lack of water, it soon became of a most formidable character. Several churches, and nearly all the public buildings, banks, and insurance offices became a prey to the flames. King street, Meeting street, Church street, State street, between Broad and Hazel streets, were the scenes of the greatest destruction. Thousands were rendered houseless and reduced to great extremity. The value of property destroyed was estimated at ten millions of dollars. Contributions were sent to the sufferers by citizens of the adjoining States to a moderate extent.

The blockade of this port was very stringent during the temperate months of the year. Near its close, the attempt was made to seal up the channels of the harbor with sunken ships. The Secretary of the Navy thus states the plan:

"One method of blockading the ports of the insurgent States, and interdicting communication, as well as to prevent the egress of privateers which sought to depredate on our commerce, has been that of sinking in the channels vessels laden with stone. The first movement in this direction was on the North Carolina coast, where there are numerous inlets to Albemarle and Pamlico sounds, and other interior waters, which afforded facilities for eluding the blockade, and also to the privateers. For this purpose a class of small vessels were purchased in Baltimore, some of which have been placed in Ocracoke Inlet.

"Another and larger description of vessels were bought in the eastern market, most of them such as were formerly employed in the whale fisheries. These were sent to obstruct

the channels of Charleston harbor and the Savannah River; and this, if effectually done, will prove the most economical and satisfactory method of interdicting commerce at those points."

Two fleets of vessels were obtained for the blockade of Charleston and Savannah. The first consisted of twenty-five vessels; the second of twenty. The largest number of these vessels had been used in the whale fisheries and in the trade to India. They were ships and barks of a burthen between two and five hundred tons, which had become too old to encounter any longer the hazards of a long voyage at sea. They were purchased by the Government at about ten dollars per ton, principally in the seaports of New Bedford and New London. The vessels, although old, were substantial and generally double-deckers. They were stripped of their copper and other fittings not necessary for so short a voyage, and loaded with picked stone as deeply as was safe. At light-water mark in each vessel one or more holes were bored through the sides, into which a lead pipe was carefully inserted, the ends of which were nailed down on each side of the vessel, a plug was driven in from the outside and another from within, and both secured by a rod passing through them, and fastened within by a nut and screw. Each fleet carried about six thousand tons of stone. The vessels were each manned by about fourteen men. The orders given to the commander were as follows:

"To Captain ———, Sir: The ——— now under your command, having been purchased by the Navy Department for service on the Southern coast of the United States, the following are your orders for your proposed voyage:

"You will proceed from this port on ———, the — instant, or with the first fair wind, and when clear of the land make a direct passage to the port of ———, and there deliver your ship to the commanding officer of the blockading fleet off said port, taking his receipt for her return to me. After the delivery of your vessel, yourself and crew will be provided with passages to the port of New York, by the Navy Department, and on your arrival there you will call on ———, who will furnish you with funds to return to this port.

"On the voyage down it would be well, as far as practicable, to keep in company of your consorts, to exhibit lights by night and sound horns or bells in case of fog near the coast.

"You will also examine daily the pipe in the quarter of your ship under water, to see that it remains safe.

"The only service required of you is the safe delivery of your vessel; and as she is old and heavily laden, you will use special care that she sustains no damage from unskilful seamanship or want of prudence and care.

"On a close approach to your port of destination, begin to put between-decks cargo into lower hold, and, before anchoring permanently, have your second anchor and chain, (if you have one,) secured on deck. On leaving your vessel, unless otherwise ordered, you will bring away papers, chronometer, charts, compasses, spy-glass, and any other valuable portable articles not required by the commander of the blockading fleet there, and return them safely to me.

"In case of disaster, to preclude going on, you can call at Fortress Monroe, Hampton Roads, to repair damages, reporting to the flag-officer there.

"Wishing you a safe and speedy passage,

"I am yours, respectfully, ———."

The effect of sunken vessels upon the channels of a harbor, if uninfluenced by winds and currents, is to stop the navigation. These old hulks become points for the accumulation of alluvials which the rivers bear down, and of the sands which the tides carry back. Becoming thoroughly imbedded in the sand, they cause the accumulations to increase with time, forming unconquerable obstacles to re-opening the channels. The strong westerly winds which prevail at Charleston tend to sweep out the channels of its harbor by the increased force of the ebb tide. Two or three hulks which were sunk by the State authorities before the bombardment of Fort Sumter were soon afterwards swept out in this manner. In some instances obstructions of this kind have caused the water to cut out new channels. On the 21st of December seventeen of these vessels were sunk across the principal entrance to Charleston by orders from the Navy Department at Washington. They were placed in three or four rows across the channel, not in uniform, but in a chequered order.

The occupation of Beaufort by the Federal troops with an immense fleet of transports excited great apprehensions at Charleston. An increased military force was gathered; the defences increased and put in a complete state of readiness to resist an attack. In case of an alarm, the orders by which the troops in the city were to proceed were to this purport:

In case of an alarm, requiring the prompt assembling of all the troops in the city of Charleston, the signal for each assembling will be fifteen strokes upon all the fire bells; an interval of one minute, and the fifteen strokes will be repeated. The strokes will be repeated five times.

Upon the sounding of such a signal the troops in the city will immediately assemble, under arms, and in marching order, at the respective regimental muster grounds, and being formed in line will await further orders.

The regiment of the reserves will assemble on the street immediately in front of the Citadel, the color company resting on the gate of the Citadel, and will be retained in the city for its immediate defence, unless otherwise specially ordered.

The officers commanding the Sixteenth and Seventeenth regiments of infantry, First Regiment of rifles and First Regiment of artillery, will have their transportation wagons turned out and loaded with the regimental tents and stores, and will proceed to press horses and mules as may be required for the transportation.

Upon an alarm being communicated to the country, the officers commanding companies will immediately extend the same in the mode pointed out.

CHARLESTON, VA., is the capital of Kanawha County. It is situated on the Kanawha River, 60 miles from its mouth, and at its confluence with Elk River, 308 miles west by north of Richmond. The river here is three hundred yards wide, and is navigable for steamboats at all seasons of the year. The principal thoroughfare from Richmond to the Ohio River passes through the town. The Virginia troops under Gen. Wise collected here in considerable numbers in July, but upon the approach of the

Union forces under Gen. Cox, they retreated. One shot was fired from the Union force into the steamboat Moffit, which caused her boiler to explode, and she was burnt to the water's edge. The troops under Gen. Wise were in a fortified camp below Charleston, but they evacuated their position and left considerable spoil behind them, which was taken by Gen. Cox's troops. They retreated to Gauley bridge, thirty-eight miles above.

CLARKSBURG, the capital of Harrison county, Virginia, is located on the west fork of the Monongahela River, at the mouth of Elk Creek. It is 220 miles northwest of Richmond. The village is situated on high tableland, environed by hills. When the ordinance of secession passed the Virginia State Convention, some of the first indications of opposition to it in Western Virginia were manifested here. The ordinance was passed on the 17th of April, and on the 23d a public meeting was held, and delegates appointed to meet similar delegates from other counties at Wheeling, to consult on the posture of affairs.

The first belligerent issue between the Union men of Western Virginia and the State troops recognizing the authority of the Southern Confederacy, was joined at this town. Two companies of the Confederate military having marched into the place on the 20th of May, the court house bell was rung as a signal for the assemblage of the two Union military companies, under the command of Captains Moore and Vance, who demanded that the Confederate forces should surrender their arms and disband. After a brief parley the demand was complied with.

COCKEYSVILLE is a village in Baltimore county, Maryland. It is on the Baltimore and Susquehanna Railroad, about seventeen miles from Baltimore and forty from Annapolis. After the attack on the Massachusetts troops at Baltimore on the 19th of April, the other forces in their rear from the North, chiefly Pennsylvanians, stopped at Cockeys Fields, in the vicinity of Cockeysville, and encamped, to the number of twenty-four hundred.

Having left Harrisburg with no knowledge of the opposition of the citizens of Baltimore to the passage of the Northern troops through their city, they had halted upon the first intimation of the hostile intentions of the authorities of that city; and, far from entertaining any idea of forcing a passage through Baltimore, they seemed to hold her citizens in peculiar and friendly regard.

This circumstance had more effect in allaying the excitement of the Baltimoreans than all the efforts of their city police or military companies.

COLUMBUS is a small village having one hundred to two hundred inhabitants, situated on the Mississippi River, in Kentucky. It is eighteen miles below Cairo by water, forty-seven miles from Paducah, and about forty-five miles above Island No. 10 in the Mississippi

River. It is important only as a military position. The Mobile and Ohio Railroad terminates here, and the Nashville and Northwestern Railroad at Hickman, nine miles below. Its position is on the southern slope of a high bluff of the Mississippi bank, which commands the stream for about five miles. Wolf's Island is in the centre of the river in its immediate vicinity. The place was occupied on the 4th of September by Confederate troops, under the command of Gen. Pillow, who immediately commenced fortifications. This closed the navigation of the Mississippi to the steamboats belonging to the States above. The fortifications were pushed to such an extent as to render it one of the strongest points held by the Confederate troops. Three one hundred and twenty-eight pounders were placed in such a position as to command the river from the highest part of the bluff, being seventy-five feet above the water. Above on the river was another battery of fourteen guns, which were generally rifled.

On the northern slope of the bluff were two light batteries and a rifle pit, one mile in length, which were designed specially to protect the place against a land attack from the north, while on the summit of the hills was a strongly intrenched work, commanding all directions, and manned by eight cannon.

On the south side, and to protect the town from a rear attack, was a small battery of eight guns. The whole number of guns has been estimated at between eighty and a hundred. In addition, there was a floating battery of twenty guns capable of being moved to the most exposed points. The number of Confederate troops at various periods, in and around Columbus, was estimated at 30,000. The position was regarded in the Confederacy as the northern key to the mouth of the Mississippi. Its evacuation on the 1st of March, 1862, after the capture of Forts Henry and Donelson, and the occupation of Nashville by the Federal troops, became a matter of course.

COMMERCE OF THE UNITED STATES.

The commerce of the United States underwent a remarkable change in the year 1861, partly in consequence of the civil war, and partly by reason of the immense demand from Europe for breadstuffs, which for the first time closely taxed the western lands, newly traversed by railroads, to supply. The external commerce of the United States has from its origin consisted mainly in the exportation of raw products, food, and materials for manufacturers, and receiving in exchange tropical productions and manufactured goods. Proportionately, however, as manufacturing has been developed in the country, and the coarser descriptions of imported goods have been supplanted by those of home production, the people, grown richer and more luxurious, have required finer and more costly productions from abroad in return for the products exported. The commoner kinds of American manufacture have also gradually

found a market abroad, swelling the sum of the exports. By far the largest portion of the national exports has been, however, tropical products of our diversified climate. The official tables show the aggregate imports and exports for seventy years to have been as follows:

Imports from 1790 to 1860.....\$8,581,113,879
Goods reexported, 1790 to 1860.....1,476,222,947

Net importations.....\$7,104,890,932
Domestic produce exported.....\$6,466,900,519

Excess imports.....\$637,990,413

There has been very nearly 10 per ct. more imported than exported in custom-house values. This excess may be composed of the freights and earnings of United States vessels in the foreign trade, the profits on sales, the exports on American account, and the sales of American stocks, public and corporate, in Europe. There have been some offsets to this, however, in the expenses of Americans travelling abroad, and other items that make up the intercourse of nations. Of the domestic produce which forms the basis of the whole trade, the leading heads since 1821, when the national accounts were first regularly kept, have been as follows:

Total domestic exports, 1820 to 1860.....\$4,856,863,868

Value of Cotton exported.....\$2,574,834,091
" Tobacco ".....455,181,067
" Rice ".....87,854,511
" Naval Stores, etc.....76,181,210
" Breadstuffs and Provisions.....1,006,951,235
" Cotton Goods and other Manufactures.....655,861,254

Net importation of goods.....\$4,856,863,868
" " ".....5,394,671,668

Excess imports goods.....537,808,800

Specie imported 1821 to 1860....\$341,226,962
" exported " ".....683,646,608

Excess of exports.....\$347,419,646

The tropical products formed by far the largest proportion of the raw produce exported, as well as of the manufactures, since about one-half of the latter was of Southern material. Of the whole amount of breadstuffs and provisions about one-half has been exported in the last ten years, since migration to the virgin soil of the West has been favored by the extension of railroads, and by the growing demand for food in western Europe. The year 1861 was one of very large European demands for food, and at the same time the crops of the United States were good, while the great net work of railroads that has been constructed in the last ten years has cheapened transportation from every portion of the West to the seaports. At the same time the disruption of commercial intercourse between the North and South which took place soon after the departure of the expedition to reinforce Fort Sumter, turned large quantities of produce that formerly went down the rivers to the South, eastward by rail, and it went forward in increased abundance. The Southern products had to a large extent gone

forward when the blockade commenced, nevertheless the commerce of the year 1861 showed the following results:

Imports of the United States for the Fiscal Year 1861.

Dutiable goods.....\$213,179,566
Free goods.....69,331,276
Specie and Bullion.....46,339,611

Total imports for the year.....\$324,850,453

Exports from the United States for the Fiscal Year 1861.

Domestic produce.....\$204,166,299
Foreign merchandise.....14,548,075
Specie and Bullion.....29,791,080

Total exports for the year.....\$248,505,454

The imports of specie were nearly double the amount imported in any previous year. This sudden change resulted from the fact that while the exports of farm produce were larger than ever under an active foreign demand, the results of the election of November, 1860, were followed by a prompt countermanding of orders for goods, and a decline in the usual consignments to this country. Consequently the proceeds of the produce sold abroad necessarily came in the shape of specie.

The aggregate importations of the year 1861, as compared with former years, are as follows:

Imports into the United States.

	Specie and Bullion.	Free of Duty.	Paying Duty.	Total.
1821	\$3,064,890	\$2,017,423	\$52,503,411	\$62,585,724
1822	3,369,846	3,923,862	75,942,838	83,241,541

The basis of this large trade has been the increased quantities of domestic products that have been exported from the United States, which are as a whole an agricultural nation. The Eastern and Middle States are indeed manufacturing and commercial, but the great wealth of the country consists in its vast tracts of fertile land, open to the enterprising settler almost without cost. Labor actively supplied by immigration, and applied to that land, has drawn forth an annually increasing surplus of raw productions and food, influenced by the growing numbers of the people, the increase in labor-saving machines, and the improved means by which distance is measurably annihilated, and transportation to market cheapened. The great agricultural West has furnished food, and the great agricultural South has furnished tobacco, rice, and raw materials in quantity and abundance that have interested the commercial world. The Northern and Middle States have been supplied with this food and these materials to build up a system of manufacturing goods, for which, under cover of protective laws, they have found an amply remunerative market among the people of the two agricultural sections, whose surplus products have employed eastern vessels in the foreign trade, have paid for whatever of foreign luxuries the growing wealth of the country has

required, and have furnished the whole revenue for the support of the Federal Government. The manufactures, rapidly as they have multiplied, have not more than kept pace with the growing demands of the home market, leaving little for export. On the other hand, the surplus of domestic produce has continually grown in magnitude, until in 1860 it was eight times as much as in 1821, and three times as much as in 1839.

Population—Foreign Goods annually consumed per head, and the Duties annually collected on them.

	Population.	Consum'd per Head.	Total.	Customs Collected.
1821	9,960,974	\$4 14	\$41,283,236	\$18,004,447 15

Total	\$5,818,049,325	\$1,231,456,369 36

The average duty on the whole amount has been 21 per cent. The consumption per head gradually advanced from 1842 to 1853, since when it has been nearly stationary. This fact, in connection with the known prosperity of the country, indicates how greatly domestic manufactures have been developed to the profit of the North.

The following is the official table of the leading articles that were exported in 1861, as compared with those of 1860, before the secession, and in 1840, previous to the great change which took place in British commercial legislation in 1842, by which her markets were opened to American provisions, that had been before prohibited. The figures show in what particulars the great decrease in the business of 1861 took place:

The decline here manifest in Southern productions, or those which for a part of the fiscal year

1861 were blockaded, was as follows, as compared with the distinctive products of other sections :

	1859.	1860.	1861.	Decrease.	Increase.
Southern Products.....	\$73,153,968	\$229,031,026	\$65,743,801	\$168,287,225

Total gold and silver.....	1,906,358	56,946,851	23,799,870	33,146,981	..
Total exports.....	\$103,531,891	\$373,189,274	\$227,966,169	\$196,434,106	..

The result is remarkable. The Western railroads, which have been of late years construct-

ed to carry Western productions to the Eastern markets, have well fulfilled their part, they

having aided in more than doubling the export of Western produce in one year, thus developing an active capital that would soon restore the capital absorbed in their construction. The Southern produce, cut off by the blockade, made necessary by the war, although that blockade did not take place until late in the fiscal year, was very large, and for the present fiscal year will have ceased altogether. The exports of goods and produce will then have barely reached 140 millions, even if the Western produce continues to find so large a market abroad, and by this amount the sum of the importations must be measured, since the country buys no more than its surplus produce pays for. Of the importations certain articles are necessities: tea, coffee, sugar, and molasses. These in the aggregate reach 80 millions, and in 1860 \$20,446,586 worth of merchandise were imported free from Canada under the reciprocity treaty. These items alone absorb 100 millions of the proceeds of exports, and leave little for the manufactured goods that have been so largely imported. The Northern States have doubtless consumed the largest proportion of the imported goods; but it has been because they have been larger sellers of their own manufactures to those who furnished the produce exported to pay for their imports. The Western section has produced an aggregate of \$200,000,000 of exchangeable values per annum, which they have sold to the East and South in exchange for imported and manufactured goods. The Southern States have produced 400 millions per annum, which they have sold, and taken in pay Northern and imported goods. The outbreak of the secession caused that trade at once to cease. The South could no longer sell, and the North lost a customer for \$400,000,000 of goods per annum. Such an event could not take place without producing immense changes not only in the foreign trade, but in internal industry. Those who no longer sold goods to the South had no longer profits with which to buy foreign goods. At the same time the necessities of the Government required the tax on the foreign goods to be increased. The shipping, which had been so largely employed in the transportation of cotton, lost much of its employment. The mills that had been accustomed to work up 700,000 bales of cotton per annum, were obliged to close, and the long list of dye stuffs and other manufacturing materials were no longer in request. At the West, where in the last four years settlement has progressed with great rapidity, the harvests were very abundant, and at the same time the Southern outlets for it being closed by the events of the war, it was forced upon the lakes, causing a great rise in freights, and at the same time low prices to the farmer. Thus the traffic towards the East has been very active, without however a corresponding increase in the return traffic.

Chicago, which stands at the head of the lake navigation, and from which the Illinois Canal, 100 miles, connects with the Illinois River, and from

which also a number of railroads radiate through a fertile region, supplies a large proportion of the food exported. The rapidity with which that region has developed produce under the action of the railroads is apparent in the following table:

Receipts of grain at Chicago.

Years.	Flour, barrels.	Wheat, bushels.	Corn, bushels.	Oats, &c., bushels.
1854...	284,575	3,088,955	7,400,453	4,541,340
1855...	320,312	7,537,097	8,582,377	3,217,249
1856...	410,939	8,767,760	11,888,395	2,394,151
1857...	49,994	10,554,761	7,409,000	1,922,645
1858...	662,540	9,639,614	8,252,641	8,368,421
1859...	726,321	8,060,766	5,401,570	2,641,906
1860...	713,348	14,427,083	15,262,394	3,135,484
1861...	1,479,284	17,385,002	26,369,939	3,015,596

This great increase for the year 1861 grew principally out of the large crops. These crops could not go South, and being turned on the lakes, caused a great demand for tonnage, and a rise in freights, which almost absorbed the value of the grain, leaving little to the farmer. The Illinois Central Railroad took corn from its land debtors in payment of instalments to the extent of 1,800,000 bushels, and altogether the road delivered 15,000,000 bushels, or five times as much as it delivered in 1855. That was the product of land which the Government had vainly offered for sale more than 10 or 15 years, until it gave 2,500,000 acres to the road to aid its construction. That being done, the land was rapidly settled, and the result is the large annual addition to the exchangeable values of the country.

Milwaukee has also, through the agency of railroads, added largely to the lake trade. The two ports of Chicago and Milwaukee have thus in 1861 delivered 41,412,000 bushels of wheat, or equal to one-half the whole wheat crop of the United States in 1840. So vast has been the progress of production in that region. The annual export of wheat has been, including the year 1861, as follows:

Export of grains from Milwaukee for 11 years.

Years.	Flour, barrels.	Wheat, bushels.	Total, in bushels.
1851.....	51,889	317,255	576,730

The trade of these two ports of Lake Michigan, as outlets for the great northern valley of the Mississippi, is indicative of the immense capacity of those regions. Toledo, at the head

of Lake Erie, receives the produce of Southern Michigan, Northwestern Ohio, and a large portion of Indiana, and pours it upon the bosom of the lake in increasing abundance.

Receipts of Flour and Grain at Toledo, with the sources of supply, for the year ending December 31st, 1861.

	Flour, barrels.	Wheat, bushels.	Corn, bushels.	Oats, bushels.	Rye, bushels.	Barley, bushels.

" 1860	800,768	5,272,690	5,383,751	129,689	82,757	115,992

These figures give an aggregate of 18,706-510 bushels of grain of all kinds received at Toledo. Of this much the largest portion was shipped by lake eastward. The transportation

of these increased quantities of grain thrown upon the lakes, exceeded the capacity of the vessels and canal boats, and caused a great advance in freights, which were as follows from Chicago :

Months.	To Buffalo.						To New York.					
	Flour, per bbl.	Wheat, per 100 lbs.	Corn, per 100 lbs.	Beef and pork, per 100 lbs.	Dressed hogs, per 100 lbs.	Live stock, per car.	Flour, per bbl.	Wheat, per 100 lbs.	Corn, per 100 lbs.	Beef and pork, per 100 lbs.	Dressed hogs, per 100 lbs.

December	95	47½	47½	47½	75	95 00	1 95	97½	97½	97½	1 40	

The tonnage employed upon the lakes was as follows in 1861 :

American.

Vessels.	No.	Tons.	Value.
Steamers	65	42,638	\$1,489,800
Propellers	107	50,018	2,123,000
Tugs	91	9,155	565,700
Barks	48	19,616	469,000
Brigs	75	22,124	435,900
Schooners	843	180,357	4,525,000
Total, 1861	1,229	323,953	\$9,608,400
" 1860	1,216	316,507	11,992,105
" 1859	1,198	323,156	9,811,200

Canadian.

Vessels.	No.	Tons.	Value.
Steamers	63	21,107	\$1,019,200
Propellers	15	4,562	176,000
Tugs	22	4,842	202,300
Barks	19	7,153	188,500
Brigs	15	4,223	101,000
Schooners	222	33,771	822,300
Total, 1861	356	75,653	\$2,509,300
" 1860	360	76,717	3,146,390
" 1859	313	69,663	2,305,200

The proportion of the Western produce received at Buffalo by water was as follows :

Flour, bbls.	1,909,557
Wheat, bushels ..	26,585,723
Corn, "	20,872,660
Oats, "	1,708,183
Barley, "	276,601
Rye, "	329,942
Lumber, feet	49,075,393
Staves, No.	76,707,120

Cattle, No.	26,921
Hogs, "	30,325
Sheep, "	29,178
Wool, bales	28,423
Pork, barrels	45,048
Beef, "	49,730
Whiskey, barrels ..	104,829
Eggs, "	13,509
Fish, "	6,885
Coal, tons	86,754

These products, with those that arrived at Oswego, and those which came from Lake Champlain, found their way by these canals and the New York Central Railroad to tide water, and thence to New York, meeting there the quantities which came from Dunkirk over the Erie Railroad. The flour and grain brought down on the New York Central Railroad to tide water in the last year, were as follows :

	Flour, barrels.	Wheat, bushels.	Corn, bushels.	Oats, bushels.
To New York	1,419,498	545,400	88,100	9,100
To Boston	713,514	29,100	81,400	2,200
To Albany	266,471	519,100	317,200	412,600
Total	2,399,483	1,093,600	436,700	423,900
By canal	1,613,855	29,632,400	22,344,179	5,991,483
Total	4,013,338	30,726,000	22,780,879	6,415,383

The quantities and values left at tide water on the State canals for the year ending with the close of navigation in 1861, were as follows : (See p. 109.)

The quantities of these articles coming from the Western States to Buffalo, as compared

with those that arrived at the Hudson, are as follows:

	Tons.	Value.	Tolls.
Shipped at Buffalo.....	1,579,745	\$38,800,920	\$2,102,012
Arrived at Tidewater.....	2,980,144	81,432,759	8,402,628

The excess delivered at tidewater represents the receipts from Oswego and Lake Champlain, added to the State surplus. The aggregate is

swollen by the Erie and New York Railroad deliveries. By far the largest portion of the receipts consists of vegetable and animal food, which in such increased abundance has come from the West.

The exports from the port of New York are largely composed of these Western grains. The following table shows the monthly quantity and values so exported from the port of New York:

1861.	FLOUR.			WHEAT.			COEN.

In inspecting these aggregates the most remarkable feature is the reversal of the trade in specie. Instead of a large excess in the exports of the precious metals, there was a large excess in imports for the year; a quantity exceeding the supplies from California was received from abroad. In the same manner the sum of the domestic exports has greatly swollen, while the importation of dutiable goods largely declined. These two circumstances, as a matter

of course, involved the change in the current of specie, since there were more bills drawn against produce, and less demand for them to pay for imported goods. Hence the decline in the price of bills to a point which checked the export of California gold, and admitted of a profitable import of foreign coin. The leading articles that made up the sum of domestic exports were as follows, as compared with former years:

ARTICLES.	1858.	1859.	1860.	1861.

1852.....	3,847	1,709,983	58,567	3,935	1,355,514	50,459

The tonnage entered and cleared at the port of New York, to and from foreign ports, was as given in table on page 111.

The coastwise movement was as in the following table:

Year.	Entered Coastwise.		Cleared Coastwise.	
	No. of Vessels.	Tons.	No. of Vessels.	Tons.
1849.....	1,855	424,976	3,994	895,589
1850.....	1,928	489,395	4,719	1,020,070
1851.....	1,765	455,542	4,803	1,214,942
1852.....	1,766	497,840	4,680	1,173,762
1853.....	1,733	507,531	4,789	1,310,697
1854.....	1,880	543,452	4,679	1,499,968
1855.....	1,966	614,045	4,563	1,378,888
1856.....	1,669	539,461	4,696	1,482,810
1857.....	1,569	503,679	4,182	1,425,810
1858.....	1,559	499,138	4,331	1,640,473
1859.....	1,535	572,232	4,695	1,726,993
1860.....	1,571	529,015	4,903	1,902,505
1861.....	1,240	393,024	2,905	592,919

The decline in the coastwise clearings is very marked, as resulting from the closing of the cotton ports, and the consequent loss of the cotton freights.

The commerce of Baltimore was greatly affected by the political events of the year, particularly in relation to the imports, which in the aggregate were as follows:

	1859.	1860.	1861.
Imports.....	\$10,408,993	\$9,379,121	\$5,584,400
Exports.....	8,724,261	10,918,170	11,471,797

The leading articles of export were as follows:

ARTICLES.	1860.	1861.
Bark, oak (value).....	\$59,452	\$60,000
Beef.....	1,522	tierces, 694
Beef.....	4,109	barrels, 647
Bacon.....	733,333	pounds, 1,805,337
Butter.....	572,216	320,215
Cheese.....	173,208	123,526
Corn.....	442,443	bushels, 742,272
Cotton.....	pounds, 92,924	bales, 3,353
Corn meal.....	43,101	barrels, 17,936
Candles.....	584,540	pounds, 535,230
Copper.....	550,000	3,067,600
Domestics (value).....	\$526,951	
Flour, wheat.....	856,029	barrels, 375,653
Flour, rye.....	512	876
Lard.....	3,283,385	pounds, 3,063,029
Oil, whale.....	5,635	gallons, 13,169
Oil, meal.....	\$40,292	pounds, 343,500
Pork.....	83	
Rosin.....	10,486	barrels, 7,302
Rice.....	21,695	9,580
Spirits turpentine.....	2,075	tierces, 1,544
Shooks and heads.....	37,723	gallons, 5,500
Sugar, refined.....	\$107,541	packages, 45,170
Sugar, raw.....	1,585,944	pounds, 329,625
Soap.....	151,068	591,300
Tobacco, leaf.....	70,124	hogsheads, 75,237
Tobacco, manufactured.....	537,209	pounds, 225,991
Wheat.....	570,969	bushels, 795,635

The Baltimore and Ohio Railroad, which is the great feeder of Baltimore commerce for a large portion of the year, was held by the Confederate troops, and its business consequently interrupted, thus cutting off the Western trade from Baltimore, and also stopping the returning business over that road.

The business of the port of Philadelphia was similarly affected in relation to breadstuffs, the exports having been as follows:

Exports of Domestic Produce.

ARTICLES.	1860.	1861.
Flour, barrels.....	295,187	362,552
Wheat, bushels.....	811,971	2,054,988
Corn meal, barrels.....	49,857	31,672
Rye meal.....	1,163	
Corn, bushels.....	490,569	803,235
Ship bread, barrels.....	9,502	11,947
Beef, tierces.....	8,566	5,941
Beef, barrels.....	5,323	8,490
Pork, tierces.....	3,090	12,418
Pork, barrels.....	8,566	7,737
Rice, tierces.....	2,341	1,080
Butter, pounds.....	955,431	979,336
Cheese.....	134,699	294,447
Codfish.....	68,061	
Tallow.....	2,759,890	4,517,603
Candles.....	586,534	794,780
Soap.....	911,412	932,639
Bacon.....	855,431	1,069,563
Lard.....	1,178,009	3,855,648

Clover seed, bushels.....	52,212	13,197
Cotton, bales.....	872	2,523
Coal, tons.....	30,423	26,301
Tobacco, hogsheads.....	452	863
Tobacco, boxes.....	1,725	1,573
Porter and ale, barrels.....	89	1,585
Vinegar.....	2,325	3,089
Oil.....	483	783
Powder, kegs.....	1,920
Pickled fish.....	1,105

The events of the war fell more heavily upon the Southwestern and Southern cities, as a matter of course, than upon the Northern ones, which were remote from hostilities. A good portion of the business of the year was transacted before the blockade took place. Hence the trade of St. Louis does not in the aggregate show so much decline as might have been anticipated. The receipts at that place were as follows:

ARTICLES.	1860.	1861.
Tobacco, total receipts, hhds... ..	12,920	8,510
Tobacco, total sales, hogsheads... ..	6,473	6,786

* In the receipts of all articles above Corn, the wagon receipts are included; of Corn, and all articles following, the receipts comprising the amounts received by boats and railroads only.

The larger portion of these commodities usually descend the river to New Orleans, where they meet the products of the lower Mississippi valley, as well as those that descend

the Ohio, and which accumulate there for export. The comparative receipts from all points of the interior at New Orleans were as follows for the years 1860 and 1861:

TABLE SHOWING THE RECEIPTS OF THE PRINCIPAL ARTICLES FROM THE INTERIOR DURING THE YEARS ENDING 31st AUGUST, 1860 AND 1861, WITH THEIR TOTAL VALUE.

ARTICLES,	1860.		1861.

" 1857-58.....	167,155,546
" 1856-57.....	158,061,369

The aggregate decline is near \$30,000,000 in value. This has not arisen so much from lessened quantities as from diminished values, consequent upon the blockade. Thus sugar with an increased crop was worth \$3,700,000 less money. A larger crop of molasses sold 30 per cent. or over \$2,000,000 less.

The exports of the leading crops from New Orleans for the year 1861, with the destination of the articles, were as follows:

	Cotton, bales.		Tobacco, hogsheads.

This return of the exports of cotton from New Orleans shows that almost the usual quantity had gone forward before the war broke out, or the blockade interrupted the trade. The crop year begins September 1, and the cotton begins to come forward in quantity in December. The bulk of it is usually delivered by April. Hence the first eight months of the blockade was of no real effect upon the trade. It was only in Jan., 1862, that it began to affect supplies. On the other hand the tobacco was much affected, the export having been cut off to the extent of more than one-half.

A principal agent in the great development of American productions in the last ten years, in which time they have more than doubled, has been the construction of railroads, by which the land, the great productive agent, has been made accessible. The extent to which these have been constructed, is manifest in the following tables of the miles in operation Jan. 1, 1852, and Jan. 1, 1862, in each State, showing the actual length of the railroads within the limits of each State, with the number of miles open for business, and the cost of the roads and equipment:

STATES.	Mileage Jan. 1, 1852.	Total Mileage.	Mileage Open, Jan. 1862.	Cost of Road and Equipment.

On the 1st of January, 1832, there were 131 miles in actual operation. The decennial increase has been as follows:

	Miles Increase.
1832-'42.....	8,746
1842-'52.....	7,001
1852-'62.....	20,922

The increase in the last ten years has been more than two-thirds of the present mileage,

and consequently in that period \$740,000,000 have been spent in their construction.

This capital has, however, been more than returned by the vast products of the land which they have opened up for industry. Take for example the commerce of the railroads of New York. The total tonnage, with value of the same, transported over these works the past year was as follows:

ARTICLES.	Canals.	Tons carried, Railroads.	Value of same, Railroads.
Products of the forest.....	1,052,392	540,079	\$10,801,580
" animals.....	19,283	1,067,070	213,414,000
Vegetable food.....	2,122,237	1,220,332	61,016,600
Other agricultural.....	2,854	221,201	3,813,130
Manufactures.....	250,256	568,691	142,175,251
Merchandise.....	135,096	719,017	359,505,500
Other articles.....	895,518	1,124,111	11,741,110
Total.....	4,507,635	5,460,501	\$801,495,171

The tonnage of the canals of the State is not as great as that of the railroads. The aggregate for both equals 9,968,044 tons, having a value of \$1,000,000,000. The tonnage of vegetable food for both railways and canals equal very nearly if not quite 3,342,569 tons, or 160,000,000 bushels.

The total mileage of the railways in New York engaged in the transportation of freight is 2,654 miles; in the Northern States, 29,683 miles. At one-half the tonnage of the New York roads, the total of the roads of these States will exceed 20,683,000 tons. Estimating the value of such freight to be only \$100 per ton, the total would be \$2,250,000,000. In other words, the value of the freight transported over the railroads of the Northern States exceeds \$100 to each inhabitant. The value of such as go over their navigable water courses is nearly as great, making the aggregate value of the internal commerce of the Northern States exceed \$4,000,000,000; a sum six times greater than the entire foreign trade of the country.

The tonnage of the railroads has gradually gained upon that of the canals. Thus the N. Y. Erie road and the N. Y. Central are supposed to rival the Erie Canal in its tonnage. The tonnage of the two roads and the canals for several years has been as follows:

	Erie—tons	Central—tons	Canals—tons
1857.....	978,066	838,701	3,244,061
1858.....	816,964	765,407	3,665,192
1859.....	869,072	834,319	3,781,684
1860.....	1,139,554	1,028,133	4,850,214
1861.....	1,253,418	1,167,302	4,507,635

Statistical View of the Commerce of the United States, exhibiting the value of Exports to and Imports from each Foreign Country, and the tonnage of American and foreign vessels arriving from and departing to each Foreign Country, during the fiscal year ending June 30, 1861.

The exports of flour and wheat reduced to bushels of wheat make 52,756,837 bushels, at an aggregate value of \$62,959,473, a larger quantity and value than was ever before shipped from the United States in a single year. Its magnitude may be appreciated when we reflect that the whole crop of wheat for the Union, per census of 1850, was only 100,485,000 bushels. Thus a quantity equal to more than half the crop was exported in the fiscal year 1861. The British Islands have been by far the largest customers for this grain, but France took an unusual quantity, owing to the shortness of her crops. Generally France rivals the United

States in supplying Great Britain, but this year she was a buyer. The exports of flour were also considerable to the North American colonies, Great Britain, and the West Indies. The South American States and Spanish West Indies have long been regular buyers of American flour, particularly of Southern wheat. It is remarkable that the large quantity this year exported has, so far from raising the price of flour in the home market, left it lower than ever. The estimates at the Patent Office have been that the consumption of wheat in the United States is three and a half bushels per head. On this basis, the population of the United States per

census of 1860 being in round numbers 31,000,000, there would be required for home use of the crops of 1860, which came to market in 1861, 108,500,000 bushels; but the official returns alone show us that there remained enough to supply all the wants of the people at low prices. Hence the crops could not have been less than 160 or 170 millions of bushels of wheat, of which nearly one-third was exported, forming more

than one-fourth of the value of the whole national exports. For the first time since the invention of the cotton gin, the export of grain has far exceeded the value of the cotton exported from the country. The presence of such immense quantities of grain in our sea ports is an evidence not only of the rapid development of the resources of the country, but also of the extent and efficiency of its artificial means of transportation.

CONFEDERATE STATES. At the 3d session of the 11th Congress, in 1811, the dissolution of the Union was spoken of for the first time by a member from the State of Massachusetts, as a possible event of the future. The manner in which this was received by that Congress seemed to indicate that it was looked upon by them almost with sentiments of abhorrence. The circumstances are interesting at this time. The bill to form a Constitution and State Government for the Territory of Orleans, and the admission of such State under the name of Louisiana into the Union, was under consideration.

Mr. Quincy, of Massachusetts, in opposition to the bill, said: "I am compelled to declare it as my deliberate opinion, that if this bill passes, the bonds of this Union are virtually dissolved; that the States which compose it are free from their obligations; and that, as it will be the right of all, so it will be the duty of some, to prepare definitely for a separation, amicably, if they can, violently, if they must."

Mr. Quincy was here called to order by Mr. Poindexter.

Mr. Quincy repeated and justified the remark he had made, which, to save all misapprehension, he committed to writing, in the following words: "If this bill passes, it is my deliberate opinion that it is virtually a dissolution of this Union; that it will free the States from their moral obligation; and as it will be the right of all, so it will be the duty of some, definitely to prepare for a separation, amicably, if they can, violently, if they must."

After some little confusion, Mr. Poindexter required the decision of the Speaker, whether it was consistent with the propriety of debate, to use such an expression. He said it was radically wrong for any member to use arguments going to dissolve the Government, and tumble this body itself to dust and ashes. It would be found, from the gentleman's statement of his language, that he had declared the right of any portion of the people to separate.

Mr. Quincy wished the Speaker to decide, for if the gentleman was permitted to debate the question, he should lose one-half of his speech.

The Speaker said that great latitude in debate was generally allowed; and that, by way of argument against a bill, the first part of the gentleman's observations was admissible; but the latter member of the sentence, viz., "That it would be the duty of some States to prepare for a separation, amicably if they can, violently if they must," was contrary to the order of debate.

Mr. Quincy appealed from his decision, and required the ayes and noes on the appeal.

The question was stated thus: "Is the decision of the Speaker correct?" And decided, ayes, 53; noes, 56.

Occasionally the subject was alluded to in the progress of time, until it was regarded as a deed to be abhorred, but yet such as might be

both possible and necessary under some circumstances of wrong and oppression.

The war with Great Britain in 1812, was so destructive to the commercial interests of the New England States, that they, to a great extent, withheld and refused their coöperation with the Federal Government. In Massachusetts, the State authorities took decisive measures to prevent the Federal Government from obtaining volunteers. Separation from the Union was discussed and advocated.

Finally public sentiment became so strong that a Convention was held at Hartford, in the State of Connecticut. It was convened to consider the state of affairs, and to devise a remedy. What its view of public affairs might be, and what would be the remedy it might suggest, was too well known to the public to admit of a doubt. Its sessions, like those of the Conventions in the seceding States, were held in secret, or with doors closed against every one except members of the Convention. Whatever were the recommendations of this body, no public action took place upon them, in consequence of the cessation of hostilities, and the speedy conclusion of peace with Great Britain.

The result of this Convention was to recognize and reaffirm the principle or doctrine which had hitherto been unofficially, and only by individuals announced, that a separation of the States, or a dissolution of the Union, or rather a withdrawal of a State or States from the Union, could, under some circumstances, be rightful and just. This justification would be found to arise from acts of oppression and wrong persistently enforced by the Federal Government. So slow were the people of the United States to recognize the right of revolution as against their own admirably formed system of government, and so attached and loyal were they to this system of government, that the members of the Convention at Hartford were ever after refused all public favor, and carried with them the frowns of the people down to their graves.

The institution of domestic slavery had always been repugnant to a large number of conscientious persons in the Northern and Southern States, but more extensively in the former. Upon the application of the State of Missouri to become a member of the Union in 1819, opposition was made, which was based upon hostility to the extension of the institution of slavery. At this time the strife ran so high as to present to the consideration of the people the question of a separation of the States, and render it more familiar to their minds. This difficulty was satisfactorily adjusted.

The subject now disappeared from the public mind until the years 1831 and '32, when the State of South Carolina took the ground that the tariff act passed by Congress in 1828, was not only unconstitutional, but so unjust and oppressive in its operation against her that it should not be executed within her limits. The issue joined in this case did not present

the true point involved. It became a question of strength between the Federal Government and the State. The State herself was divided in sentiment. The Federal Government made concessions, and all open signs of strife disappeared. In this instance, the acts of oppression and wrong could not be stated in precise words, nor estimated in figures. They were not of such a positive and flagrant character that the world could see or comprehend them. Hence the course of South Carolina at that time has not been approved by the sentiment of mankind. By this difficulty a great stride was taken towards a solution of the problem of a separation of the States. The State and the Federal Government reached the actual borders of a violent struggle.

Enough had been seen of the operation of the Government to prove that this question of separation of a State or States from the Union, was one which the American people must some time meet and decide. Indeed, it may be declared, as a general principle, that if the right of revolution is sacred, such is the tendency of all human government, either through ignorance or negligence, or from a wilful purpose, at some period, to persist in oppressive and unjust measures, that none can escape the bitter experience of internal bloodshed. In other words, if those who have power will oppress, then those who are oppressed, or who think they are oppressed, or who suppose they are about to be oppressed, will certainly resist, or they must consent to become slaves.

At this time, political agitation for the abolition of slavery commenced. This brought out, in 1835, political agitation for its defence and protection. Small and insignificant at first, this contest grew into a terrific flame. The latter party always asserted that, under a just and strict administration of the Government according to the Constitution, their rights were safe, and slavery, as an institution, could not be essentially damaged. At the same time, they boldly and fully declared that, if the time should ever come when they should be convinced that they could not retain their rights as slaveholders and slaveholding States, within the Union and under the administration of the Federal Government, they then should seek those rights and that protection without the Union. In other words, a separation or dissolution of the Union was to be the alternative of the triumph of one side, and the defeat of the other. With an astonishing indifference, apparently, the mass of the people witnessed this contest. It can be explained only upon the supposition, that the attachment to the Union of all the States was so great, and its civil and social advantages so conspicuous that none were ready to believe a serious purpose for its destruction could be formed. Finally, on the 4th of November, 1860, the issue was decided. The political agitators for the limitation or abolition of slavery, triumphed over the political agitators for its defence and protection. The latter party immediately took

the steps which they believed to be necessary to carry out their long-threatened purpose. It may not be altogether out of place in these pages to ask if they were justified in beginning these proceedings? In answer, it may be asked if the slaveholding States were suffering at that time, under the hand of the Federal Government, such oppression and such wrongs as justify the exercise of the sacred right of revolution? They were not. Did they fear the speedy infliction of such wrongs as would justify the exercise of the right of revolution? This question is asked on the presumption that the apprehension of wrongs and oppression will justify revolution; and, for the sake of the argument, let it be granted. On this question turns the whole case. Did they fear and apprehend these wrongs? and were their fears just and well founded? The debates at the 2d session of the 37th Congress, contain the views of Southern Senators and Representatives. (*See CONGRESS, U. S.*) According to these statements such were their fears and apprehensions. South Carolina, after adopting an ordinance of secession, issued a declaration of grievances, which consist of past injuries she has suffered. (*See SOUTH CAROLINA.*) This point was also discussed in the South Carolina State Convention. The views there entertained, are shown in the following debate:

Mr. Parker: "Mr. President, it appears to me, with great deference to the opinions that have been expressed, that the public mind is fully made up to the great occasion that now awaits us. It is no spasmodic effort that has come suddenly upon us, but it has been gradually culminating for a long series of years, until at last it has come to that point when we may say the matter is entirely right."

Mr. Inglis: "Mr. President, if there is any gentleman present who wishes to debate this matter, of course this body will hear him; but as to delay, for the purpose of a discussion, I for one am opposed to it. As my friend (Mr. Parker) has said, most of us have had this matter under consideration for the last twenty years, and I presume we have by this time arrived at a decision upon the subject."

Mr. Keitt: "Sir, we are performing a great act, which involves not only the stirring present, but embraces the whole great future of ages to come. I have been engaged in this movement ever since I entered political life. I am content with what has been done to-day, and content with what will take place to-morrow. We have carried the body of this Union to its last resting-place, and now we will drop the flag over its grave. After that is done, I am ready to adjourn, and leave the remaining ceremonies for to-morrow."

Mr. Rhett: "The secession of South Carolina is not an event of a day. It is not any thing produced by Mr. Lincoln's election, or by the non-execution of the fugitive slave law. It has been a matter which has been gathering head for thirty years. The election of Lincoln

and Hamlin was the last straw on the back of the camel. But it was not the only one. The back was nearly broken before. The point upon which I differ from my friend is this: He says he thought it expedient for us to put this great question before the world upon this simple matter of wrongs on the question of slavery, and that question turned upon the fugitive slave law. Now, in regard to the fugitive slave law, I myself doubt its constitutionality, and I doubted it on the floor of the Senate, when I was a member of that body. The States, acting in their sovereign capacity, should be responsible for the rendition of fugitive slaves. That was our best security."

So, in the correspondence of Messrs. Rost, Yancey, and Mann, with Lord John Russell, the right of separation is placed on other grounds. (*See DIPLOMATIC CORRESPONDENCE OF CONFEDERATE STATES, also PUBLIC DOCUMENTS, Messages of President Davis.*) Admitting, then, notwithstanding these various statements, that fears of wrongs and destruction to the institution of slavery were entertained, and that such apprehensions, if well founded, are a justification of revolution; yet, on this point, it is sufficient to state the fact, that the Federal Government has always been ready to compromise in her difficulties with any State. If it had meditated evil in the new hands in which it has been placed, of which not the first sign had yet appeared, its hands would have been tied by the action of nearly half the voters in the sixteen Northern States, and by the action of all the voters in the fifteen Southern States. On the secession of the State of Georgia, one of her citizens used this language:

"Posterity will regard the act as wanting in statesmanship, and the greatest folly ever committed by a great and prosperous people. But undue prosperity begets luxury and restlessness, and grave deeds are often committed without reflection or reason. Posterity will censure the act of secession, for the reason that the seceding States, in their several Conventions, made no demands for the redress of grievances, but madly—yea, blindly—precipitated a revolution. To stand justified in the eye of the future, and before the scrutiny of civilization, we should demand redress in a Convention of all the States."

The first public act which took place, having for its ultimate object the formation of a Southern Confederacy, was the call for a State Convention in South Carolina. This resulted in the secession of that State, and was followed rapidly by the secession of Alabama, Florida, Mississippi, Georgia, Louisiana, and Texas. The preliminary proceedings which have come to light are too important to be overlooked. The first public step is to be found described in a letter from the Colonel of the Ordnance, H. K. Craig, to the Secretary of War, Joseph Holt, dated January 15, 1861, stating the number of rifles and muskets sent to the Southern States during the year 1860. It is as follows:

"SIR: I have the honor to acknowledge the reference of a letter from the Hon. B. Stanton, asking for a statement of the distribution of arms from the armories to the arsenals and other places of deposit for safe keeping, from the 1st of January, 1860, to that of January 1, 1861, &c.

"In compliance with your directions, I have the honor to report that on the 30th day of December, 1859, an order was received from the War Department directing the transfer of one hundred and fifteen thousand muskets from the Springfield (Mass.) and Watervliet (N. Y.) arsenals to different arsenals at the South. Orders were given in obedience to these instructions on the 30th of May, 1860, and the arms were removed during the past spring from and to the places as follows:—

"From Springfield armory sixty-five thousand percussion muskets, calibre sixty-nine hundredths of an inch.

"From Watertown arsenal six thousand percussion rifles, calibre fifty-four hundredths of an inch.

"From Watervliet arsenal four thousand percussion rifles, calibre fifty-four hundredths of an inch.

"Of which there were sent as follows:

	Percussion Muskets.	Alt. Mkts.	P. Rifles.
Charleston (S. C.) arsenal...	9,280	5,720	2,000
North Carolina arsenal....	15,408	9,520	2,000
Augusta (Ga.) arsenal.....	12,850	7,620	2,000
Mount Vernon, Ala.....	9,280	5,720	2,000
Baton Rouge, La.....	18,520	11,420	2,000

"The arms thus transferred, which were at the Charleston arsenal, the Mount Vernon arsenal, and the Baton Rouge arsenal, have been seized by the authorities of the several States of South Carolina, Alabama, and Louisiana, and are no longer in possession of the Ordnance Department. Those stored at the Augusta arsenal and at North Carolina are still in charge of officers of this Department.

"In addition to the foregoing, there have been transfers from the armories to different arsenals, as the exigencies of the service demanded, for immediate issues to the army and to the States, under the act of April 23, 1808, and which I infer are not intended to be embraced in the call of the House of Representatives."

On the 29th of October, 1860, Gen. Winfield Scott sent to the President and Secretary of War a letter, containing "views suggested by the imminent danger of a disruption of the Union by the secession of one or more of the Southern States." In this paper he suggested certain measures of precaution which should be taken by the Government to prevent the anticipated disruption. Why they were not adopted will presently appear. So much of them as appertain to the steps proper for the Government to take, were as follows:—

"From a knowledge of our Southern population it is my solemn conviction that there is some danger of an early act of rashness preliminary to secession, viz., the seizure of some or

all of the following posts: Forts Jackson and St. Philip in the Mississippi, below New Orleans, both without garrisons; Fort Morgan, below Mobile, without a garrison; Forts Pickens and McRae, Pensacola harbor, with an insufficient garrison for one; Fort Pulaski, below Savannah, without a garrison; Forts Moultrie and Sumter, Charleston harbor, the former with an insufficient garrison, and the latter without any; and Fort Monroe, Hampton Roads, without a sufficient garrison. In my opinion, all these works should be immediately so garrisoned as to make any attempt to take any one of them, by surprise or *coup de main*, ridiculous.

"With the army faithful to its allegiance, and the navy probably equally so, and with a Federal Executive, for the next twelve months, of firmness and moderation, which the country has a right to expect—moderation being an element of power not less than firmness—there is good reason to hope that the danger of secession may be made to pass away without one conflict of arms, one execution, or one arrest for treason.

"In the mean time it is suggested that exports should remain as free as at present; all duties, however, on imports, collected, (outside of the cities,*) as such receipts would be needed for the national debt, invalid pensions, &c., and only articles contraband of war be refused admittance. But even this refusal would be unnecessary, as the foregoing views eschew the idea of invading a seceded State.

"WINFIELD SCOTT.

"NEW YORK, October 29, 1860."

The copy sent to Secretary of War, Floyd, contains these additional remarks:

"It will be seen that the 'Views' only apply to a case of secession that makes a gap in the present Union. The falling off say of Texas, or of all the Atlantic States, from the Potomac south, was not within the scope of General S.'s provisional remedies.

"It is his opinion that instructions should be given, at once, to the commanders of the Barancas, Forts Moultrie and Monroe, to be on their guard against surprises and *coups de main*. As to regular approaches, nothing can be said or done, at this time, without volunteers.

"There is one (regular) company at Boston, one here, (at the Narrows,) one at Pittsburgh, one at Augusta, Ga., and one at Baton Rouge—in all five companies only, within reach, to garrison or reinforce the forts mentioned in the 'Views.'

"General Scott is all solicitude for the safety of the Union. He is, however, without hope that all dangers and difficulties will pass away without leaving a scar or painful recollection behind.

"The Secretary's most obedient servant,

"October 30, 1860.

W. S."

* In forts or on board ships of war. The great aim and object of this plan was to gain time—say eight or ten months—to await expected measures of conciliation on the part of the North, and the subsidence of angry feelings in the opposite quarter.

The part taken by the Secretary of War in favor of the seceding States was not made apparent until some months later. On the 1st of April, three months after the resignation of the Secretary, there appeared at Richmond, Virginia, a eulogy of him which vindicates his patriotism to the Confederate States by a statement of facts:

"All who have attended to the developments of the last three months, and know aught of the movements of the Buchanan Administration up to the time of Floyd's resignation, will justify the assertion that the Southern Confederacy would not and could not be in existence at this hour but for the action of the late Secretary of War. The plan invented by Gen. Scott to stop secession was, like all campaigns devised by him, very able in its details, and nearly certain of general success. The Southern States are full of arsenals and forts, commanding their rivers and strategic points. Gen. Scott desired to transfer the army of the United States to these forts as speedily and as quietly as possible. Had he succeeded in doing so, revolution would have been paralyzed in the whole South, and the submissionist party would have been organized on a very different footing from what we now know. The Southern States could not have cut off communication between the Government and the forts without a great fleet, which they cannot build for years, or take them by land without one hundred thousand men, many hundred millions of dollars, and several campaigns, and many a bloody siege. Had Gen. Scott been enabled to get those forts in the condition he desired them to be, the Southern Confederacy would not now exist.

"But the coöperation of the Secretary of War is necessary to the movement of troops; and in lieu of coöperating, the Secretary of War thwarted, objected, resisted, and forbade. Every day saw the battle fought in President Buchanan's Cabinet, and every day the solitary champion of the South was forced closer to the corner of the wall. That day came when he was fairly beaten. He resigned, but not with stealth or shame; he resigned with a clap of thunder. While the Administration was giving the orders for the military occupation of the Southern country, it was actually in negotiation with the Commissioners of South Carolina. This fact, if made clearly manifest, sufficiently unveiled the design and the character of the Cabinet, and, causing his resignation to turn on that specification, the Secretary drew the eyes of the entire world on that one focus. The Southern leaders awoke to a sense of their position, and perceiving that if they gave a week's respite to a plot actually in course of execution they were hopelessly lost, they sent over the country the orders which led to the popular seizure of all the forts in the South except two."

By these movements the seceding States were protected from the military arm of the Govern-

ment. The plans for combined operations were concerted at Washington, and made known to the public through the press of that city in the following manner. The leading print said:

"The subjoined communication, disclosing the designs of those who have undertaken to lead the movement now threatening a permanent dissolution of the Union, comes to us from a distinguished citizen of the South, who formerly represented his State with great distinction in the popular branch of Congress. Temporarily sojourning in this city, he has become authentically informed of the facts recited in the subjoined letter, which he communicates to us under a sense of duty, and for the accuracy of which he makes himself responsible. Nothing but assurances coming from such an intelligent, reliable source, could induce us to accept the authenticity of these startling statements, which so deeply concern not only the welfare but the honor of the Southern people."

WASHINGTON, January 9, 1861.

I charge that on last Saturday night a caucus was held in this city by the Southern Secession Senators from Florida, Georgia, Alabama, Mississippi, Louisiana, Arkansas, and Texas. It was then and there resolved in effect to assume to themselves the political power of the South, and, to control all political and military operations for the present, they telegraphed to complete the plan of seizing forts, arsenals, and custom-houses, and advised the Conventions now in session, and soon to assemble, to pass ordinances for immediate secession; but, in order to thwart any operations of the Government here, the Conventions of the seceding States are to retain their representations in the Senate and the House.

They also advised, ordered, or directed the assembling of a Convention of Delegates from the seceding States at Montgomery on the 15th of February. This can of course only be done by the revolutionary conventions usurping the powers of the people and sending delegates over whom they will lose all control in the establishment of a Provisional Government, which is the plan of the dictators.

This caucus also resolved to take the most effectual means to dragoon the Legislatures of Tennessee, Kentucky, Missouri, Arkansas, Texas, and Virginia into following the seceding States. Maryland is also to be influenced by such appeals to popular passion as have led to the revolutionary steps which promise a conflict with the State and Federal Governments in Texas.

They have possessed themselves of all the avenues of information in the South—the telegraph, the press, and the general control of the postmasters. They also confidently rely upon defections in the army and navy.

The spectacle here presented is startling to contemplate. Senators intrusted with the representative sovereignty of the States, and sworn to support the Constitution of the United States, while yet acting as the privy councillors of the President, and anxiously looked to by their constituents to effect some practical plan of adjustment, deliberately conceive a conspiracy for the overthrow of the Government through the military organizations, the dangerous secret order of the Knights of the Golden Circle, "Committees of Safety," Southern Leagues, and other agencies at their command; they have instituted as thoroughly a military and civil despotism as ever cursed a maddened country.

It is not difficult to foresee the form of government which a Convention thus hurriedly thrown together at Montgomery will irrevocably fasten upon a deluded and unsuspecting people. It must essentially be "a monarchy founded upon military principles," or it cannot endure. Those who usurp power never fail to forge strong chains.

It may be too late to sound the alarm. Nothing may be able to arrest the action of revolutionary tribunals whose decrees are principally in "secret sessions." But I call upon the people to pause and reflect before they are forced to surrender every principle of liberty, or to fight those who are becoming their masters rather than their servants.

EATON.

A letter from Washington to the Baltimore press, of the 10th, made this statement: "The leaders of the Southern movement are consulting as to the best mode of consolidating their interests into a Confederacy under a Provisional Government. The plan is to make Senator Hunter, of Virginia, Provisional President, and Jefferson Davis Commander-in-Chief of the army of defence. Mr. Hunter possesses in a more eminent degree the philosophical characteristics of Jefferson than any other statesman now living. Col. Davis is a graduate of West Point, was distinguished for gallantry at Buena Vista, and served as Secretary of War under President Pierce, and is not second to General Scott in military science or courage."

It is charged above that the caucus met on Saturday night, January 5th. A despatch from Washington, under the date of January 6th, appeared in the Charleston press on Monday, January 7th, relating to the same caucus, and was as follows:

"WASHINGTON, January 6.

"The Senators from those of the Southern States which have called Conventions of their people met in caucus last night, and adopted the following resolutions:

"Resolved, That we recommend to our respective States immediate secession.

"Resolved, That we recommend the holding of a General Convention of the said States, to be held in the city of Montgomery, Alabama, at some period not later than the 15th day of February, 1861.

"These resolutions were telegraphed this evening to the Conventions of Alabama, Mississippi, and Florida. A third resolution is also known to have been adopted, but it is of a confidential character, not to be divulged at present. There was a good deal of discussion in the caucus on the question of whether the seceding States ought to continue their delegations in Congress till the 4th of March, to prevent unfriendly legislation, or whether the Representatives of the seceding States should all resign together, and leave a clear field to the Opposition to pass such bills, looking to coercion, as they may see fit. It is believed that the opinion that they should remain prevailed."

The Senators who represented the States above mentioned were as follows:

Alabama—Benjamin Fitzpatrick, C. C. Clay, jr.

Arkansas—R. W. Johnson, Wm. K. Sebastian.

Georgia—Robert Toombs, Alfred Iverson.

Louisiana—J. P. Benjamin, John Slidell.

Mississippi—Jefferson Davis, Albert G. Brown.

Texas—John Hemphill, Louis T. Wigfall.

Florida—David L. Yulee,* S. R. Mallory.

* On the capture of Fernandina, in Florida, by the Federal troops, in March, 1862, numerous letters and papers were found in the houses abandoned by the inhabitants, among which was the following letter. Its statement of facts coincides so accurately with the representations of

The subsequent progress of events has served to show how accurate was the intelligence, and how deliberate was the inception of the plot devised against the integrity of the Union and the stability of the Government; for the events which have marked the progress of secession since that time have been but the fulfilment of the programme prescribed by this Senatorial caucus. The leaders of the disunion movement did "assume to themselves the political power of the South." They did control "all political and military operations." Forts, arsenals, and custom-houses were seized in obedience to telegraphic orders. (*See FORTS.*) State Conventions did pass ordinances of immediate and separate secession. A Convention of delegates from the seceding States was held at Montgomery in pursuance of the plan proposed, and these delegates were arbitrarily appointed by the several State Conventions whose members had been elected with no reference whatever to any such ulterior functions. (*See CONGRESS, CONFEDERATE.*) "Defections from the army and navy" were openly rewarded by promotions in the "Southern service."

The principal features in all these proceedings in the different States were these: they were prompt, conducted in secret sessions, and afterwards enforced by the State authorities. The people had no calm, deliberate voice in the matter. In some instances the authority calling the State Convention expressly forbid the

passage of an ordinance of secession which should be binding, unless it was ratified by the people.

On the 19th of January a committee in the Mississippi Legislature reported a series of resolutions to provide for a Southern Confederacy and the establishment of a Provisional Government. On this same day, Gov. Pickens, of South Carolina, sent by telegraph the following despatch to the Commissioner, A. B. Jackson, from that State to Mississippi: "Please urge Mississippi to send delegates to the Montgomery meeting of States, at as early a day as possible—say 4th February—to form immediately a strong Provisional Government. It is the only thing to prevent war, and let that Convention elect immediately a Commander-in-Chief for the seceding States."

The State Conventions of South Carolina and Alabama urged the Montgomery Congress, and hence, in the Conventions of all the seceding States, delegates were appointed to this Congress. Among others was Howell Cobb, of Georgia, who resigned his position of Secretary of the Treasury of the United States on the 10th day of December, 1860.

So loyal, however, were the people of some of the States, and particularly Louisiana, to the Union, that notwithstanding all the steps of disunion, they still hoped the end would be a reunion. They looked to the fact that the border States remained in the Union as an assurance that they, through the mediation of these States, could be received back after the delirium of secession was over. They openly declared that if, as people of the Gulf States, they could obtain the assurance of a faithful enforcement of the Constitution, in some such form as the Crittenden bill suggested, they would coerce the seceders. They said that at that time there was in favor of the Union and the clearly guaranteed rights of the South under the Constitution of the United States, a vast majority of the people of the Gulf States; and that a compromise on such a basis would put down all who should exclaim against its provisions.

These sentiments in favor of reconstruction were rebuked in the most decided manner by the Georgia State Convention. That body refused to vote for any person as a member of the Confederate Congress, until he had given assurance that he would, under no contingency, favor reconstruction. It has been stated that the authorities of each State aided the efforts of the Conventions by enforcing the ordinance of secession. These efforts were thoroughly done. All the United States property, whether forts, arsenals, custom-houses, or light-houses, was taken. Not a vestige of the authority of the Federal Government was suffered to remain excepting the Post-Office Department. On the 4th of February the delegates to the Confederate Congress assembled at Montgomery, in Alabama. (*See CONGRESS, CONFEDERATE.*) Their first duties consisted in preparing a form of organization for themselves and the

others who are well known, that there can be no doubt of its authenticity.

WASHINGTON, January 7, 1861.

MY DEAR SIR:—On the other side is a copy of resolutions adopted at a consultation of the Senators from the seceding States, in which Georgia, Alabama, Louisiana, Arkansas, Texas, Mississippi, and Florida were present. The idea of the meeting was that the States should go out at once and provide for the early organization of a Confederate Government, not later than the 15th of February. This time is allowed to enable Louisiana and Texas to participate. It seemed to be the opinion that if we left here, *force, loan, and volunteer bills might be passed*, which would put Mr. Lincoln in immediate condition for hostilities; whereas, by remaining in our places until the 15th of March, it is thought we can keep the hands of Mr. Buchanan tied, and disable the Republicans from effecting any legislation which will strengthen the hands of the incoming Administration.

The resolutions will be sent by the delegation to the President of the Convention. I have not been able to find Mr. Mallory this morning. Hawkins [the Representative from Florida] is in Connecticut. I have, therefore, thought it best to send you this copy of the resolutions.

In haste, yours truly,

D. L. YULEE.

J. S. FINNEGAN, Sovereign Convention.

Resolved, That in our opinion, each of the Southern States should, as soon as may be, secede from the Union.

Resolved, That provision should be made for a Convention to organize a Confederacy of the seceding States, the Convention to meet not later than the 15th of February, at the City of Montgomery, in the State of Alabama.

Resolved, That in view of the hostile legislation that is threatened against the seceding States, and which may be consummated before the 4th of March, we ask instructions whether the delegations are to remain in Congress until that date for the purpose of defeating such legislation.

Resolved, That a Committee be and are hereby appointed, consisting of Messrs. Davis, Sildell, and Mallory, to carry out the objects of this meeting.

In accordance with these resolutions, the ordinances of secession were passed as follows:—Mississippi, January 9th; Alabama and Florida, January 11th; Louisiana, January 26th; Texas, February 1st. The Confederate Congress met at Montgomery on February 4th, and President Davis was inaugurated February 18th.

States which they represented. This resulted in a Provisional Constitution, to continue in operation for one year. Under this Constitution, Jefferson Davis, of Mississippi, was elected President, and Alexander H. Stephens, of Georgia, Vice-President. On the 16th of February, Mr. Davis arrived at Montgomery, to be inaugurated and to enter upon the duties of his office. He was greeted with an ovation, to which he responded in an address reviewing the position of the South. He said: "The time for compromise has now passed, and the South is determined to maintain her position, and make all who oppose her smell Southern powder and feel Southern steel if coercion is persisted in. He had no doubts as to the result. He said we will maintain our rights and government at all hazards. We ask nothing, we want nothing; we will have no complications. If the other States join our Confederation they can freely come in on our terms. Our separation from the old Union is now complete. No compromise, no reconstruction is now to be entertained."

After reaching the Exchange Hotel he again addressed the crowd from the balcony as follows: "Fellow-citizens and brethren of the Confederate States of America—for now we are brethren, not in name merely, but in fact—men of one flesh, one bone, one interest, one purpose, of identity of domestic institutions—we have henceforth, I trust, a prospect of living together in peace, with our institutions subject to protection, and not to defamation. It may be that our career will be ushered in in the midst of a storm; it may be that, as this morning opened with clouds, rain, and mist, we shall have to encounter inconveniences at the beginning; but, as the sun rose and lifted the mist, it dispersed the clouds and left us the pure sunlight of heaven. So will progress the Southern Confederacy, and carry us safe into the harbor of constitutional liberty and political equality. We shall fear nothing, because of homogeneity at home and nothing abroad to awe us; because, if war should come, if we must again baptize in blood the principles for which our fathers bled in the Revolution, we shall show that we are not degenerate sons, but will redeem the pledges they gave, preserve the rights they transmitted to us, and prove that Southern valor still shines as bright as in 1776, in 1812, and in every other conflict."

In concluding his speech, Mr. Davis said: "I thank you, my friends, for the kind manifestations of favor and approbation you exhibit on this occasion. Throughout my entire progress to this city I have received the same flattering demonstrations of support. I did not regard them as personal to myself, but tendered to me as the humble representative of the principles and policy of the Confederate States. I will devote to the duties of the high office to which I have been called all I have of heart, of head, and of hand. If, in the progress of events, it shall become necessary that my services be needed in another position—if, to be

plain, necessity require that I shall again enter the ranks of soldiers—I hope you will welcome me there. And now, my friends, again thanking you for this manifestation of your approbation, allow me to bid you good night."

The inauguration took place at Montgomery, on the 18th of February. The hill on which the Capitol is situated, was crowded with the wealth and beauty, the soldiers and citizens from the different States. In the evening the city was gorgeously illuminated. The President held a levee at Estelle Hall—bands of music played, fireworks were displayed, and a grand and general demonstration was made. (For Inaugural Address see PUBLIC DOCUMENTS.)

The cabinet officers of this new Government were as follows: Secretary of State, Robert Toombs; Secretary of the Treasury, Chas. G. Memminger; Secretary of War, L. Pope Walker. Mr. Stephens appeared in Congress and took the oath of office and entered upon his duties. (See CONGRESS, CONFEDERATE.)

Several new questions now arose for immediate decision. All the other States of the Union were to the new Confederacy parts of a foreign country. Goods from those States were required to enter at the custom-houses of the Confederacy, and all vessels bound to foreign ports received a clearance in the name of the Confederate States.

The mouths of the Mississippi River being in the State of Louisiana, that State, upon her secession from the Union, undertook to collect the duties upon the foreign goods imported, and to appropriate them to her own use. These goods, when destined to ports up the Mississippi or Ohio, within the United States, became subject to the duties imposed by the tariff of the Union. How should this difficulty be adjusted? The Convention of Louisiana passed a resolution pledging the faith of the State to preserve the navigation of the Mississippi free. But this proposition looked to the future, and never was of any benefit. The prospect of a close shutting up of the mouths of the Mississippi to the trade of the Western States, was the most alarming and irritating event which could be presented to the minds of their citizens. It was equally alarming to see that outlet in the possession of a foreign power. Even Kentucky could not retain her calmness under such an anticipation. This was her language: "No doubt, when the Cotton States Government shall go into full operation, the revenue laws of Louisiana, so far as the exaction of duties is concerned, will be substituted by the revenue laws of that Government, and we greatly fear that, unless the favorite old Southern theory of free trade shall prevail, the Government will exact, as Louisiana now does, duties on goods passing up the Mississippi for States out of the Southern Confederacy. It is in vain for any man to attempt to disguise or conceal the fact that, unless the Southern States that have suffered themselves to be precipitated into revolution can be won back, the most dreadful of all

national calamities, a bloody and devastating and desolating war, enlisting the fiercest and most destructive energies of hundreds of thousands of men, is as inevitable as the fulfilment of the decrees of God."

It was a question in which much interest was manifested, after the inauguration of the new Government, what its policy would be in relation to the Federal Union. It was soon indirectly made known in the following language: "It will be the policy of the new Government to preserve the status quo of affairs until the 4th of March, when the inauguration of Mr. Lincoln will enable him to indicate the course his Administration will pursue towards the Southern Confederacy. The hope is not yet entirely relinquished that more rational counsels may prevail at Washington, and that, 'making a virtue of necessity,' the Republicans will abandon their idea of coercion, and by a peaceful and conciliatory policy endeavor to preserve all that their folly has not entirely lost to them—commercial relations with the South. It is probable that one of the first acts of the new Government will be to send a commission to Washington, to treat for a peaceable and equitable arrangement of matters between the two Republics—the acknowledgment of our independence, the surrender of the forts, a fair division of the public property and of the public debt. Until it is known how our commissioners will be received, and whether the Federal Government is willing to treat for the peaceable and equitable adjustment of these matters, it would be unwise to take any steps that would be likely to precipitate hostilities. We should prepare for the worst while we hope for the best. As the moral sense of a very large portion of the North is on our side, we should do nothing rashly to forfeit our just claim to the fair judgment of that portion of our late confederates, who are blameless for the causes which led to the disruption of the Union and forced the South to assume her present attitude towards the Federal Government."

Military preparations, however, were not neglected. The States of the South, like those of the North, were, with insignificant exceptions, destitute of any well-organized military force. Excepting officers of the army and navy of the United States, and a few others who had survived the Mexican war, military experience and knowledge were most defective. Munitions of war were also lacking. Nevertheless the military spirit of the people was of the first order. Signs of a new life were seen. The powder mills in Pickens district, South Carolina, commenced manufacturing some fifty kegs a day. A contract for three thousand shot and shells for South Carolina was taken in Savannah; another for casting cannon-balls and grape was taken in Mobile. Recruiting for the regular army of Georgia commenced in all parts of the State. Small squads of recruits from Tennessee were passing to South Caro-

lina. One of the delegates of the Confederate Congress publicly declared their purpose in these words: "We intend to put the strongest force in the field which can be raised, and the President will accept from the States all the men that may be tendered. They will be received with their own officers, but the President must settle all questions of rank and position under the authority of Congress."

The plan adopted at this time by Congress, for the regular army of the Confederate States was that it should consist of 10,488 men, rank and file—100 of whom will be of the engineer corps; 3,372 of the artillery; 763 of the cavalry; 6,296 of the infantry. There will be 111 companies, 9 colonels, 8 lieutenant-colonels, 21 majors, 115 captains, 150 first lieutenants, 180 second lieutenants, 450 sergeants, 450 corporals, 8,878 privates, and 222 musicians. The pay of a colonel is \$2,340 to \$2,520, according to the corps of the service; of a lieutenant-colonel, \$2,040 to \$2,220; of a major, \$1,800 to \$1,944; of a captain, \$1,560 to \$1,680; of a first lieutenant, \$1,080 to \$1,200; of a second lieutenant, \$960 to \$1,080. Sergeants or master-workmen of engineer corps, \$34 per month; corporals or overseers, \$20; privates of first-class, or artificers, \$17; do. second-class, or laborers and musicians, \$13; sergeant-major of cavalry, \$21 per month; first sergeant, \$20; sergeant, \$17; farriers and blacksmiths, \$13; privates, \$12; in infantry, privates \$11. Forage, fuel, and quarters additional to pay, and ten cents per mile mileage when travelling on duty.

As each State adopted an ordinance of secession, large numbers of their citizens who were officers of the Federal army and navy, resigned their commissions and entered the service of the Confederate States. On the 3d of March Gen. G. T. Beauregard, one of these officers who had thus resigned, was ordered from New Orleans, to take the command of the Confederate forces at Charleston.

On the 6th of March Congress passed an act, which was approved by President Davis, authorizing a military force of 100,000 men to be raised.

The principles upon which this new nation, now rising up before the world, as its authors believed, was to be founded, were very fully declared by the second officer of the Government, Mr. Stephens, in a speech delivered to the citizens of Savannah, Georgia. In the first place, the Constitution of the United States was adopted, with some alterations and additions. In those alterations and additions consisted all the objections that could be entertained to their previous form of government. After stating several changes of minor importance, he thus proceeded to explain the great and cardinal feature of distinction between the Government of the Confederate States and that of the United States:

"The new Constitution has put at rest forever all the agitating questions relating to our

peculiar institutions—African slavery as it exists among us—the proper *status* of the negro in our form of civilization. This was the immediate cause of the late rupture and present revolution. Jefferson, in his forecast, had anticipated this, as the ‘rock upon which the old Union would split.’ He was right. What was conjecture with him, is now a realized fact. But whether he fully comprehended the great truth upon which that rock stood and stands, may be doubted. The prevailing ideas entertained by him and most of the leading statesmen at the time of the formation of the old Constitution were, that the enslavement of the African was in violation of the laws of nature; that it was wrong in principle, socially, morally, and politically. It was an evil they knew not well how to deal with; but the general opinion of the men of that day was, that, somehow or other, in the order of Providence, the institution would be evanescent and pass away. This idea, though not incorporated in the Constitution, was the prevailing idea at the time. The Constitution, it is true, secured every essential guarantee to the institution while it should last, and hence no argument can be justly used against the constitutional guarantees thus secured, because of the common sentiment of the day. Those ideas, however, were fundamentally wrong. They rested upon the assumption of the equality of races. This was an error. It was a sandy foundation, and the idea of a Government built upon it was wrong—when the ‘storm came and the wind blew, it fell.’

“Our new Government is founded upon exactly the opposite ideas; its foundations are laid, its corner-stone rests upon the great truth that the negro is not equal to the white man; that slavery, subordination to the superior race, is his natural and moral condition. This, our new Government, is the first in the history of the world, based upon this great physical, philosophical, and moral truth. This truth has been slow in the process of its development, like all other truths in the various departments of science. It is so even amongst us. Many who hear me, perhaps, can recollect well that this truth was not generally admitted, even within their day. The errors of the past generation still clung to many as late as twenty years ago. Those at the North who still cling to these errors with a zeal above knowledge, we justly denominate fanatics. All fanaticism springs from an aberration of the mind; from a defect in reasoning. It is a species of insanity. One of the most striking characteristics of insanity, in many instances, is forming correct conclusions from fancied or erroneous premises; so with the anti-slavery fanatics: their conclusions are right if their premises are. They assume that the negro is equal, and hence conclude that he is entitled to equal privileges and rights with the white man. If their premises were correct, their conclusions would be logical and just; but their premises being wrong, their

whole argument fails. I recollect once of having heard a gentleman from one of the Northern States, of great power and ability, announce in the House of Representatives, with imposing effect, that we of the South would be compelled, ultimately, to yield upon this subject of slavery; that it was as impossible to war successfully against a principle in politics, as it was in physics or mechanics. That the principle would ultimately prevail. That we, in maintaining slavery as it exists with us, were warring against a principle—a principle founded in nature, the principle of the equality of man. The reply I made to him was, that upon his own grounds we should succeed, and that he and his associates in their crusade against our institutions would ultimately fail. The truth announced, that it was as impossible to war successfully against a principle in politics as well as in physics and mechanics, I admitted, but told him that it was he and those acting with him who were warring against a principle. They were attempting to make things equal which the Creator had made unequal.

“In the conflict thus far, success has been on our side, complete throughout the length and breadth of the Confederate States. It is upon this, as I have stated, our social fabric is firmly planted; and I cannot permit myself to doubt the ultimate success of a full recognition of this principle throughout the civilized and enlightened world.

“As I have stated, the truth of this principle may be slow in development, as all truths are, and ever have been, in the various branches of science. It was so with the principles announced by Galileo—it was so with Adam Smith and his principles of political economy. It was so with Harvey, and his theory of the circulation of the blood. It is stated that not a single one of the medical profession, living at the time of the announcement of the truths made by him, admitted them. Now they are universally acknowledged. May we not therefore look with confidence to the ultimate universal acknowledgment of the truths upon which our system rests? It is the first Government ever instituted upon principles in strict conformity to nature, and the ordination of Providence, in furnishing the materials of human society. Many Governments have been founded upon the principles of certain classes; but the classes thus enslaved, were of the same race, and in violation of the laws of nature. Our system commits no such violation of nature’s laws. The negro by nature, or by the curse against Canaan, is fitted for that condition which he occupies in our system. The architect, in the construction of buildings, lays the foundation with the proper material—the granite—then comes the brick or the marble. The substratum of our society is made of the material fitted by nature for it, and by experience we know that it is the best, not only for the superior but for the inferior race, that it should be so. It is, indeed, in conformity with the

Creator. It is not for us to inquire into the wisdom of His ordinances or to question them. For His own purposes He has made one race to differ from another as He has made 'one star differ from another in glory.'

"The great objects of humanity are best attained, when conformed to his laws and decrees, in the formation of Governments as well as in all things else. Our Confederacy is founded upon principles in strict conformity with these laws. This stone which was rejected by the first builders, 'is become the chief stone of the corner' in our new edifice.

"I have been asked, what of the future? It has been apprehended by some, that we would have arrayed against us the civilized world. I care not who or how many they may be, when we stand upon the eternal principles of truth we are obliged and must triumph.

"Thousands of people, who begin to understand these truths, are not yet completely out of the shell; they do not see them in their length and breadth. We hear much of the civilization and Christianization of the barbarous tribes of Africa. In my judgment, those ends will never be obtained but by first teaching them the lesson taught to Adam, that 'in the sweat of thy brow shalt thou eat bread,' and teaching them to work, and feed, and clothe themselves.

"But to pass on. Some have propounded the inquiry, whether it is practicable for us to go on with the Confederacy without further accessions. Have we the means and ability to maintain nationality among the powers of the earth? On this point I would barely say, that as anxious as we all have been, and are, for the Border States, with institutions similar with ours, to join us, still we are abundantly able to maintain our position, even if they should ultimately make up their minds not to cast their destiny with ours. That they ultimately will join us, be compelled to do it, is my confident belief; but we can get on very well without them, even if they should not.

"We have all the essential elements of a high national career. The idea has been given out at the North, and even in the Border States, that we are too small and too weak to maintain a separate nationality. This is a great mistake. In extent of territory we embrace 564,000 square miles and upwards. This is upwards of 200,000 square miles more than was included within the limits of the original thirteen States. It is an area of country more than double the territory of France or the Austrian Empire. France, in round numbers, has but 212,000 square miles. Austria, in round numbers, has 248,000 square miles. Ours is greater than both combined. It is greater than all France, Spain, Portugal, and Great Britain, including England, Ireland, and Scotland together. In population we have upwards of 5,000,000, according to the census of 1860; this includes white and black. The entire population, including white and black, of the origi-

nal thirteen States, was less than 4,000,000 in 1790, and still less in 1776, when the independence of our fathers was achieved. If they, with a less population, dared maintain their independence against the greatest power on earth, shall we have any apprehension of maintaining ours now?"

The population of the seceding States in 1860, was as follows:

	White.	Free Colored.	Slave.
Alabama.....	526,534	2,690	435,182
Arkansas.....	824,186	187	111,104
Florida.....	77,778	908	61,753
Georgia.....	591,686	3,459	462,232
Louisiana.....	357,642	18,688	338,010
Mississippi.....	353,969	731	436,696
North Carolina.....	631,489	30,097	381,081
South Carolina.....	291,623	9,648	402,541
Tennessee.....	826,828	7,285	275,784
Texas.....	421,411	889	180,682
Virginia.....	1,047,618	57,574	490,887

On the 12th of February the Congress assumed charge of the questions pending between the several States of the Confederacy and the Government of the United States, relating to the occupation of forts, arsenals, dockyards, and other public establishments, and directed that act to be communicated to the several States; and, again, on the 15th of March, they recommended the several States to cede the forts, arsenals, dockyards, and other public establishments within their respective limits, to the Confederate States, and in case of such cession, authorized and empowered the President to take charge of this property. It was also provided, by an act passed on the 28th of February, that the President be authorized and directed to assume control of all military operations between the Confederate States, or any of them, and powers foreign to them; and he was authorized to receive from the several States the arms and munitions of war acquired from the United States, and then in the forts, arsenals, and navy yards of said States, and all other arms and munitions which they might desire to turn over and make chargeable to the Confederate Government.

In response to these ordinances, the State of Georgia, on the 20th of March, authorized the Confederate States to occupy, use, and hold possession of all forts, navy yards, arsenals, custom-houses, and other public sites, with their appurtenances, within the limits of said State, and lately in possession of the United States, and to repair, rebuild, and control the same at its discretion until the ordinance should be repealed by a Convention of the people of that State. By another ordinance of the same date and authority, the control of all military operations in that State having reference to or connected with questions between that State, or any of the Confederate States, and powers foreign to them, was transferred to the charge of the Confederate Government. In like manner, the arms and munitions of war, armed vessels and steamers, acquired from the United

States, were transferred to the Confederate Government, which thereupon became accountable for the same.

In like manner South Carolina transferred the public property seized from the United States by her authorities to the Confederate Government. This was done on the 8th of April.

Texas transferred the same within her limits on the 20th of March.

Subsequently Arkansas transferred the arsenal at Little Rock, and the site, buildings, and appurtenances of the hospital at Napoleon, subject to certain conditions and stipulations. The States of Alabama, Louisiana, Mississippi, Florida, and North Carolina pursued the same course. Mississippi transferred also the arms obtained by purchase before her secession. These were sufficient to supply ten or eleven regiments.

Early in the month of March commissioners were sent to England, France, Russia, and Belgium, to ask the recognition of the Confederate States as a member of the family of nations, and to make with each of those powers treaties of amity and commerce. These appointments were made and the instructions given in pursuance of resolutions adopted at the previous session of Congress.

Commissioners were also sent to Washington, who arrived at that city on the 5th of March. They were John Forsyth, Martin J. Crawford, and A. B. Roman, appointed under a resolution of Congress requesting it, and for the purpose of making a settlement of all questions of disagreement between the Government of the United States and that of the Confederate States "upon principles of right, justice, equity, and good faith." Upon the arrival of the commissioners at Washington, an informal notice was given to the Secretary of State, and the explanation of the object of their mission was postponed to the 12th of March. On that day they addressed Secretary Seward, informing him of the purpose of their arrival, and stating their wish to make to the Government of the United States overtures for the opening of negotiations, and assuring that Government that the President, Congress, and people of the Confederate States desired a peaceful solution of the questions of disagreement between them; and that it was neither their interest nor their wish to make any demand which was not founded on the strictest principles of justice, nor to do any act of injury to their late sister States.

A memorandum, bearing date March 15th, was delivered, as the reply to this communication, on the 8th of April, and then upon the request of the secretary of the commissioners, for an answer to their note. This length of time was permitted to elapse by the commissioners, who waived all questions of form with the design of avoiding war if possible. For the details of this correspondence see UNITED STATES. All negotiation upon the basis on which the

commissioners desired to place it, failed. Official intercourse with them was declined by Secretary Seward.

Meantime the Government of the Confederacy was becoming more completely organized. All the courts, with the exception of those of Mississippi and Texas, had been organized by the appointment of marshals and district attorneys, and were prepared for the exercise of their functions. The applications for patents averaged seventy per month, although the laws fully organizing the department had not been enacted. Regulations were devised and put in execution, respecting the collection of revenue on goods brought by the various railways entering the territory of the Confederate States. These were carried into effect as early as the 20th of March. The Circular of Instructions of Secretary Memminger, provides for the location of "revenue stations" near the frontier of the Confederate States. At each station an officer was appointed, to act as a "revenue guard," whose duties were of a supervisory nature over all merchandise introduced. "Revenue depots" were also established, each having a chief officer, with all the powers of collectors of the customs over importations by sea at ports of entry. The circular thus prescribes the duties of the officers:

"Immediately on the arrival of any railroad carriage or train, from any foreign territory contiguous to the Confederate States, at any of the revenue stations, the conductor or other person in charge shall be required to produce to the revenue guard at the first station, a manifest in triplicate of all the goods, wares, or merchandise brought into the Confederate States on board such railway carriage or train. And it is made the duty of the revenue guard, at the revenue station, to board all railway trains arriving at said station, from said foreign territory, at all hours of the day and night, to receive the manifest, and on its presentation to see that the goods described therein are placed in separate cars from those in which mails or passengers are conveyed, and to place on each of said freight cars revenue locks of the Confederate States of America. The original manifest, properly certified, shall be returned to the conductor, and a duplicate forwarded, under seal, to the revenue officer at the first revenue depot to which the cars are destined by the shortest route.

"On the arrival of the railway train or cars at the first revenue depot within the limits of the Confederate States, the conductor shall deliver to the chief revenue officer residing thereat, the original manifest presented to and endorsed with the certificate of the revenue guard at the station aforesaid, and also deliver to the said chief revenue officer all the merchandise described in said manifest, by either leaving at said depot all the locked cars containing the same, or depositing said goods in a warehouse of deposit at said depot, to be provided for that purpose, under the regulations now

governing bonded warehouses, or as may be otherwise provided. On such delivery being made and an examination being instituted of the train by said revenue officer, he shall, if satisfied that all the merchandise has been delivered, furnish to the conductor or other person in charge of the train, a permit to proceed to a further destination.

"The baggage of all passengers passing over the railroad routes, on arrival at the revenue station or depots, shall be subject to the inspection and examination of either the revenue guard at such stations, or revenue officer at such revenue depots; and any baggage that may be intended to be landed at places between the revenue stations and first revenue depots, may be examined by the revenue guard, and if containing no articles subject to duty, shall be landed at the intermediate place named, by having a permit, signed by the said revenue guard, pasted permanently on the trunk, valise, carpet-bag, or other envelope of such baggage.

"Should, however, dutiable articles be found in such baggage, the trunk or other package containing the same must be placed in the car with the merchandise, and under the revenue lock as before required, and the fact noticed in the manifest. And such baggage shall be delivered, with the other merchandise, to the chief revenue officer at the revenue depot, under the foregoing regulations.

"Passenger baggage destined for places beyond or more interior than the revenue depot, must be examined by the chief revenue officer at said revenue depot; and if they are found not to contain any merchandise subject to duty, may pass to their destination by having a permit, signed by the chief revenue officer, pasted thereon. Should, however, such baggage contain dutiable merchandise, the trunks or other package in which said baggage is contained, shall be deposited at said revenue depot."

The civil list passed by Congress, at its first session, placed the amount of appropriations for this class of objects within very moderate bounds. The items of the act were of the following proportions for each department of the Government:

"Legislative, \$55,740; Executive, \$33,050; Department of State, \$44,200; Treasury Department, \$70,800; War Department, \$59,000; Navy Department, \$17,300; Post-Office Department, \$44,900; Judiciary, \$63,200; Mint and Independent Treasury, \$80,000; Foreign Intercourse, \$100,000; Light-houses, \$150,000; Expenses of Collecting Revenue, \$545,000; Executive Mansion, \$5,000; Miscellaneous, \$200,000; Total, \$1,468,190."

This does not embrace the aggregate for general purposes. A single bill appropriates \$1,323,767, for the equipment and support of three thousand troops for twelve months. Other bills appropriated for general purposes equally large amounts, but the gigantic expenditures which were at hand, were not then contem-

plated. Affairs were, however, rapidly approaching a crisis. The curtain was about to be raised, which would exhibit in all their magnitude and dreadful reality the consequences which secession was about to bring upon the Confederate States.

The Commissioners to Washington were refused an audience. The United States Government had prepared to send supplies to the handful of troops besieged in Fort Sumter. Notice of this intention was given to the Governor of South Carolina, and if the Confederate Government was in earnest in what had been done, the hour had come when the sword must be drawn. Its determination was soon taken, and its action quickly followed.

On the 8th of April, the following telegraphic correspondence commenced between the Secretary of War for the Confederate States and the Commander of the Confederate forces at Charleston harbor:

CHARLESTON, April 8th.

L. P. Walker, Secretary of War:

An authorized messenger from President Lincoln just informed Governor Pickens and myself that provisions will be sent to Fort Sumter peaceably, or otherwise by force.

G. T. BEAUREGARD.

MONTGOMERY, 10th.

Gen. G. T. Beauregard, Charleston:

If you have no doubt of the authorized character of the agent who communicated to you the intention of the Washington Government to supply Fort Sumter by force, you will at once demand its evacuation; and if this is refused, proceed in such a manner as you may determine, to reduce it. Answer.

L. P. WALKER, *Secretary of War.*

CHARLESTON, April 10.

L. P. Walker, Secretary of War:

The demand will be made to-morrow at twelve o'clock.

G. T. BEAUREGARD.

MONTGOMERY, April 10.

General Beauregard, Charleston:

Unless there are especial reasons connected with your own condition, it is considered proper that you should make the demand at an early hour.

L. P. WALKER, *Secretary of War.*

CHARLESTON, April 10.

L. P. Walker, Secretary of War:

The reasons are special for twelve o'clock.

G. T. BEAUREGARD.

CHARLESTON, April 11, 1861.

To Hon. L. P. Walker:

The demand was sent at 2 P. M., and until 6 was allowed for the answer.

G. T. BEAUREGARD.

MONTGOMERY, April 11, 1861.

General Beauregard, Charleston:

Telegraph the reply of Major Anderson.

L. P. WALKER.

CHARLESTON, April 11, 1861.

To Hon. L. P. Walker:

Major Anderson replies: "I have the honor to acknowledge the receipt of your communication demanding the evacuation of this fort, and to say in reply thereto that it is a demand with which I regret that my sense of honor and of my obligation to my Government prevent my compliance." He adds, verbally, "I will await the first shot, and, if you do not batter us to pieces, we will be starved out in a few days."

G. T. BEAUREGARD.

MONTGOMERY, April 11, 1861.

To General Beauregard:

Do not desire needlessly to bombard Fort Sumter. If Major Anderson will state the time at which, as indicated by himself, he will evacuate, and agree that, in the mean time, he will not use his guns against us unless ours should be employed against Fort Sumter, you are authorized thus to avoid the effusion of blood. If this or its equivalent be refused, reduce the fort, as your judgment decides to be the most practicable.

L. P. WALKER.

CHARLESTON, April 12, 1861.

To Hon. L. P. Walker:

He would not consent. I write to-day.
G. T. BEAUREGARD.

CHARLESTON, April 12, 1861.

To Hon. L. P. Walker:

We opened fire at 4.30.
G. T. BEAUREGARD.

The fire opened at 4.30 A. M. on the 12th of April on Fort Sumter, resulted in compelling the commander of the fort to surrender. (See SUMTER.) On the evening of the same day, when the people of Montgomery, Alabama, were rejoicing in the prospect that Fort Sumter would fall, the following telegraphic despatch was sent forth from that city to all parts of the United States:

"MONTGOMERY, FRIDAY, APRIL 12, 1861.—An immense crowd serenaded President Davis and Secretary Walker, at the Exchange Hotel, to-night.

"The former is not well, and did not appear. Secretary Walker appeared and declined to make a speech, but in a few words of electrical eloquence told the news from Fort Sumter, declaring, in conclusion, that before many hours the flag of the Confederacy would float over that fortress.

"No man, he said, could tell where the war this day commenced would end, but he would prophesy that the flag which now flaunts the breeze here would float over the dome of the old Capitol at Washington before the first of May. Let them try Southern chivalry and test the extent of Southern resources, and it might float eventually over Faneuil Hall itself."

On the 15th of April, immediately after the surrender of Fort Sumter, President Lincoln issued his message, calling forth the militia of the several States of the Union to the aggregate number of seventy-five thousand. This was immediately after an act of hostility had been committed under the authority of the Confederate Government, and forty days after an act had passed the Confederate Congress authorizing a force of one hundred thousand men to be raised.

Who commenced hostilities, is a question which must be considered as decided. "The war this day commenced," says the Secretary of War of the Confederate States. "We opened fire at 4.30 A. M.," says General Beauregard, in his despatch to the Secretary of War of the Confederate States, dated April 12th. Hostilities were commenced by order of the Government of the Confederate States. For this act

President Davis felt it to be necessary to present to the world some grounds of justification. This he attempted to do in his message to the Confederate Congress, dated April 29th. In that document he states that commissioners from the Confederate States arrived in Washington on the 15th of March, authorized in a peaceful manner to adjust all questions between the two Governments. He states their communication addressed to Secretary Seward on the 12th of March, and proceeds thus:

"To this communication no formal reply was received until the 8th of April. During the interval, the commissioners had consented to waive all questions of form, with the firm resolve to avoid war if possible. They went so far even as to hold, during that long period, unofficial intercourse through an intermediary, whose high position and character inspired the hope of success, and through whom constant assurances were received from the Government of the United States of its peaceful intentions—of its determination to evacuate Fort Sumter, and further, that no measure would be introduced changing the existing status prejudicial to the Confederate States; that in the event of any change in regard to Fort Pickens, notice would be given to the commissioners.

"The crooked paths of diplomacy can scarcely furnish an example so wanting in courtesy, in candor, in directness, as was the course of the United States Government towards our commissioners in Washington. For proof of this I refer to the annexed documents, taken in connection with further facts, which I now proceed to relate:

"Early in April the attention of the whole country was attracted to extraordinary preparations for an extensive military and naval expedition in New York and other Northern ports. These preparations commenced in secrecy, for an expedition whose destination was concealed, and only became known when nearly completed; and on the 5th, 6th, and 7th of April, transports and vessels of war with troops, munitions, and military supplies, sailed from northern ports, bound southward.

"Alarmed by so extraordinary a demonstration, the commissioners requested the delivery of an answer to their official communication of the 12th of March, and the reply dated on the 15th of the previous month, from which it appears that during the whole interval, whilst the commissioners were receiving assurances calculated to inspire hope of the success of their mission, the Secretary of State and the President of the United States had already determined to hold no intercourse with them whatever—to refuse even to listen to any proposals they had to make, and had profited by the delay created by their own assurances, in order to prepare secretly the means for effective hostile operations.

"That these assurances were given has been virtually confessed by the Government of the United States, by its act of sending a messenger

to Charleston to give notice of its purpose to use force if opposed in its intention of supplying Fort Sumter.

"No more striking proof of the absence of good faith in the conduct of the Government of the United States towards the Confederacy can be required, than is contained in the circumstances which accompanied this notice.

"According to the usual course of navigation, the vessels composing the expedition, and designed for the relief of Fort Sumter, might be looked for in Charleston harbor on the 9th of April. Yet our commissioners in Washington were detained under assurances that notice should be given of any military movement. The notice was not addressed to them, but a messenger was sent to Charleston to give notice to the Governor of South Carolina, and the notice was so given at a late hour on the 8th of April, the eve of the very day on which the fleet might be expected to arrive.

"That this manoeuvre failed in its purpose, was not the fault of those who controlled it. A heavy tempest delayed the arrival of the expedition, and gave time to the commander of our forces at Charleston to ask and receive instructions of the Government. Even then, under all the provocation incident to the contemptuous refusal to listen to our commissioners, and the treacherous course of the Government of the United States, I was sincerely anxious to avoid the effusion of blood, and directed a proposal to be made to the commander of Fort Sumter, who had avowed himself to be nearly out of provisions, that we would abstain from directing our fire at Fort Sumter if he would promise to not open fire on our forces unless first attacked. This proposal was refused. The conclusion was, that the design of the United States was to place the besieging force at Charleston between the simultaneous fire of the fleet and fort. The fort should, of course, be at once reduced. This order was executed by General Beauregard with skill and success."

Subsequently, at the session of the Confederate Congress held in July, President Davis sent a message to that body in which he referred to his message of the 29th of April, in which he says:

"I referred to the course of conduct of the Government of the United States towards the commissioners of this Government, sent to Washington for the purpose of effecting, if possible, a peaceful adjustment of the pending difficulties between the two Governments. I also made allusion to 'an intermediary, whose high position and character inspired the hope of success;' but I was not then at liberty to make my communication on this subject as specific as was desirable for a full comprehension of the whole subject.

"It is now, however, in my power to place before you other papers, which I herewith address to you. From them you will perceive that the intermediary referred to was the Hon. John A. Campbell, a Judge of the Supreme

Court of the United States, who made earnest effort to promote the successful issue of the mission entrusted to our Commissioners, and by whom I was kept advised, in confidential communications, of the measures taken by him to secure so desirable a result. It is due to you, to him, and to history, that a narration of the occurrences with which he was connected, should be known."

He also states that he was prompted to call the Congress together, in extraordinary session, on April 29th, "not by reason of the declarations contained in the proclamation of President Lincoln of the 15th of April. My proclamation convoking you was issued on the 12th of April, and was prompted by the declaration of hostile purposes contained in the message sent by President Lincoln to the Governor of South Carolina, on the 8th of April."

The documents referred to in this message of President Davis consist of two letters of Judge Campbell to Secretary Seward, and one to President Davis, as follows:

WASHINGTON CITY, April 13, 1861.

SIR: On the 15th of March ultimo I left with Judge Crawford, one of the commissioners of the Confederate States, a note in writing to the effect following:

"I feel entire confidence that Fort Sumter will be evacuated in the next five days. And this measure is felt as imposing great responsibility on the Administration.

"I feel entire confidence that no measure changing the existing status prejudicially to the Southern Confederate States, is at present contemplated.

"I feel an entire confidence that an immediate demand for an answer to the communication of the commissioners will be productive of evil and not of good. I do not believe that it ought at this time to be pressed."

The substance of this statement I communicated to you the same evening by letter. Five days elapsed and I called with a telegram from General Beauregard to the effect that Sumter was not evacuated, but that Major Anderson was at work making repairs.

The next day, after conversing with you, I communicated to Judge Crawford, in writing, that the failure to evacuate Sumter was not the result of bad faith, but was attributable to causes consistent with the intention to fulfil the engagement, and that, as regarded Pickens, I should have notice of any design to alter the existing status there. Mr. Justice Nelson was present at these conversations, three in number, and I submitted to him each of my written communications to Judge Crawford, and informed Judge C. that they had his (Judge Nelson's) sanction. I gave you, on the 22d of March, a substantial copy of the statement I had made on the 15th.

The 30th of March arrived, and at that time a telegram came from Governor Pickens inquiring concerning Colonel Lamon, whose visit to Charleston he supposed had a connection with the proposed evacuation of Fort Sumter. I left that with you, and was to have an answer the following Monday, (1st of April.) On the 1st of April I received from you the statement in writing: "I am satisfied the Government will not undertake to supply Fort Sumter without giving notice to Governor P." The words "I am satisfied" were for me to use as expressive of confidence in the remainder of the declaration.

The proposition as originally prepared was, "The President may desire to supply Sumter, but will not do so," &c., and your verbal explanation was that you did not believe any such attempt would be made, and that there was no design to reinforce Sumter.

There was a departure here from the pledges of the

previous month, but, with the verbal explanation, I did not consider it a matter then to complain of. I simply stated to you that I had that assurance previously.

On the 7th of April I addressed you a letter on the subject of the alarm that the preparations by the Government had created, and asked you if the assurances I had given were well or ill-founded. In respect to Sumter your reply was, "Faith as to Sumter, fully kept—wait and see." In the morning's paper I read, "An authorized messenger from President Lincoln informed Governor Pickens and General Beauregard that provisions will be sent to Fort Sumter—peaceably, or otherwise by force." This was the 8th of April, at Charleston, the day following your last assurance, and is the evidence of the full faith I was invited to wait for and see. In the same paper, I read that intercepted despatches disclosed the fact that Mr. Fox, who had been allowed to visit Major Anderson, on the pledge that his purpose was specific, employed his opportunity to devise a plan for supplying the fort by force, and that this plan had been adopted by the Washington Government, and was in process of execution. My recollection of the date of Mr. Fox's visit carries it to a day in March. I learn he is a near connection of a member of the Cabinet. My connection with the commissioners and yourself was superinduced by a conversation with Justice Nelson. He informed me of your strong disposition in favor of peace, and that you were oppressed with a demand of the commissioners of the Confederate States for a reply to their first letter, and that you desired to avoid it if possible at that time.

I told him I might perhaps be of some service in arranging the difficulty. I came to your office entirely at his request and without the knowledge of either of the commissioners. Your depression was obvious to both Judge Nelson and myself. I was gratified at the character of the counsels you were desirous of pursuing, and much impressed with your observation that a civil war might be prevented by the success of my mediation. You read a letter of Mr. Weed to show how irksome and responsible the withdrawal of troops from Sumter was. A portion of my communication to Judge Crawford on the 15th March was founded upon these remarks, and the pledge to evacuate Sumter is less forcible than the words you employed. These words were: Before this letter reaches you (a proposed letter by me to President Davis) Sumter will have been evacuated.

The commissioners who received those communications conclude they have been abused and overreached. The Montgomery Government hold the same opinion. The commissioners have supposed that my communications were with you, and upon the hypothesis were prepared to arraign you before the country in connection with the President. I placed a peremptory prohibition upon this as being contrary to the term of my communications with them. I pledged myself to them to communicate information upon what I considered as the best authority, and they were to confide in the ability of myself, aided by Judge Nelson, to determine upon the credibility of my informant.

I think no candid man who will read over what I have written, and considers for a moment what is going on at Sumter, but will agree that the equivocating conduct of the Administration, as measured and interpreted in connection with these promises, is the proximate cause of the great calamity.

I have a profound conviction that the telegrams of the 8th of April of General Beauregard, and of the 10th of April of General Walker, the Secretary of War, can be referred to nothing else than their belief that there has been systematic duplicity practised on them through me. It is under an impressive sense of the weight of this responsibility that I submit to you these things for your explanation.

Very respectfully,

JOHN A. CAMPBELL,

Associate Justice of the Supreme Court, U. S.

Hon. WM. H. SEWARD, Secretary of State.

DESPATCHES.

CHARLESTON, April 8, 1861.

To L. P. Walker, Secretary of War:

An authorized message from President Lincoln just informed Governor Pickens and myself that provisions will be sent to Fort Sumter peaceably, or otherwise by force.

G. T. BEAUREGARD.

MONTGOMERY, April 10, 1861.

Gen. G. T. Beauregard:

If you have no doubt as to the authorized character of the agent who communicated to you the intention of the Washington Government to supply Fort Sumter by force, you will at once demand its evacuation, and if this is refused, proceed in such manner as you may determine to reduce it.

L. P. WALKER.

WASHINGTON, April 20, 1861.

SIR: I enclose you a letter, corresponding very nearly with one I addressed to you one week ago, (13th April,) to which I have not had any reply. The letter is simply one of inquiry in reference to facts concerning which, I think, I am entitled to an explanation. I have not adopted any opinion in reference to them which may not be modified by explanation; nor have I affirmed in that letter, nor do I in this, any conclusion of my own unfavorable to your integrity in the whole transaction. All that I have said and mean to say is, that an explanation is due from you to myself. I will not say what I shall do in case this request is not complied with, but I am justified in saying that I shall feel at liberty to place these letters before any person who is entitled to ask an explanation of myself.

Very respectfully,

JOHN A. CAMPBELL,

Associate Justice of the Supreme Court, U. S.

Hon. WM. H. SEWARD, Secretary of State.

No reply has been made to this letter.

April 24, 1861.

MONTGOMERY, (ALA.) May 7, 1861.

SIR: I submit to you two letters that were addressed by me to Hon. W. H. Seward, Secretary of State of the United States, that contain an explanation of the nature and result of an intervention by me in the intercourse of the commissioners of the Confederate States with that officer. I considered that I could perform no duty in which the entire American people, whether of the Federal Union or of the Confederate States, were more interested than that of promoting the counsels and the policy that had for their object the preservation of peace. This motive dictated my intervention. Besides the interview referred to in these letters, I informed the Assistant Secretary of State of the United States, (not being able to see the Secretary,) on the 11th of April ultimo, of the existence of a telegram of that date from General Beauregard to the commissioners, in which he informed the commissioners that he had demanded the evacuation of Sumter, and if refused he would proceed to reduce it. On the same day I had been told that President Lincoln had said that none of the vessels sent to Charleston were war vessels, and that force was not to be used in the attempt to supply the fort. I had no means of testing the accuracy of this information, but offered that, if the information was accurate, I would send a telegram to the authorities at Charleston, and it might prevent the disastrous consequences of a collision at that fort between the opposing forces. It was the last effort that I would make to avert the calamities of war. The Assistant Secretary promised to give the matter attention, but I had no other intercourse with him or any other person on the subject, nor have I had any reply to the letters submitted to you.

Very respectfully,

JOHN A. CAMPBELL.

Gen. DAVIS, President of the Confederate States.

The last letter of the commissioners to Secretary Seward was dated April 9th, in which

the commissioners say: "On the 1st of April they were again informed that there might be an attempt to supply Fort Sumter with provisions, but that Governor Pickens should have previous notice of this attempt. There was no suggestion of any reinforcements." (See UNITED STATES.)

In his Message to Congress in July, President Lincoln thus describes his actions relative to the relief of Fort Sumter:

"On the 5th of March, (the present incumbent's first full day in office,) a letter of Major Anderson, commanding at Fort Sumter, written on the 28th of February, and received at the War Department on the 4th of March, was, by that department, placed in his hands. This letter expressed the professional opinion of the writer, that reinforcements could not be thrown into that fort within the time for his relief, rendered necessary by the limited supply of provisions, and with a view of holding possession of the same, with a force of less than twenty thousand good and well-disciplined men. This opinion was concurred in by all the officers of his command, and their memoranda on the subject, were made enclosures of Major Anderson's letter. The whole was immediately laid before Lieutenant-General Scott, who at once concurred with Major Anderson in opinion. On reflection, however, he took full time, consulting with other officers, both of the army and navy, and, at the end of four days, came reluctantly, but decidedly, to the same conclusion as before. He also stated at the same time that no sufficient force was then at the control of the Government, or could be raised and brought to the ground within the time when the provisions in the fort would be exhausted. In a purely military point of view, this reduced the duty of the Administration in the case, to the mere matter of getting the garrison safely out of the fort.

"It was believed, however, that to so abandon that position, under the circumstances, would be utterly ruinous; that the necessity under which it was to be done, would not be fully understood; that by many, it would be construed as a part of a voluntary policy; that at home, it would discourage the friends of the Union, embolden its adversaries, and go far to insure to the latter a recognition abroad; that, in fact, it would be our national destruction consummated. This could not be allowed. Starvation was not yet upon the garrison; and ere it would be reached, Fort Pickens might be reinforced. This last would be a clear indication of policy, and would better enable the country to accept the evacuation of Fort Sumter, as a military necessity. An order was at once directed to be sent for the landing of the troops from the steamship Brooklyn, into Fort Pickens. This order could not go by land, but must take the longer and slower route by sea. The first return news from the order was received just one week before the fall of Fort Sumter. The news itself was, that the officer

commanding the Sabine, to which vessel the troops had been transferred from the Brooklyn, acting upon some *quasi* armistice of the late Administration, (and of the existence of which the present Administration, up to the time the order was despatched, had only too vague and uncertain rumors to fix attention,) had refused to land the troops. To now reinforce Fort Pickens, before a crisis would be reached at Fort Sumter, was impossible—rendered so by the near exhaustion of provisions in the latter-named fort. In precaution against such a conjuncture, the Government had, a few days before, commenced preparing an expedition, as well adapted as might be, to relieve Fort Sumter, which expedition was intended to be ultimately used, or not, according to circumstances. The strongest anticipated case for using it was now presented; and it was resolved to send it forward. As had been intended, in this contingency, it was also resolved to notify the Governor of South Carolina that he might expect an attempt would be made to provision the fort; and that, if the attempt should not be resisted, there would be no effort to throw in men, arms, or ammunition, without further notice, or in case of an attack upon the fort. This notice was accordingly given; whereupon the fort was attacked, and bombarded to its fall, without even awaiting the arrival of the provisioning expedition."

On the 8th of April General Beauregard sent a despatch by telegraph to Secretary Walker, that a notice had that day been given to Governor Pickens and himself, "that provisions will be sent to Fort Sumter, peaceably or otherwise by force." Such are the facts. If the garrison of Fort Sumter had received no supplies, they must have abandoned it in a few days. If they had received supplies of provisions merely, they would have been fully as unable to have defended the fort at a future day, as they proved to have been when it was attacked. If Fort Sumter had been reinforced with men and provisions, it had no power of aggression, but its final capture by the Confederate Government would have been more difficult and distant. President Davis, however, says: "The conclusion was, that the design of the United States was to place the besieging force at Charleston between the simultaneous fire of the fleet and the fort."

There were some other facts which occurred at this time of sufficient importance to excite the inquiry whether the capture of Fort Sumter was not a political necessity with the Confederate Government.

The Convention of the State of Virginia was in session at this time, but manifested no disposition to adopt an ordinance of secession, or to join the Confederate States. The bombardment of Fort Sumter begun at 4.30 o'clock on the morning of the 12th of April. At 10 o'clock on the same day the following despatch was sent by telegraph to the President of the State Convention:

MONTGOMERY, April 12—10 A. M.

Ex-President JOHN TYLER, *State Convention* :

I am authorized by Hon. L. P. Walker, Secretary of War, C. S. A., to send you the following despatches and explanatory note, preceding the bombardment of Fort Sumter, for publication.

Your son, JOHN TYLER, Jr.,

[Mr. Tyler was a clerk in the War Department of the Confederate States.]

The despatches consisted of copies of the telegraphic correspondence between General Beauregard and the Secretary of War of the Confederate States, to be found on a previous page.

On the evening of the day previous to the attack on the fort, ex-Congressman Pryor of Virginia, in a speech to the citizens of Charleston, made the following declarations :

"As sure as to-morrow's sun will rise upon us, just so sure will Old Virginia be a member of this Southern Confederation. (Applause.)

"And I will tell you, gentlemen, what will put her in the Southern Confederation in less than an hour by Shrewsbury clock. Strike a blow! (Tremendous applause.)

"I do not mean to say any thing for effect upon military operations. I am but a poor civilian, who never set a squadron in the field—

"Nor the division of a battle note
More than a spinster."

but I was speaking with respect to the political effects of revolution. The very moment that blood is shed, Old Virginia will make common cause with her sisters of the South. It is impossible she should do otherwise. (Applause.)

"In conclusion, accept my word for it, the moment the conflict begins, Old Virginia will dispute with South Carolina the precedence in this great combat."

Meanwhile an unquenchable military spirit was aroused in the Confederate States by the events of a few days. They determined to be fully prepared for the coming struggle, and declared that they would "meet the Northern forces with full confidence in the justice of their cause." At this time they had a large number of troops in the field, chiefly at Charleston and Pensacola. The requisition for fifteen hundred troops from Mississippi was answered by more than three thousand volunteers, and heavy bonuses were offered for many places of those accepted. On the 17th, two days later than the proclamation of President Lincoln, one was also issued by President Davis, offering letters of marque to all persons who might desire by service in private armed vessels to aid the Government. The proclamation was as follows :

Whereas Abraham Lincoln, President of the United States, has by proclamation announced the intention of invading the Confederacy with an armed force for the purpose of capturing its fortresses, and thereby subverting its independence and subjecting the free people thereof to the dominion of a foreign power; and whereas it has thus become the duty of this Government to repel the threatened invasion and defend the rights and liberties of the people by all the means which the laws of nations and usages of civilized warfare place at its disposal :

Now, therefore, I, Jefferson Davis, President of the Confederate States of America, do issue this my proclamation, inviting all those who may desire by service in private armed vessels on the high seas to aid this Government in resisting so wanton and wicked an aggression, to make application for commissions or letters of marque and reprisal, to be issued under the seal of these Confederate States; and I do further notify all persons applying for letters of marque to make a statement in writing, giving the name and suitable description of the character, tonnage, and force of the vessel, name of the place of residence of each owner concerned therein, and the intended number of crew, and to sign such statement, and deliver the same to the Secretary of State or collector of the port of entry of these Confederate States, to be by him transmitted to the Secretary of State; and I do further notify all applicants aforesaid, before any commission or letter of marque is issued to any vessel or the owner or the owners thereof and the commander for the time being, they will be required to give bond to the Confederate States, with at least two responsible sureties not interested in such vessel, in the penal sum of five thousand dollars, or if such vessel be provided with more than one hundred and fifty men, then in the penal sum of ten thousand dollars, with the condition that the owners, officers, and crew who shall be employed on board such commissioned vessel shall observe the laws of these Confederate States and the instructions given them for the regulation of their conduct that shall satisfy all damages done contrary to the tenor thereof by such vessel during her commission, and deliver up the same when revoked by the President of the Confederate States; and I do further specially enjoin on all persons holding offices, civil and military, under the authority of the Confederate States, that they be vigilant and zealous in the discharge of the duties incident thereto; and I do, moreover, exhort the good people of these Confederate States, as they love their country, as they prize the blessings of free government, as they feel the wrongs of the past and those now threatened in an aggravated form by those whose enmity is more implacable because unprovoked, they exert themselves in preserving order, in promoting concord, in maintaining the authority and efficacy of the laws, and in supporting and invigorating all the measures which may be adopted for a common defence, and by which, under the blessing of Divine Providence, we may hope for a speedy, just, and honorable peace.

In witness whereof, I have set my hand and have caused the seal of the Confederate States of America to be attached this seventeenth day of April, in the year of our Lord one thousand eight hundred and sixty-one. JEFFERSON DAVIS.

ROBERT TOOMBS, Secretary of State.

The following is a copy of the form in which these letters of marque were issued :

Jefferson Davis, President of the Confederate States of America, to all who shall see these presents, greeting : Know ye that, by virtue of the power vested in me by law, I have commissioned, and do hereby commission, have authorized and do authorize the schooner or vessel called the ———, (more particularly described in the schedule herewith annexed,) ——— is commander, to act as a private armed vessel in the service of the Confederate States, on the high seas, against the United States of America, their ships, vessels, goods, and effects, and those of their citizens, during the pendency of the war now existing between the said Confederate States and the said United States; this commission to continue in force until revoked by the President of the Confederate States for the time being.

Given under my hand and the seal of the Confederate States, at Montgomery, this — day of —, A. D. 1861.

By the President : JEFFERSON DAVIS.

R. TOOMBS, Secretary of State.

All privateers which sailed under one of

these letters of marque were required to obey the following instructions:

1. The tenor of your commission, under the act of Congress entitled "An act recognizing the existence of war between the United States and the Confederate States, and concerning letters of marque, prizes, and prize goods," a copy of which is hereto annexed, will be kept constantly in your view. The high seas referred to in your commission you will understand generally to refer to the low-water mark, but with the exception of the space within one league, or three miles, from the shore of countries at peace with the United States and the Confederate States. You will nevertheless execute your commission within that distance of the shore of the nation at war with the United States, and even on the waters within the jurisdiction of such nation, if permitted to do so.

2. You are to pay the strictest regard to the rights of neutral powers and the usages of civilized nations, and in all your proceedings towards neutral vessels you are to give them as little molestation or interruption as will consist with the right of ascertaining their neutral character, and of detaining and bringing them in for regular adjudication in the proper cases. You are particularly to avoid even the appearance of using force or seduction with the view to deprive such vessels of their crews or the passengers, other than persons in the military service of the enemy.

3. Towards enemy's vessels and their crews you are to proceed, in exercising the rights of war, with all the justice and humanity which characterize this Government and its citizens.

4. The master, and one or more of the principal persons belonging to the captured vessels, are to be sent, as soon after the capture as may be, to the judge or judges of the proper court in the Confederate States, to be examined upon oath touching the interest or property of the captured vessel and her lading, and at the same time are to be delivered to the judge or judges all papers, charter parties, bills of lading, letters, and other documents and writings found on board; and the said papers to be proved by the affidavit of the commander of the captured vessel, or some other person present at the capture, to be produced as they were received, without fraud, addition, subtraction, or embezzlement.

5. Property, even of the enemy, is exempt from seizure on neutral vessels, unless it be contraband of war. If goods contraband of war are found on any neutral vessel, and the commander thereof shall offer to deliver them up, the offer shall be accepted, and the vessel left at liberty to pursue its voyage, unless the quantity of contraband goods shall be greater than can be conveniently received on board your vessel, in which case the neutral vessel may be carried into port, for the delivery of the contraband goods.

The following articles are declared by this Government contraband of war, as well as all others that are so declared by the laws of nations, viz.: All arms and implements serving for the purpose of war by land or sea, such as cannons, mortars, guns, muskets, rifles, pistols, petards, bombs, grenades, balls, shot, shell, pikes, swords, bayonets, javelins, lances, horse furniture, holsters, belts, and generally all other implements of war. Also, timber for ship-building, pitch, tar, rosin, copper in sheets, sails, hemp, cordage, and generally whatever may serve directly to the equipment of vessels, wrought iron and planks only excepted.

Neutral vessels conveying enemies' despatches or military persons in the service of the enemy forfeit their neutral character, and are liable to capture and condemnation. But this rule does not apply to neutral vessels bearing despatches from the public ministers or ambassadors of the enemy residing in neutral countries.

By the command of the President of the Confederate States.

ROBERT TOOMBS,
Secretary of State.

The passage of the ordinance of secession by

the State Convention of Virginia on the 18th of April, was received throughout the Confederate States with unbounded joy. In all the principal cities bells were rung, salutes of a hundred guns were fired, and other exciting demonstrations made. The war spirit now stirred up was unparalleled. Men and money were lavishly offered, and hundreds of battalions and regiments of volunteers began to form, some openly, and some secretly, to be prepared to meet the North.

The refusal of the Governors of Virginia, North Carolina, Kentucky, Missouri, and Arkansas, to furnish the quota of troops required under the proclamation of President Lincoln, afforded much gratification to the authorities and people of the Confederate States. Virginia and North Carolina were regarded as sure to join the Confederate States with their whole military strength. The course of Kentucky was considered as somewhat doubtful, and an early effort was therefore made to secure her coöperation. For this purpose the Governor was addressed by the Secretary of War as follows:

MONTGOMERY, April 22, 1861.

HON. B. MAGOFFIN:

SIR: Your patriotic response to the requisition of the President of the United States for troops to coerce the Confederate States justifies the belief that your people are prepared to unite with us in repelling the common enemy of the South. Virginia needs our aid. I therefore request you to furnish one regiment of infantry, without delay, to rendezvous at Harper's Ferry, Virginia. It must consist of ten companies of not less than sixty-four men each. * * * * * Staff officers are appointed by the President. They will be mustered into the service of the Confederate States at Harper's Ferry, but transportation and subsistence will be provided from the points of departure. They will furnish their own uniforms. By communicating, arms and ammunition will be sent to Harper's Ferry, or to such points as you may designate. Answer and say whether you will comply with this request, and when.

L. P. WALKER,

Sec. of War of the Confederate States.

The military force of the Confederate States now in the field was 35,000 men. Of this number there were at Charleston, Pensacola, Forts Morgan, Jackson, St. Philip, and Pulaski 19,000 men. The remainder were on the route to Virginia, to wit, 16,000. The Navy Department had become organized, and commenced by the purchase of the steamers Sumter and McRea, which were fitted out at New Orleans. At the same time contracts were made in that city with two different establishments for the casting of ordnance—cannon, shot, and shell—with the view to encourage the manufacture of these articles.

The loan of five millions of dollars authorized by Congress had now not only all been taken, but an excess of three millions had also been subscribed. The entire subscription was, however, accepted, amounting to eight millions of dollars.

The question now presented before the Confederate Government for their decision, related to the course to be pursued in the war. Should

it be an offensive war or conducted only for defence, and to prevent an invasion of the Southern States? What should be the plan? The more radical and extreme portion of the Southern people clamored for an attack upon Washington at once. The Secretary of War had said on the eve of the attack on Fort Sumter that "the flag which now flaunts the breeze here would float over the dome of the old Capitol at Washington before the 1st of May." Others said: "the desire for taking Washington increases every hour, and all things seem tending to this consummation." "Nothing is more probable than that President Davis will soon march an army through North Carolina and Virginia to Washington." "From mountain tops and valleys to the shores of the sea there is one wild shout of fierce resolve to capture Washington City at all and every human hazard."

President Davis, in his message on the 29th of April, although giving no decisive information upon the purposes of the Government, manifested a disposition to pursue a defensive policy. He said: "We protest solemnly, in the face of mankind, that we desire peace at any sacrifice, save that of honor." "In independence we seek no conquest, no aggrandizement, no cession of any kind from the States with which we have lately confederated. All we ask is to be let alone—that those who never held power over us should not now attempt our subjugation by arms. This we will, we must resist, to the direst extremity." "The moment that this pretension is abandoned, the sword will drop from our grasp, and we shall be ready to enter into treaties of amity and commerce, that cannot but be mutually beneficial."

On the night of the 30th of April, on his return from Richmond, where the terms were arranged under which Virginia joined the Confederate States, the Vice-President, Mr. Stephens, addressed an audience at Atlanta, Ga., as follows:

"What is to take place before the end, I know not. A threatening war is upon us, made by those who have no regard for right. We fight for our homes, our fathers and mothers, our wives, brothers, sisters, sons, and daughters, and neighbors; they for money. The hirelings and mercenaries of the North are all hand to hand against you.

"As I told you when I addressed you a few days ago, Lincoln may bring his seventy-five thousand soldiers against us; but seven times seventy-five thousand men can never conquer us. We have now Maryland and Virginia, and all the Border States with us. We have ten millions of people with us, heart and hand, to defend us to the death. We can call out a million of people, if need be; and when they are cut down, we can call out another, and still another, until the last man of the South finds a bloody grave, rather than submit to their foul dictation. But a triumphant victory, and independence with an unparalleled career of

glory, prosperity, and progress await us in the future. God is on our side, and who shall be against us? None but His omnipotent hand can defeat us in this struggle.

"A general opinion prevails that Washington City is soon to be attacked. On this subject I can only say, our object is peace. We wish no aggressions on any one's rights, and will make none. But if Maryland secedes, the District of Columbia will fall to her by reversionary right—the same as Sumter to South Carolina, Pulaski to Georgia, and Pickens to Florida. When we have the right, we will demand the surrender of Washington, just as we did in the other cases, and will enforce our demands at every hazard and at whatever cost. And here let me say that our policy and conduct from the first have been right, and shall be to the last. I glory in this consciousness of our rectitude.

"It may be that 'whom the gods would destroy, they first make mad.' But for Lincoln's wicked and foolish war proclamation, the Border States—some of them at least, would still have lingered in the hope that the Administration and its designs were not so basely treacherous as that document has shown them to be. Tennessee and other States would have lingered for some time. Now, all the slave States are casting in their lot with us, and linking their destinies with ours. We might afford to thank Lincoln a little for showing his hand. It may be that soon the Confederate flag with fifteen stars will be hoisted upon the dome of the ancient Capitol. If so, God's will be done, is my prayer. Let us do nothing that is wrong. Let us commit our cause into His hand—perform our whole duty, and trust in Him for the crowning results.

"I have many things I would like to say to you, but my strength will not admit, even if it were necessary for your encouragement—but it is not. I find that you are fully up to the music, that you thoroughly comprehend our condition, and are resolved to do your whole duty. I find our people everywhere are alive to their interests and their duty in this crisis. Such a degree of popular enthusiasm was never before seen in this country."

The plan of the war was evidently decided by circumstances beyond the control of the Government. Commencing as an organized Confederacy on the 22d of February, on the 12th of April Fort Sumter was attacked, and the Confederacy launched into a gigantic war. An agricultural people entering upon a war of invasion within three months after their organization as a nation, and against a commercial and manufacturing people, superior in numbers and general intelligence, is an event as yet unknown in history. Peace was the only source of life to the Confederate States—at least a peace of such length of time as would allow of concentration and national organization. The movement to send supplies to Fort Sumter was followed by the attack on that fort, and sub-

sequently by the union of Virginia, North Carolina, Tennessee, and Arkansas to the Confederacy. Thus stood the South at war against the North. Should the South make the war one of invasion? She had nothing to clothe, equip, or move an army with, unless it had been bought abroad, and imported within her territory. How could the Confederacy undertake a war of invasion, destitute of all facilities for a strong and sustained effort? These facts decided the character of the war on the part of the Confederacy. On the other hand the United States, composed of a commercial and manufacturing people, with every facility to raise and equip an army, and possessing the army and navy of the nation when undivided, was unable to commence a movement of invasion with success until months had passed away. How much less could such a movement be made by mere agricultural States? The character of the war on the part of the Confederacy was thus decided by circumstances. The true position of affairs was early seen by President Davis. "All we ask is to be let alone," are the words in his message to Congress. The attack upon Washington urged by many juvenile minds in the Confederacy was impracticable from the outset. It served, however, to gratify a kind of contemptuous spirit which prompted its utterance, and to rouse the United States to the utmost activity and energy for its defence. The war therefore necessarily became a defensive one on the part of the Confederacy.

The leaders of secession in the Southern States who foresaw where their proceeding would end, had flattered themselves that when the war came they should derive advantage from numerous auxiliaries. They believed the demand for cotton in England and France would put a speedy end to any blockade the United States might attempt. They believed the great democratic party of the North would stand aloof from the Government in its attempt to repossess the forts and arsenals. They believed that the prowess of the North had degenerated, and that it would prove an inefficient foe. They saw, when it was too late, that England and France were bound by every principle of honor to respect an efficient blockade, which the navy and the commercial marine of the United States could establish. They now found the North united as one man in support of the Union, and were soon to bring to a test the energy of her prowess.

A proclamation was immediately issued by President Davis after the capture of Fort Sumter, calling a meeting of the Confederate Congress at Montgomery on the 29th of April. On that day this body assembled, and the President's message was delivered. (See PUBLIC DOCUMENTS.) It recommended such measures as were necessary to conduct a vigorous defensive war. The course to be pursued by the Confederate Government was soon fixed. The acquisition of Virginia made her a portion of

the Confederacy, and in assuming the obligations she became entitled to the protection of the Government. The instructions of the Secretary of the Treasury to the collectors of revenue on the 12th of May were in these words:

"Virginia is now one of the Confederate States. Of course no duties are to be collected on imports from thence. Suspend collections of duties from North Carolina and Tennessee."

On the 21st of May Congress adjourned to meet in Richmond, Virginia, on the 20th of July. The reasons for this change of capital are given by the President of Congress, Howell Cobb, in a speech at Atlanta, Ga., on the 22d of May. He also states the future intentions of the Government relative to the war:

"I presume that a curiosity to know what we have been doing in the Congress recently assembled at Montgomery, has induced you to to make this call upon me.

"We have made all the necessary arrangements to meet the present crisis. Last night we adjourned to meet in Richmond on the 20th of July. I will tell you why we did this. The 'Old Dominion,' as you know, has at last shaken off the bonds of Lincoln, and joined her noble Southern sisters. Her soil is to be the battle-ground, and her streams are to be dyed with Southern blood. We felt that her cause was our cause, and that if she fell we wanted to die by her. We have sent our soldiers on to the posts of danger, and we wanted to be there to aid and counsel our brave 'boys.' In the progress of the war further legislation may be necessary, and we will be there, that when the hour of danger comes, we may lay aside the robes of legislation, buckle on the armor of the soldier, and do battle beside the brave ones who have volunteered for the defence of our beloved South.

"The people are coming up gallantly to the work. When the call was made for twelve-months volunteers, thousands were offered; but when it was changed to the full term of the war, the numbers increased! The anxiety among our citizens is not as to who shall go to the wars, but who shall stay at home? No man in the whole Confederate States—the gray-haired sire down to the beardless youth—in whose veins was one drop of Southern blood, feared to plant his foot upon Virginia's soil, and die fighting for our rights.

"But we not only need soldiers, we must have treasure to carry on the war. Private contributions have been offered to a vast amount. I will mention an instance which occurred on the Mississippi a few days ago. An aged man—whose gray hairs and tottering limbs forbade his entering the ranks, and whose children of the first and second generations were in the ranks of his country's defenders—was asked how much he would give to carry on the war. The spirit of the old man rose up in him—'Tell them,' he said, 'that my yearly crop of 1,000 bales of cotton they may have. Only give me enough to sustain me, and let the balance

go to my country!" Offers of this sort come pouring in upon the Government from all parts of the country.

"But the Government does not require contributions from individuals; she has the means within herself of sustaining this war. No donations are necessary, except for the equipment of your own volunteers, and those you can and will provide for. But I tell you what you may do. Those of you who raise large crops of cotton, when your cotton is ready for market, give it to your Government at its market value, receive in return its bonds, and let it sell your produce to Europe for the specie to sustain our brave 'boys' in Virginia. This was agreed on at Montgomery, and we promised to throw out the suggestion, that the people might think about it. I raise some cotton, and every thing above my necessary expenses my Government shall have. When this was proposed in Congress, a gentleman from Mississippi rose up and said that he did not raise cotton; it was his misfortune not to be able to help his country in that manner. 'But,' said he, 'I will go home and canvass my section, and every man that I meet, who raises cotton, sugar, and rice, I will persuade him to sell it to his Government.'"

On the next evening the Vice-President, Mr. Stephens, being at Atlanta, also made an address, in which the plan of the Government is more fully unfolded:

"The time for speech-making has passed. The people have heard all that can be said. The time for prompt, vigorous, and decisive action is upon us, and we must do our duty. Upon the surface affairs appear to be quiet, and I can give you no satisfaction as to their real condition. It is true that threats of an attack on Pensacola have been made, but it is uncertain whether any attack will be made. As you know, an attack was made at Sewall's Point, near Norfolk, but the vessel making it was repulsed and disabled. But the general opinion and indications are that the first demonstration will be at Harper's Ferry, and that there, where John Brown inaugurated his work of slaughter, will be fought a fierce and bloody battle. As for myself, I believe that there the war will begin, and that the first boom of cannon that breaks upon our ears will come from that point. But let it begin where it will, and be as bloody and prolonged as it may, we are prepared for the issue!

"Some think there will be no war; as to that I know not. But whatever others wanted, the object of the Confederate Government is *peace*. Come peace or war, however, it is determined to maintain our position at every hazard and at every cost, and to drive back the myrmidons of Abolitionism.

"We prefer and desire peace if we can have it; but if we cannot, we must meet the issue forced upon us. We must meet Lincoln and his myrmidons on their own ground, and on their own terms—on constitutional principles.

"So far our progress has been all that we

could expect. A Government has been organized, executive departments and offices supplied, all needful laws passed, and all necessary arrangements made to meet any contingency. At the head of our Government is President Davis, who led the Mississippi Rifles at Buena Vista, and whose flag never yet trailed in the dust. This noble and true son of the South goes to Richmond to take command in person of our soldiers there, and to lead them upon the battle-field against all the military power and the talent they can summon—even to their veteran chieftain, Gen. Scott himself. Whether brought to a bloody conflict or not, we are prepared. Our people everywhere are full of enthusiasm, and strong in their determination never to submit to the rule of Lincoln."

The views of President Davis, expressed in his message to Congress on the 29th of April, were repeated in a letter to commissioners from Maryland. The Legislature of that State had appointed commissioners to visit Montgomery, and suggest to the Confederate Government the cessation of the hostilities now impending, until the meeting of Congress at Washington in July, in order that the Congress might, if possible, arrange for an adjustment of the existing troubles by means of negotiations rather than the sword. Similar commissioners were sent to Washington. The reply was dated May 25th, at Montgomery:

"The Government of the Confederate States is at a loss how to reply without a repetition of the language it has used on every possible occasion that has presented itself since the establishment of its independence.

"In deference to the State of Maryland, however, it again asserts, in the most emphatic terms, that its sincere and earnest desire is for peace, and that while the Government would readily entertain any proposition from the Government of the United States, tending to a peaceful solution of the present difficulties, the recent attempts of this Government to enter into negotiations with that of the United States were attended with results which forbid any renewal of proposals from it to that Government.

"If any further assurance of the desire of this Government for peace were necessary, it would be sufficient to observe, that being formed of a confederation of sovereign States, each acting and deciding for itself, the right of every other sovereign State to assume self-action and self-government is necessarily acknowledged.

"Hence conquests of other States are wholly inconsistent with the fundamental principles and subversive of the very organization of this Government. Its policy cannot but be peace—peace with all nations and people."

The Confederate Congress, in compliance with the call of the President, assembled at Montgomery on the 29th of April. During its adjournment the Constitution, framed for the establishment of a permanent Government of the Confederate States, had been ratified by the

regular Conventions of each of the States, to which it had been referred. This was the first confirmation which the Government had received. It came only from the State Conventions, and its extent was to approve of the existence of the Provisional Constitution and Provisional Government, which were to remain in force for one year, then to be supplanted by a regular Constitution and officers duly elected under it.

At this session measures were taken to place the finances of the Confederacy upon such a basis as would enable it to meet the great struggle at hand. Treasury notes were adopted as a means of circulation. The first issue authorized was made payable at the expiration of twelve months. But at this session the time of payment was extended until six months after the close of the war. This currency drove all other out of circulation, and became the only medium of exchange in some of the Confederate States. The discount on these notes for specie was variable during the year, but often at thirty per cent., and even more. To give the stamp of value, and attract confidence to the financial movements of the Government, it was necessary to secure to it a substantial income. The revenue from imports under a stringent blockade could not be calculated upon, and probably would not equal the expenses of collection. Direct taxes, if laid, could not be collected in any amount sufficient to strengthen the credit of the Government. The deposits in all the banks of the Confederate States on the 20th of March amounted to \$75,000,000. A people devoted to agriculture without the accumulations of commerce have no resources but the products of the land. Rich as the Southern States may be when their crops of cotton, rice, and tobacco are gathered and ready for market, yet without a market these crops are of no value. A strict blockade annihilated their market, and destroyed any immediate value these crops otherwise would have. Nothing but credit remained, and to improve it a plan was devised by Congress which proposed to make cotton a basis of security. The plan was that the planters should subscribe for the use of the Government a certain sum of money out of the proceeds of a certain number of bales of cotton when sold. The planter was to retain the cotton in his custody, and have the exclusive right of declaring when he would sell it and at what price it should be sold. By this plan the Government would get nothing at once, and there was room for many contingencies whether it would ever get any thing. The planter might become bankrupt and his cotton be seized by creditors, or it might be surreptitiously disposed of. The Government received nothing but an order on the commission agent who might conduct the sale, to pay the Government the amount subscribed from the proceeds of sale, whenever he should receive the cotton and effect its sale. In consequence of the events of the last year there was not only

no sale for the cotton, but it was kept from the seaboard cities to prevent its falling into the hands of their enemies. On the 20th of July the subscriptions to the cotton loan merely, exceeded fifty millions of dollars. Other articles were afterwards included, and President Davis speaks of the plan in these words: "Scarcely an article required for the consumption of our army is provided otherwise than by subscription to the produce loan so happily devised by the wisdom of Congress." This plan, although it failed to produce money for the Government, served to supply it liberally with such articles as were necessary for the consumption of the army. In each district or county proper individuals were appointed to solicit subscriptions. The instructions given to them by the Secretary of the Treasury, Mr. Memminger, were as follows:

"Sir: The Congress of the Confederate States, at its last session, passed an act authorizing the issue of bonds for the proceeds of the sale of raw produce and manufactured articles.

"It has been deemed advisable, in carrying out this law, to circulate in advance lists for subscription, in which every planter can indicate the portion of his crop which he is disposed to lend for the support of the Government. It is proposed that no disturbance shall be made of the usual arrangements of each planter for selling his crop, but that he shall simply indicate the portion he is willing to subscribe, the time and place of delivery, and the factor in whose hands it is placed for sale; and shall order the factor to exchange the proceeds of sale of the subscribed portion for Confederate bonds, bearing eight per cent. interest. Several of these lists are herewith sent you, and you are requested to act as commissioner in bringing the same to the attention of the people of your district or county. You will use your discretion as to the best mode of bringing the matter forward; but it is suggested that it would be desirable to use any public occasion, and to induce as many gentlemen as you can to make individual applications to their fellow-citizens. As soon as you shall have procured as many signatures as you can to any one list, you will please forward it to this Department. To provide against loss of any list, it is desirable that they should be signed in duplicate, and forwarded by different mails."

It remains to be seen what the fruits of this measure will be, so far as relates to placing in the hands of the Government actual resources, with which to pay its debts or to provide such munitions of war as can be obtained only with funds of value in foreign markets. The large amount of cotton and tobacco subscribed, are of no value unless they can reach a market outside of the Confederate States. The Confederate Congress subsequently recommended that all these articles should be burned as the Federal armies approach. The object of this recommendation was to prevent the seizure and sale of these articles by the Federal Government.

Further, as a State is recovered or brought under the control of the Federal arms, like Florida and Tennessee, there will be no opportunity to convert the subscriptions to the advantage of the Confederate Government, however favorably disposed the subscribers might continue. The ultimate loss of the amount subscribed must be complete, if the Federal arms are successful.

The views of the Government itself, on the character of this loan, were very fully explained by Vice-President Stephens, in an address to the cotton-planters at Augusta, Ga., on the 11th of July :

"I am here to-day to discuss before you the fifty million loan, but I am frank to tell you it may be one hundred millions, and I think it probably will be. The proposition that the Government makes is not to tax the people. The object of a wise and good Government is to make the burdens fall as light upon the people as possible to meet every exigency. The proposition the Government makes, therefore, is to take a loan in produce. In the grain-growing sections, the members of Congress solicit the loan in grain, army subsistence, meat, corn, wheat, and flour. We are not a grain-growing country. Our supply is cotton. I address you, therefore, solely on the subject of cotton.

"The object is to get along with as little tax as possible; but, my countrymen, do not suppose the Government will not tax you if necessary; for I tell you the Government does not intend to be subjugated; and if we do not raise the money by loans, if the people do not contribute, I tell you we intend to have the money, and taxation will be resorted to, if nothing else will raise it. Every life and dollar in the country will be demanded, rather than you and every one of us shall be overrun by the enemy. On that you may count. The Government, while it desires to carry on the war, establish your independence, and maintain the Government, at the same time wishes to do it in such a way as not to cripple industry; and while our men are in the field fighting the battles of their country, their brethren at home are discharging an equal duty, so that no serious detriment to public property will be sustained; and we have the element to do this that no other people in the world have.

"Now, then, if four millions of bales of cotton are made, upon an average price they will bring two hundred millions of dollars. If the cotton-planter will but lend, not give—lend to the Government the proceeds of but one-half, that will be one hundred millions of dollars, double what the Government wants, or did want when we adjourned—quite enough to keep two hundred thousand men in the field—the balance you can use as you please.

"I now will read to you, just at this part of my address, the proposition upon which I shall make some comments, for I wish every gentleman to understand it. It is not asking a dona-

tion; the Government simply wishes to control the proceeds of your cotton. The Government proposes to give you a bond bearing eight per cent. interest, paying the interest semi-annually. It is not a gift or donation, but simply your surplus cotton, as much as you can spare. This is the proposition :

"We, the subscribers, agree to contribute to the defence of the Confederate States that portion of our crop set down to our respective names; the same to be placed in warehouse or in the hand of our factors, and sold on or before the — next."

"Fix the day of sale as soon as you please; the 1st of January, the 1st of February, or the 1st of March, if you please; though I am aware the Government wishes you to sell it as soon as convenient; but let each planter consult his interest, and in the mean while consult the market. But to proceed :

"And our net proceeds of sale we direct to be paid over to the Treasurer of the Confederate States, for bonds for the same amount, bearing eight per cent. interest."

"There is the whole of it. The cotton-planter directs his cotton to be sent into the hands of his factor or his commission merchant. He only tells the Government in the subscription the portion he can lend. He directs it to be sold, and the proceeds to be invested in Confederate bonds. I understand that a committee will be appointed before this meeting adjourns, to canvass this country. Every planter, therefore, of Richmond County, will be waited upon and afforded an opportunity to subscribe. I wish, therefore, to say to that committee, and everybody, subscribe. I prefer your putting down first, your name; second, the number of bales; and I prefer you putting down the proportion of your crop. I want, especially, the number of bales, but would like also to know the proportion it bears to your crop. Let everybody, therefore, put down a portion of their crop, if it be two bales, or fifty bales, or one hundred bales, or five hundred bales.

"Inquiries have been made of me, and I take this opportunity to answer them: 'Whether these bonds will circulate as money—will they pay debts?' On this point I wish no mistake. They are not intended as currency; they are unfitted to answer the purpose of circulation. The bonds are larger than this paper, (a letter sheet.) The obligation is on the upper part of it, and the whole of the lower part is divided into forty squares or checks. In each one of these checks the interest is counted for each six months, or for twenty years. The checks are called coupons, and all the party holding them has to do is every six months to clip off the lower coupon, send it to the Treasury, and get his interest. The bond is not suitable to carry in your pocket-book and use. It would wear out. It is intended to represent a fixed capital or permanent investment—just so much as you can spare from your cotton crop. That is all. Instead of putting your surplus in lands, ne-

groes, houses, furniture, useless extravagance, or luxuries, just put it in Confederate bonds.

"But while I said it was not intended to circulate or to pay debts, I have not the least doubt that anybody who will sell his crop entire for bonds, will find no difficulty in getting the money for them, for they draw interest, and are better than money; and any man holding a note, will give it up and take a bond, for a note draws but seven per cent., and this draws eight. I have no doubt that all minors' and trust property will soon be invested in it. The entire amount of private funds in the State of Georgia, on private loans, I suppose is ten or twenty millions of dollars, at seven per cent. All that amount will immediately find its way into these bonds; and hence a planter who sells his entire crop, and needs money, can get it from the money-lenders on these bonds.

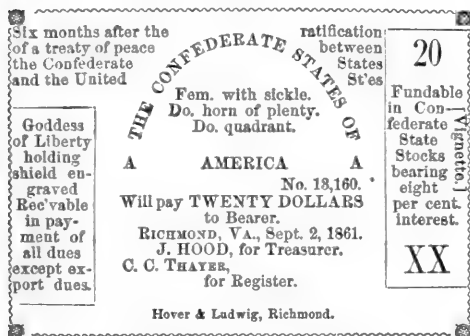

"I have been frequently asked if these bonds were good. Well, I want to be equally frank upon that point. If we succeed, if we establish our independence, if we are not overridden, if we are not subjugated, I feel no hesitancy in telling you it is the best Government stock in the world that I know of. It is eight per cent. interest; and if we succeed in a short time, in a few years, if not more than one hundred millions or two hundred millions are issued, I have but little doubt they will command a considerable premium. The old United States stock (six per cent. bonds) five years ago commanded fifteen and sixteen per cent., and went as high as twenty per cent. Take the Central Railroad. The stock of that company commands fifteen per cent. premium now. These bonds pay eight per cent. semi-annually; therefore, if there is a short war, these bonds very soon will command fifteen or twenty per cent. But candor also compels me to state that if Lincoln overruns us—if we are subjugated, these bonds will not be worth a single dime, and nothing else you have will be worth anything. If we are overrun, they will be worth just as much as anything else you have, and nothing else you have got will be worth anything. So that is the whole of it."

To push forward the measure, a convention of cotton-planters was held at Atlanta, at which resolutions were passed expressing their willingness to aid the Government with the entire cotton crop, if the same should be needed for its use, and recommending to the planters to invest at least one-half of the proceeds of their entire crops in the eight per cent. bonds of the Confederate States, and to capitalists and others having money to lend, that they invest in like manner in these bonds. They also recommended to Congress to authorize the issue of Treasury notes of denominations suited for circulation as currency, for an amount equal to the exigencies of the Government, such notes to be paid out as money in payment of all Government dues, and made receivable for all taxes and duties, and convertible into eight per cent. bonds of the Confederate

States at the pleasure of the holder. Congress, at its session at Richmond, in July, authorized the issue of one hundred millions of Treasury notes, and laid a direct tax, estimated to produce about fifteen millions of dollars. The Government thus had at its control for financial purposes, a loan of fifteen millions, authorized in February, duties on imports, which yielded nothing worthy of consideration, the authorized issue of Treasury notes to the amount of one hundred millions, the direct tax of fifteen millions assumed by the States, and the loans on produce, of which cotton was calculated to be the chief. The cotton would not yield any thing until sold. These were the authorized resources previous to November, 1861, to carry on a war, requiring the equipment, and transportation, and maintenance of an army of three hundred thousand men. There was one source of help to the Confederate Government which has not been mentioned. The States undertook to raise, and equip, and pay, to a certain extent, the troops of each. For this purpose the Legislatures authorized loans, amounting from five hundred thousand to two millions of dollars. With several of them the prospect of borrowing on this authorized loan was hopeless. Arkansas authorized her loan to be made available by issuing notes of five dollars and upwards in amount. These were paid to her soldiers and others, and depreciated until, as one of the former observed, "a hauf was required to obtain a dollar in specie." Tennessee authorized an almost unlimited expansion by her bank, until its paper depreciated like Arkansas State notes. In Virginia, military officers of State troops took from the people whatever their forces required, and gave a certificate of indebtedness upon the State of Virginia. These measures strengthened the Confederate Government for a period, by reducing the demands upon it, but they rendered more certain its ultimate bankruptcy. They enfeebled the resources of the people, upon which all Governments must rely. Upon the people the operation was most disastrous. Specie disappeared. Paper money was issued by a multitude of corporations and cities. It depreciated thirty per cent. compared with specie. Nearly double in amount was now required to purchase food, clothing, and other necessary articles. Apart from the influence of the blockade in reducing the supply of such as were of foreign manufacture, charges of extortion were raised against dealers, and public meetings were held to denounce them, which were composed of citizens who were ignorant that the source of all the evil consisted in the worthless currency. The Governor of Tennessee sent a message to the Legislature, relative to the extortions introduced "by those who had at heart their own interests more than the good of their fellow-mortals and of the country." The subject was acted upon by the Legislature. The Governor of Alabama, in a message to the Legislature, denounced the speculation that had commenced in articles

of first necessity. The Governors of Georgia, Louisiana, and Mississippi, requested the attention of their respective Legislatures to this subject of complaint. It was urged at Richmond that the Confederate Government should make it treason, and punishable by death, for any one to ask or receive a percentage for exchanging one sort of money for another, whether it was specie for paper, or one sort of paper for another; that every State in the Confederacy should receive at par any paper money lawfully issued by any corporation or individual within its jurisdiction; that the "public funds and securities" should be used to redeem any paper money in the Confederacy; and that every bank in the Confederacy should be forced to redeem the bills of every other bank. Those must be fearful evils from which an escape is sought by such means.

The following is a copy of one of the Treasury Notes of the Government :

To obtain some relief from their embarrassments, the planters applied to the Government. The office of the produce loan was burdened with their letters suggesting and requesting modes of relief under the conditions of their subscriptions to the Government. Nearly all of these letters gave the same account of the necessities of the planting interest, and held out the certain prospect of large additions to the subscriptions to the loan in case the Government should make small advances suitable to the actual necessities of the planters. In reply, the Secretary of the Treasury addressed a circular to the commissioners of subscription under date of October 17th, which presents a more distinct view of the condition of the Confederate Treasury. It shows that the Government wanted credit exceedingly; that its promissory notes supplanted all others; that it was carrying on a war for existence on credit, and the sole wonder was that it should be so successful as it had, up to that time, been. Nor was the condition of the planters much better. As they were to lend to the Government something hereafter, they asked the Government to lend them something now to carry them over the trying interval previous to the sale of their cotton. The circular was as follows :

To the Commissioners Appointed to Receive Subscriptions to the Produce Loan :

GENTLEMEN : Inquiries have been made from various quarters :

1. Whether, during the continuance of the blockade, any efforts should be made to procure further subscriptions.

2. Whether the Government will authorize promises to be held out of aid to the planters as an inducement to such further subscriptions.

The first inquiry seems to imply a misunderstanding of the scheme of the subscriptions. Many persons have supposed that the Government was to have some control of the produce itself; others that the time of sale appointed by the subscription was to be absolute and unconditional. The caption at the head of the lists, when examined, will correct both these errors.

The subscription is confined to the proceeds of sales, and contains an order on the commission merchant or factor of the planter to pay over to the Treasurer the amount subscribed in exchange for Confederate bonds. The transaction is simply an agreement by the planter to lend the Government so much money, and in order to complete the transaction, a time and place are appointed when the parties may meet to carry it out. The important point is that it shall certainly be completed at some time, and that is secured by the engagement of the planter. Whether that time be December or June is simply a question of convenience, and works no injury to either party. The Government is sure of the eventual payment, and derives from that certainty so much credit; and it loses nothing, because it gives its bond only when the money is paid.

It is obvious, therefore, that the subscriptions are as valuable to the Government during the blockade as after it. The blockade simply suspends the completion of the engagement. It becomes the interest of both parties to wait for a good price, and the Government will readily consent to a postponement of the sale.

You perceive, therefore, that it is desirable to continue your exertions to increase the subscriptions, and you are authorized to say that the Government will consent to a reasonable extension of the time appointed for sale.

3. The next inquiry is as to a promise of material aid from the Government to the planters.

In answering this inquiry I am to speak in advance of any act of Congress. What that body may see fit to do is not for me to determine. I can merely express the views of the Department; these must govern your actions until reversed by a higher authority. It would be a sufficient answer to the inquiry to say that the action of the Government is settled by the Constitution. No power is granted to any Department to lend money for the relief of any interest. Even the power of Congress, in relation to money, is confined to borrowing, and no clause can be found which would sanction so stupendous a scheme as purchasing the entire crop with a view to aid its owners.

But it may be said that the Constitution of the Provisional Government may be altered by Congress, and it is the duty of this Department to prepare the way for such alteration, if in its judgment the financial necessities of the country demand the change. I am not disposed, then, to close the inquiry with the abrupt denial thus made by the Constitution, and will proceed to consider the subject upon its intrinsic merits.

Two plans of relief have been proposed :

The one is that the Government should purchase the entire crop of the country; the other that an advance should be made of part of its value. In either case the payment is to be made by the issuance of Treasury notes; and, therefore, if we put aside for the present the many and serious objections to the possession, transportation, and management of the crop by the Government, it becomes simply a question of amount. To purchase the whole crop would require its whole

value, less the amount of subscription—cotton at \$200,000,000 and the subscription at \$50,000,000. The purchase would then require \$150,000,000 of Treasury notes, and if to this sum be added the amount of value for other agricultural products, which would certainly claim the same benefit, the sum required would probably reach \$175,000,000.

The amount called for by the other plan of making an advance would depend upon the proportion of that advance. Few of the advocates of this plan have put it lower than five cents per pound on cotton, and at the same rate on other produce. It may, therefore, be very fairly set down at about \$100,000,000.

If we consider, first, the least objectionable of these plans, it is certainly that which requires the smaller sum; and if this be found impracticable, the larger must of necessity be rejected.

Our inquiry, then, may be narrowed down to a proposal that the Government should issue one hundred millions of Treasury notes, to be distributed among the planting community upon the pledge of the forthcoming crop.

The first remarkable feature in this scheme is, that it proposes that a new Government, yet struggling for existence, should reject all the lessons of experience, and undertake that which no Government, however long established, has yet succeeded in effecting. The "organization of labor" has called forth many ingenious attempts, both speculative and practical, among well-established Governments, but always with disastrous failure. With us, however, the experiment is proposed to a new Government, which is engaged in a gigantic war, and which must rely on credit to furnish means to carry on that war. Our enemies are in possession of all the munitions and work-shops that have been collected during forty-five years of peace; their fleets have been built at our joint expense. With all these on hand, they yet are obliged to expend nearly ten millions of dollars per week to carry on the war. Can we expect to contend with them at less than half that expenditure?

Suppose that it may require two hundred millions of dollars, then the proposal is, that at a time when we are called upon to raise this large sum for the support of the Government, we shall raise a further sum of one hundred millions for the benefit of the planting interests. For it must be observed, first, that the Government receives no benefit whatever from this advance. The money is paid to each individual planter; and, in exchange, the Government receives only his bond or note; or, if the cotton be purchased, the Government receives only certain bales of cotton. That is to say, the Government pays out money which is needful to its very existence, and receives in exchange planter's notes or produce, which it does not need, and cannot in any way make use of.

It must be observed, in the next place, that Treasury notes have now become the currency of the country. They are, therefore, the measures of value. In this view, it is the duty of Government to limit their issue, as far as practicable, to that amount which is the limit of its currency. Every person acquainted with this branch of political science is aware that, if the currency passes this point, it not only becomes depreciated, but it disturbs the just relations of society, precisely as though an arbitrary power should change the weights and measures of a country. If the currency of a country should be suddenly extended from one hundred to two hundred millions of dollars, that which was measured by one dollar is now measured by two, and every article must be paid for at double its former price. The Government, from the necessities of war, is the largest of all purchasers, and thus, by a kind of suicidal act, compels itself to pay two dollars for what one would formerly have purchased, and at this rate of advance two hundred millions of dollars can effect no more than one hundred millions of dollars would have effected before; or, in other words, one hundred millions of dollars are actually sunk in the operation.

Such a condition of the currency the Government

has anxiously endeavored to guard against. The war tax was laid for the purpose of creating a demand for Treasury notes, and a security for their redemption. Their redundancy has been carefully guarded against by allowing them to be funded in eight per cent. bonds. If necessity shall compel the Government to issue, for the defence of the country, and to keep out two hundred millions, it is plain that every accession must impair and may defeat all the precautions.

If the Government should undertake, for the sake of private interests, so large an increase of issue, it may hazard its entire credit and stability. The experiment is too dangerous, and relief for the planters must be sought in some other direction. And may not that remedy be found?

In the first place let the planters immediately take measures for winter crops, to relieve the demand for grain and provisions. Let them proceed to divert part of their labor from cotton and make their own clothing and supplies. Then let them apply to the great resource presented by the money capital in banks and private hands. Let this capital come forward and assist the agricultural interest. Heretofore the banks have employed a large part of their capital in the purchase of Northern exchange; let them apply this portion to factors' acceptances of planters' drafts, secured by pledge of the produce in the planters' hands. An extension of the time usually allowed on these drafts would overcome most of the difficulties. This extension could safely reach the probable time of sale of the crops, inasmuch as the suspension of specie payments throughout the entire Confederacy relieves each bank from calls for coin. The banks are accustomed to manage loans of this character, and will conduct the operation with such skill as will make them mutually advantageous. The amount of advance asked from the banks would be greatly less than if advances were offered by the Government, and all the abuses incidental to Government agencies would be avoided.

It seems to me, therefore, that it is neither necessary nor expedient that the Government should embark upon this dangerous experiment. It is far better that each class of the community should endeavor to secure its own existence by its own exertions, and if an effort be at once made by so intelligent a class as the planters, it will result in relief. Delay in these efforts, occasioned by vague expectations of relief from Government, which cannot be realized, may defeat that which is yet practicable. C. G. MEMMINGER,

Secretary of the Treasury.

At the same time that this circular was issued, a commercial convention had assembled in Memphis, Tennessee. A series of resolutions, expressing violent hostility to the North, and demanding prohibitory legislation against Northern trade, were presented before that body, and voted down, or rejected under such circumstances as were declared to mean that a reconstruction of commercial and political relations with the North was desired by a majority in that convention.

The military spirit raised by President Lincoln's proclamation reached an indescribable state of excitement during the months of April and May. It was estimated that a hundred thousand men were then organized, armed, and awaiting orders from the Confederate Government, in the seven States which first seceded. In Virginia sixty thousand were under arms. This number included the troops from the other States, together with the militia of Virginia. This latter class were ready and disposed, in all parts of the State except the western, to turn out almost *en masse*. This enthusiasm, the prosperous condition of the people generally,

and the cause of self-defence and self-preservation in which they conceived they were about to fight, rapidly furnished the Government with the men and munitions required. Any attack upon Washington, however, was frustrated by the early arrival of Federal troops in such numbers as to render its success hopeless to the Confederate force. A line of defence was therefore adopted by the Government, the object of which was to prevent the invasion of Virginia by Federal troops. Immediately upon the secession of Virginia a force was despatched by Governor Letcher to seize the U. S. arsenal at Harper's Ferry. This effort failed in consequence of the destruction of the property by the officers in charge of it, but it served to place a considerable force in the northern border of the State, which ultimately became the left wing of the army in front of Washington. The centre was stationed in a fortified camp at Manassas Junction, and the right wing was posted near the Potomac River. Such was the position of this force at its most flourishing period. At other times, when its numbers were more reduced, the left wing held an independent position, and the centre became a distinct force, resting behind its entrenchments. There were periods during the year when this army was almost destitute of the necessities of subsistence, and its general supplies were often of the coarsest kind. This force was under the command of Gen. Johnston, who occupied a position with the troops forming the right wing, while the centre at Manassas was under the command of Gen. Beauregard. Upon taking command of this portion of the army, he issued the following proclamation :

HEAD-QUARTERS, DEPARTMENT OF ALEXANDRIA, }
CAMP PICKENS, June 1, 1861.

A Proclamation to the People of the Counties of Loudon, Fairfax, and Prince William :

A reckless and unprincipled tyrant has invaded your soil. Abraham Lincoln, regardless of all moral, legal, and constitutional restraints, has thrown his Abolition hosts among you, who are murdering and imprisoning your citizens, confiscating and destroying your property, and committing other acts of violence and outrage too shocking and revolting to humanity to be enumerated.

All rules of civilized warfare are abandoned, and they proclaim by their acts, if not on their banners, that their war-cry is "Beauty and Booty." All that is dear to man—your honor, and that of your wives and daughters, your fortunes and your lives—are involved in this momentous contest.

In the name, therefore, of the constituted authorities of the Confederate States; in the sacred cause of constitutional liberty and self-government, for which we are contending; in behalf of civilization itself; I, G. T. Beauregard, Brigadier-General of the Confederate States, commanding at Camp Pickens, Manassas Junction, do make this my proclamation, and invite and enjoin you, by every consideration dear to the hearts of freemen and patriots, by the name and memory of your Revolutionary fathers, and by the purity and sanctity of your domestic firesides, to rally to the standard of your State and country, and, by every means in your power compatible with honorable warfare, to drive back and expel the invaders from your land.

I conjure you to be true and loyal to your country and her legal and constitutional authorities, and especially to be vigilant of the movements and acts of the

enemy, so as to enable you to give the earliest authentic information at these head-quarters, or to the officers under this command.

I desire to assure you that the utmost protection in my power will be given to you all.

G. T. BEAUREGARD,
Brigadier-General Commanding.

Official.—THOMAS JORDAN,
Acting Assistant Adjutant-General.

To oppose this force, Federal troops were concentrated at Washington, who soon took up a fortified position on the Virginia side of the Potomac, opposite the city. This force was under the immediate command of Gen. Scott until his retirement, and subsequently under Gen. McClellan. Another force was stationed farther up the Potomac, opposite the left wing of the Confederate army and on the Maryland side of the Potomac. Frequent skirmishes occurred between the opposing forces, none of which were of such a serious character as to exert a decisive influence upon the campaign of the year, except the battle of Bull Run. (*See BULL RUN.*)

Meantime, as a state of hostilities had become fully developed between the Federal and Confederate Governments, both powers now resorted to those extreme measures which follow in the hideous train of War.

In the first place, Congress, on the 21st of May, passed an act prohibiting all persons indebted to individuals or corporations in the United States, except the States of Delaware, Maryland, Kentucky, Missouri, and the District of Columbia, from paying the same to their respective creditors during the war. These debtors were authorized to pay the amounts so due into the Confederate Treasury, for which they would be entitled to receive certificates bearing like interest with the debt, and payable on presentation after the close of the war. Texas, Georgia, and some of the other Confederate States, passed similar acts.

It was generally estimated that the amount due from citizens of Southern States to citizens of Northern States was two hundred millions of dollars. The payment of these debts ceased, as a matter of course, upon the development of the contest, and the necessary cessation of all imports and exports between the hostile countries. The act of Congress was designed to transfer a large portion of the amount of these debts into the Confederate Treasury. In this respect it was a failure. Very few individuals would acknowledge their indebtedness, much less pay the amount into the hands of the Government. On the contrary, those who found favorable opportunities, and anticipated the ultimate defeat of the Confederacy, were generally willing to acknowledge and pay their debts to Northern citizens.

Congress, at its session in July, also passed an act, banishing, within forty days, all persons who were not citizens, from the limits of the Confederate States. The following proclamation was issued by President Davis, in compliance with this act :

PROCLAMATION.

Whereas the Congress of the Confederate States of America did, by an act approved on the 8th day of August, 1861, entitled "An Act respecting Alien Enemies," make provision that proclamation should be issued by the President in relation to alien enemies, and in conformity with the provisions of said act:

Now, therefore, I, Jefferson Davis, President of the Confederate States of America, do issue this my proclamation: and I do hereby warn and require every male citizen of the United States, of the age of fourteen years and upwards, now within the Confederate States, and adhering to the Government of the United States, and acknowledging the authority of the same, and not being a citizen of the Confederate States, to depart from the Confederate States within forty days from the date of this proclamation. And I do warn all persons above described, who shall remain within the Confederate States after the expiration of said period of forty days, that they will be treated as alien enemies.

Provided, however, That this proclamation shall not be considered as applicable, during the existing war, to citizens of the United States residing within the Confederate States with intent to become citizens thereof, and who shall make a declaration of such intention in due form, acknowledging the authority of this Government; nor shall this proclamation be considered as extending to the States of Delaware, Maryland, Kentucky, Missouri, the District of Columbia, the Territories of Arizona and New Mexico, and the Indian Territory south of Kansas, who shall not be chargeable with actual hostility or other crime against the public safety, and who shall acknowledge the authority of the Government of the Confederate States.

And I do further proclaim and make known that I have established the rules and regulations hereto annexed, in accordance with the provisions of said law.

Given under my hand and the seal of the Confederate States of America, at the City of Richmond, on the 14th day of August, A. D. 1861.

JEFFERSON DAVIS.

By the President,
R. M. T. HUNTER, Secretary of State.

The following regulations are hereby established respecting alien enemies, under the provisions of an act approved the 8th of August, 1861, entitled "An Act respecting Alien Enemies":

1. Immediately after the expiration of the term of forty days from the date of the foregoing proclamation, it shall be the duty of the several district attorneys, marshals, and other officers of the Confederate States, to make complaint against any aliens or alien enemies coming within the purview of the act aforesaid, to the end that the several courts of the Confederate States, and of each State having jurisdiction, may order the removal of such aliens or alien enemies beyond the territory of the Confederate States, or their restraint and confinement, according to the terms of said law.

2. The marshals of the Confederate States are hereby directed to apprehend all aliens against whom complaints may be made under said law, and to hold them in strict custody until the final order of the court, taking special care that such aliens obtain no information that could possibly be made useful to the enemy.

3. Whenever the removal of any alien beyond the limits of the Confederate States is ordered by any competent authority, under the provisions of the said law, the marshal shall proceed to execute the order in person, or by deputy, or other discreet person, in such manner as to prevent the alien so removed from obtaining any information that could be used to the prejudice of the Confederate States.

4. Any alien who shall return to these States during the war, after having been removed therefrom under the provisions of said law, shall be regarded and treated as an alien enemy, and, if made prisoner, shall be at once delivered over to the nearest military author-

ity, to be dealt with as a spy or a prisoner of war, as the case may require.

This act was designed to compel all persons to sustain the Government, otherwise they would be declared alien enemies, and compelled to leave the country. The number who returned to the United States in consequence of this act was small. It served to secure a tacit acquiescence in the authority of the Confederate Government, by all who were opposed to it, and thereby enabled it to present an aspect of greater strength and efficiency.

Another act was passed by Congress, declaring all citizens of the United States, except those of Maryland, Kentucky, Delaware, Missouri, and the District of Columbia who do not aid the Federal Government, to be alien enemies of the Confederate States, and confiscating all their lands, stocks, bonds, debts, and property of whatever description, within the limits of the Confederacy. The following were the instructions of the Government relative to the mode of proceeding under the act:

DEPARTMENT OF JUSTICE,
RICHMOND, September 12, 1861.

Instructions to Receivers under the act entitled "An Act for the sequestration of the estates, property, and effects of alien enemies, and for the indemnity of citizens of the Confederate States, and persons aiding the same in the existing war against the United States," approved August 8, 1861.

The following persons are subject to the operation of the law as alien enemies:

All citizens of the United States, except citizens or residents of Delaware, Maryland, Kentucky, or Missouri, or the District of Columbia, or the Territories of New Mexico, Arizona, or the Indian Territory south of Kansas.

All persons who have a domicile within the States with which this Government is at war, no matter whether they be citizens or not: thus the subjects of Great Britain, France, or other neutral nations, who have a domicile, or are carrying on business or traffic within the States at war with this Confederacy, are alien enemies under the law.

All such citizens or residents of the States of Delaware, Maryland, Kentucky, or Missouri, and of the Territories of New Mexico, Arizona, and the Indian Territory south of Kansas, and of the District of Columbia, as shall commit actual hostilities against the Confederate States, or aid or assist the United States in the existing war against the Confederate States.

Immediately after taking your oath of office, you will take possession of all the property of every nature and kind whatsoever within your district belonging to alien enemies as above defined.

You will forthwith apply to the clerk of the court for writs of garnishment under the 8th section of the law, and will propound to the garnishees the interrogatories of which a form is annexed. These interrogatories you will propound to the following persons, viz.:

1st. All attorneys and counsellors practising law within your district.

2d. The presidents and cashiers of all banks, and principal administrative officers of all railroad and other corporations within your district.

All agents of foreign corporations, insurance agents, commission merchants engaged in foreign trade, agents of foreign mercantile houses, dealers in bills of exchange, executors and administrators of estates, assignees and syndics of insolvent estates, trustees, and generally all persons who are known to do business as agents for others.

In the first week of each month you will exhibit to the judge a statement showing the whole amount of money in your hands as receiver, and deposit the same for safe keeping in such bank or other depository as may be selected for that purpose by the judge, reserving only such amount as may be required for immediate necessary expenditure in the discharge of your duties as receivers.

Whenever, in the discharge of your duties, you discover that any attorney, agent, former partner, trustee, or other person holding or controlling any property, rights, or credits of an alien enemy, has wilfully failed to give you information of the same, you will immediately report the fact to the district attorney for your district, to the end that the guilty party may be subjected to the pains and penalties prescribed by the third section of the law.

J. P. BENJAMIN,
Attorney-General.

The following interrogatories to garnishees have been prepared for your use, together with a note annexed for the information of the garnishee:

1. Have you now, or have you had, in your possession or under your control, since the twenty-first day of May last, (1861,) and if yea, at what time, any land or lands, tenement or tenements, hereditament or hereditaments, chattel or chattels, right or rights, credit or credits, within the Confederate States of America, held, owned, possessed, or enjoyed for or by an alien enemy, or in or to which any alien enemy had, and when, since that time, any right, title, or interest, either directly or indirectly?

2. If you answer any part of the foregoing interrogatory in the affirmative, then set forth, specifically and particularly, a description of such property, right, title, credit, or interest, and if you have disposed of it in whole or in part, or of the profit, or rent, or interest accruing therefrom, then state when you made such disposition, and to whom, and where such property now is, and by whom held?

3. Were you, since the twenty-first day of May, 1861, and if yea, at what time, indebted, either directly or indirectly, to any alien enemy or alien enemies? If yea, state the amount of such indebtedness, if one, and of each indebtedness if more than one; give the name or names of the creditor or creditors, and the place or places of residence, and state whether and to what extent such debt or debts have been discharged, and also the time and manner of the discharge.

4. Do you know of any land or lands, tenement or tenements, hereditament or hereditaments, chattel or chattels, right or rights, credit or credits, within the Confederate States of America, or any right or interest held, owned, possessed, or enjoyed, directly or indirectly, by or for one or more alien enemies, since the twenty-first day of May, 1861, or in or to which any one or more alien enemies had since that time any claim, title, or interest, direct or indirect? If yea, set forth specially and particularly what and where the property is, and the name and residence of the holder, debtor, trustee, or agent.

5. State all else that you know which may aid in carrying into full effect the sequestration act of the 30th of August, 1861, and state the same as fully and particularly as if thereunto specially interrogated.

A. B., Receiver.

NOTE.—The garnishee in the foregoing interrogatories is specially warned that the sequestration act makes it the duty of each and every citizen to give the information asked in said interrogatories.—[Act 30th August, 1861, sec. 2.] And if any attorney, agent, former partner, trustee, or other person holding or controlling any property or interest therein of or for any alien enemy shall fail speedily to inform the receiver of the same, and to render him an account of such property or interest, he shall be guilty of a high misdemeanor, and, upon conviction, shall be fined in a sum not exceeding five thousand dollars, and imprisoned not longer than six months, and be liable to pay

besides to the Confederate States double the value of the property or interest of the alien enemies so held or subject to his control.—[Sec. 3.]

The constitutionality of this act was called in question in the Confederate Court for the District of South Carolina, Judge Magrath presiding. J. S. Pettigru, a citizen of Charleston, was served with the writ of garnishment, and, being a member of the bar, he appeared in open court to oppose it. The arguments which he boldly advanced show the conflict of the act with the principles of civil and constitutional liberty. In this connection, the following sentence from the speech of President Davis at Richmond, on June 1st, is worthy of notice: "Upon us is devolved the high and holy responsibility of preserving the constitutional liberty of a free government." The objections to this confiscation act were of the following nature:

"Where is the authority given? Where is the power to call upon the citizen, in a new and unheard-of manner, to answer questions upon oath for the purpose of enforcing the confiscation law? Shall it be said that it is to furnish the means for carrying on the war? How can that be said to be necessary which is absolutely never known to have been done before? Was there anybody that ever fought before General Beauregard? War unfortunately is not a new thing. Its history is found on every page. Was there ever a law like this endured, practised, or heard of? It certainly is not found among the people from whom we derive the common law. No English monarch or Parliament has ever sanctioned or undertaken such a thing. It is utterly inconsistent with the common law to require an inquisitorial examination of the subjects of the laws of war. It is no more a part of the law of war than it is a part of the law of peace. * * *

"All that can be said in favor of the end and object proposed, can be said in favor of the Star Chamber and the Spanish Inquisition. Torquemada set on the latter institution with the best of motives. It was to save men's souls. He labored most earnestly, in season and out of season; and when high necessity commanded, he burnt their bodies to save their souls. * * *

"We do not consider that the end justifies the means in these days, but Torquemada might have burnt Jews and Protestants, without calling upon their best friends to inform against them, and making it penal not to do so. * * *

"The war power includes as an incident every thing which is necessary or usual. It cannot be pretended that this is necessary or usual, since it never was done before. This is not the first war that ever was waged; and the laws of war are not the subject of wild speculation. Now, the means granted to attain this end are based upon the supposition that the end deserves all commendation; that nothing in the world is more calculated to advance the repute of the country than to be keen in searching out the property of enemies, and proceeding

against them when they have no opportunity of being heard, and to impoverish them by taking away the earnings of their industry and applying it to other uses. * * * It would be the most intolerable hardship for me, for a citizen, at every quarter session to be obliged to tell all he knows or suspects against his neighbor. It is pretended that it is an innocent proceeding. How can that be innocent which calls upon one to commit a breach of trust? * * *

"It is an extraordinary stretch of power, in an extraordinary time, when we are endeavoring to make good before the world our right to its respect as an enlightened people—a people capable of self-government, and of governing themselves in a manner worthy of the civilization and light of the age; and this act, borrowed from the darkest period of tyranny, is dug up from the very quarries of despotism, and put forth as our sentiments. They are not my sentiments; and sorry will I be if in this sentiment I am solitary and alone. * * * With regard to that which requires the violation of professional confidence, he must be better instructed before making up his mind to the order of responsibility or not. There are cases where it is dishonor or death—and death will certainly be chosen by every man who deserves the name." (*See S. CAROLINA.*)

All property in corporations, such as stock or bonds of railroad companies, banks, &c., held by citizens of the Northern States, was easily traced out and very generally sequestered. Such property also as was the basis of mercantile and commercial enterprise, was extensively confiscated, but interests in estates, and that class of property which passes through kindred and friends, was extensively covered up. The enforcement of the law gradually ceased with the decline of that bitterness of spirit which existed at the time of its passage. It was also understood that, as a measure of severity against Northern citizens, it would be of no avail. Where allegiance was given by a citizen, protection was due by the Government. Under this principle the Government of the United States would in justice be required to compensate its citizens for their losses. A sequestration act was passed by the Federal Congress. (*See UNITED STATES.*) Its enforcement was temporary.

On the 8th of July, while Colonel Porter was reconnoitring for a camp for his brigade about six miles from Arlington, on the Virginia side of the Potomac, opposite Washington, Lieutenant-Colonel Taylor, an officer in the Confederate army, presented himself with a flag of truce. He stated that he was the bearer of despatches from the President of the Confederate States to President Lincoln. He was taken to the head-quarters at Arlington, and at evening conveyed to Washington. His letter was sent to President Lincoln, and the next day he returned. No answer was given to this communication, the contents of which were as follows:

RICHMOND, July 6, 1861.

To Abraham Lincoln, President and Commander-in-Chief of the Army and Navy of the United States:

SIR: Having learned that the schooner *Savannah*, a private armed vessel in the service and sailing under a commission issued by authority of the Confederate States of America, had been captured by one of the vessels forming the blockading squadron off Charleston harbor, I directed a proposition to be made to the officer commanding that squadron for an exchange of the officers and crew of the *Savannah* for prisoners of war held by this Government, "according to number and rank." To this proposition, made on the 19th ultimo, Captain Mercer, the officer in command of the blockading squadron, made answer on the same day that "the prisoners (referred to) are not on board of any of the vessels under my command."

It now appears, by statements made without contradiction in newspapers published in New York, that the prisoners above mentioned were conveyed to that city, and have been treated, not as prisoners of war, but as criminals; that they have been put in irons, confined in jail, brought before the courts of justice on charges of piracy and treason; and it is even rumored that they have been actually convicted of the offences charged, for no other reason than that they bore arms in defence of the rights of this Government, and under the authority of its commission.

I could not, without grave discourtesy, have made the newspaper statements above referred to the subject of this communication, if the threat of treating as pirates the citizens of this Confederacy, armed for its service on the high seas, had not been contained in your proclamation of 19th April last; that proclamation, however, seems to afford a sufficient justification for considering these published statements as not devoid of probability.

It is the desire of this Government so to conduct the war now existing as to mitigate its horrors, as far as may be possible; and, with this intent, its treatment of the prisoners captured by its forces has been marked by the greatest humanity and leniency consistent with public obligation. Some have been permitted to return home on parole, others to remain at large under similar conditions within this Confederacy, and all have been furnished with rations for their subsistence, such as are allowed to our own troops. It is only since the news has been received of the treatment of the prisoners taken on the *Savannah* that I have been compelled to withdraw these indulgences and to hold the prisoners taken by us in strict confinement.

A just regard to humanity and to the honor of this Government now requires me to state explicitly that, painful as will be the necessity, this Government will deal out to the prisoners held by it the same treatment and the same fate as shall be experienced by those captured on the *Savannah*; and if driven to the terrible necessity of retaliation by your execution of any of the officers or crew of the *Savannah*, that retaliation will be extended so far as shall be requisite to secure the abandonment of a practice unknown to the warfare of civilized man, and so barbarous as to disgrace the nation which shall be guilty of inaugurating it.

With this view, and because it may not have reached you, I now renew the proposition made to the commander of the blockading squadron, to exchange for the prisoners taken on the *Savannah* an equal number of those now held by us, according to rank.

I am, sir, yours, &c.,

JEFFERSON DAVIS,
President and Commander-in-Chief of the Army and Navy of the Confederate States.

In his message to Congress on the 20th of July, President Davis refers to this despatch sent to Washington, and after stating the reasons upon which it was sent, thus proceeds:

"To this end I despatched an officer under a flag of truce to President Lincoln, and informed

him of my resolute purpose to check all barbarities on prisoners of war by such severity of retaliation on prisoners held by us as should secure the abandonment of the practice. This communication was received and read by an officer in command of the United States forces, and a message was brought from him by the bearer of my communication that a reply would be returned by President Lincoln as soon as possible. I earnestly hope this promised reply (which has not yet been received) will convey the assurance that prisoners of war will be treated, in this unhappy contest, with that regard for humanity which has made such conspicuous progress in the conduct of modern warfare. As measures of precaution, however, and until this promised reply is received, I shall retain in close custody some officers captured from the enemy, whom it had been my pleasure previously to set at large on parole, and whose fate must necessarily depend on that of prisoners held by the enemy."

Still later in the year, another case of this kind occurred. The captain and crew who were captured in the privateer Jefferson Davis were brought to Philadelphia and tried, and found guilty of piracy. The sentence of the law in such a case is death. For the purpose of rescuing these men, retaliatory measures were adopted by the Confederate Government. What the measures were, and the manner in which they were put in force, is shown by the orders of the Government authorities, as follows:

C. S. A. WAR DEPARTMENT, }
RICHMOND, Nov. 9, 1861. }

SIR: You are hereby instructed to choose, by lot, from among the prisoners of war of highest rank, one who is to be confined in a cell appropriated to convicted felons, and who is to be treated in all respects as if such convict, and to be held for execution in the same manner as may be adopted by the enemy for the execution of the prisoner of war Smith, recently condemned to death in Philadelphia.

You will also select thirteen other prisoners of war, the highest in rank of those captured by our forces, to be confined in the cells reserved for prisoners accused of infamous crimes, and will treat them as such so long as the enemy shall continue so to treat the like number of prisoners of war captured by them at sea, and now held for trial in New York as pirates.

As these measures are intended to repress the infamous attempt now made by the enemy to commit judicial murder on prisoners of war, you will execute them strictly, as the mode best calculated to prevent the commission of so heinous a crime.

Your obedient servant,

J. P. BENJAMIN,

Acting Secretary of War.

To Brig.-Gen. JOHN H. WINDER, Richmond, Va.

HEAD-QUARTERS DEPARTMENT OF HENRICO, }
RICHMOND, VA., Nov. 11, 1861. }

SIR: In obedience to your instructions contained in your letter of the 9th instant, one prisoner of war of the highest rank in our possession was chosen, by lot, to be held for execution in the same manner as may be adopted by the enemy for the execution of Smith, recently condemned to death in Philadelphia. The names of the six Colonels were placed in a can. The first name drawn was that of Colonel Corcoran, Sixty-ninth Regiment N. Y. S. M., who is the hostage chosen to answer for Smith.

In choosing the thirteen from the highest rank to be held for a like number of prisoners of war captured by the enemy at sea, there being only ten field officers, it was necessary to draw by lot three captains. The first names drawn were Captains J. B. Ricketts, H. McQuade, and J. W. Rockwood.

The list of thirteen will therefore stand: Colonels Lee, Cogswell, Wilcox, Woodruff, and Wood; Lieutenant-Colonels Bowman and Neff; Majors Potter, Revere, and Vogdes; Captains Ricketts, McQuade, and Rockwood.

Respectfully, your obedient servant,

JOHN H. WINDER, Brigadier-General.

Hon. J. P. BENJAMIN, Secretary of War.

HEAD-QUARTERS DEPARTMENT OF HENRICO, }
RICHMOND, VA., Nov. 12, 1861. }

SIR: In obedience to your instructions, all the wounded officers have been exempted as hostages, to await the result of the trial of prisoners captured by the enemy at sea. I have therefore made selections, by lot, of Captains H. Bowman and T. Kaffer, to replace Captains Ricketts and McQuade, wounded.

The list of thirteen will now stand: Colonels Lee, Cogswell, Wilcox, Woodruff, and Wood; Lieutenant-Colonels Bowman and Neff; Majors Potter, Revere, and Vogdes; Captains Rockwood, Bowman, and Kaffer.

Respectfully, your obedient servant,

JOHN H. WINDER, Brigadier-General.

Hon. J. P. BENJAMIN, Sec'y of War, Richmond.

The privateersmen were ultimately put on the footing of prisoners of war by the orders of the Federal Government, and these prisoners in the Confederate States were early released, with the exception of Colonel Corcoran.

These extreme measures, whether adopted by the Federal or Confederate Governments, were not prosecuted for any length of time with that bitterness or vindictiveness which might be anticipated from the language in which they are expressed. Neither was the treatment of prisoners on either side, with some exceptions, marked by that harshness and severity which characterized former wars, and especially civil wars. The sentiment of mankind forbade, either at the North or South, any thing like a system of cruelty to captives.

The internal affairs of the Confederate States were early placed upon an organized and efficient system. The withdrawal from the United States, and the creation of a Confederacy, caused but few changes, and these consisted rather in the persons who held public offices, than in any change in the nature of the offices themselves.

The transmission of the mails was gradually suspended by the Federal Government, after the secession of each State, and was entirely assumed by the Confederate Government within the limits of the Confederate States after the 31st of May.

All postmasters, route agents, and special agents acting under the authority of the United States, were directed, on and after the 1st day of June, to continue in the discharge of their duties, subject to the laws and regulations of the Confederate Government, to which they were required to apply for new commissions. They were also instructed to render their final accounts up to the 31st day of May, to the Post-

Office Department at Washington, and to return, at the same time, all postage stamps and stamped envelopes belonging to the United States, and to retain in their possession all the revenue which should have accrued from the postal service previous to the 1st of June, to meet the orders of the Postmaster-General of the United States for the payment of mail-service within the Confederate States.

Postmasters were forbidden to collect postage on mail matter sent to or received from the United States until a postal treaty should be made by that Government with the Southern Confederacy; and, until postage stamps and stamped envelopes were furnished, all mail matter was required to be paid for in money.

Five cents were charged for every single sealed letter conveyed over a distance of less than five hundred miles within the limits of the Confederacy; and for any distance exceeding that point, double that rate. Newspapers published within the Confederate States and sent from the office to subscribers residing in the said States, were charged as follows: weeklies, ten cents per quarter; semi-weeklies, double that amount; tri-weeklies, treble that amount; papers published six times a week, sixty cents; and dailies seventy cents. Periodicals published oftener than biennially were charged as newspapers. Books, bound or unbound, not weighing over four pounds, were charged at two cents an ounce for any distance. Double the rates above specified were to be charged upon all newspapers published beyond the limits of the Confederate States.

The new postage stamp did not make its appearance until the 18th of October. It was green, with a portrait of President Davis, within a double oval border, surrounded with the inscription, "Confederate States of America." Outside of the circle, and at the head of the stamp, is the word "postage," and at the lower edge its denomination, "five cents."

The Courts of the United States were also organized as courts of the Confederate States, and the officers of the army and navy of the United States, who resigned, became officers in the army and navy of the Confederate States. Revenue officers in like manner continued as such under the new Government.

At the session of Congress in July at Richmond, the report of the Secretary of War stated the number of regiments of troops then accepted was 194, and 32 battalions, besides various detachments of artillery, and companies of cavalry. He urged the continued acceptance of troops until the number reached 300 regiments. The success at Bull Run awakened such a degree of enthusiasm and confidence in the ultimate triumph of the Confederacy, that the army, in a short time, increased to a greater number than had been anticipated. Forward movements were made from Manassas and Centreville, and the flag of the "Stars and Bars" was flaunted from the summit of Munson's Hill, where the inhabitants of the city of Washington could see its folds proudly waving. At this

time, a division of opinion existed even in the Cabinet of President Davis, on the policy of a forward movement of the army. It was apprehended by those who were opposed, that an attack upon and destruction of the Capital would thoroughly arouse the North. Some asserted that the true policy at that time, was to await the action of the French and English Governments, and thus the difficulties might be arranged without further effusion of blood. At the same time, the army was desirous of a forward movement, the capture of Washington, the recovery of Maryland, and the possession of Baltimore for their winter-quarters. The final decision was adverse to a forward movement. The rapid increase in the Federal force, its improving discipline and reorganization, rendered doubtful the result. A change was also made in the war policy of the Federal Government, the design of which now was to attack the Confederate States elsewhere than in Virginia. All these circumstances exerted a controlling influence when united with others which existed within the Confederacy itself. These consisted in a lack of transportation, and those more indispensable means to the success of an attempt at invasion, an abundance of money. Nevertheless, the military efforts of the Government were on a most extensive scale. Troops were organized and sent to intrenched camps in Kentucky. (See KENTUCKY.) Forces were maintained in Western Virginia, and an active campaign carried on. (See VIRGINIA.) In Missouri, although left in a manner by the Government to take care of herself, the most active military operations took place. (See MISSOURI.) The talents and skill of the Commanding General, Price, enabled him to sustain himself, and carry on an active campaign with less assistance and encouragement from the Government than any officer in the army.

At this moment, the solvent or specie-paying banks refused to receive the Confederate Treasury notes, and were calling in all their own circulation. They also refused to receive the bills of suspended banks, and both Treasury notes and suspended bills sunk from eight to fifteen per cent., and in the cities of the Gulf States were refused by mechanics and tradesmen. Embarrassment, discouragement, and uncertainty settled upon whole communities. The valuable paper was rapidly decreasing and disappearing, while the other was as rapidly increasing. All who could, drew specie from the banks, and millions of dollars were hid away or buried.

From this period, which was the month of September, the favorable aspect of affairs in the Confederate States began to decline, and before the close of the year, the subject of drafting soldiers to serve in the army was actively discussed. The entire forces in the field at any time scarcely exceeded 290,000 men, and many of those were militia, rather than soldiers enlisted for a long war.

Financial affairs became more and more embarrassed, and the sale of the year's crops, upon which an agricultural people always relies, being cut off, the planters and agriculturalists found themselves sadly crippled. Clothing and arms were deficient for the army, and the means of increasing the latter were too defective to promise a sufficient supply, unless they could be obtained in Europe, and imported in spite of the blockade.

On the 6th of November, an election was held for a President and Vice-President under the permanent constitution. President Davis and Vice-President Stephens were the candidates without opposition. The electoral votes of the States respectively were as follows:

Alabama	11	North Carolina.....	12
Arkansas	6	South Carolina.....	8
Florida	4	Tennessee	13
Georgia	12	Texas	8
Louisiana.....	8	Virginia	13
Mississippi.....	9		
		Total.....	109

Messrs. Davis and Stephens were elected President and Vice-President for the term of six years. They entered upon the duties of their offices under this election, in the ensuing month of February.

The extent of attachment for the Federal Union, which remained among the people of the Confederate States, can never be justly known. It was not prudent to express such sentiments, however ardently they might have been entertained. Neither was it any less imprudent to express sentiments in favor of secession in the United States. Doubtless a large number of the people were disposed to acquiesce in the result, whichever side triumphed. In some parts of the Confederate States, such as Western Virginia, the Union sentiment was irresistible; in other parts it was kept in subjection by the strong arm of military power. Such was the case in Eastern Tennessee. The following correspondence between the Colonel commanding a post in that region of country, and the Confederate Secretary of War, reveals the strength of the Union attachment among the people:

KNOXVILLE, Nov. 20, 1861.

J. P. Benjamin, Secretary of War:

SIR: The rebellion in East Tennessee has been put down in some of the counties, and will be effectually suppressed in a few weeks in all the counties. Their camps in Sweet and Hamilton counties have been broken up, and a large number of them made prisoners. Some are confined in jail at this place, and others sent to Nashville. In a former communication I inquired of the Department what I should do with them. It is a mere farce to arrest them, and turn them over to the courts—instead of having the effect to intimidate, it really gives encouragement and emboldens them in their traitorous conduct.

We have now in custody some of their leaders: Judge Patterson, the son-in-law of Andrew Johnson; Colonel Pickens, the Senator in the Legislature from Sevier and other counties; and several members of the Legislature, besides others of influence and some distinction in their counties. These men have encouraged this rebellion, but have so managed as not to be found in arms; nevertheless, all their actions and words have been hostile to the Confederate States. The influence

of their wealth, position, and connection has been exerted in favor of the Lincoln Government, and they are the parties most to blame for the troubles in East Tennessee. They really deserve the gallows, and if consistent with the laws, ought speedily to receive their deserts. But there is such a gentle spirit of conciliation in the South, that I have no idea that one of them will receive such a sentence at the hands of any jury empanelled to try them. I have been here at this station for three months, half the time in command of the post, and I have had a good opportunity of learning the feeling pervading the country; it is hostile to the Confederate Government. They are the followers and slaves of Johnson and Maynard, and never intend to be otherwise. When accosted, they suddenly become very submissive, and declare they are for peace, and not supporters of the Lincoln Government, but yet they claim to be Union men. At one time, when our forces were at Knoxville, they gave it out that great changes were taking place in East Tennessee, and the people were becoming reconciled and loyal.

At the withdrawal of the army from here to the Gap, and the first intimation of the approach of the Lincoln army, they were in arms, and there was scarcely a man but who was ready to join the enemy and make war upon us.

I have to suggest at least that the prisoners I have taken be treated, if not as traitors, as prisoners of war. To release them would be ruinous—to convict them in a court next to an impossibility. But if they are kept in prison six months, it will have a good effect. The bridge-burners ought to be tried at once.

Very respectfully,
W. B. WOOD,
Colonel commanding post.

BENJAMIN'S REPLY.

WAR DEPARTMENT, RICHMOND, }
Nov. 25, 1861. }

COL. W. B. WOOD—SIR: Your report of the 20th inst. is received, and I now proceed to give you the desired instructions in relation to the prisoners taken by you amongst the traitors of East Tennessee.

1st. All such as can be identified in having been engaged in bridge-burning are to be tried summarily by drum-head court-martial, and if found guilty, executed on the spot by hanging. It would be well to leave their bodies hanging in the vicinity of the burnt bridges.

2d. All such as have not been so engaged, are to be treated as prisoners of war, and sent with an armed guard to Tuscaloosa, Alabama, there to be kept imprisoned at the depot selected by the Government for prisoners of war.

Whenever you can discover that arms are concentrated by these traitors, you will send out detachments, search for, and seize the arms. In no case is one of the men known to have been up in arms against the Government, to be released on any pledge or oath of allegiance. The time for such measures is past. They are all to be held as prisoners of war, and held in jail till the end of the war. Such as come in voluntarily, take the oath of allegiance, and surrender their arms, are alone to be treated with leniency. Your vigilant execution of these orders is earnestly urged by the Government.

Your obedient servant,
J. P. BENJAMIN, Secretary of War.

P. S.—Judge Patterson, Colonel Pickens, and other ring-leaders of the same class, must be sent at once to Tuscaloosa to jail, as prisoners of war.

The year finally closed with one of the most decisive blows to the hopes of the Confederate States for a speedy triumph, which could possibly occur. The chief reliance for success, entertained by the Confederate authorities and people, was founded upon the expectation of certain interference by England and France to

break up the blockade and open their trade. Messrs Mason and Slidell were sent out as Commissioners, the former to England and the latter to France, to negotiate treaties with those Governments. They were captured when on board an English steamer, (*see* TRENT,) on their way to England, and taken to Boston, and incarcerated in Fort Warren. It was believed in the Confederate States that the crisis had now come—England would demand the surrender of these Commissioners, which the United States would refuse, and war would immediately ensue between the latter power and Great Britain. All eyes were now turned with intense interest to view the conduct of England. The stormy weather delayed the arrival of the news. The first report brought, stated the immense military preparations she was making. The next brought a demand for the immediate surrender of the Commissioners, or the alternative of the retirement of the British Minister. Three days of great public anxiety ensued. On the fourth day the Commissioners were surrendered, (*see* DIPLOMATIC CORRESPONDENCE,) and the hopes of the Confederate States for foreign intervention were dashed to the ground, never to rise again. The Government of the Confederate States at the close of the year was as follows:

JEFFERSON DAVIS, of Mississippi, President.

ALEX. H. STEPHENS, of Georgia, Vice-President.

Col. JOSEPH DAVIS, of Mississippi, Aid to the President.
Capt. R. JOSSELYN, of Mississippi, Private Secretary of the President.

R. M. T. HUNTER, Va., Secretary of State. WILLIAM M. BROWNE, Assistant Secretary of State. P. P. DAN-DRIGE, Chief Clerk.

C. G. MEMMINGER, S. C., Secretary of the Treasury. P. CLAYTON, Ga., Assistant Secretary of the Treasury. H. D. CAPEES, Chief Clerk of the Department. LEWIS CRUGER, S. C., Comptroller and Solicitor. BOLLING BAKER, Ga., 1st Auditor. W. H. S. TAYLOR, La., 2d Auditor. ROBERT TYLER, Va., Register. E. C. ELMORE, Ala., Treasurer.

J. P. BENJAMIN, La., Secretary of War. A. T. BLEDSOE, Va., Chief Clerk of the Department. S. COOPER, Va., Adjutant and Inspector-General of the C. S. Army. Lieut.-Col. B. CHILTON and Capt. J. WITHERS, S. C., Assistants Adjutant and Inspector-General. Col. R. TAYLOR, Ky., Quartermaster-General. Col. A. C. MYERS, S. C., Assistant Quartermaster-General. Lieut.-Col. NOR-THROP, S. C., Commissary-General. Col. J. GORGAS, Va., Chief of Ordnance. Col. S. P. MOORE, (M. D.), S. C., Surgeon-General. Capt. C. H. SMITH, (M. D.), Va., Assistant Surgeon-General. Capt. LEG. G. CAPEES, (M. D.), S. C., Chief Clerk of the Medical Department. Major D. HUBBARD, Ala., Commissioner of Indian Affairs.

S. R. MALLOY, Fla., Secretary of the Navy. Com. E. M. TIDBALL, Va., Chief Clerk of the Department. Com. D. N. INGRAHAM, S. C., Chief of Ordnance, Construction and Repair. Capt. GEORGE MINOR, Va., Inspector of Ordnance. Com. L. ROSSAU, La., Chief of Equipment, Recruiting Orders, and Detail. Capt. W. A. SPOTTSWOOD, (M. D.), Va., Chief of Medicine and Surgery. Capt. JOHN DEBBEE, Chief of Clothing and Provisions. Ex-Gov. BRAGG, N. C., Attorney-General. WADE KEYS, Ala., Assistant Attorney-General. R. R. RHODES, Miss., Commissioner of Patents. G. E. W. NELSON, Ga., Superintendent of Public Printing. R. M. SMITH, Va., Public Printer.

JOHN H. REAGAN, Texas, Postmaster-General. H. S. OFFUT, Va., Chief Contract Bureau. B. N. CLEMENTS, Tenn., Chief Appointment Bureau. J. L. HARRELL, Ala., Chief Finance Bureau. W. D. MILLE, Texas, Chief Clerk of Department.

CONGRESS, CONFEDERATE. No sooner was secession an organized fact in South Carolina with a certainty that other States would soon arrive at the same result, than suggestions

were made for a Southern Confederacy. A committee in the Legislature of Mississippi, on Jan. 19, reported resolutions to provide for a Southern Confederacy and establish a Provisional Government. Florida, Alabama, and Georgia at once approved of this general design, and delegates were appointed to a Congress to be held at Montgomery. The design of this Congress, as then understood, was to organize a new Confederacy of the seceding slaveholding States, and such other slaveholding States as should secede and join them; and to establish first, a Provisional Government, intended to prepare for the general defence of those States which were linked together by a common interest in the peculiar institution, and which were opposed to the Federal Union; second, make treaties with the United States and "other foreign" countries; third, obtain decisive legislation in regard to the negro; and, fourthly, determine what States should constitute the Confederacy.

On the 4th of February this Congress met at Montgomery, in a Hall, on the walls of which, portraits of Marion, Clay, Andrew Jackson, and several of Washington were hanging. It was composed of the following members, except those from Texas who were not appointed until Feb. 14:

South Carolina.—R. B. Rhett, James Chesnut, Jr., W. P. Miles, T. J. Withers, R. W. Barnwell, C. G. Memminger, L. M. Keltz, and W. W. Boyce.

Georgia.—Robert Toombs, Howell Cobb, Benjamin H. Hill, Alexander H. Stephens, Francis Bartow, Martin J. Crawford, E. A. Nisbett, Augustus B. Wright, Thomas R. E. Cobb, and Augustus Keenan.

Alabama.—Richard W. Walker, Robert H. Smith, Colin J. McRae, John Gill Shorter, S. F. Hale, David P. Lewis, Thomas Fearn, J. L. M. Curry, and W. P. Chilton.

Mississippi.—Willie P. Harris, Walker Brooke, A. M. Clayton, W. S. Barry, J. T. Harrison, J. A. P. Campbell, and W. S. Wilson.

Louisiana.—John Perkins, jr., Duncan F. Kenner, C. M. Conrad, E. Spencer, and Henry Marshall.

Florida.—Jackson Morton, James Powers, and J. P. Anderson.

Texas.—L. T. Wigfall, J. H. Reagan, J. Hemphill, T. N. Waul, Judge Gregg, Judge Oldham, and Judge W. B. Ochiltree.

All the members were present except Mr. Morton, of Florida, and the members from Texas. A permanent organization was made by the election of Howell Cobb, of Georgia, as Chairman, and J. J. Hooper, of Montgomery, Alabama, Secretary.

Mr. Cobb, on taking the chair, made an address. He said:

"Accept, gentlemen of the Convention, my sincere thanks for the honor you have conferred upon me. I shall endeavor, by a faithful and impartial discharge of the duties of the Chair, to merit, in some degree, at least, the confidence you have reposed in me.

"The occasion which assembles us together, is one of no ordinary character. We meet as representatives of sovereign and independent States, who, by their solemn judgment, have dissolved the political association which connected them with the Government of the United States. Of the causes which have led

to this decision it is unnecessary now to speak. It is sufficient to announce that by the judgment of our constituents they have been pronounced ample and sufficient. It is now a fixed and irrevocable fact. The separation is perfect, complete, and perpetual.

"The great duty is now imposed upon us of providing for these States a Government for their future security and protection. We can and should extend to our sister States—our late sister States—who are identified with us in interest, feeling, and institutions, a cordial welcome to unite with us in a common destiny—desirous at the same time of maintaining with our former confederates, as with the world, the most peaceful and friendly relations, both political and commercial.

"Our responsibilities, gentlemen, are great, and I doubt not we shall prove equal to the occasion. Let us assume all the responsibility which may be necessary for the successful completion of the great work committed to our care, placing before our countrymen and the world our acts and their results, as the justification for the course we may pursue, and the policy we may adopt. With a consciousness of the justice of our cause, and with confidence in the guidance and blessings of a kind Providence, we will this day inaugurate for the South a new era of peace, security, and prosperity."

The rules of the Convention were drawn on the principle that it was a Congress of sovereign and independent States, and the members should therefore vote by States.

On the 7th of February, the Committee on a Provisional Government reported a plan which was discussed in secret session. On the 8th, the Constitution of the United States was adopted with some amendments, as follows:

Alterations.—1st. The Provisional Constitution differs from the Constitution of the United States in this: That the legislative powers of the Provisional Government are vested in the Congress now assembled, and this body exercises all the functions that are exercised by either or both branches of the United States Government.

2d. The Provisional President holds his office for one year, unless sooner superseded by the establishment of a permanent government.

3d. Each State is erected into a distinct judicial district, the judge having all the powers heretofore vested in the district and circuit courts; and the several district judges together compose the supreme bench—a majority of them constituting a quorum.

4th. Wherever the word "Union" occurs in the United States Constitution the word "Confederacy" is substituted.

Additions.—1st. The President may veto any separate appropriation without vetoing the whole bill in which it is contained.

2d. The African slave trade is prohibited.

3d. Congress is empowered to prohibit the introduction of slaves from any State not a member of this Confederacy.

4th. All appropriations must be upon the demand of the President or heads of departments.

Omissions.—1st. There is no prohibition against members of Congress holding other offices of honor and emolument under the Provisional Government.

2d. There is no provision for a neutral spot for the

location of a seat of government, or for sites for forts, arsenals, and dock-yards; consequently there is no reference made to the territorial powers of the Provisional Government.

3d. The section in the old Constitution in reference to capitation and other direct tax is omitted; also the section providing that no tax or duty shall be laid on any exports.

4th. The prohibition against States keeping troops or ships of war in time of peace is omitted.

5th. The Constitution being provisional merely, no provision is made for its ratification.

Amendments.—1st. The fugitive slave clause of the old Constitution is so amended as to contain the word "slave," and to provide for full compensation in cases of abduction or forcible rescue on the part of the State in which such abduction or rescue may take place.

2d. Congress, by a vote of two-thirds, may at any time alter or amend the Constitution.

Temporary Provisions.—1st. The Provisional Government is required to take immediate steps for the settlement of all matters between the States forming it and their late confederates of the United States in relation to the public property and the public debt.

2d. Montgomery is made the temporary seat of government.

3d. This Constitution is to continue one year, unless altered by a two-thirds vote or superseded by a permanent government.

The tariff clause provided that "Congress shall have power to lay and collect taxes, duties, imposts, and excises for revenue necessary to pay the debts and carry on the Government of the Confederacy, and all duties, imposts, and excises shall be uniform throughout the Confederacy."

The first section of Article I. is as follows:

"All legislative powers herein delegated shall be vested in this Congress, now assembled, until otherwise ordained."

The fifth article is as follows:

"The Congress, by a vote of two-thirds, may, at any time, alter or amend this Constitution."

The other portions of the Constitution are nearly identical with the Constitution of the United States.

On the next day after the adoption of the Provisional Constitution, at the opening of Congress, the President of the body was sworn by R. W. Walker to support the new Constitution, and the oath was then administered in turn by the President to all the members, in the order in which they were called by States.

At a quarter past twelve o'clock in the afternoon the Congress threw open its doors, after having previously gone into secret session, and proceeded to elect a President. The ballots were taken by States, each State being allowed one vote. On counting, it was found that Jefferson Davis, of Mississippi, had received six votes, the whole number cast. The same formality was gone through in the election of Vice-President, resulting likewise in the unanimous election of Alexander H. Stephens, of Georgia.

An immense crowd had gathered on the floor and in the galleries to witness the election of the first President of "the Confederate States of America." The election of Davis and

Stephens was greeted with loud cheers and applause from the spectators.

The President of the Convention was directed to appoint Committees on Foreign Affairs, Finance, Military and Naval Affairs, the Judiciary, Postal Affairs, Commerce, Patents, and Printing.

A bill was passed continuing in force, until repealed or altered by Congress, all the laws of the United States which were in force on the 1st of November, 1860, not inconsistent with the Constitution of the Provisional Government.

A resolution was adopted instructing the Finance Committee to report promptly a tariff bill for raising a revenue for the support of the Provisional Government.

A resolution was also adopted authorizing the appointment of a Committee to report a Constitution for a permanent Government of the Confederacy.

The name "Confederate States of North America" was also adopted for the Union represented at Montgomery.

At the session on the next day, Mr. Stephens appeared and announced his acceptance of the office of Vice-President, and said:

"I have been notified by the committee of my election as Vice-President of the Provisional Government of the Confederate States of America. The committee requested that I should make known to this body, in a verbal response, my acceptance of the high position I have been called upon to assume, and this I now do in this august presence—before you, Mr. President, before this Congress, and this large concourse of people, under the bright sun and brilliant skies which now smile so felicitously upon us.

"I take occasion to return my most profound acknowledgments for this expression of confidence on the part of this Congress. There are especial reasons why I place an unusually high estimate on it. The considerations which induced me to accept it, I need not state. It is sufficient for me to say that it may be deemed questionable if any good citizens can refuse to discharge any duty which may be assigned them by their country in her hour of need.

"It might be expected that I should indulge in remarks on the state of our public affairs—the dangers which threaten us, and the most advisable measures to be adopted to meet our pressing exigencies; but allow me to say, in the absence of the distinguished gentleman called to the Chief Executive Chair, I think it best that I should refrain from saying any thing on such matters. We may expect him here in a few days—possibly by Wednesday—if he is not providentially detained. When he comes you will hear from him on these difficult questions; and I doubt not we shall cordially and harmoniously concur in any line of policy his superior wisdom and statesmanship may indicate.

"In the mean time, we may be profitably

employed in directing attention to such matters as providing the necessary postal arrangements, making provision for the transfer of the custom-houses from the separate States to the Confederacy, and the imposition of such duties as are necessary to meet the present expected exigencies in the exercise of power, and raise a revenue. We are limited in the latter object to a small duty, not exceeding ten per centum upon importations. We can also be devoting attention to the Constitution of a permanent Government, stable and durable, which is one of the leading objects of our assembling.

"I am now ready to take the oath."

The oath was accordingly administered.

A committee of two from each State was appointed to form a permanent Constitution for the Confederacy.

On the 12th resolutions were offered to continue in office the revenue officers of the respective States.

It was also resolved "That this Government takes under its charge all questions and difficulties now existing between the sovereign States of this Confederacy and the Government of the United States relating to the occupation of forts, arsenals, navy-yards, custom-houses, and all other public establishments, and the President of this Congress is directed to communicate this resolution to the Governors of the respective States of the Confederacy."

On the 13th of February, the Committee on Naval Affairs, and also the Committee on Military Affairs, were instructed to include in any plans they might propose for the army and navy, provisions for such officers as might tender their resignations.

A resolution was also adopted instructing the Committee on Commercial Affairs to inquire and report upon the expediency of repealing the navigation laws.

A debate took place on the subject of a National flag, proposing to make only such changes as might be necessary to distinguish it easily from that of the United States.

Mr. Brooks, in the course of his remarks, said the flag of stars and stripes is the idol of the heart, around which cluster memories of the past which time cannot efface, or cause to grow dim.

Mr. Miles, in reply, said he had regarded from his youth the stars and stripes as the emblem of oppression and tyranny.

The Committee to whom the subject was referred made a report, which was unanimously adopted. It recommended that the flag of the Confederate States should consist of three bars of red and white—the upper red, middle white, lower red. The lower bar should extend the whole width of the flag, and just above it, next to the staff in the upper left hand corner of the flag, should be a blue Union with seven stars in a circle.

The form of Government adopted by the Congress was chiefly objected to, so far as it held out any encouragement for reconstruction, or

any inducement to the Border Slave States to remain in the Union with the North.

On the 15th, Congress made arrangements for the reception and inauguration of President Davis. An official copy of the Texas secession ordinance was presented, and the deputy president invited to a seat, although the ordinance had not been ratified.

There was then a secret session, during which a resolution was passed removing the injunction of secrecy from an act continuing in office the officers connected with the collection of customs at the time of the adoption of the Constitution of the Confederate States, with the salaries and powers as heretofore provided; the compensation not to exceed five thousand dollars. The collectors were required, within two weeks, to execute the same bonds as heretofore, and the subordinates to give bond. One week after the collectors were required to take the oath to discharge their duties, and support the Constitution of the Provisional Government. The Secretary of the Treasury had been instructed to report a plan, to go into effect on the first of April, diminishing the expenses of collecting the revenue at each custom-house at least fifty per cent.

The 18th was devoted to the splendors and gaieties of a Presidential inauguration, which was regarded as the grandest pageant ever witnessed in the Southern States.

On the 19th, measures were adopted to admit, duty free, all breadstuffs, provisions, munitions of war, or materials therefor, living animals, and agricultural products in their natural state; also goods, wares, and merchandise from the United States purchased before the 1st of March, and imported before the 14th of March. Texas was excepted from the operation of the tariff laws.

On the next day the Departments of War, Navy, Justice, Postal Affairs, State and Treasury, were organized.

On the 21st, a resolution was introduced by Mr. Cobb instructing the Committee on Finance to inquire into the expediency of laying a duty on cotton exported from the Confederate States to any foreign country.

Mr. Cobb, on presenting the resolution, said:

"I am not prepared to discuss the policy of levying such a duty. That we have the power to do so there can be no doubt. I apprehend that we are conscious of the power we hold in our hands by reason of our producing that staple so necessary to the world. I doubt not that power will exert an influence mightier than armies and navies. We know that by an embargo we could soon place, not only the United States, but many of the European Powers, under the necessity of electing between such a recognition of our independence as we require, or domestic convulsions at home.

"The information in our possession seems to justify such an inquiry as the resolution proposes. It is a fact that some of the cotton now produced in this Confederacy is already seeking

a new channel to the sea. We are informed that at Pittsburg, Pennsylvania, more than 20,000 bales of cotton have already been received, conveyed thither up the Mississippi and Ohio rivers. We are also informed that more than 20,000 bales of cotton from Rome, Georgia, have been sent by railroad to seek a port at Norfolk and Alexandria. We are further informed that the directors of the railroads connecting with the principal lines in our territory are now concerting schemes for the purpose of reducing freights on those roads, in order in that way to entice our cotton to markets in Northern ports.

"The result of such a course, if successful, would, in the first place, necessarily be to make the blockade of our ports a matter of no importance to foreign nations; secondly, it would destroy all commerce with our own seaports; and, thirdly, and most important of all, it would compel us to receive all the imported goods we might need after paying duties on them in New York City. These considerations have induced me to offer this resolution of inquiry. I do not think that the resolution should elicit discussion at the present time, but, after the Committee on Finance have made their report, it may become a grave matter for the consideration of this body."

The resolution was adopted.

The President then nominated, and the Congress confirmed, the following: Mr. Toombs, of Georgia, Secretary of State; Mr. Memminger, of South Carolina, Secretary of the Treasury; and L. Pope Walker, of Alabama, Secretary of War.

On the 22d, an act was unanimously passed declaring the free navigation of the Mississippi River to be established.

On the 26th, an act was passed defining more accurately the exemption of duty on certain goods; also, an act modifying the navigation laws; an act in relation to the slave trade, for which the punishment was defined; an act organizing the general staff of the army; and an act authorizing the establishment of additional ports of entry and delivery.

Subsequently the nomination of Gustave T. Beauregard, of Louisiana, as Brigadier-General of the Provisional Army, was confirmed.

An act to raise provisional forces for the Confederate States and for other purposes was passed. It directed, among other provisions, that the President should take charge of all the military operations between the Confederacy and other Powers.

An act was also passed to raise money to support the Government. It authorized the President to borrow \$15,000,000, payable in ten years, at an interest of eight per cent. The last section directed an export duty of one-eighth per cent. on each pound of cotton exported after the 1st of August following, to create a fund to liquidate principal and interest of the loan.

The postal system of the Confederate States

was adopted on the report of the Committee of Congress, made on the 25th of February. The report stated that the expenses, over and above receipts, for the post-office service in the six States (Texas not included) composing the Confederacy, were, for the year ending June 30, 1859, \$1,660,595. The Committee recommended an increase of postage rates, by which they estimated an increase of receipts of \$578,874. They also recommended a new mode of letting contracts, on what was called the "starbid system," by which it was hoped to save \$619,033. Some routes were to be discontinued, by which \$206,344 would be saved. Daily service was, in some cases, to be changed to tri-weekly, and thus another \$206,344 would be saved. Minor post-offices were to be abolished, and \$50,000 saved. These savings and the expected increase were estimated by the Committee to cover the deficiency. Present mail contracts were to be assumed by the Government until all the routes were re-let. The rates of postage proposed were: on each letter of half an ounce or less, five cents for five hundred miles, and ten cents for over five hundred miles; drop and advertised letters two cents. Newspaper postage was put at varying but not high rates. Stamps were to be used. The franking privilege was abolished, except in the case of the Post-Office Department. Letter registration was repealed.

On the 6th of March, the appointment of John H. Reagan, as Postmaster-General, was confirmed.

On the next day, a bill was reported providing that, in the event of a conflict or a refusal by the United States to recognize the independence of the Confederacy, no Court in the Confederate States should have cognizance of civil cases by citizens of the United States, and that all civil cases pending should be dismissed.

A resolution was adopted authorizing the President to instruct the Commissioners to the European Courts to enter into a treaty for an extension of international copyright privileges.

On the same day, an act was passed authorizing a military force of 100,000 men to be raised.

The first section is in these words:

SEC. 1. *The Congress of the Confederate States of America do enact*, That in order to provide speedily forces to repel invasion, maintain the rightful possession of the Confederate States of America in every portion of territory belonging to each State, and to secure the public tranquillity and independence against threatened assault, the President be and he is hereby authorized to employ the militia, military, and naval forces of the Confederate States of America, and ask for and accept the services of any number of volunteers, not exceeding one hundred thousand, who may offer their services, either as cavalry, mounted rifle, artillery, or infantry, in such proportion of these several arms as he may deem expedient, to serve for twelve months after they shall be mustered into service, unless sooner discharged.

On the 11th of March the permanent Constitution was adopted by Congress. In nearly all its parts it adopts the precise language, and follows in its articles and sections the order of arrangement of the Constitution of the United

States. The parts in which it differs from the latter either by variations from, or additions thereto, are herewith presented. It begins with the following preamble:

We, the people of the Confederate States, each State acting in its sovereign and independent character, in order to form a permanent Federal Government, establish justice, insure domestic tranquillity, and secure the blessings of liberty to ourselves and our posterity—invoking the favor and guidance of Almighty God—do ordain and establish this Constitution for the Confederate States of America.

The second section of the first article imposes the following restriction on the rights of suffrage, in order to correct an abuse which has sprung from the action of certain States in the Union which have granted the right of voting to unnaturalized aliens:

The House of Representatives shall be composed of members chosen every second year by the people of the several States; and the electors in each State shall be citizens of the Confederate States, and have the qualifications requisite for electors of the most numerous branch of the State Legislature; but no person of foreign birth not a citizen of the Confederate States, shall be allowed to vote for any officer, civil or political, State or Federal.

In adjusting the basis of representation and direct taxation, "three-fifths of all slaves" are enumerated, as in the Constitution of the United States, which substitutes for the word "slaves" the term "other persons." The number of Representatives given prior to an actual enumeration of the population, appointed to take place within three years after the first meeting of the Congress of the Confederate States, and within every subsequent term of ten years, is as follows:

The State of South Carolina shall be entitled to choose six, the State of Georgia ten, the State of Alabama nine, the State of Florida two, the State of Mississippi seven, the State of Louisiana six, and the State of Texas six.

On the subject of impeachments, the following provision is made:

The House of Representatives shall choose their Speaker and other officers, and shall have the sole power of impeachment, except that any judicial or other Confederate officer, resident and acting solely within the limits of any State, may be impeached by a vote of two-thirds of both branches of the Legislature thereof.

It is provided that the Senators of the Confederate States shall be chosen by the State Legislatures "at the regular session next immediately preceding the commencement of the term of service."

It is provided that the concurrence of "two-thirds of the whole number" of each House shall be necessary to the expulsion of a member.

Congress is authorized to make the following provision in reference to heads of the Executive Departments:

Congress may by law grant to the principal officer in each of the Executive Departments a seat upon the floor of either House, with the privilege of discussing any measures appertaining to his Department.

The President is authorized to make the fol-

lowing discrimination in giving his assent to appropriation bills:

The President may approve any appropriation and disapprove any other appropriation in the same bill. In such case he shall, in signing the bill, designate the appropriations disapproved, and shall return a copy of such appropriations with his objections to the House in which the bill shall have originated, and the same proceeding shall then be had as in case of other bills disapproved by the President.

The following prohibition of the "protective policy" is engrained in the Constitution in enumerating the powers of Congress:

No bounties shall be granted from the Treasury, nor shall any duties or taxes on importations from foreign nations be laid to promote or foster any branch of industry.

Internal improvements by the Confederate Government are also prohibited:

Congress shall have power to regulate commerce with foreign nations and among the several States, and with the Indian tribes; but neither this nor any other clause contained in the Constitution shall ever be construed to delegate the power to Congress to appropriate money for any internal improvement intended to facilitate commerce; except for the purpose of furnishing lights, beacons, and buoys, and other aids to navigation upon the coasts, and the improvement of harbors and the removing of obstructions in river navigation, in all of which cases such duties shall be laid on the navigation facilitated thereby as may be necessary to pay the costs and expenses thereof.

The Post-Office Department must pay its expenses from its own resources "after the first day of March, 1863."

In relation to the slave trade, the following provision is made:

The importation of negroes of the African race from any foreign country, other than the slaveholding States or Territories of the United States of America, is hereby forbidden; and Congress is required to pass such laws as shall effectually prevent the same. Congress shall also have power to prohibit the introduction of slaves from any State not a member of or Territory not belonging to this Confederacy.

The imposition of export duties is restricted by the following provision:

No tax or duty shall be laid on articles exported from any State, except by a vote of two-thirds of both Houses.

The appropriation of money for other objects than those indicated and estimated for by the several Executive Departments is thus restrained:

Congress shall appropriate no money from the Treasury except by a vote of two-thirds of both Houses, taken by yeas and nays, unless it be asked and estimated for by some one of the Heads of Department, and submitted to Congress by the President, or for the purpose of paying its own expenses and contingencies, or for the payment of claims against the Confederate States, the justice of which shall have been judicially declared by a tribunal for the investigation of claims against the Government, which it is hereby made the duty of Congress to establish.

All bills appropriating money shall specify in Federal currency the exact amount of each appropriation, and the purposes for which it is made; and Congress shall grant no extra compensation to any public contractor, officer, agent, or servant, after such contract shall have been made or such service rendered.

Akin to these regulations is the following provision:

Every law or resolution having the force of law shall relate to but one subject, and that shall be expressed in the title.

Tonnage duties when levied by the several States are thus regulated:

No State shall, without the consent of Congress, lay any duty of tonnage, except on sea-going vessels, for the improvement of its rivers and harbors navigated by the said vessels; but such duties shall not conflict with any treaties of the Confederate States with foreign nations; and any surplus of revenue thus derived, shall, after making such improvement, be paid into the common treasury; nor shall any State keep troops or ships of war in time of peace, enter into any agreement or compact with another State, or with a foreign Power, or engage in war, unless actually invaded, or in such imminent danger as will not admit of delay. But when any river divides or flows through two or more States, they may enter into compacts with each other to improve the navigation thereof.

The President and Vice-President of the Confederate States hold office for the term of six years, the President not being re-eligible. The qualifications of eligibility are as follows:

No person except a natural born citizen of the Confederate States, or a citizen thereof at the time of the adoption of this Constitution, or a citizen thereof born in the United States prior to the 20th of December, 1860, shall be eligible to the office of President; neither shall any person be eligible to that office who shall not have attained the age of thirty-five years, and been fourteen years a resident within the limits of the Confederate States, as they may exist at the time of his election.

Appointments and removals are regulated as follows:

The principal officer in each of the Executive Departments, and all persons connected with the diplomatic service, may be removed from office at the pleasure of the President. All other civil officers of the Executive Department may be removed at any time by the President, or other appointing power, when their services are unnecessary, or for dishonesty, incapacity, inefficiency, misconduct, or neglect of duty; and when so removed, the removal shall be reported to the Senate, together with the reasons therefor.

The President shall have power to fill all vacancies that may happen during the recess of the Senate, by granting commissions which shall expire at the end of their next session; but no person rejected by the Senate shall be reappointed to the same office during their ensuing recess.

The following provisions are made in reference to the rights of transit and sojourn with slave property, recovery of fugitive slaves, &c.

The citizens of each State shall be entitled to all the privileges and immunities of citizens in the several States, and shall have the right of transit and sojourn in any State of this Confederacy, with their slaves and other property; and the right of property in said slaves shall not be thereby impaired.

A person charged in any State with treason, felony, or other crime against the laws of such State, who shall flee from justice, and be found in another State, shall, on demand of the Executive authority of the State from which he fled, be delivered up to be removed to the State having jurisdiction of the crime.

No slave or other person held to service or labor in any State or Territory of the Confederate States, under the laws thereof, escaping or lawfully carried into another, shall, in consequence of any law or regu-

lation therein, be discharged from such service or labor, but shall be delivered up on claim of the party to whom such slave belongs, or to whom such service or labor may be due.

The following is the provision in reference to the admission of States into the new Confederacy :

Other States may be admitted into this Confederacy by a vote of two-thirds of the whole House of Representatives and two-thirds of the Senate, the Senate voting by States ; but no new State shall be formed or erected within the jurisdiction of any other State, nor any State be formed by the junction of two or more States, or parts of States, without the consent of the Legislatures of the States concerned as well as of the Congress.

The "Territorial question" is thus disposed of:

The Congress shall have power to dispose of and make all needful rules and regulations concerning the property of the Confederate States, including the lands thereof.

The Confederate States may acquire new territory ; and Congress shall have power to legislate and provide governments for the inhabitants of all territory belonging to the Confederate States lying without the limits of the several States ; and may permit them, at such times and in such manner as it may by law provide, to form States to be admitted into the Confederacy. In all such territory the institution of negro slavery, as it now exists in the Confederate States, shall be recognized and protected by Congress and by the Territorial government ; and the inhabitants of the several Confederate States and Territories shall have the right to take to such Territory any slaves lawfully held by them in any of the States or Territories of the Confederate States.

Amendments to the Constitution are to be thus initiated and consummated :

Upon the demand of any three States, legally assembled in their several Conventions, the Congress shall summon a Convention of all the States to take into consideration such amendments to the Constitution as the said States shall concur in suggesting at the time when the said demand is made ; and should any of the proposed amendments to the Constitution be agreed on by the said Convention—voting by States—and the same be ratified by the Legislatures of two-thirds of the several States, or by Conventions in two-thirds thereof—as the one or the other mode of ratification may be proposed by the General Convention—they shall thenceforward form a part of this Constitution.

The following temporary provisions are enumerated :

The Government established by this Constitution is the successor of the Provisional Government of the Confederate States of America, and all the laws passed by the latter shall continue in force until the same shall be repealed or modified ; and all the officers appointed by the same shall remain in office until their successors are appointed and qualified, or the offices abolished.

All debts contracted and engagements entered into before the adoption of this Constitution shall be as valid against the Confederate States under this Constitution as under the Provisional Government.

The mode of ratification and the number of States necessary to put the Constitution in force are thus designated :

The ratification of the Conventions of five States shall be sufficient for the establishment of this Constitution between the States so ratifying the same.

When five States shall have ratified this Constitution, in the manner before specified, the Congress under the Provisional Constitution shall prescribe the

time for holding the election of President and Vice-President, and for the meeting of the Electoral College, and for counting the votes, and inaugurating the President. They shall also prescribe the time for holding the first election of members of Congress under this Constitution, and the time for assembling the same. Until the assembling of such Congress, the Congress under the Provisional Constitution shall continue to exercise the legislative powers granted them ; not extending beyond the time limited by the Constitution of the Provisional Government.

An act was also passed authorizing the issue of one million dollars in Treasury notes, and an appropriation bill to meet current expenses.

The tariff bill reported to Congress was postponed to the 1st of May. As compared with the tariff of the United States, most of the articles paying 30 per cent. were reduced to 25 per cent. ; the larger portion of those paying 24 and 19 per cent. were reduced to 15. There was also a large 10 per cent. schedule, and a very small free list.

The Commissioners appointed to visit Europe were Messrs. Yancey, A. Dudley Mann, and P. A. Rost, of Louisiana. They immediately proceeded by way of New Orleans and Havana to their place of destination.

The Congress also passed an act to authorize the transit of merchandise through the Confederate States ; also, a resolution requesting the States to cede the forts, arsenals, navy-yards, dock-yards, and other public establishments within their limits to the Confederacy.

The act passed to prohibit the African slave trade was vetoed by President Davis on the ground of a conflict in the details of one of the sections with the provisions of the Constitution, to wit :

EXECUTIVE DEPARTMENT, }
Feb. 23, 1861. }

Gentlemen of Congress : With sincere deference to the judgment of Congress, I have carefully considered the bill in relation to the slave trade, and to punish persons offending therein, but have not been able to approve it, and, therefore, do return it with a statement of my objections.

The Constitution—section seven, article one—provides that the importation of African negroes from any foreign country other than Slaveholding States of the United States is hereby forbidden, and Congress is required to pass such laws as shall effectually prevent the same. The rule herein given is emphatic, and distinctly directs the legislation which shall effectually prevent the importation of African negroes. The bill before me denounces as high misdemeanor the importation of African negroes, or other persons of color, either to be sold as slaves or to be held to service or labor, affixing heavy, degrading penalties on the act if done with such intent. To that extent it accords with the requirements of the Constitution, but in the sixth section of the bill provision is made for the transfer of persons who may have been illegally imported into the Confederate States to the custody of foreign States or societies, upon condition of deportation and future freedom, and, if the proposition thus to surrender them shall not be accepted, it is then made the duty of the President to cause said negroes to be sold at public outcry to the highest bidder in any one of the States where such sale shall not be inconsistent with the laws thereof. This provision seems to me to be in opposition to the policy declared in the Constitution—the prohibition of the importation of African negroes—and in derogation of its mandate to legislate for the effectuation of that object. Wherefore the bill is

returned to you for your further consideration, and, together with the objections, most respectfully submitted.

JEFFERSON DAVIS.

This veto of the President was sustained in Congress by the following vote—the question being, “Shall the bill pass notwithstanding the President’s objections?”

YEAS—Messrs. Curry and Chilton, of Alabama; Morton and Owens, of Florida; Toombs, H. Cobb, T. R. Cobb, Barton, Nisbit, and Kenan, of Georgia; Rhett, Barnwell, Keitt, and Miles, of South Carolina; Ochiltree, of Texas—15.

NAYS—Messrs. Smith, Hale, Shorter, and Dean, of Alabama; Wright and Stephens, of Georgia; DeClouet, Conrad, Kenner, Sparrow, and Marshall, of Louisiana; Harris, Brooke, Wilson, Clayton, Barry, and Harrison, of Mississippi; Chesnut, Withers, and Boyce, of South Carolina; Reagan, Waul, Gregg, and Oldham, of Texas—24.

The clause in the permanent Constitution of the Confederate States prohibiting the African slave traffic was adopted in the Montgomery Congress by the vote of four States to two. South Carolina and Florida opposed the restriction, while Georgia, Alabama, Louisiana, and Mississippi advocated it.

An act was also passed to accept from the State of Louisiana the offer of a certain amount of the moneys of the United States, taken possession of by order of the State authorities, from the mint and sub-treasury.

On the 29th of April Congress assembled at Montgomery, in compliance with the proclamation of President Davis. This proclamation convoking Congress, was issued on the 12th of April, “and was prompted,” says President Davis, “by the declaration of hostile purposes contained in the Message sent, by President Lincoln to the Government of South Carolina on the 8th of April.

H. C. Jones and Nicholas Davis, jr., elected to fill the vacancies occasioned by the resignations of David P. Lewis and Thomas Feavre, from Alabama, were qualified and took their seats.

Louis T. Wigfall appeared, from the State of Texas, and J. A. Orr, the successor of W. S. Wilson, of Mississippi, and were qualified.

The Message of President Davis was then read. (*See PUBLIC DOCUMENTS.*)

It announced the ratification of the Permanent Constitution by all the States of the Confederacy.

The President said the declaration of war made against the Confederacy by Abraham Lincoln rendered it necessary to convene Congress, to devise proper measures for the defence of the country.

He reviewed at length the relations heretofore existing between the States, and the events which resulted in the present warfare. Referring to the mission of the Confederate State Commissioners to Washington, he said the “crooked paths of diplomacy can scarcely fur-

nish an example so wanting in courtesy, in candor, and directness, as was the course of the United States Government towards our Commissioners.”

Commissioners had been sent to England, France, Russia, and Belgium, to ask their recognition of the Confederate States as a member of the family of nations, to make treaties, &c. He recommended the appointment of other diplomatic agents.

The Confederacy, he said, through Vice-President Stephens, had concluded a Convention with Virginia, by which Virginia had united her citizens and their fortunes with them. He had satisfactory assurances that other Southern States would soon unite with the Confederacy. Nearly all of the Executive departments were in successful operation. The Postmaster-General would soon be ready to assume the direction of postal affairs.

In conclusion, he congratulated the Confederacy on the patriotic devotion exhibited by her citizens—men of high official and social position and wealth were serving in the volunteer ranks. He spoke complimentarily of the railway companies for their liberal rates of transportation of troops and supplies, and of their proffer of liberal terms in transporting the mails, and to take pay in bonds of the Confederacy. He said: “A people thus united and resolved cannot fail of final success. We feel that our cause is just and holy, and protest solemnly in the face of mankind that we desire peace at any sacrifice, save that of honor and independence. We seek no conquest, no aggrandizement, no concessions from the Free States. All we ask is to be let alone—that none shall attempt our subjugation by arms. This we will and must resist to the direst extremity. The moment this pretension is abandoned the sword will drop from our hands, and we shall be ready to enter into treaties of amity and commerce mutually beneficial. So long as this pretension is maintained, with firm reliance on that Divine power which covers with its protection the just cause, we will continue to struggle for our inherent right to freedom, independence, and self-government.”

On the 6th of May Congress passed an act recognizing a state of war with the United States, and authorizing the issue of letters of marque. The preamble and first section were as follows:

Whereas, The earnest efforts made by this Government to establish friendly relations between the Government of the United States and the Confederate States, and to settle all questions of disagreement between the two Governments upon principles of right, justice, equity, and good faith, have proved unavailing, by reason of the refusal of the Government of the United States to hold any intercourse with the Commissioners appointed by this Government for the purposes aforesaid, or to listen to any proposal they had to make for the peaceful solution of all causes of difficulties between the two Governments; and *whereas*, the President of the United States of America has issued his proclamation, making requisition upon the States of the American Union for seventy-five thousand men, for the purpose as therein indicated of

capturing forts, and other strongholds within the jurisdiction of, and belonging to, the Confederate States of America, and has detailed naval armaments upon the coasts of the Confederate States of America, and raised, organized, and equipped a large military force to execute the purpose aforesaid, and has issued his other proclamation, announcing his purpose to set on foot a blockade of the ports of the Confederate States; and *whereas*, the State of Virginia has seceded from the Federal Union, and entered into a convention of alliance, offensive and defensive, with the Confederate States, and has adopted the Provisional Constitution of the said States, and the States of Maryland, North Carolina, Tennessee, Kentucky, Arkansas, and Missouri have refused, and it is believed that the State of Delaware and the inhabitants of the Territories of Arizona and New Mexico, and the Indian Territory south of Kansas, will refuse to cooperate with the Government of the United States in these acts of hostilities and wanton aggression, which are plainly intended to overawe, oppress, and finally subjugate the people of the Confederate States; and *whereas*, by the acts and means aforesaid war exists between the Confederate States and the Government of the United States, and the States and Territories thereof, excepting the States of Maryland, North Carolina, Tennessee, Kentucky, Arkansas, Missouri, and Delaware, and the Territories of Arizona, and New Mexico, and the Indian Territory south of Kansas: Therefore,

SEC. 1. *The Congress of the Confederate States of America do enact*, That the President of the Confederate States is hereby authorized to use the whole land and naval force of the Confederate States to meet the war thus commenced, and to issue to private armed vessels, commissions, or letters of marque and general reprisal, in such form as he shall think proper, under the seal of the Confederate States, against the vessels, goods, and effects of the Government of the United States, and of the citizens or inhabitants of the States and Territories thereof, except the States and Territories hereinbefore named. *Provided*, however, that property of the enemy (unless it be contraband of war) laden on board a neutral vessel, shall not be subject to seizure under this Act; and *provided further*, that vessels of the citizens or inhabitants of the United States now in the ports of the Confederate States, except such as have been, since the 5th of April last, or may hereafter be, in the service of the Government of the United States, shall be allowed thirty days after the publication of this Act to leave said ports and reach their destination; and such vessels and their cargoes, excepting articles contraband of war, shall not be subject to capture under this Act, during said period, unless they shall have previously reached the destination for which they were bound on leaving said ports.

On the 7th, the ordinance of the Virginia State Convention uniting the State to the Confederate States, and the treaty concluded by Vice-President Stephens and the Commissioners of Virginia, were presented. Another ordinance was adopted ratifying the action of these Commissioners and recognizing Virginia as one of the Confederate States. J. W. Brockenbrough and Walter R. Staples, members elect from Virginia, were sworn in and took their seats as members of the Congress. The time of the Convention was passed almost entirely in secret session. George T. Ward, successor of J. P. Anderson, of Florida, also appeared.

On the 8th, Congress was in secret session, and engaged in perfecting arrangements for a vigorous prosecution of the war. It was estimated that the Government had control of sufficient arms, ordnance, and ammunition of every description to put into the field one hundred and fifty thousand men.

On the 9th, an act was passed to authorize the President to accept the services of volunteers without regard to the place of enlistment.

On the 11th, a bill was reported to establish a patent-office. This was passed on the 17th.

A Message was also received from President Davis, recognizing T. J. Clingman as a commissioner from North Carolina, and conveying the assurance that the State would cooperate with the Confederate States. Mr. Clingman was then invited to take a seat in the public and secret session of Congress, and to participate in the discussions. Many appointments of judges and marshals were then confirmed.

On the 18th, a bill was passed authorizing the issue of fifty millions of dollars in bonds, payable in twenty years, with interest not exceeding eight per centum, or, in lieu of bonds, the issue of twenty millions in Treasury notes in small sums without interest.

An act was passed abolishing the mints at New Orleans and Dahlonega after the 1st of June.

Arkansas was admitted as one of the Confederate States.

On the same day another bill was passed forbidding the people of the Confederate States to pay any debts due from them to the citizens of the Northern and Northwestern States. The following is the act:

SEC. 1. *The Congress of the Confederate States of America do enact*, that all persons in any manner indebted to individuals or corporations in the United States of America, (except the States of Delaware, Maryland, Kentucky, and Missouri, and the District of Columbia,) be and are hereby prohibited from paying the same to their respective creditors, or their agents or assignees, pending the existing war waged by that Government against the Confederate States, or any of the slaveholding States before named.

SEC. 2. Any person indebted as aforesaid shall be and is hereby authorized to pay the amount of his indebtedness into the Treasury of the Confederate States in specie or Treasury notes, and shall receive from the Treasurer a certificate, countersigned by the Register, showing the amount paid and on what account, and the rate of interest which the same was bearing.

SEC. 3. Such certificate shall bear like interest with the original contract, and shall be redeemable at the close of the war and the restoration of peace, in specie or its equivalent, on presentation of the original certificate.

SEC. 4. All laws and parts of laws militating against this act shall be and the same are hereby repealed.

HOWELL COBB, President of the Congress.
Approved, May 21, 1861.

JEFFERSON DAVIS.

On the 22d, an adjournment was made to meet at Richmond on the 20th July. The object of this removal was to strengthen the Government by its influence in Virginia.

The tariff bill was passed with some unimportant amendments; but such was the efficiency of the blockade of the ports of these Confederate States, that at the close of the year it had yielded no revenue to the Government.

A committee, consisting of Messrs. Rives, Hunter, and Memminger, was also appointed to make arrangements to transfer the military department to Richmond.

On Saturday, July 20, the Congress again assembled. It convened in the hall of the House of Delegates at Richmond, in Virginia. About seventy members out of ninety-two were present. Messrs. Scott, Tyler, Prior, Boccock, Mason, and Preston were absent. The President's Message was received and read, and five thousand copies ordered to be printed. (See PUBLIC DOCUMENTS.) Afterwards a secret session commenced. A standing resolution required that all business relating to the public defence should be discussed in secret session, and although it did not extend to other subjects, yet these were soon included.

The report of the Secretary of War stated that one hundred and ninety-four regiments and thirty-two battalions had then been accepted, besides various detachments of artillery and companies of cavalry not made into regiments. He also recommended that Congress should call forth and accept three hundred regiments, in view of the immense additions to the forces of the Federal Government.

R. M. T. Hunter, of Virginia, was nominated and confirmed as Secretary of State in place of Robert Toombs, resigned.

The principal business of the session was to provide ways and means to sustain the operations of the Government. A disposition prevailed to look in a considerable measure to the action of the banks. (See FINANCES, U. S.) This action, however, was somewhat embarrassed by the banks at New Orleans, which continued to pay specie, as they otherwise would forfeit their charters. The banks of Mobile still continued to pay specie, although not subject to such a penalty on suspension.

An act was adopted which prescribed a uniform mode of taking, authenticating, and preserving the evidence of the abduction or reception by the enemy, of slaves owned by any of the Confederate States, as also of the age, sex, and value of said slaves, to the end that indemnity might hereafter be exacted from the enemy.

Another act was passed in relation to the telegraph, which illustrates the degree of power concentrated in the hands of the military leaders, and shows the prudent surveillance exercised by them over military matters. It was in these words:

"During the existing war the President is hereby authorized and empowered to take such control of such of the lines of telegraph in the Confederate States, and of such of the offices connected therewith, as will enable him effectually to supervise the communications passing through the same, to the end that no communications shall be conveyed of the military operations of the Government to endanger the success of such operations, nor any communication calculated to injure the cause of the Confederate States, or to give aid or comfort to their enemies.

"The President shall appoint trustworthy agents in such offices and at such points on the various lines as he may think fit, whose duty it shall be to supervise all communications sent

or passing through said lines, and to prevent the transmission of any communication deemed to be detrimental to the public service.

"In case the owners and managers of said lines shall refuse to permit such supervision, or shall fail or refuse to keep up and continue the business on said lines, the President is hereby empowered to take possession of the same for the purposes aforesaid.

"The President shall from time to time issue instructions to the agents so appointed, and to the operators of the various lines, to regulate the transmission of communications touching the operations of the Government, or calculated to affect the public welfare.

"No communication in cipher nor enigmatical or other doubtful communication shall be transmitted, unless the person sending the same shall be known to the agent of the Government to be trustworthy, nor until the real purport of such communication shall be explained to such agent.

"If any person shall knowingly send or transmit any message or communication touching the military operations of the Government, without the same being first submitted to the inspection of the agent of the Government, or any message calculated to aid and promote the cause of the enemies of the Confederate States, he shall be subject to indictment in the District Court of the Confederate States, and on conviction, shall be fined in a sum not less than five hundred dollars and imprisoned for a term not less than one year."

An act was also passed relative to alien enemies. It makes all citizens within the Confederacy of any nation with which the Confederate States are at war, enemies who shall be liable to be apprehended, restrained, or secured, and removed as alien enemies, unless steps are taken for naturalization.

The official reports made the number of men in the field at this time 210,000. Upon which an act was passed further to provide for the public defence, of which the following was the first section:

Sec. 1. *The Congress of the Confederate States of America do enact*, That in order to provide additional forces to repel invasion, maintain the rightful possession of the Confederate States of America, and to secure the independence of the Confederate States, the President be, and he is hereby, authorized to employ the militia, military and naval forces of the Confederate States of America, and to ask for and accept the services of any number of volunteers, not exceeding four hundred thousand, who may offer their services, either as cavalry, mounted riflemen, artillery, or infantry, in such proportions of these several arms as he may deem expedient, to serve for a period of not less than twelve months, nor more than three years after they shall be mustered into service, unless sooner discharged.

The nomination of Gustave T. Beauregard to the rank of General was made and confirmed unanimously. This is the highest denomination known under the act organizing the army of the Confederate States, passed May 16, 1861. The commission was to bear date from July 21st, the day of the battle at Manassas. This promotion

was first communicated to Gen. Beauregard, by President Davis, in the following letter :

MANASSAS, July 21, 1861.

SIR: Appreciating your services in the battle of Manassas, and on several other occasions during the existing war, as affording the highest evidence of your skill as a commander, your gallantry as a soldier, and your zeal as a patriot, you are promoted to be a General in the army of the Confederate States of America, and with the consent of Congress will be duly commissioned accordingly.

Yours, &c.,
JEFF. DAVIS.

On the 21st of August, President Davis approved an act empowering him to appoint two other Commissioners to Europe. The act empowered the President to determine to what nations the Commissioners now in Europe should be accredited, and to prescribe their duties. The two additional Commissioners would receive the same pay as those now in Europe.

The President also approved an act for the aid of the State of Missouri in repelling the invasion, and to authorize her admission into the Confederacy. The preamble set forth that the people of Missouri had been prevented by the unconstitutional interference of the Federal Government from expressing their will in regard to union with the Confederate States, and that Missouri was engaged in repelling the lawless invasion of her territory by armed forces. The Confederate Government considered it their right and duty to aid the Government and people of Missouri in resisting this invasion, and securing the means and opportunity of expressing their will upon all questions affecting their rights and liberties.

The President was authorized to cooperate, through the military power of the Government, with the authorities of Missouri in defending that State against the lawless invasion of their soil by the United States, in maintaining the liberty and independence of Missouri, with power to accept the services of troops sufficient to suit the purpose. The act provided for the admission of Missouri to the Confederacy, on an equal footing with the other States, when the Provisional Constitution should be ratified by the legally constituted authorities of Missouri, and an authenticated copy be communicated to the President.

The President would then, in accordance with the provisions of the act, issue his proclamation announcing the admission of Missouri into the Confederacy. She recognized the Government in Missouri of which Claiborne F. Jackson was Chief Magistrate.

A bill was passed providing for the sequestration of the property of alien enemies. This bill was framed as a retaliatory measure, to offset the confiscation act of the United States Congress.

Congress called upon the Navy Department for an estimate of the amount required to construct two gunboats for the defence of the city of Memphis and the Mississippi River in that neighborhood, upon a special plan which had been submitted to the Department.

The measure adopted to furnish funds to the Government authorized the issue of Treasury notes and funds, and provided for a war tax.

Section one authorized the issue of Treasury notes, payable to bearer at the expiration of six months after the ratification of a treaty of peace between the Confederate States and the United States. The notes were not to be of a less denomination than five dollars, to be re-issued at pleasure, to be received in payment of all public dues, except the export duty on cotton; and the whole issue outstanding at one time, including the amount issued under former acts, was not to exceed one hundred millions of dollars.

Section two provided that, for the purpose of funding the said notes, or for the purpose of purchasing specie or military stores, &c., bonds might be issued, payable not more than twenty years after date, to the amount of one hundred millions of dollars, and bearing an interest of eight per cent. per annum. This amount included the thirty millions heretofore authorized to be issued. The bonds were not to be issued in less amounts than \$100, except when the subscription was for a less amount, when they might be issued as low as \$50.

Section three provided that holders of Treasury notes might at any time exchange them for bonds.

Section four provided that, for the special purpose of paying the principal and interest of the public debt, and of supporting the Government, a war tax should be assessed and levied of fifty cents upon each one hundred dollars in value of the following property in the Confederate States, namely: Real estate of all kinds; slaves; merchandise; bank stocks; railroad and other corporation stocks; money at interest or invested by individuals in the purchase of bills, notes, and other securities for money, except the bonds of the Confederate States of America, and cash on hand or on deposit in bank or elsewhere; cattle, horses, and mules, gold watches, gold and silver plate; pianos and pleasure carriages; provided, however, that when the taxable property, herein above enumerated, of any head of a family was of value less than five hundred dollars, such taxable property should be exempt from taxation under the act. It provided further, that the property of colleges, schools, and religious associations should be exempt.

The remaining sections provided for the collection of the tax.

A resolution was adopted as early as the 8th of August, the object of which was to place the Confederacy in a favorable position at the Courts of Great Britain and France, on the rights of neutrals and belligerents. This was no less than an expression of adhesion to the declaration made at the Congress of Paris, excepting the first clause. (*See DIPLOMATIC CORRESPONDENCE OF THE UNITED STATES.*) The resolution adopted was in these words :

Whereas it has been found that the uncertainty of maritime law in time of war has given rise to differences of opinion between neutrals and belligerents, which may occasion serious misunderstandings, and even conflicts; and whereas the Plenipotentiaries of Great Britain, France, Austria, Prussia, Sardinia, and Russia, at the Congress of Paris of 1856, established a uniform doctrine on this subject, to which they invited the adherence of the nations of the world, which is as follows :

1. That privateering is and remains abolished.
2. That the neutral flag covers the enemy's goods, with the exception of contraband of war.
3. That neutral goods, with the exception of contraband of war, are not liable to capture under the enemy's flag; and
4. That blockades, in order to be binding, must be effective; that is to say, maintained by a force sufficient really to prevent access to the coast of the enemy.

And whereas it is desirable that the Confederate States of America shall assume a definite position on so important a point; now, therefore, be it

Resolved, That the Congress of the Confederate States of America accept the second, third, and fourth clauses of the above-cited declaration, and decline to assent to the first clause thereof.

The prohibition of the exportation of cotton, except through Confederate ports, was extended by Congress to embrace rice, sugar, molasses, and sirups.

An act was also passed for the sequestration of all Northern property found in the State. The principal clause of the act was as follows :

Be it enacted by the Congress of the Confederate States, That all and every the lands, tenements, and hereditaments, goods and chattels, rights and credits within these Confederate States, and every right and interest therein held, owned, possessed, or enjoyed by or for any alien enemy since the twenty-first day of May, 1861, except such debts due to an alien enemy as may have been paid into the Treasury of any one of the Confederate States prior to the passage of this law, be and the same are hereby sequestered by the Confederate States of America, and shall be held for the full indemnity of any true and loyal citizen, a resident of these Confederate States, or other person aiding said Confederate States in the prosecution of the present war between said Confederate States and the United States of America, and for which he may suffer any loss or injury under the act of the United States to which this act is retaliatory, or under any other act of the United States, or of any State thereof, authorizing the seizure or confiscation of the property of citizens or residents of the Confederate States, or other person aiding said Confederate States, and the same shall be seized and disposed of as provided for in this act: *Provided, however*, When the estate, property, or rights to be affected by this act were or are within some State of this Confederacy, which has become such since said twenty-first day of May, then this act shall operate upon and as to such estate, property, or rights, and all persons claiming the same from and after the day such State became a member of this Confederacy, and not before: *Provided, further*, That the provisions of this act shall not extend to the stocks or other public securities of the Confederate Government, or of any of the States of this Confederacy, held or owned by an alien enemy, or to any debt, obligation, or sum due from the Confederate Government or any of the States to such alien enemy. *And provided, also*, That the provisions of this act shall not embrace the property of citizens or residents of either of the States of Delaware, Maryland, Kentucky, Missouri, or the District of Columbia, or the Territories of New Mexico, Arizona, or the Indian Territory south of Kansas, except such of said citizens or residents as shall commit actual hostilities against the Confederate States, or aid or abet the United States in the existing war against Confederate States.

Sections 2 to 13 provide for the appointment of receivers in each county, and impose a penalty of \$2,000 on all who may endeavor to conceal the ownership of property belonging to alien enemies. Section 14 provides for the appointment of three commissioners to take charge of the sequestration fund, and to hear and decide on all claims against it.

This session was short, and devoted almost exclusively to military and financial subjects, (*see* CONFEDERATE STATES, also FINANCES, U. S.,) and closed by an adjournment to the 18th of November. On that day Congress again reassembled at Richmond. The members present from Virginia were Messrs. W. B. Preston, Tyler,

and Macfarland. The aspect of affairs had somewhat changed since its adjournment. It was now manifest that serious dangers were beginning to threaten. The Northern force had gathered, and was organized and disciplined for desperate work. South Carolina had been invaded. North Carolina and Louisiana would soon be threatened. Still there were no fears of the ultimate ability of the Confederacy to repel all invaders. The number of acts of general importance passed at this session was limited. One was adopted admitting Kentucky into the Union of Confederate States.

A Message from President Davis was also laid before Congress, relative to the secession of Missouri. It was accompanied by a letter from Governor Jackson, and also by an act dissolving the Union with the United States, and an act ratifying the Constitution of the Provisional Government of the Confederate States; also, the Convention between the Commissioners of Missouri and the Commissioners of the Confederate States. This Convention was made on the part of the Confederate States, by R. M. T. Hunter, Secretary of State, and was unanimously ratified by Congress. On the next day an act was passed, admitting Missouri as a member of the Confederacy. At the same time a resolution was adopted, refusing to make any advance to, or to purchase the produce of planters, and surprise was expressed that such applications should be made.

An act was also passed to increase the naval force and to enlist not more than two thousand seamen. A resolution was passed appropriating \$250,000 as an advance, on account of any claims of the State of South Carolina upon the Confederate States. A large number of nominations, as major and brigadier-generals, was also confirmed.

About \$60,000,000 were appropriated for the army, and about \$4,000,000 for the navy. The provisions of the naturalization act were extended to all persons not citizens of the Confederate States, who were engaged in the naval service of the Confederate States during the war. Postmasters were required to receive Treasury notes in the sums of five dollars and upwards, in payment of postage stamps and stamped envelopes.

On the appointment of Attorney-General Benjamin, as Secretary of War, Thomas Bragg, of North Carolina, was appointed to the vacancy.

All important matters relating to the war, finance, foreign relations, and many domestic measures were discussed in secret sessions, at which no persons were admitted but the regular members of that body and its officers.

It presented to the world the first example of a public body, which claimed to represent the people of a country, and to be acting by their authority and in their behalf, sitting with closed doors and withholding all its important transactions from their knowledge. Such a flagrant outrage upon representative institutions can find no justification with freemen.

CONGRESS, THE U. S. The second session of the thirty-sixth Congress commenced at Washington on Monday, December 3, 1860.*

In the Senate the difficulties of the country attracted immediate attention.

Mr. Clingman, of North Carolina, on making the usual motion for printing the President's message, (for Message see Public Documents,) said :

"As to the general tone of the message, Mr. President, everybody will say that it is eminently patriotic, and I agree with a great deal that is in it ; but I think it falls short of stating the case that is now before the country. It is not, for example, merely that a dangerous man has been elected to the Presidency of the United States. We know that under our complicated system that might very well occur by

accident, and he be powerless ; but I assert that the President elect has been elected because he was known to be a dangerous man. He avows the principle that is known as the "irrepressible conflict." He declares that it is the purpose of the North to make war upon my section until its social system has been destroyed, and for that he was taken up and elected. That declaration of war is dangerous, because it has been indorsed by a majority of the votes of the free States in the late election. It is this great, remarkable, and dangerous fact that has filled my section with alarm and dread for the future.

"The President says that he may be powerless by reason of the opposition in Congress now ; but that is only a temporary relief. Everybody knows that the majority which has borne him into the chair can control all the depart-

* The members of the Senate were as follows. From the State of

Maine.—Hannibal Hamlin and William Pitt Fessenden.
New Hampshire.—John P. Hale and Daniel Clark.
Vermont.—Solomon Foote and Jacob Collamer.
Massachusetts.—Henry Wilson and Charles Sumner.
Rhode Island.—Jas. F. Simmons and Henry B. Anthony.
Connecticut.—Lafayette B. Foster and James Dixon.
New York.—William H. Seward and Preston King.
New Jersey.—John R. Thomson and John C. Ten Eyck.
Pennsylvania.—Simon Cameron and William Bigler.
Delaware.—James A. Bayard and Willard Saulsbury.
Maryland.—James A. Pearce and Anthony Kennedy.
Virginia.—Robert M. T. Hunter and James M. Mason.
North Carolina.—Thomas Bragg and Thos. L. Clingman.
Georgia.—Robert Toombs and Alfred Iverson.
Alabama.—Benjamin Fitzpatrick and C. C. Clay, jr.
Mississippi.—Albert G. Brown and Jefferson Davis.
Tennessee.—Alfred O. P. Nicholson and Andrew Johnson.
Kentucky.—John J. Crittenden and Lazarus W. Powell.
Missouri.—James S. Green and Truett Polk.
Ohio.—Benjamin F. Wade and George E. Pugh.
Indiana.—Jesse D. Bright and Graham N. Pitch.
Illinois.—Stephen A. Douglas and Lyman Trumbull.
Michigan.—Zachariah Chandler and Kinsley S. Bingham.
Florida.—David L. Yulee and S. R. Mallory.
Texas.—John Hemphill and Louis T. Wigfall.
Wisconsin.—Charles Durkee and James K. Doolittle.
Iowa.—James W. Grimes and James Harlan.
Minnesota.—Henry M. Rice and Morton S. Wilkinson.
California.—Milton S. Latham and William M. Gwin.
Oregon.—Joseph Lane.
Louisiana.—J. P. Benjamin and John Slidell.
Arkansas.—E. W. Johnson and William K. Sebastian.
South Carolina.—James Chesnut, jr., and James H. Hammond had tendered their resignation to the Governor of that State on the 9th of November, 1860.

The members of the House of Representatives were as follows :

Maine.—Daniel E. Simes, John J. Perry, Ezra B. French, Stephen Coburn, Freeman H. Morse, Israel Washburn, jr., Stephen C. Foster.
New Hampshire.—Gilman Marston, Mason W. Tappan, Thomas M. Edwards.
Vermont.—E. P. Walton, Justin S. Morrill, Homer E. Boyce.
Massachusetts.—Thomas D. Eliot, James Buffinton, Chas. F. Adams, Alexander H. Rice, Anson Burlingame, John B. Alley, Charles E. Train, Eli Thayer, Charles Delano.
Rhode Island.—Christopher Robinson, Wm. D. Brayton.
Connecticut.—Dwight Loomis, John Woodruff, Alfred A. Burnham, Orris S. Ferry.
New York.—Luther C. Carter, James Humphreys, Daniel E. Sickles, William B. Maclay, John Cochrane, George Briggs, Horace F. Clark, John B. Haskin, William S. Kenyon, Charles L. Beale, John H. Reynolds, James B. McKean, George W. Palmer, Francis E. Spinner, Edwin R. Reynolds, James H. Graham, Roscoe Conkling, E. Holland Duell, M. Lindley Lee, Charles B. Hoard, Charles B. Sedgwick, Martin Butterfield, Emory B. Fottle, Alfred Wells, William Irvine, Alfred Ely, Augustus Frank, Elbridge G. Spaulding, Reuben E. Fenton.

New Jersey.—John T. Nixon, John L. N. Stratton, Garrett B. Adrain, Jetur R. Riggs.

Pennsylvania.—Thomas E. Florence, Edward Joy Morris, John P. Verree, John Wood, John Hickman, Henry C. Longnecker, Thaddeus Stevens, John W. Killinger, James H. Campbell, Galusha A. Grow, Jacob K. McKenty, James T. Hale, Benjamin F. Junkin, Edward McPherson, Samuel S. Blair, John Covode, James K. Moorhead, Robert McKnight, William Stewart, Chapin Hall, Elijah Babbitt.

Delaware.—William G. Whiteley.

Maryland.—James A. Stewart, J. Morrison Harris, H. Winter Davis, Jacob M. Kunkel, George W. Hughes, — Webster.

Virginia.—John S. Millson, Daniel C. De Jarnette, Roger A. Pryor, Thomas S. Bocock, William Smith, Alexander R. Boteler, John T. Harris, Albert G. Jenkins, Henry A. Edmundson, Elbert S. Martin.

North Carolina.—William N. H. Smith, Thomas Ruffin, Warren Winslow, Lawrence O'R. Branch, John A. Gilmer, James M. Leach, Burton Craige.

South Carolina.—John McQueen, Lawrence M. Keitt, Milledge L. Bonham, John D. Ashmore, William W. Boyce.
Georgia.—Peter E. Love, Thomas Hardeman, Lucius J. Gartrell, John W. H. Underwood, James Jackson, Joshua Hill, John J. Jones.

Alabama.—James L. Pugh, David Clifton, Sydenham Moore, George S. Houston, Williamson E. W. Cobb, Jabez L. M. Curry.

Mississippi.—Otho R. Singleton.

Louisiana.—John E. Bouligny.

Ohio.—George H. Pendleton, John A. Gurley, Clement L. Vallandigham, William Allen, James M. Ashley, William Howard, Thomas Corwin, Benjamin Stanton, John Carey, Carey A. Trimble, Charles D. Martin, Samuel S. Cox, John Sherman, Harrison G. Blake, William Helmick, Cydnor R. Tompkins, Thomas C. Theaker, Sidney Edgerton, Edward Wade, John Hutchins, John A. Bingham.

Kentucky.—Henry C. Burnett, Samuel O. Peyton, Francis M. Bristow, William C. Anderson, Green Adams, Laban T. Moore, John W. Stevenson, John Y. Brown.

Tennessee.—Thomas A. R. Nelson, Horace Maynard, William B. Stokes, Robert Hatton, James H. Thomas, James M. Quarles, Emerson Etheridge, William T. Avery.

Indiana.—William E. Niblack, William H. English, W. McKee Dunn, William S. Holman, David Kilgore, Albert G. Porter, John G. Davis, Schuyler Colfax, Charles Case, John U. Pettit.

Illinois.—Elihu B. Washburne, Owen Lovejoy, Isaac N. Morris, John A. McClernand, James C. Robinson, Philip B. Fouke, John A. Logan.

Missouri.—Thomas L. Anderson, John B. Clark, James Craig, J. R. Barrett, Samuel H. Woodson, John S. Phelps, John W. Noell.

Arkansas.—Albert Rust.

Michigan.—William A. Howard, Francis W. Kellogg, De Witt C. Leach.

Florida.—George S. Hawkins.

Iowa.—Samuel E. Curtis, William Vandever.

Wisconsin.—John F. Potter, Cadwalader C. Washburn, Charles H. Larnabee.

California.—John C. Burch.

Minnesota.—Cyrus Aldrich, William Windom.

Oregon.—Lansing Stout.

Washington.—Isaac I. Stevens.

New Mexico.—Miguel A. Otero.

Kansas.—Marcus J. Parrott, Martin F. Conway.

ments of this Government. Why, sir, five or six of our conservative Senators have already to give place to others on the 4th of March; and if the others do not, it is simply because their terms have not expired. Both the Senators from Indiana and the Senator from Illinois, [Mr. Douglas,] and other gentlemen, would be beaten by that same majority, if it were not that their terms have time to run. They must, however, be cut down at no distant day. Not only that; but if the House of Representatives is divided to some little extent, how long can it be so? We all know that New England has presented an unbroken front for some time past; and does any man doubt that the same organization that elected Abraham Lincoln can make a clear majority of both branches of Congress? The efforts of the Abolitionists will be directed to the few doubtful districts, and they will soon be subjected to their control. So powerful and steady is the current of their progress that it will soon overwhelm the entire North. In this way they must soon control the President, both Houses of Congress, the Supreme Court, and all the officers of the Government. The result is that a sectional party will wield the entire power over all the departments of the Government.

"But this is not the worst view of the case. We are not only to be governed by a sectional domination which does not respect our rights, but by one, the guiding principle of which is hostility to the Southern States. It is that, Mr. President, that has alarmed the country; and it is idle for gentlemen to talk to us about this thing being done according to the forms of the Constitution.

"My purpose was not so much to make a speech as to state what I think is the great difficulty; and that is, that a man has been elected because he has been and is hostile to the South. It is this that alarms our people; and I am free to say, as I have said on the stump this summer repeatedly, that if that election were not resisted, either now or at some day not far distant, the Abolitionists would succeed in abolishing slavery all over the South.

"Therefore I maintain that our true policy is to meet this issue *in limine*; and I hope it will be done. If we can maintain our personal safety, let us hold on to the present Government; if not, we must take care of ourselves at all hazards. I think this is the feeling that prevails in North Carolina."

Mr. Lane, of Oregon, said: "We are all aware, Mr. President, that there is great dissatisfaction in this country, and a very near approach, unless something can be done very speedily, to a dissolution of the Union. It is not very strange, as I look at it, that this condition of things should exist. It has been truly said that the election of any man to the Presidency would not be good cause for a dissolution of the Union. I am prepared to say that the simple election of any man to that office, in my judgment, would not be cause for a dissolution.

Nor is that the cause of complaint in the country; but it is the principles upon which the late election has taken place that have given rise to the trouble. Never in any previous presidential election has the issue been so fully put, so directly made, as in the late one. The question everywhere was: shall the equality of the States be maintained; shall the people of every State have a right to go into the common territory with their property? And the verdict of the people has been that equality in this country shall not prevail. It is to the effect that fifteen States of this Union shall be deprived of equality; that they shall not go into the common territory with their property; that they are inferiors, and must submit to inequality and degradation. Then, sir, with such a state of facts before us, is it strange that there should be dissatisfaction and trouble?

"Mr. President, it is not the election of Mr. Lincoln that is troubling the country, as I said before, but that he is regarded as a dangerous man; that he entertains views and opinions as expressed by himself, which are dangerous to the peace, safety, and prosperity of fifteen States of this Confederacy. He is an 'irrepressible conflict' man; he holds that the slave States and free States cannot live together. I apprehend the result will be, that they will not live together."

Mr. Hale, of New Hampshire, from the other side of the Senate, replied: "I think we might as well look this matter right clearly in the face; and I am not going to be long about doing it. I think that this state of affairs looks to one of two things: it looks, to absolute submission, not on the part of our Southern friends and of the Southern States, but of the North, to the abandonment of their position—it looks to a surrender of that popular sentiment which has been uttered through the constituted forms of the ballot-box; or it looks to open war. We need not shut our eyes to the fact. It means war, and it means nothing else; and the State which has put herself in the attitude of secession so looks upon it. And I avow here—I do not know whether or not I shall be sustained by those who usually act with me—if the issue which is presented is that the constitutional will of the public opinion of this country, expressed through the forms of the Constitution, will not be submitted to, and war is the alternative, let it come in any form or in any shape. The Union is dissolved and it cannot be held together as a Union, if that is the alternative upon which we go into an election. If it is pre-announced and determined that the voice of the majority expressed through the regular and constituted forms of the Constitution, will not be submitted to, then, sir, this is not a Union of equals; it is a Union of a dictatorial oligarchy on the one side, and a herd of slaves and cowards on the other. That is it, sir; nothing more, nothing less."

Mr. Brown, of Mississippi, said in answer: "All we ask is that we be allowed to depart in

peace. Do you mean to say that that is not to be allowed us, that we shall neither have peace in the Union, nor be allowed the poor boon of seeking it out of the Union? If that be your attitude, war is inevitable. We feel as every American citizen not blinded by passion and by prejudice must feel, that in this transaction we have been deeply aggrieved; that the accumulating wrongs of years have finally culminated in your triumph—not the triumph of Abraham Lincoln, not your individual triumph—but in the triumph of principles, to submit to which would be the deepest degradation that a free people ever submitted to. We cannot; calmly, quietly, with all the dignity which I can summon, I say to you that we will not submit. We invite no war; we expect none, and hope for none.”

Mr. Iverson, of Georgia, still further replied: “As the Senator from New Hampshire very properly remarked, it is time to look this thing in the face. The time is rolling rapidly to the consummation of these great objects; and, in my opinion, there is nothing this side of heaven that can prevent their consummation. You talk about concessions. You talk about repealing the personal liberty bills as a concession to the South. Repeal them all to-morrow, sir, and it would not stop the progress of this revolution. It is not your personal liberty bills that we dread. Those personal liberty bills are obnoxious to us not on account of their practical operation, not because they prevent us from reclaiming our fugitive slaves, but as an evidence of that deep-seated, wide-spread hostility to our institutions, which must sooner or later end in this Union in their extinction. That is the reason we object to your personal liberty bills. It is not because that in their practical operation they ever do any harm. But, sir, if all the liberty bills were repealed to-day, the South would no more gain her fugitive slaves than if they were in existence. It is not the personal liberty laws; it is mob laws that we fear. It is the existence and action of the public sentiment of the Northern States that are opposed to this institution of slavery, and are determined to break it down—to use all the power of the Federal Government, as well as every other power in their hands, to bring about its ultimate and speedy extinction. That is what we apprehend, and what in part moves us to look for security and protection in secession and a Southern Confederacy.”

Mr. Wigfall, of Texas, declared his view of this point thus: “We simply say that a man who is distasteful to us has been elected, and we choose to consider that as a sufficient ground for leaving the Union, and we intend to leave the Union. Then, if you desire it, bring us back. When you undertake that, and have accomplished it, you may be like the man who purchased the elephant—you may find it rather difficult to decide what you will do with the animal.”

Mr. Saulsbury, of Delaware, closed the debate

on printing the message with these words: “I do not rise for the purpose of protracting this unnecessary and most unfortunate debate; but I rise simply to say in the presence of the representatives of the different States, that my State having been the first to adopt the Constitution, will be the last to do any act or countenance any act calculated to lead to the separation of the States of this glorious Union. She has shared too much of its blessings; her people performed too much service in achieving the glorious liberties which we now enjoy, and in establishing the Constitution under which we live, to cause any son of hers to raise his hand against those institutions or against that Union. Sir, when that Union shall be destroyed by the madness and folly of others, (if, unfortunately, it shall be so destroyed,) it will be time enough then for Delaware and her Representatives to say what will be her course.”

On a subsequent day Mr. Powell, of Kentucky, introduced a resolution respecting the reference of the President's message, which was changed by amendment to the following form:

Resolved, That so much of the President's message as relates to the agitated and distracted condition of the country, and the grievances between the slaveholding and non-slaveholding States, be referred to a special committee of thirteen members, and that said committee be instructed to inquire into the present condition of the country, and report by bill or otherwise.

Mr. Powell, on offering the resolution, thus stated its object: “Mr. President, the object of the resolution under consideration is to initiate measures to save the country from its present perilous condition; to avert, if possible, a dismemberment of the Union, and restore peace, harmony, happiness, and security, to a distracted and divided people. Events are rapidly crowding upon us which, if not arrested, will speedily overthrow the Government. The mere anticipation of these sad and melancholy results has already caused distrust, alarm, and ruin in many parts of the country.”

Mr. King, of New York, said: “I am not one of those who despair of the republic; I believe we shall go safely through this crisis, as we have passed through many others that in my period of time have been said to exist. If there be any thing that ought to be inquired into, in my judgment it is, whether the laws be sufficient to enable the Government to maintain itself, and to enforce its constitutional powers.”

Mr. Douglas, upon the resolution being again before the Senate, said: “I am ready to act with any party, with any individual of any party, who will come to this question with an eye single to the preservation of the Constitution and the Union. I trust we may lay aside all party grievances, party feuds, partisan jealousies, and look to our country, and not to our party, in the consequences of our action.”

Mr. Davis, of Mississippi, argued that the fault was not in the form of the Government, nor did the evil spring from the manner in

which it had been administered. Where, then, was it? It was that our fathers formed a Government for a Union of friendly States; and though under it the people have been prosperous, beyond comparison with any other whose career is recorded in the history of man, still that Union of friendly States had changed its character, and sectional hostility had been substituted for the fraternity in which the Government was founded. He further said:

"I do not intend here to enter into a statement of grievances; I do not intend here to renew that war of crimination which for years past has disturbed the country, and in which I have taken a part perhaps more zealous than useful; but I call upon all men who have in their hearts a love of the Union, and whose service is not merely that of the lip, to look the question calmly but fully in the face, that they may see the true cause of our danger, which, from my examination, I believe to be that a sectional hostility has been substituted for a general fraternity, and thus the Government rendered powerless for the ends for which it was instituted. The hearts of a portion of the people have been perverted by that hostility, so that the powers delegated by the compact of union are regarded, not as means to secure the welfare of all, but as instruments for the destruction of a part—the minority section. How, then, have we to provide a remedy? By strengthening this Government? By instituting physical force to overawe the States—to coerce the people living under them as members of sovereign communities to pass under the yoke of the Federal Government? No, sir; I would have this Union severed into thirty-three fragments sooner than have that great evil befall constitutional liberty and representative government. Our Government is an agency of delegated and strictly limited powers. Its founders did not look to its preservation by force; but the chain they wove to bind these States together was one of love and mutual good offices.

"Then where is the remedy? the question may be asked. In the hearts of the people, is the ready reply; and therefore it is that I turn to the other side of the chamber, to the majority section, to the section in which have been committed the acts that now threaten the dissolution of the Union. I call on you, the representatives of that section, here and now to say so, if your people are not hostile; if they have the fraternity with which their fathers came to form this Union; if they are prepared to do justice; to abandon their opposition to the Constitution and the laws of the United States; to recognize, and to maintain, and to defend all the rights and benefits the Union was designed to promote and to secure. Give us that declaration—give us that evidence of the will of your Constituency to restore us to our original position, when mutual kindness was the animating motive, and then we may hopefully look for remedies which may suffice; not by organizing armies—

not so much by enacting laws as by repressing the spirit of hostility and lawlessness, and seeking to live up to the obligations of good neighbors, and friendly States united for the common welfare."

Mr. Green, of Missouri, said: "For me to go on the stump or in this Senate chamber, and denounce one section of the Union, or the other section of the Union, would do more harm than good; but let me appeal to them, and ask them, as I say to them now, Are you not willing to grant me the Constitution? Yes. You ask me, Do you want any more than the Constitution? No. Then this one point only remains: If you construe the Constitution one way, and I construe it another, let us as brethren put in an explanatory amendment, which will remove the whole difficulty, that we may go on together in harmony and peace hereafter. A rigid enforcement of the fugitive slave law, a rigid protection of the States from invasion, and an explanatory amendment of the Constitution, defining the rights on every point where there is any dispute, will give us the same old peace we had, and we will go on with the same prosperity as we formerly did."

Mr. Dixon, of Connecticut, followed: "In saying that the controversy respecting slavery is the cause of our present difficulties, I do not intend to say whether one section of the country is in fault more than another, whether both are equally in fault, or whether the blame is wholly on one side. Crimination and recrimination are now useless—nay, dangerous. If it be possible, the first thing should be to restore the fraternal spirit which once existed, ought to exist, and may still exist.

"How shall this be done? I know of no other mode than by cheerfully and honestly assuring to every section of the country its constitutional rights. No section professes to ask more; no section ought to offer less. As to what are these constitutional rights, that is a question to be considered in a spirit of confidence and mutual good will, and furthermore, in a spirit of devotion to the Union, for the preservation of which my constituents are ready to make any sacrifice which a reasonable man can ask, or an honorable man can grant, consistently with principle. In this spirit, sir, I shall meet this great question; and in doing so I believe I shall be sustained by an immense majority of my constituents. If time shall show that I am wrong in this belief, I shall instantly cease to represent them in this Senate."

Mr. Brown, of Mississippi, declined to vote for the resolution. He said: "Things had reached a crisis. The crisis could only be met in one way effectually, in his judgment; and that was, for the Northern people to review and reverse their whole policy upon the subject of slavery. I see no evidence anywhere of any such purpose. On the contrary, the evidences accumulate all around, day by day, that there is no such purpose. The Southern States do not expect that they are going to do it; and,

having despaired of that reversal of judgment and that change of conduct, they are proceeding in the only mode left them to vindicate their rights and their honor. I cannot vote for the resolution of my friend from Kentucky, because it would be an intimation—darkly given, it is true, but yet an intimation—to my State which is moving, that there is a hope of reconciliation. I do not believe there is any such hope. I see no evidence upon which to base a hope. I see, through this dark cloud that surrounds us, no ray of light. To me it is all darkness—midnight gloom. I therefore, standing here as one of the Senators from my State to report faithfully what is going on, will hold out no false hope. I will not say to them, even by implication, that I believe that which, upon my soul, I do not believe.”

Mr. Pugh, of Ohio, denied the conclusion of the preceding speaker, saying: “After more than seventy years of liberty and happiness and prosperity as a confederation of States, must we now acknowledge that our constituents, some thirty million in all, with every advantage that men could desire for self-government, are unable to decide their differences in a satisfactory manner? Why, sir, what hope is left for mankind anywhere? Will you pretend that the Southern people are capable of free government hereafter, if they cannot now commune with their Northern brethren upon fair and honorable terms of adjustment? Or shall we, on our side, indulge a pretension equally vain? We stultify ourselves, all of us, in saying that we cannot hear, cannot discuss, and cannot compromise the controversy with which we are threatened. That is to say, in so many words, that our experiment of the Union is a failure; and, more than that, your Southern confederacy will be a failure, and all other confederacies to the end of time. Mr. President, I have not attained any such conclusion; I am not of opinion, as yet, that a majority, or any considerable number of the people, South or North, desire the bonds of this Confederacy to be torn asunder. There has been crimination upon both sides; there have been outrages on both sides; there have been things which ought to be redressed, some by the arm of the law, some by a more faithful administration of our Federal and State Governments; but there has been nothing which cannot be redressed promptly, fairly, and in the most efficacious manner. I believe, before God and my country, that ninety-nine hundredths of the people in every State, North and South, are anxious this day to redress all outrages and all causes of reasonable complaint.”

Mr. Mason, of Virginia, stated that he should vote for the resolution, “but without an idea that it is possible for any thing that Congress can do to reach the dangers with which we are threatened.” He said: “What is the evil? Gentlemen have well said, it is not the failure to execute this fugitive slave law; it is not the passage of these liberty bills, as they are called,

in various of the States; it is a social war—so far not a war of arms—a war of sentiment, of opinion; a war by one form of society against another form of society. I possibly may have a misinformed judgment, but I rely upon it until corrected; and my judgment is satisfied that, for some reason, the population in the States having no slaves, feeling their great numerical majority, and having nursed this sentiment, this mere opinion about social forms existing elsewhere, have in some manner unfortunately brought themselves to a determination to extinguish it. I do not mean by any immediate blow—by any present law; but it is their purpose, having obtained possession of the Federal power, to use that power in every form to bring that social condition to a close.

“I look upon it then, sir, as a war of sentiment and opinion by one form of society against another form of society. How that will end, I will not undertake to predict; but if there be a remedy for it, it is not here; it must be at home in their own State councils; and I should regret extremely if any vote I am to give here should mislead public judgment so far as to lead them to suppose that they are to look here for safety. If the people would go into convention in all those States, as we are driven into convention, take up the subject, probe it, analyze it, look back to history and see what it is, they would have it in their power to apply a remedy. The remedy rests in their hands, not in Congress; in the State councils of the several States; in the political society of the several States; and if we induce them, by any act of ours here, to look to Congress for safety, we shall mislead them.”

Mr. Iverson, of Georgia, after discussing the various measures of conciliation, which might be proposed under the resolution: such as the effort to remove the objections of the Southern States by congressional legislation—alteration of the Constitution, &c., declared that the South would never be satisfied with any concession “that does not fully recognize, not only the existence of slavery in its present form, but the right of the Southern people to emigrate to the common territories with their slave property, and their right to congressional protection, while the territorial existence lasts.” “No one expects such a remedy will ever be accorded by Congress. The Republican party is a unit against any such provision: I tell you, Mr. President, that the question is settled in relation to this great movement which is now progressing in certain of the Southern States. I know the efforts that are now being made to stay the hand of the Southern people, and to cool down the patriotism which is burning within the Southern heart; but it will be ineffectual, sir. When the arbitrary monarchical government of Louis Philippe, in 1848, had aroused the people of Paris to a sense of their danger and to rebellion, and the barricades of Paris were raised, and the masses of that great city were upheaving in their majesty against

the arbitrary power of the monarchy, Louis Philippe saw his danger, and attempted to avert it by changing his ministry. He turned out M. Guizot and nominated M. Thiers as his principal adviser. That he supposed would quiet the dissensions which he saw rising around him; but, sir, the words 'too late,' 'too late,' went all through the streets of Paris. The next day, when he found the streets barricaded, he abdicated the throne in favor of his grandson, and made an effort, through his friends, to obtain the regency of his daughter, the mother of the Count of Paris. When that was done, in the hope that he might quell the insurrection then raging around him, the same words 'too late' ran through all the masses of Paris, ringing out in sepulchral tones like the trump of the archangel summoning the dead to judgment. So now, sir, you may tinker the Constitution, if you please; you may propose concessions; you may suggest additional legislation; you may present additional constitutional securities; you may attempt by all these ingenious devices to stay the storm which now rages in the Southern States, to prevent that people from marching on to the deliverance and liberty upon which they are resolved; but, sir, the words 'too late,' that ring here to-day, will be reiterated from mountain to valley in all the South, and are now sounding the death knell of the Federal Union."

Mr. Pugh, of Ohio, regarded the assertion that the people of the Northern States had set on foot some policy in regard to the institution of slavery, as an invention of history. The assertion of things as facts, which are not facts, has raised all this vast cloud of passion and misrepresentation in both extremes of the country. He said:

"Now, sir, I do not believe that ninety-nine hundredths of the men, who voted for Mr. Lincoln, thought any thing about the subject of slavery in the States, or had any policy on the subject. They were opposed to the introduction of slavery into the territories. They were in favor of a general division of the offices and the plunder. Many of them wanted protection to iron, and I do not know what all; but most of them were animated by a thorough hatred of the Democratic party. But as for any policy in their minds, bearing upon the institutions of the Southern States, I believe this day, if the question were put in any shape, that even in New England, though I cannot speak for her—in every State of the North—there is a large majority of the people who are opposed to any interference whatever."

Mr. Douglas, of Illinois, in reply to statements respecting the non-execution of the fugitive slave-law in the North, said "that nine-tenths of the complaints on that subject are unfounded."

Mr. Wigfall, of Texas, in answer to a demand for a specification of the wrongs, or supposed wrongs, under which the Southern States were

suffering, stated that it was the denial by the Government that slaves were property, and the refusal to protect the owners in their title, whenever they were within the Federal jurisdiction, and proceeded:

"My objection to the course we are now pursuing, is simply that these discussions amount to nothing. We cannot save the Union. The Senators on the other side, and the Senator from Illinois can, possibly. I do not know that they can. If they cannot, it cannot be saved. We cannot do it. The people of the South—I speak of the people of the different slaveholding States, and especially those upon the Gulf, commonly called the cotton States—are dissatisfied with the present Government, as it is about to be administered by the President elect. There is nothing that can satisfy them except amendments to the Constitution, and those amendments must be made by the Northern States unanimously, or they will not be satisfied; and I say here, that they should not be."

Mr. Wade, of Ohio, said: "I have listened to the complaints on the other side patiently, and with an ardent desire to ascertain what was the particular difficulty under which they were laboring. Many of those who have supposed themselves aggrieved have spoken; but I confess that I am now totally unable to understand precisely what it is of which they complain. Why, sir, the party which lately elected their President, and are prospectively to come into power, have never held an executive office under the General Government, nor has any individual of them. It is most manifest, therefore, that the party to which I belong, have as yet committed no act of which anybody can complain. If they have fears, as to the course that we may hereafter pursue, they are mere apprehensions—a bare suspicion, arising, I fear, out of their unwarrantable prejudices, and nothing else."

In answer to the question what has caused this excitement? he ascribed it to the belief by the Southern people, that the Republicans were their mortal enemies, "and stand ready to trample their institutions under foot." Those who make the complaints "have, for a long series of years, had this Government in their own keeping. Therefore, if there is any thing in the legislation of the Federal Government that is not right, they are responsible for it, for the Republicans have never been invested with the power to modify or control the legislation of the country." He said:

"Now, sir, I should like to have the Senators on the other side tell me when ever a Republican has violated, or ever proposed to violate, a right of theirs. I have listened to your arguments here for about a week. They are all in very general terms. They are very loosely drawn indictments, and I do not know where to meet you at all. Is there any thing in our platform detrimental to your rights, unless in modern times you have set up a construction

of the Constitution of the United States differing from ours?—we following the old beaten track of every department of the Government for more than seventy years, and you switching off, as it were, upon another track, and setting up yours as orthodox—that is all. You say that we must follow you. We choose to follow the old landmarks. That is the complaint against us.

“Sir, I am one of those who went forth with zeal to maintain the principles of the great Republican party. In a constitutional way we met, as you met. We nominated our candidates for President and Vice-President, and you did the same for yourselves. The issue was made up; and we went to the people upon it. Although we have been usually in the minority, although we have been generally beaten; yet, this time, the justice of our principles, and the maladministration of the Government in your hands, convinced the people that a change ought to be wrought; and after you had tried your utmost, and we had tried our utmost, we beat you; and we beat you upon the plainest and most palpable issue that ever was presented to the American people, and one that they understood the best. There is no mistaking it; and now, when we come to the Capitol, I tell you that our President and our Vice-President must be inaugurated, and administer the Government as all their predecessors have done. Sir, it would be humiliating and dishonorable to us if we were to listen to a compromise by which he who has the verdict of the people in his pocket, should make his way to the presidential chair. When it comes to that, you have no Government; anarchy intervenes; civil war may follow it; all the evils that may come to the human imagination may be consequent upon such a course as that. The moment the American people cut loose from the sheet-anchor of free government and liberty—that is, whenever it is denied in this Government that a majority fairly given shall rule—the people are unworthy of free government. Sir, I know not what others may do; but I tell you that, with the verdict of the people given in favor of the platform upon which our candidates have been elected, so far as I am concerned, I would suffer any thing to come before I would compromise that away. I regard it as a case where I have no right to extend comity or generosity. A right, an absolute right, the most sacred that a free people can ever bestow on any man, is their undisguised, fair verdict, that gives him a title to the office that he is chosen to fill; and he is recreant to the principle of free government who will ask a question beyond the fact whether a man has the verdict of the people, or if he will entertain for a moment a proposition in addition to that. It is all I want. If we cannot stand there, we cannot stand anywhere. Any other principle than that would be as fatal to you, my friends, as to us. On any other principle, anarchy must immediately ensue.”

Mr. Crittenden then addressed the Senate for the purpose of presenting joint resolutions, proposing certain amendments to the Constitution. In explanation of them he referred to the questions of an alarming character that had grown out of the controversy between the Northern and Southern sections of the country, in relation to the rights of the slaveholding States in the territories of the United States, and in relation to the rights of the citizens in the slaveholding States. His object was to meet all these questions and causes of discontent by amendments to the Constitution, so that the settlement may be permanent, and leave no cause for future controversy. He proposed that the Constitution should be so amended as to declare that Congress shall have no power to abolish slavery in the District of Columbia so long as slavery exists in the States of Maryland and Virginia; and that it shall have no power to abolish slavery in any of the places under its special jurisdiction within the Southern States.

“These are the constitutional amendments which I propose, and embrace the whole of them in regard to the questions of territory and slavery. There are other propositions in relation to grievances, and in relation to controversies, which I suppose are within the jurisdiction of Congress, and may be removed by the action of Congress. I propose, in regard to legislative action, that the fugitive slave law, as it is commonly called, shall be declared by the Senate to be a constitutional act, in strict pursuance of the Constitution. I propose to declare, that it has been decided by the Supreme Court of the United States to be constitutional, and that the Southern States are entitled to a faithful and complete execution of that law, and that no amendment shall be made hereafter to it which will impair its efficiency. But, thinking that it would not impair its efficiency, I have proposed amendments to it in two particulars. I have understood from gentlemen of the North that there is objection to the provision giving a different fee where the commissioner decides to deliver the slave to the claimant, from that which is given where he decides to discharge the alleged slave; the law declares that in the latter case he shall have but five dollars, while in the other he shall have ten dollars—twice the amount in one case than in the other. The reason for this is very obvious. In case he delivers the servant to his claimant, he is required to draw out a lengthy certificate, stating the principal and substantial grounds on which his decision rests, and to return him either to the marshal or to the claimant to remove him to the State from which he escaped. It was for that reason that a larger fee was given to the commissioner, where he had the largest service to perform. But, sir, the act being viewed unfavorably and with great prejudice, in a certain portion of our country, this was regarded as very obnoxious, because it seemed to give an inducement to the commis-

sioner to return the slave to the master, as he thereby obtained the larger fee of ten dollars instead of the smaller one of five dollars. I have said, let the fee be the same in both cases.

"I have understood furthermore, sir, that inasmuch as the fifth section of that law was worded somewhat vaguely, its general terms had admitted of the construction in the Northern States that all the citizens were required, upon the summons of the marshal, to go with him to hunt up, as they express it, and arrest the slave; and this is regarded as obnoxious. They have said, 'in the Southern States you make no such requisition on the citizen;' nor do we, sir. The section, construed according to the intention of the framers of it, I suppose, only intended that the marshal should have the same right in the execution of process for the arrest of a slave that he has in all other cases of process that he is required to execute—to call on the *posse comitatus* for assistance where he is resisted in the execution of his duty; or where, having executed his duty by the arrest, an attempt is made to rescue the slave. I propose such an amendment as will obviate this difficulty and limit the right of the master and the duty of the citizen to cases where, as in regard to all other process, persons may be called upon to assist in resisting opposition to the execution of the laws.

"I have provided further, sir, that the amendments to the Constitution which I here propose, and certain other provisions of the Constitution itself, shall be unalterable, thereby forming a permanent and unchangeable basis for peace and tranquillity among the people. Among the provisions in the present Constitution, which I have by amendment proposed to render unalterable, is that provision in the first article of the Constitution which provides the rule for representation, including in the computation three-fifths of the slaves. That is to be rendered unchangeable. Another is the provision for the delivery of fugitive slaves. That is to be rendered unchangeable."

These views were urged by considerations of the importance of the Union and the comparative trifle required to be sacrificed. He said, "Is it not the cheapest price at which such a blessing as this Union was ever purchased?"

The question on printing the resolutions was reached with difficulty, in consequence of the calls for the special order on the part of some, and the desire to make remarks on the resolutions by others. Their reception appeared ominous of their ultimate fate. They were known as the "Compromise Measures"* pro-

posed by Mr. Crittenden, and attracted much attention among the people of the central States, and were approved by several legislative bodies. It is not too much to say, that with some slight amendments this plan would

and especially their rights in the common territory of the United States; and whereas it is eminently desirable and proper that these dissensions, which now threaten the very existence of this Union, should be permanently quieted and settled by constitutional provisions, which shall do equal justice to all sections, and thereby restore to the people that peace and good-will which ought to prevail between all the citizens of the United States: Therefore,

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, (two-thirds of both Houses concurring.) That the following articles be, and are hereby, proposed and submitted as amendments to the Constitution of the United States, which shall be valid to all intents and purposes, as part of said Constitution, when ratified by conventions of three-fourths of the several States:

ARTICLE 1. In all the territory of the United States now held, or hereafter acquired, situate north of latitude 36° 30', slavery or involuntary servitude, except as a punishment for crime, is prohibited while such territory shall remain under territorial government. In all the territory south of said line of latitude, slavery of the African race is hereby recognized as existing, and shall not be interfered with by Congress, but shall be protected as property by all the departments of the territorial government during its continuance. And when any territory, north or south of said line, within such boundaries as Congress may prescribe, shall contain the population requisite for a member of Congress according to the then Federal ratio of representation of the people of the United States, it shall, if its form of government be republican, be admitted into the Union, on an equal footing with the original States, with or without slavery, as the constitution of such new State may provide.

ART. 2. Congress shall have no power to abolish slavery in places under its exclusive jurisdiction, and situate within the limits of States that permit the holding of slaves.

ART. 3. Congress shall have no power to abolish slavery within the District of Columbia, so long as it exists in the adjoining States of Virginia and Maryland, or either, nor without the consent of the inhabitants, nor without just compensation first made to such owners of slaves as do not consent to such abolishment. Nor shall Congress at any time prohibit officers of the Federal Government, or members of Congress, whose duties require them to be in said district, from bringing with them their slaves, and holding them as such during the time their duties may require them to remain there, and afterwards taking them from the district.

ART. 4. Congress shall have no power to prohibit or hinder the transportation of slaves from one State to another, or to a territory in which slaves are by law permitted to be held, whether that transportation be by land, navigable rivers, or by the sea.

ART. 5. That, in addition to the provisions of the third paragraph of the second section of the fourth article of the Constitution of the United States, Congress shall have power to provide by law, and it shall be its duty so to provide, that the United States shall pay to the owner who shall apply for it, the full value of his fugitive slave in all cases when the marshal or other officer whose duty it was to arrest said fugitive was prevented from so doing by violence or intimidation; or when, after arrest, said fugitive was rescued by force, and the owner thereby prevented and obstructed in the pursuit of his remedy for the recovery of his fugitive slave under the said clause of the Constitution and the laws made in pursuance thereof. And in all such cases, when the United States shall pay for such fugitive, they shall have the right, in their own name, to sue the county in which said violence, intimidation, or rescue was committed, and to recover from it, with interest and damages, the amount paid by them for said fugitive slave. And the said county, after it has paid said amount to the United States, may, for its indemnity, sue and recover from the wrongdoers or rescuers by whom the owner was prevented from the recovery of his fugitive slave, in like manner as the owner himself might have sued and recovered.

ART. 6. No future amendment of the Constitution shall affect the five preceding articles; nor the third paragraph of the second section of the first article of the Constitution; nor the third paragraph of the second section of the fourth article of said Constitution; and no amendment shall be made to the Constitution which shall authorize or give to Congress any power to abolish or interfere with slavery in

* The following are the joint resolutions as proposed by Mr. Crittenden:

A joint resolution (S. No. 50) proposing certain amendments to the Constitution of the United States.

Whereas serious and alarming dissensions have arisen between the Northern and Southern States, concerning the rights and security of the rights of the slaveholding States,

have been acceptable to a majority of the people of the United States.

Mr. Breckinridge, a member of the Senate from the State of Kentucky, said upon the floor of the Senate on the 16th of July, 1861: "It was stated upon the floor of the Senate by the late Senator from Illinois, and I happened personally to know the fact myself, that the leading statesmen of the lower Southern States were willing to accept the terms of settlement which were proposed by the venerable Senator from Kentucky, my predecessor."

Mr. Hale, of New Hampshire, had no confidence in compromise propositions. He said: "I do not believe, sir, that the remedy is to be sought there. I do not believe that the remedy is to be sought in new constitutional provisions: but in an honest, faithful execution of the things that are already written in the compact and in

the bond. I am willing, and I hope the State I represent is willing, to look this matter all over fairly, calmly, and dispassionately, and if there be any thing that can be demanded of that State consistent with the dignity that belongs to a free State, and the regard that she owes to the Constitution, I have no doubt that she will render and perform it to the letter and to the spirit. But I say, with all deference, that I think these new compacts and these amendments are the mere daubing of the wall with untempered mortar. They are not what is required to sustain the fabric of our Government.

"Sir, I do not know that this Congress can do any thing; but this controversy will not be settled here. It has been well said, it will be done by the States; but, sir, the enlightened tribunal of the public opinion of Christendom

any of the States by whose laws it is, or may be, allowed or permitted.

And whereas, also, besides those causes of dissension embraced in the foregoing amendments proposed to the Constitution of the United States, there are others which come within the jurisdiction of Congress, and may be remedied by its legislative power; and whereas it is the desire of Congress, as far as its power will extend, to remove all just cause for the popular discontent and agitation which now disturb the peace of the country, and threaten the stability of its institutions: Therefore,

1. *Resolved by the Senate and House of Representatives of the United States of America in Congress assembled,* That the laws now in force for the recovery of fugitive slaves are in strict pursuance of the plan and mandatory provisions of the Constitution, and have been sanctioned as valid and constitutional by the judgment of the Supreme Court of the United States; that the slaveholding States are entitled to the faithful observance and execution of those laws, and that they ought not to be repealed, or so modified or changed as to impair their efficiency; and that laws ought to be made for the punishment of those who attempt by rescue of the slave, or other illegal means, to hinder or defeat the due execution of said laws.

2. That all State laws which conflict with the fugitive slave acts of Congress, or any other constitutional acts of Congress, or which, in their operation, impede, hinder, or delay the free course and due execution of any of said acts, are null and void by the plain provisions of the Constitution of the United States; yet those State laws, void as they are, have given color to practices, and led to consequences, which have obstructed the due administration and execution of acts of Congress, and especially the acts for the delivery of fugitive slaves, and have thereby contributed much to the discord and commotion now prevailing. Congress, therefore, in the present perilous juncture, does not deem it improper, respectfully and earnestly to recommend the repeal of those laws to the several States which have enacted them, or such legislative corrections or explanations of them as may prevent their being used or perverted to such mischievous purposes.

3. That the act of the 18th of September, 1850, commonly called the Fugitive Slave Law, ought to be so amended as to make the fee of the commissioner, mentioned in the eighth section of the act, equal in amount in the cases decided by him, whether his decision be in favor of or against the claimant. And to avoid misconception, the last clause of the fifth section of said act, which authorizes the person holding a warrant for the arrest or detention of a fugitive slave, to summon to his aid the *posse comitatus*, and which declares it to be the duty of all good citizens to assist him in its execution, ought to be so amended as to expressly limit the authority and duty to cases in which there shall be resistance or danger of resistance or rescue.

4. That the laws for the suppression of the African slave trade, and especially those prohibiting the importation of slaves into the United States, ought to be made effectual, and ought to be thoroughly executed; and all further enactments necessary to those ends ought to be promptly made.

The following substitute was afterward offered to the preamble of the resolutions by Mr. Crittenden:

Whereas the Union is in danger, and owing to the unhappy

divisions existing in Congress, it would be difficult, if not impossible, for that body to concur in both its branches by the requisite majority so as to enable it either to adopt such measures of legislation, or to recommend to the States such amendments to the Constitution, as are deemed necessary and proper to avert that danger; and whereas in so great an emergency the opinion and judgment of the people ought to be heard, and would be the best and surest guide to their representatives: Therefore,

Resolved, That provision ought to be made by law without delay for taking the sense of the people and submitting to their vote the following resolutions as the basis for the final and permanent settlement of those disputes that now disturb the peace of the country and threaten the existence of the Union.

The annexed table, made out from the report of the Commissioner of Public Lands, shows that the division of territory proposed by adopting the line of 36° 30', would give to both the North and the South a quantity very nearly in proportion to their respective populations—to the North 1,795,965 square miles for a population of nineteen millions, and to the South 1,203,711 square miles for a population of twelve millions.

will utter its voice, and I tell you there is no power on God's earth that can stand before that."

The Vice-President, in announcing the Committee of Thirteen on Mr. Powell's resolution, remarked that the Chair had found a great deal of difficulty in framing the committee, but had tried to compose it in the spirit which he believed actuated the Senate in ordering its appointment. It will be observed that upon this committee were two Senators from one State. This was unavoidable. "Of course the author of the resolutions becomes the chairman of the committee; and I am sure the Senate will, for many reasons, recognize the fact that it was proper that the eminent senior Senator from Kentucky should also be a member of that committee. The Secretary will read it."

The Secretary read the committee, as follows: Mr. Powell, Mr. Hunter, Mr. Crittenden, Mr. Seward, Mr. Toombs, Mr. Douglas, Mr. Collamer, Mr. Davis, Mr. Wade, Mr. Bigler, Mr. Rice, Mr. Doolittle, and Mr. Grimes.

Mr. Davis, of Mississippi, was excused from serving on the committee, upon his own request. He said:

"The position which I am known to occupy, and the position in which the State I represent now stands, render it altogether impossible for me to serve upon that committee with any prospect of advantage."

Subsequently a motion to reconsider the vote excusing Mr. Davis was carried, upon which he rose and said:

"If, in the opinion of others, it be possible for me to do any thing for the public good, the last moment while I stand here is at the command of the Senate. If I could see any means by which I could avert the catastrophe of a struggle between the sections of the Union, my past life, I hope, gives evidence of the readiness with which I would make the effort. If there be any sacrifice which I could offer on the altar of my country to heal all the evils, present or prospective, no man has the right to doubt my readiness to do it. Therefore, when Senators, entertaining the same opinions with myself, came to me and expressed regret that I had refused to serve, I could but tell them that I had only obeyed what I believed to be propriety in the case, not desiring to shrink from the performance of a duty, still less to indulge in personal feeling. I therefore answer the request of the Senator from Florida, knowing also that it is made after consultation with others, that if the Senate choose that I should be placed upon the committee, and continue to serve there, I shall offer no further opposition."

The motion to excuse the Senator was then withdrawn.

On the 31st of December, the committee reported as follows:

The Committee of Thirteen, appointed by order of the Senate, of the 20th instant, have agreed upon the following resolution, and report the same to the Senate:

Resolved, That the committee have not been able to agree upon any general plan of adjustment, and report that fact to the Senate, together with the journal of the committee.

On a subsequent day the report of the committee and the resolutions of the Senator from Kentucky were taken up; also a brief resolution of nearly similar import offered by Senator Johnson, of Tennessee; also resolutions of Senator Lane, of Oregon.

Mr. Douglas addressed the Senate. He commenced by saying that no act of his public life had ever caused him so much regret as the necessity of voting in the special committee of thirteen for the resolution reporting to the Senate their inability to agree upon any general plan of adjustment, which would restore peace to the country and insure the integrity of the Union. If we wish to understand the real causes which have produced such wide-spread and deep-seated discontent in the slaveholding States, we must go back, he said, beyond the recent Presidential election, and trace the origin and history of the slavery agitation from the period when it first became an active element in Federal politics.

Having traced the agitation down, he ascribed the present crisis to the fact that the Southern people have received the result of the recent election as furnishing conclusive evidence that the dominant party of the North, which is soon to take possession of the Federal Government under that election, are determined to invade and destroy their constitutional rights. What shall be done, he asked, in the case of South Carolina? Our right of jurisdiction over that State for Federal purposes, according to the Constitution, had not been destroyed or impaired by the ordinance of secession, or any act of the convention, or of the *de facto* government. The right remains; but the possession is lost, for the time being. "How shall we regain the possession?" is the pertinent inquiry. It may be done by arms, or by a peaceable adjustment of the matters in controversy.

After examining many incidental questions relating to the mode of adjustment, he said:

"I repeat, then, my solemn conviction, that war means disunion—final, irrevocable, eternal separation. I see no alternative, therefore, but a fair compromise, founded on the basis of mutual concessions, alike honorable, just, and beneficial to all parties, or civil war and disunion. Is there any thing humiliating in a fair compromise of conflicting interests, opinions, and theories, for the sake of peace, union, and safety? Read the debates of the Federal convention, which formed our glorious Constitution, and you will find noble examples, worthy of imitation; instances where sages and patriots were willing to surrender cherished theories and principles of government, believed to be essential to the best form of society, for the sake of peace and unity."

On another day Mr. Crittenden called up his

resolution, which was now so modified by himself as to make it a question of referring the matter to the people as an amendment to the Constitution. He had already perceived that there was no party in the Senate in favor of compromise sufficiently strong to pass his resolution in its original form. With a degree of melancholy natural to one who had spent so large a portion of his life in endeavors to promote the prosperity and glory of his country, and who now sees a gigantic catastrophe about to overwhelm her, he addresses the Senate:

"Mr. President, if I could indulge myself with the hope that the resolution which I have proposed for amendments to the Constitution could obtain that majority in this Senate which would recommend it to the States for their adoption, by convention or by Legislature, I should never have made this motion for a reference of the question to the people. It is the extraordinary condition of the country, the extraordinary circumstances by which we are now surrounded, and the peculiar situation in which Congress itself is placed, that has induced me to attempt so extraordinary a resort. We believe that amendments to the Constitution are requisite to give that permanent security which is necessary to satisfy the public mind and restore quiet to the country. Those amendments cannot be recommended, nor can we proceed in the measure of amendment, unless it be by a two-thirds majority. I have feared that that majority could not be hoped for here; and it is in this last extremity that I have proposed that we should invoke the judgment of the people upon the great question on which their Government depends. It is not an ordinary question; it is no question of party; it is no question of policy; it is a question involving the existence of the Union, and the existence of the Government. Upon so momentous a question, where the public counsels themselves are so divided and so distracted as not to be able to adopt, for the want of the requisite majority, those means that are supposed to be necessary for the safety of the country and the people, it has seemed to me not improper that we should resort to the great source of all political authority—the people themselves. This is their Government; this is their Union; we are but their representatives. I speak in no feeling of flattery to the people, sir. No; I call upon them to pronounce their judgment, and do their duty to their country. If we cannot save the country, and they will not save the country, the country is gone. I wish to preserve it by all the means, ordinary and extraordinary, that are within our possible reach. That is the whole feeling, and that is the entire principle upon which I have acted in making this proposition. I see nothing improper in it."

After examining all the points bearing on the proposition for compromise in a most conciliatory spirit, and urging with all the elo-

quence he could command, the importance to the future welfare of the country that this course should be adopted, he closed, and the Senator from Georgia followed. Nothing could be more complete than the contrast between their views.

Mr. Toombs, of Georgia, said: "The success of the Abolitionists and their allies, under the name of the Republican party, has produced its logical results already. They have for long years been sowing dragons' teeth, and have finally got a crop of armed men. The Union, sir, is dissolved. That is an accomplished fact in the path of this discussion that men may as well heed. One of your confederates has already, wisely, bravely, boldly, confronted public danger, and she is only ahead of many of her sisters because of her greater facility for speedy action. The greater majority of those sister States, under like circumstances, consider her cause as their cause; and I charge you in their name to-day, "Touch not Saguntum." It is not only their cause, but it is a cause which receives the sympathy, and will receive the support, of tens and hundreds of thousands of honest patriotic men in the non-slaveholding States, who have hitherto maintained constitutional rights, who respect their oaths, abide by compacts, and love justice. And while this Congress, this Senate, and this House of Representatives are debating the constitutionality and the expediency of seceding from the Union, and while the perfidious authors of this mischief are showering down denunciations upon a large portion of the patriotic men of this country, those brave men are coolly and calmly voting what you call revolution—ay, sir, doing better than that—arming to defend it. They appealed to the Constitution, they appealed to justice, they appealed to fraternity, until the Constitution, justice, and fraternity were no longer listened to in the legislative halls of their country, and then, sir, they prepared for the arbitrament of the sword; and now you see the glittering bayonet, and you hear the tramp of armed men from your capital to the Rio Grande. It is a sight that gladdens the eyes and cheers the hearts of other millions ready to second them. Inasmuch, sir, as I have labored earnestly, honestly, sincerely, with these men to avert this necessity so long as I deemed it possible, and inasmuch as I heartily approve their present conduct of resistance, I deem it my duty to state their case to the Senate, to the country, and to the civilized world."

The claims of the Southern States and their views of the Constitution have been already stated so often, that it will not be necessary to repeat the argument of the Senator from Georgia.

On a subsequent day Mr. Clark, of New Hampshire, offered the following resolutions, designing to move them as an amendment to the resolutions of Mr. Crittenden:

Resolved, That the provisions of the Constitution

are ample for the preservation of the Union, and the protection of all the material interests of the country; that it needs to be obeyed rather than amended; and that an extrication from the present dangers is to be looked for in strenuous efforts to preserve the peace, protect the public property, and enforce the laws, rather than in new guarantees for particular interests, compromises for particular difficulties, or concessions to unreasonable demands.

Resolved, That all attempts to dissolve the present Union, or overthrow or abandon the present Constitution, with the hope or expectation of constructing a new one, are dangerous, illusory, and destructive; that, in the opinion of the Senate of the United States, no such reconstruction is practicable, and therefore, to the maintenance of the existing Union and Constitution should be directed all the energies of all the departments of the Government, and the efforts of all good citizens.

A bill was afterwards introduced by Mr. Bigler, of Pennsylvania, to provide for taking the sense of the people of the several States on the proposed amendments to the Constitution offered by Mr. Crittenden.

Subsequently Mr. Crittenden called up his resolutions, when a motion was made to postpone their consideration to a future day, by Mr. Wilson, of Massachusetts, because the Pacific Railroad bill, and the bill for the admission of Kansas were set down for previous days. To this the venerable Senator, Mr. Crittenden, replied:

"I do think that this may well be considered as trifling with the greatest subject that can possibly be before this Senate, if we consent to such a postponement, and make the reason for it the pendency of this or that bill. I cannot consent to it; and I hope, if the Senate are disposed to treat the subject at all with the solemnity that belongs to it, that we shall at least show respect enough to the subject to manifest a temper and disposition to act upon it decidedly and promptly. I want this question acted upon; and from this dilatory sort of proceedings, it seems to me it is evident gentlemen are trying to postpone this subject, and give it no consideration."

After further discussion the motion to postpone was lost, 19 Republicans to 25. Another debate arose on questions of order, and the session of the day closed, by the Senator from Kentucky withdrawing his call.

On the next day, when the Senator called for his resolutions again, they were set aside, as the Pacific Railroad bill had been set down as a special order.

Mr. Lane, of Oregon, thus expressed his disapprobation of the course which had been taken:

"I was very sorry this morning to see the most important measure that has been introduced into this Senate, or can be introduced into it during this or any other session, set aside to take up this bill. I allude to the proposition introduced by the venerable Senator from Kentucky. It was a proposition presented with the hope of saving the final dissolution of this Union. The measures proposed by him,

if sanctioned by the people, if approved by the Northern States, would in all human probability—and I know there is no man in this Union more anxious for it than myself—delay the movements which are now going on, that are to result ultimately in the entire dissolution of the Union. At such a time, when every gentleman knows that the country cannot be held together unless something shall be promptly done, I thought it was not proper to take up a bill involving the country in obligations amounting to hundreds of millions, for the making of two railroads, in preference to adopting some measures by which this Union may be held together; some plan that may afford security and protection, and guarantee the rights of all the States of the Confederacy."

Later in the day Mr. Crittenden alluded to the same action on the part of the Senate, and expostulated with them, saying:

"I cannot think, Mr. President, of voting for the Pacific Railroad bill while this other measure is undetermined. It has been said of old that men build as if they never expected to die. We seem to be acting as a nation upon that hypothesis; we are proposing to build railroads, providing roads for future generations, when the very existence of our country is in danger. When the Union itself is reeling about like a drunken man, we are making provision for futurity and for posterity. I cannot vote for any such measure at any such time. Build up the Union first; then talk about building up a railroad. Then I will vote for this measure. I want my friends from California to understand that, although I voted to-day for the indefinite postponement of this bill, I am not its enemy. I am prepared to vote for it when you make the Union stable enough to afford the faintest promise that the work can be executed, and that we shall have a nation to enjoy the benefits of it. It seemed to me very solemn trifling before this people, that the Senate should sit here legislating upon the making of roads for future generations, and for a nation, when that nation is trembling upon a point between life and death. Yet the Senate preferred to act upon a railroad, rather than to act on these measures calculated to give permanence to the Union itself. I ask my friends to consider what sort of intelligence is this to go out of a country that is now trembling with anxiety upon the question of peace or war, existence or non-existence as a nation, that they should sit here and with quiet indifference to the state of the country take up a railroad bill?"

On another day the resolutions were taken up and the amendments of Mr. Powell, of Kentucky, and Mr. Clark of New Hampshire, were adopted. This amendment of Mr. Clark looked so much like war, that on the motion to reconsider the vote on the next day, it was reconsidered and postponed.

On the 28th of January, Senator Iverson, of Georgia, withdrew from the Senate. His communication to that body was as follows:

WASHINGTON CITY, January 23, 1861.

To the Senate of the United States:

The undersigned has received official information that, on the 19th instant, a convention of the people of Georgia, recently assembled, and now in session, passed the following ordinance:

"An ordinance to dissolve the union between the State of Georgia and other States united with her under a compact of government, entitled the 'Constitution of the United States of America.'

"We, the people of the State of Georgia, in convention assembled, do declare and ordain, and it is hereby declared and ordained, that the ordinance adopted by the people of the State of Georgia in convention on the 2d day of January, in the year of our Lord, 1788, when the Constitution of the United States of America was assented to, ratified, and adopted; and also all acts and parts of acts of the General Assembly of this State, ratifying and adopting amendments of the said Constitution, are hereby repealed, rescinded, and abrogated.

"We do further declare and ordain, that the Union now subsisting between the States of Georgia and other States, under the name of the United States of America, is hereby dissolved; and that the State of Georgia is in the full possession and exercise of all those rights of sovereignty which belong and appertain to a free and independent State."

The undersigned, recognizing the validity of said ordinance, and the fact that the State which he, in part, represents in the Senate of the United States, has withdrawn from the Federal Union, and is now a separate, sovereign, and independent State, does not feel at liberty any longer to take part in the proceedings of the Senate, and shall this day withdraw from the body.

Very respectfully,

ALFRED IVERSON.

Upon its being read, the Senator made a brief address to the Senate, saying that peace or war could follow as the remaining States might choose. The first gun fired would cause the withdrawal of all the slaveholding States, and forever destroy all hope of reconstruction.

A question next arose in the Senate respecting the effect which the act of this Senator had upon his seat in that body. After a lengthy discussion, the subject was laid upon the table and passed over for the time.

At this time a movement was made on the part of the State of Virginia, to accomplish a peaceful settlement of the difficulties of the country. Resolutions were adopted by the Legislature of that State, recommending all the States to appoint commissioners to a convention, the object of which should be to adjust "the present unhappy controversies in the spirit in which the Constitution was originally formed."

The convention was to meet at Washington on the 4th of February ensuing. These resolutions* were laid before Congress by President Buchanan, accompanied with a message to each

House, in which he thus expressed his gratification upon the occasion, and his views of his own position:—

"I confess I hail this movement on the part of Virginia, with great satisfaction. From the past history of this ancient and renowned Commonwealth, we have the fullest assurance that what she has undertaken she will accomplish, if it can be done by able, enlightened, and persevering efforts. It is highly gratifying to know

and the Constitution, in the spirit in which they were established by the fathers of the Republic: Therefore,

Resolved, That on behalf of the Commonwealth of Virginia, an invitation is hereby extended to all such States, whether slaveholding or non-slaveholding, as are willing to unite with Virginia in an earnest effort to adjust the present unhappy controversies in the spirit in which the Constitution was originally formed, and consistently with its principles, so as to afford to the people of the slaveholding States adequate guarantees for the security of their rights, to appoint commissioners to meet, on the 4th day of February next, in the city of Washington, similar commissioners appointed by Virginia, to consider, and, if practicable, agree upon some suitable adjustment.

Resolved, That ex-President John Tyler, William C. Rives, Judge John W. Brockenbrough, George W. Summers, and James A. Seddon are hereby appointed commissioners, whose duty it shall be to repair to the city of Washington, on the day designated in the foregoing resolution, to meet such commissioners as may be appointed by any of the said States, in accordance with the foregoing resolution.

Resolved, That if said commissioners, after full and free conference, shall agree upon any plan of adjustment requiring amendments of the Federal Constitution, for the further security of the rights of the people of the slaveholding States, they be requested to communicate the proposed amendments to Congress, for the purpose of having the same submitted by that body, according to the forms of the Constitution, to the several States for ratification.

Resolved, That if said commissioners cannot agree on such adjustment, or, if agreeing, Congress shall refuse to submit for ratification such amendments as may be proposed, then the commissioners of this State shall immediately communicate the result to the Executive of this Commonwealth, to be by him laid before the convention of the people of Virginia and the General Assembly: *Provided*, that the said commissioners be subject at all times to the control of the General Assembly, or, if in session, to that of the State Convention.

Resolved, That in the opinion of the General Assembly of Virginia, the propositions embraced in the resolutions presented to the Senate of the United States by Hon. John J. Crittenden—so modified as that the first article proposed as an amendment to the Constitution of the United States, shall apply to all the territory of the United States now held or hereafter acquired south of latitude 36° 30', and provide that slavery of the African race shall be effectually protected as property therein during the continuance of the territorial government, and the fourth article shall secure to the owners of slaves the right of transit with their slaves between and through the non-slaveholding States and Territories—constitute the basis of such an adjustment of the unhappy controversy which now divides the States of this Confederacy, as would be accepted by the people of this Commonwealth.

Resolved, That ex-President John Tyler is hereby appointed, by the concurrent vote of each branch of the General Assembly, a commissioner to the President of the United States; and Judge John Robertson is hereby appointed, by a like vote, a commissioner to the State of South Carolina, and the other States that have seceded, or shall secede, with instructions respectfully to request the President of the United States and the authorities of such States to agree to abstain, pending the proceedings contemplated by the action of this General Assembly, from any and all acts calculated to produce a collision of arms between the States and the Government of the United States.

Resolved, That copies of the foregoing resolutions be forthwith telegraphed to the Executives of the several States, and also to the President of the United States; and that the Governor be requested to inform, without delay, the commissioners of their appointment by the foregoing resolutions.

A copy from the rolls.

WILLIAM F. GORDON, JR.,
C. H. D. and K. E. of Virginia.

* *Preamble and Resolution adopted by the General Assembly of Virginia, January 19, 1861.*

Whereas it is the deliberate opinion of the General Assembly of Virginia, that unless the unhappy controversy which now divides the States of this Confederacy shall be satisfactorily adjusted, a permanent dissolution of the Union is inevitable; and the General Assembly, representing the wishes of the people of the Commonwealth, is desirous of employing every reasonable means to avert so dire a calamity, and determined to make a final effort to restore the Union

that other patriotic States have appointed, and are appointing, commissioners to meet those of Virginia in council. When assembled, they will constitute a body entitled, in an eminent degree, to the confidence of the country.

"The General Assembly of Virginia have also resolved 'that ex-President John Tyler is hereby appointed, by the concurrent vote of each branch of the General Assembly, a commissioner to the President of the United States; and Judge John Robertson is hereby appointed, by a like vote, a commissioner to the State of South Carolina and the other States that have seceded or shall secede, with instructions respectfully to request the President of the United States and the authorities of such States to agree to abstain, pending the proceedings contemplated by the action of this General Assembly, from any and all acts calculated to produce a collision of arms between the States and the Government of the United States.'

"However strong may be my desire to enter into such an agreement, I am convinced that I do not possess the power. Congress, and Congress alone, under the war-making power, can exercise the discretion of agreeing to abstain 'from any and all acts calculated to produce a collision of arms' between this and any other Government. It would, therefore, be a usurpation for the Executive to attempt to restrain their hands by an agreement in regard to matters over which he has no constitutional control. If he were thus to act, they might pass laws which he should be bound to obey, though in conflict with his agreement.

"Under existing circumstances, my present actual power is confined within narrow limits. It is my duty at all times to defend and protect the public property within the seceding States so far as this may be practicable, and especially to employ all constitutional means to protect the property of the United States, and to preserve the public peace at this the seat of the Federal Government. If the seceding States abstain 'from any and all acts calculated to produce a collision of arms,' then the danger so much to be deprecated will no longer exist. Defence, and not aggression, has been the policy of the Administration from the beginning.

"But whilst I can enter into no engagement such as that proposed, I cordially commend to Congress, with much confidence that it will meet their approbation, to abstain from passing any law calculated to produce a collision of arms pending the proceedings contemplated by the action of the General Assembly of Virginia. I am one of those who will never despair of the Republic. I yet cherish the belief that the American people will perpetuate the Union of the States on some terms just and honorable for all sections of the country. I trust that the mediation of Virginia may be the destined means, under Providence, of accomplishing this inestimable benefit. Glorious as are the

memories of her past history, such an achievement, both in relation to her own fame and the welfare of the whole country, would surpass them all."

After the message had been read in the Senate, Mr. Mason of Virginia said, it was a great and honorable office which his honored and venerated State had undertaken. Should it unfortunately occur, however, either from impatience in the States that have separated, or from any undue and over-zeal in any department of the Federal Government, that the two sections should be brought into collision, there is an end of all negotiation. Men never negotiate in war. There must be a peace first. If there was any honorable Senator on the floor, or any citizen of any one of the States, who, under existing events, yet indulged the belief that an attempt to enforce the Federal laws in the States that have declared themselves beyond the Federal jurisdiction was not an act which would lead to war, and to war alone, never was such a Senator or such a citizen more deluded. He had occasion to say so heretofore, "I speak it now, sir, certainly not in anger; but I should speak it in sorrow, if I could be brought to contemplate such an event."

He thought that there were evidences—daily evidences—from that section of the country which had separated itself from this Union, that, while the authorities there have thought it necessary, as measures of precaution, to possess themselves, in the several States, of the forts, arsenals, navy-yards, and military materials found within their limits, acknowledging them to be a portion of the public property all the time, they have done so with no intent on their part to make war; they have done so, as they conceived, only as measures of necessary, prudent precaution, in the event that any war should unhappily be waged on them. And he thought honorable Senators on the other side would respond to the declaration, when he said that there was not one of those States, when they shall be restored to the Union, if they shall be restored, or when the Government shall be reconstructed, if it shall be reconstructed, or when peace shall be concluded, if war shall now follow, who will not account for every dollar of the public property that they have taken.

A great number of petitions and memorials had been presented in both Houses of Congress relative to the crisis of the country, and for the most part praying Congress to adopt such measures as would result in peace and permanent union. Resolutions also were from time to time adopted by the Legislatures of many of the States and laid before Congress.

Among the memorials thus presented was one from the city of New York, which was forwarded through a committee of twenty-five citizens, and which prayed "for the exercise of the best wisdom of Congress in finding some plan for the adjustment of the troubles which disturb the peace and happiness and endanger

the safety of the nation." It also favored the Border State plan. Mr. Seward, of New York, in presenting the memorial to the Senate, stated that he had been asked by the committee to support the petition, but he had not seen a proposition from either North or South which would be satisfactory to the other. He deemed it his duty to hold himself open and ready for the best adjustment, but he would express to the public and to the Senate the commendable spirit in which the committee came. He then proceeded to say :

"I have asked them, also, in return for performing my duty on this occasion, that when they have arrived at home, they will act in the same spirit and manifest their devotion to the Union above all other interests and all other sentiments, by speaking for the Union, by voting for the Union, and, if it should be demanded, by lending and even giving their money for the Union, and fighting, in the last resort, for the Union, taking care always that speaking goes before voting, voting goes before giving money, and all go before a battle, which I should regard as hazardous and dangerous, and therefore the last, as it would be the most painful measure to be resorted to for the salvation of the Union.

"This is the spirit in which I have determined for myself to come up to this great question, and to pass through it, as I sincerely believe we shall pass through it. For, although this great controversy has not been already settled, I do not, therefore, any the less calculate upon and hope and expect that it will be peacefully settled, and settled for the Union. I have not been so rash as to expect that, in sixty days which have been allowed to us since the meeting of Congress—and I will be frank, sir, in saying that I have not expected that, in the ninety days which are the allotted term of Congress—reason and judgment would come back to the people, and become so pervading, so universal, as that they would appreciate the danger and be able to agree on the remedies. Still, I have been willing that it should be tried, though unsuccessfully; but my confidence has remained the same, for this simple reason: that, as I have not believed that the passion and frenzy of the hour could overturn this great fabric of constitutional liberty and empire in ninety days, so I have felt sure that there would be time, even after the expiration of ninety days, for the restoration of all that had been lost, and for the reestablishment of all that was in danger."

Mr. Mason, of Virginia, replied: "I was about to remark, that at this time, when the Government is in process of disintegration, when there are six States which have separated themselves from the Union, as they say, finally and forever; when other States not yet separated, are arming themselves—arming upon a large scale; when my own State appropriated, twelve months ago, in expectation of what seems now to be occurring, the very large sum

from a State treasury, in advance, of \$500,000 to purchase arms to arm her people; when here, within a few days, another appropriation was made of \$1,000,000 for the same purpose, to arm her people; when we find that other States have done the same thing; when we find, in my own State and in other States, also, that the people are arming themselves, that the counties and the towns, exercising their municipal authority, are raising money upon the credit of the counties and the towns to arm the people; when that state of things is going on, and the public mind is engaged, in those of the slave States that have not yet separated, and in some of the free States, in devising a possible mode by which the American mind can again be united in a common Government, what do we hear from the honorable Senator from New York? What do we hear from that Senator who occupies the position before the country which is occupied by that Senator, acknowledged at the head of the political combinations which are to bring into power the incoming Administration, said, through the newspaper press, to be the probable right hand of the new Administration? What do we hear from him?

"Why, the honorable Senator, amidst the maze of generalities which marked his speech, did march up to the line and tell us what his policy was; and I assume it is to be the policy of those whom he has so aided to bring into power. What was it? His recommendation to those gentlemen who have sent this enormous petition here, not adopting their views, not looking to any amendment to the Constitution whatsoever, is given in four distinct propositions of what is to be the policy of those whom he is to lead, if history does not misinform us, after the 4th of March next. What is it? He recommends them, when they go home, to employ themselves in the great work of restoring the breaches that have been made in the Government. How? Why, said he, speak for the Union. That is the first. Next, vote for the Union. That is the second great measure. What is the third? Give money for the Union. And the last? Fight for the Union. These are the four measures proposed by the honorable Senator from New York to heal this gaping breach in the Government."

Mr. Seward, in answer, said: "I contemplated, sir, after the expiration of all the multitudinous trials that are making to save this Union by compromise, a convention of the people of the United States, called in constitutional form; and when that shall have been held, or refused to be held, and found to be impossible to obtain; if then, this Union is to stand or fall by the force of arms, I have advised my people to do as I shall be ready to do myself—stand in the breach, and stand with it or perish with it."

Mr. Mason responded: "Then we have it definite, Mr. President. I want to bring the honorable Senator, the exponent of the new

Administration, to the policy which is to be adopted. I understand from him now, that remedies failing through the Constitution by the conventions of the States, his recommendation is battle and bloodshed to preserve the Union; and his recommendation to his people is that they shall contribute the money which shall march the army upon the South; for what? To preserve the Union? It is gone; it is broken; there is no Union now in this country. Those States that are out of the Union have broken it as completely as if, instead of six or seven, there were now all the fifteen slave States with them; and if this battle is to be fought, it is to be fought against them upon their own soil, for the purpose of reducing them to colonies and dependencies. It cannot mean any thing else. The honorable Senator is too wise and experienced a statesman, the honorable Senator knows too well the construction and theory of this Government, to think for one moment that when you have subjugated the people of the States you have restored the Union. No, sir, —"

Mr. Seward answered: "I look, sir, to no such contingency as seceded States and a dis-severed Union. I look to no such condition of things. The honorable Senator and I differ in regard to the future. He, with an earnest will and ardent imagination, sees this country hereafter rent and dis-severed, and then recombined into separate confederacies. I see no such thing in the future; but I do see, through the return of reason and judgment to the American people, a return of public harmony, and the consolidation of the Union firmer than ever before. The honorable Senator from Virginia can very easily see that we may differ in our anticipations and expectations of the future, because we differ so much in regard to the actual, living present. Here I am, sir, in the Union of the United States, this same blessed, glorious, nobly-inherited, God-given Union; in the Senate chamber of the United States, pleading for it, maintaining it, and defending it."

The debate was further continued, and other Senators took a part in it.

Mr. Douglas, of Illinois, in allusion to the votes of the Senate, said that extremes North and South often meet, and unite in resisting the efforts of the friends of the Union, of concession, of conciliation, and of harmony, when their joint efforts, though prompted by different motives, lead to the same end—inevitable disunion, now and forever.

Mr. Johnson, of Arkansas, said the impression that there is no hope of an adjustment has been derived from the action in this chamber, and there is not a man here who is not conscious of the fact.

Mr. Wigfall, of Texas, in reply to the remark of the Senator from Illinois, said: "Why, I tell the Senator that that great principle of his (non-intervention) disrupted the Democratic party, and has now disrupted the Union; and

but for him and his great principle, this day a Democrat would have been President, and the Union saved. That is the fact about the matter; and when a Senator who has contributed more than any man in the Union, according to his ability, to the destruction of the country, comes here and charges me with complicity in dissolving the Union, and charges in terms that extremes meet, and that I and my friends, and the Free-Soilers on the other side, are coöperating for the same purpose; that we are voting together, and that we take great comfort in all these exhibitions of the impossibility of saving the Union, I tell him that he is not the man to come here and preach to anybody."

The peace propositions of Virginia were next taken up, and Mr. Clingman, of North Carolina, expressed his views of all these propositions in these few words: "I have and shall continue to vote for any measure that may improve the existing *status*, whether it, in my judgment, be all that the South is entitled to ask or not, leaving to my constituents and other Southern States the right to determine how far it satisfies them. But I have felt all the time, that unless some movement came from the other side of the chamber, or was at least taken up by them, any effort on our part would be futile. Even though every Democratic member should vote for a proposition, and that should chance to be a majority, yet we could not here pass a proposition for an amendment to the Constitution by the necessary two-thirds vote, nor carry any proposition through the House of Representatives, much less cause its adoption by the free States."

Of the future, he thus predicted: "I say, Mr. President, that one of three contingencies is inevitably before you: either a settlement of these difficulties such as will be satisfactory and arrest the movement; or a recognition of a peaceable separation; or, thirdly, war. No human ingenuity can find any other result. The best course, undoubtedly, would be to adjust things now, if possible, on a satisfactory and permanent basis. The next best is a peaceable recognition of the independence of the seceding States; and the worst of all, but inevitable if neither of the others be taken, is war. I tell gentlemen, if they sit still war will make itself; it will come of its own accord."

On closing his remarks, Mr. Clingman thus referred to the subject of peace or war: "A Roman ambassador, addressing those to whom he was sent, said: 'I carry in my bosom peace and war; which will you have?' Reversing his declaration, I say to Senators on the other side of this chamber, 'You carry in your bosoms, for the country, peace or war; which do you mean to give it?' If you say war, then our people will meet you, and struggle with you all along the lines, and wherever else you come."

To these remarks Mr. Hale of New Hampshire, replied: "I want to protest here, for one of the Northern States, against the tone of the Senator's speech, in which, looking to war, he talks to us as if we were the war-making power. Have we seized upon any forts? Have we taken any arsenals, and seized upon any mints? Have we done one single act looking to aggression? Have we fired into any flag, State or National? On the other hand, is not the condition of the Northern States one that subjects them, in the eyes of the world, to the charge of pusillanimity and reproach for wanting manliness in repelling the attacks that have been made upon them? Gentlemen come here and preach peace to us as if we were the aggressive party; as if the responsibilities of war must rest on us. Why, sir, if we have any of the responsibilities of war resting upon us, it will be by a course of conduct which subjects us, in the eyes of the world, to the imputation of cowards—that lies still and invokes aggression."

The inflammable state of the feelings of the Southern people had already been very distinctly manifested. On the last day of December, orders were issued from the War Department for the purpose of sending troops South. Late in the night, perhaps as late as eleven o'clock, these orders were countermanded; but in the mean time, telegraphic despatches had been sent to the South, and a number of forts were taken. In North Carolina, on the day following, the 1st of January, there was a similar movement on foot, and a despatch went down which prevented it, by giving assurances that the orders had been countermanded. Not long afterwards the sending of the *Star of the West* occurred, other reports of hostile movements went abroad, and the people occupied some of the forts in North Carolina; but they were informed again that there was no purpose on the part of the Government to reinforce them, and they were abandoned.

The Naval Appropriation bill next came up before the Senate. One of its provisions authorized the construction of seven steamships of war, when

Mr. Mason, of Virginia, rose and said: "Now, sir, why is the navy to be increased? Is there any demand for these steamers? Is there any such pressing necessity upon the military arm of the country to be strengthened, as to induce Congress to borrow money at the ruinous rates we are now compelled to pay, to strengthen it? I ask Senators on the other side to state what the necessity is? Is there any apprehension of war? Is there any apprehension that this Government may find itself unable to defend itself on any sudden emergency, that will justify us in borrowing money at this ruinous rate for the purpose now of increasing the navy?"

Mr. Grimes, of Iowa, replied: "If the Senator will allow me, I will say that it is recommended now by the Secretary of the Navy; and, furthermore, that since the last session of

Congress there has been a survey of the naval vessels of the United States, many of which have been found to be utterly worthless; and that, I apprehend, is one reason why a good many gentlemen, who were recorded as having voted against the proposition last year, voted as they did on the present occasion."

Mr. Mason responded: "What is the public emergency that calls for this increase of the naval force when we have no war? Our commerce is not unprotected; we hear of no complaint there. We have no unredressed grievances in any part of the world, that I know of, that call for an increase of the navy. Why, then, when we are borrowing money at a rate of usance unknown to this Government, is it asked that we should expend \$1,500,000 for the increase of the navy, and the increase of this peculiar kind of naval vessels—vessels of small draught of water, and which are to be, as the amendment requires, heavily armed in proportion to their draught and size? Why, sir, we know from the newspapers, that a bill is about to be introduced, or has been introduced, into the other branch of Congress, providing for a military surveillance upon those States that are no longer portions of this Confederacy. We have had a bill introduced into the Senate by the honorable Senator from Vermont, authorizing the President of the United States, under circumstances stated in the bill, to discontinue the ports of entry—

Mr. Collamer: "That bill has no warlike purpose whatever. It is to avoid that. It is to declare them no longer ports of entry, so that ships will not make clearances to them. It will prevent the necessity of any military force there."

Mr. Mason: "I have not spoken one word, Mr. President, of the reasons that induced the honorable Senator to introduce that bill. I am speaking of the fact. The honorable Senator has introduced a bill giving authority to the President, under certain circumstances stated in the bill, to discontinue ports of entry. Very well. I speak of the fact only. What it may lead to is another question."

Referring then to the condition of the seceded States, Mr. Mason continued: "Now, sir, other gentlemen may shut their eyes to these facts, if they think it wise to do so. I come from that part of the country; I cannot shut my eyes to the existing facts. I know that, whatever may be the design of the honorable mover of this proposition, if these steamers are built, they will be part of the naval armament of this Confederation, to be used for any military purposes that the public exigencies may require; and I know that the proposition of the honorable Senator from Vermont will lead to this, whatever he intends.

"It is high time, sir, for the Government to take into consideration the state of things on our late southern borders, and determine what those relations are. They should meet it like

men. Do not attempt to cover it up and to evade it or disguise it; meet it in full front; declare that they are in rebellion, and they are to be put down; or declare that they have the right of separation, and are to be acknowledged in their separation. This is my view of that matter. Those States being out, having actually confederated, having assumed a nationality, I should consider it was the bounden duty of the Government, no matter what question separates them—whether it be a slave question, or a question of domestic economy, or any thing else—to acknowledge the separation, and to let them go in peace; but until those relations are settled satisfactorily, until we know whether the arm of this Government is to be raised against them, by no vote of mine shall there be any additions either to the naval or military service of the country.”

Mr. Fessenden, of Maine, replied: “The honorable Senator says this will not do; do one thing or another; declare war against them, if you please, or else declare that they are no longer a part of the United States. Sir, I do not choose to do either in the present state of affairs. I propose simply to do that which is necessary for our own protection and our own advantage. I repeat, I am acting, as yet, as a Senator of the United States. I am legislating for the United States, and not for South Carolina, or for any seceded State; and as long as I sit here, as I said before, I take it that is my duty. What, then, does the United States want to do? It wishes to collect its own revenue, and it wishes for force enough, if force is necessary, to accomplish that purpose. I am not at all frightened by the term ‘force,’ and this talk about the coercion of a State. The time may come when it will be necessary for us, to use the language of the honorable Senator, to speak plainly. I am ready to speak plainly now upon that subject; and I say most distinctly, if the time ever does come, in my judgment—I speak for one—when it will be necessary to use force in order to execute the laws of the United States under the Constitution anywhere and everywhere within what is properly the United States, I am perfectly ready to do it.”

Mr. King, of New York, followed and said: “Mr. President, this Government cannot be peaceably destroyed, or overthrown, or divided. Before that should be done, the sovereigns themselves would come here, if their representatives could prove recreant in their defence of it. It is well that it should be understood that the people of this country will never give their consent to a peaceable destruction and dissolution of it. Sir, I do not believe it can be destroyed. I would use forbearance, patience; I would extend every degree of kindness, and make every effort for conciliation with these people; but to admit their right to divide the country, to take a State out of the Union, or to destroy it; and, last of all, that they should peaceably have the right to break it up, I should never agree to.

“I do not know what these gentlemen consider peace. They have armed themselves by means which are well known to the whole country. They have illegally taken the arms belonging to this Government from our arsenals. Cabinet officers and members of the Senate have been in complicity in this treason. A foul and infamous plot, I have no doubt, has existed to destroy this Government. Providence, rather than the skill or attention of the people, has arrested it.

“I tell these gentlemen, in my judgment, this treason must come to an end—peacefully, I hope; but never, in my judgment, peacefully by the ignominious submission of the people of this country to traitors—never. I desire peace, but I would amply provide means for the defence of the country by war, if necessary.”

Mr. Green, of Missouri, answered: “To what purposes are these steamers to be applied? Why is it at this time, when our resources are less than they have been for many years, when our credit is lower than it has been for a long number of years, why is it now deemed necessary to borrow \$1,200,000 to build seven new steamers? This question would have been pertinent; it is now pertinent; it will remain pertinent; but the purpose was disclosed in the speech of the honorable Senator from New York. I do not mean the thin, keen-visaged, eagle-eyed Senator, but I mean the bellicose Senator, (laughter,) whose voice is still for war, whose object is to involve us in serious, deadly conflict; and he says he wants them to coerce sovereign States.”

The other propositions which had been introduced to the Senate, having in view a settlement of difficulties, may be as well noticed here. The debates occasioned by them were generally different aspects of one great subject, and strictly form a part of the preceding discussions. Other measures, such as the admission of Kansas, and the organization of governments for the other territories, are entitled to be placed in this class, as the discussions upon them embraced many views relating to the crisis in public affairs.

Three amendments to the Constitution were presented by Mr. Johnson, of Tennessee. One proposed to change the mode of election of President and Vice-President of the United States from the electoral college to a vote substantially and directly by the people. The second proposed that the Senators of the United States shall be elected by the people, once in six years, instead of by the Legislatures of the respective States. The third provided that the Supreme Court shall be divided into three classes: the term of the first class is to expire in four years from the time that the classification is made; of the second class in eight years; and of the third class in twelve years; and as these vacancies occur they are to be filled by persons chosen—one-half from the slave States, and the other half from the non-slave-

holding States, thereby taking the judges of the Supreme Court, so far as their selection goes, from the respective divisions of the country; also that either the President or Vice-President at each election shall be from the slaveholding States. These propositions were brought forward as calculated to obviate the difficulty or complaint manifested in different portions of the country.

Whilst aiming at the same object as his Southern friends, he hoped to secure it by different means. Secession was no remedy for the evils complained of. "I think that this battle ought to be fought not outside but inside of the Union, and upon the battlements of the Constitution itself. So far as I am concerned, and I believe I may speak with some degree of confidence for the people of my State, we intend to fight that battle inside and not outside of the Union; and if anybody must go out of the Union, it must be those who violate it. We do not intend to go out. It is our Constitution; it is our Union, growing out of the Constitution; and we do not intend to be driven from it or out of the Union."

He was opposed to seceding or breaking up the Union until all honorable means had been exhausted in trying to obtain from the Northern States a compliance with the spirit and letter of the Constitution and all its guarantees. He denied the right of any State to secede from the Union without the consent of the other States which made the compact. Believing that the opinion that a State had a right to secede, had resulted from the Virginia resolutions of 1798 and 1799, he examined the subject and said: "Take the resolutions; take the report of Mr. Madison upon them; take Mr. Madison's expositions of them in 1832 and 1833; his letter to Mr. Trist; his letter to Mr. Webster; his letter to Mr. Rives; and when all are summed up, this doctrine of a State, either assuming her highest political attitude or otherwise, having the right of her own will to dissolve all connection with this Confederacy, is an absurdity, and contrary to the plain intent and meaning of the Constitution of the United States. I hold that the Constitution of the United States makes no provision, as said by the President of the United States, for its own destruction. It makes no provision for breaking up the Government, and no State has the constitutional right to secede and withdraw from the Union.

"I know that the inquiry may be made, how is a State, then, to have redress? There is but one way, and that is expressed by the people of Tennessee. You have entered into this compact; it was mutual; it was reciprocal; and you of your own volition have no right to withdraw and break the compact, without the consent of the other parties. What remedy, then, has the State? It has a remedy that remains and abides with every people upon the face of the earth—when grievances are without a remedy, or without redress, when oppression

becomes intolerable, they have the great inherent right of revolution, and that is all there is of it.

"Sir, if the doctrine of secession is to be carried out upon the mere whim of a State, this Government is at an end. I am as much opposed to a strong, or what may be called by some a consolidated Government, as it is possible for a man to be; but while I am greatly opposed to that, I want a Government strong enough to preserve its own existence; that will not fall to pieces by its own weight, or whenever a little dissatisfaction takes place in one of its members. If the States have the right to secede at will and pleasure, for real or imaginary evils or oppressions, I repeat again, this Government is at an end; it is not stronger than a rope of sand; its own weight will tumble it to pieces, and it cannot exist."

This position was fortified by reference to the views of Mr. Jefferson, Chief Justice Marshall, Mr. Webster, and General Jackson.

"In travelling through the instrument we find how the Government is created, how it is to be perpetuated, and how it may be enlarged in reference to the number of States constituting the Confederacy; but do we find any provision for winding it up, except on that great inherent principle that it may be wound up by the States—not by a State, but by the States which spoke it into existence—and by no other means. That is a means of taking down the Government that the Constitution could not provide for. It is above the Constitution; it is beyond any provision that can be made by mortal man.

"The Constitution was intended to be perpetual. In reference to the execution of the laws what do we find? As early as 1795, Congress passed an excise law, taxing distilleries throughout the country, and what were called the whiskey boys of Pennsylvania resisted the law. The Government wanted means. It taxed distilleries. The people of Pennsylvania resisted it. What is the difference between a portion of the people resisting a constitutional law, and all of the people of a State doing so? But because you can apply the term coercion in one case to a State, and in the other call it simply the execution of the law against individuals, you say there is a great distinction. We do not assume the power to coerce a State, but we assume that Congress has power to lay and collect taxes, and Congress has the right to enforce that law when obstructions and impediments are opposed to its enforcement. Such was the action of Washington, and similar was the action of Jackson in 1832."

In considering the circumstances which might arise in consequence of secession, he alluded to the free navigation of the Mississippi, when Mr. Slidell, of Louisiana, took occasion to say that he "did not know of a citizen of any southwestern State bordering on the Mississippi who does not acknowledge the propriety and necessity of extending to every citizen of

the country whose streams flow into the Mississippi the free navigation of the river, and the free interchange of all of the agricultural products of the valley of the Mississippi. Such a course is dictated not only by every consideration of justice, but by the recognized and well-understood interests of the southwestern States. On this point, I can speak with entire confidence of the sentiment of Louisiana."

The right has been claimed by the United States to occupy foreign territory on the ground of its importance to the safety of the institutions of the country. On this principle the Government acted in the case of Florida. This was the principle announced at Ostend, where the American ministers to the three principal courts of Europe met and considered the grounds upon which the Government would be justified in acquiring Cuba. How would this doctrine bear upon Louisiana when out of the Union and holding the key to the Gulf—the outlet of the commerce of the West?

Mr. Lane, of Oregon, replied that the attempt to enforce the laws in South Carolina, when she was not a member of this Confederacy, would bring about civil war. No authority to conquer States and hold them as provinces is found in the Constitution. No such power is conferred on the Government. He exclaimed: "I am a man of peace. I dislike war. I would never make it or encourage it, except in defence of right, in defence of honor, in defence of truth and justice. I would go into battle and fight for the right; but I will never force war upon a people, or inaugurate it, unless it is authorized, and unless it is my duty to do so in defence of right; but certainly I would not make war to conquer a people contending simply for a right that has been refused, for a right that they cannot have in the Union, and for a right that they can have out of the Union, even if tyrants, or rulers that would be tyrants, should undertake to coerce them. The man that would do it, the man that would inaugurate it, would drench this country in blood."

In his opinion, reorganization was the only means to restore the country. "If we would bring about that reorganization, if we would rebuild the fabric that has been stricken down, we must maintain peace. Inaugurate force, inaugurate war in this country, and all hope of reconstruction has vanished forever."

He argued that if the party that succeeded in the late triumph had indicated to the country that they were now ready to see justice done; that they were ready to extend to every Southern State the rights they claim for themselves; if they had, at the beginning of this Congress, said—"Amendments of the Constitution will be acceptable to us, and ratified by our people, extending justice to all," to-day the Union would have been safe, and secession would not have been possible.

Declaring this to be the greatest Govern-

ment ever created by the wit of man, he thus stated his view of the cause of its destruction:

"I look upon our Constitution as the best system of government ever formed by man. I would to God it could be maintained as it is. I wish that equality could prevail. I would to Heaven that justice could be dealt out fairly to every man of every State of this Union, as provided by that great system of government. But it cannot be so. Public opinion is in its way. The Northern sectional party is opposed to it; and you cannot have rights equal with them under the Constitution as it is. They break it up, not we. They destroy it by refusing to comply with its provisions. They trample it under foot, because they will not do justice to their friends. They claim the territory, though won by the blood of the gallant Southern men as well as the Northern men. They refuse to the Southern man one inch of territory for his property, though it cost him his money and his blood."

Mr. Benjamin, of Louisiana, declared that the present state of things had been foreseen for years. South Carolina had dissolved the Union which connected her with the other States of the Confederacy, and proclaimed herself independent. He said: "We, the representatives of those remaining States, stand here to-day, bound either to recognize that independence or to overthrow it; either to permit her peaceful secession from the Confederacy, or to put her down by force of arms. That is the issue. That is the sole issue. No artifice can conceal it. No attempts by men to disguise it from their own consciences, and from an excited or alarmed public, can suffice to conceal it. Those attempts are equally futile and disingenuous."

His anticipations of the extent to which secession would reach embraced all the slaveholding States. "Next week, Mississippi, Alabama, and Florida will have declared themselves independent; the week after, Georgia; and a little later, Louisiana; soon, very soon, to be followed by Texas and Arkansas. I confine myself purposely to these eight States, because I wish to speak only of those whose action we know with positive certainty, and which no man can for a moment pretend to controvert. I designedly exclude others, about whose action I feel equally confident, although others may raise a cavil."

That South Carolina had a right to take the course she pursued, the Senator attempted to prove from the admitted right of all men to self-government, and having this right she formed a compact with the other States, which had been broken on the part of some of them, and was therefore broken on the part of all. Between the right to secede and the right of revolution, he thus discriminated: "I say, therefore, that I distinguish the rights of the States under the Constitution into two classes: one resulting from the nature of their bargain; if the bargain is broken by the sister States, to

consider themselves freed from it on the ground of breach of compact; if the bargain be not broken, but the powers be perverted to their wrong and their oppression, then, whenever that wrong and oppression shall become sufficiently aggravated, the revolutionary right—the last inherent right of man to preserve freedom, property, and safety—arises, and must be exercised, for none other will meet the case.”

The act of a State absolves all its subjects, says the Senator, addressing the Republican side, and when you deny that you will coerce a State, but assert that you mean to execute the laws against individuals, it is an absurdity. “This whole scheme, this whole fancy, that you can treat the act of a sovereign State, issued in an authoritative form, and in her collective capacity as a State, as being utterly out of existence; that you can treat the State as still belonging collectively to the Confederacy, and that you can proceed, without a solitary Federal officer in the State, to enforce your laws against private individuals, is as vain, as idle, and delusive, as any dream that ever entered into the head of man. The thing cannot be done. It is only asserted for the purpose of covering up the true question, than which there is no other; you must acknowledge the independence of the seceding State, or reduce her to subjection by war.”

Mr. Baker, of Oregon, rising for the final time to speak on the floor of the Senate, after a few preliminary words, thus proceeded: “It is my purpose to reply, as I may, to the speech of the honorable and distinguished Senator from the State of Louisiana. I do so, because it is, in my judgment at least, the ablest speech which I have heard, perhaps the ablest I shall hear, upon that side of the question, and in that view of the subject; because it is respectful in tone and elevated in manner; and because, while it will be my fortune to differ from him upon many, nay, most of the points to which he has addressed himself, it is not, I trust, inappropriate for me to say that much of what he has said, and the manner in which he has said it, has tended to increase the personal respect—nay, I may say the admiration—which I have learned to feel for him. And yet, sir, while I say this, I am reminded of the saying of a great man—Dr. Johnson, I believe—who, when he was asked for his critical opinion upon a book just then published, and which was making a great sensation in London, said: ‘Sir, the fellow who has written that, has done very well what nobody ought ever to do at all.’

“The entire object of the speech is, as I understand it, to offer a philosophical and constitutional disquisition to prove that the Government of these United States is, in point of fact, no Government at all; that it has no principle of vitality; that it is to be overturned by a touch; dwindled into insignificance by a doubt; dissolved by a breath; not by maladministration merely, but in consequence of organic defects, interwoven with its very existence.

“But, sir, this purpose—strange and mournful in anybody, still more so in him—this purpose has a terrible significance now and here. In the judgment of the honorable Senator, the Union is this day dissolved; it is broken and disintegrated; civil war is a consequence at once necessary and inevitable. Standing in the Senate chamber, he speaks like a prophet of woe. The burden of the prediction is the echo of what the distinguished gentleman now presiding in that chair has said before—(Mr. Iverson in the chair)—‘Too late! too late!’ The gleaming and lurid lights of war flash around his brow, even while he speaks. And, sir, if it were not for the exquisite amenity of his tone and manner we could easily persuade ourselves that we saw the flashing of the armor of the soldier beneath the robe of the Senator.

“My purpose is far different; sir, I think it is far higher. I desire to contribute my poor argument to maintain the dignity, the honor of the Government under which I live, and beneath whose august shadow I hope to die. I propose, in opposition to all that has been said, to show that the Government of the United States is in very deed a real, substantial power, ordained by the people, not dependent upon States; sovereign in its sphere; a Union, and not a compact between sovereign States; that, according to its true theory, it has the inherent capacity of self-protection; that its Constitution is a perpetuity, beneficent, unfailing, grand; and that its powers are equally capable of exercise against domestic treason and against foreign foes. Such, sir, is the main purpose of my speech; and what I may say additional to this, will be drawn from me in reply to the speech to which I propose now to address myself.”

He then proceeded to deny that this Government was a compact, that there was such a right as that of secession, or that the grievances complained of by the South, were sufficient to justify their proposed course of action.

These propositions went to the Committee of Thirteen; and the subsequent debate embraced all the measures before that committee. No separate and favorable action was taken upon them in the Senate.

The following resolution, presented in the Senate by Mr. Jefferson Davis, of Mississippi, previous to his retirement, contains in a few words the entire claim made by Southern members of what was necessary to secure their rights. It was ordered to be printed.

Resolved, That it shall be declared, by amendment of the Constitution, that property in slaves, recognized as such by the local law of any of the States of the Union, shall stand on the same footing in all constitutional and Federal relations as any other species of property so recognized; and, like other property, shall not be subject to be divested or impaired by the local law of any other State, either in escape thereto, or of transit or sojourn of the owner therein; and in no case whatever shall such property be subject to be divested or impaired by any legislative act of the United States, or of any of the territories thereof.

It does not appear to have been called up or discussed before the Senate.

The admission of Kansas, as a State of the Union, was made a question in the Senate by the report of a bill for that purpose. But the crisis of the country was the absorbing topic of the remarks of all speakers.

Mr. Nicholson, of Tennessee, expressed his conviction that the sentiments of a majority of the Northern people on the subject of slavery, as an abstract question, were embraced in these three propositions:

1. That slavery, as it exists in the Southern States, is a moral as well as social and political evil.
2. That the owners and their slaves are created equal; that they are endowed alike with the inalienable rights of life, liberty, and the pursuit of happiness; and that to secure these rights equally to both governments are instituted, deriving their just power from the consent of the governed.
3. That as the owners and their slaves are created equal, the former cannot rightfully acquire or hold dominion over, or property in, the latter without his consent.

He said "that, under the freedom of speech and the freedom of conscience, they have a full and perfect right to entertain these opinions. It is no cause of quarrel between us and them. On the other hand, the South entertain directly antagonistic opinions as matters of conscience and as matters of political opinion, on each one of these propositions. They claim the right under the same high sanction to entertain these opinions, and we say that it is no cause of quarrel, and should be none.

"What we now complain of is, that in the year 1856 these questions, known to be questions of antagonism, morally and socially, if not politically, incapable of reconciliation between the North and South, were seized upon by political leaders at the North and incorporated as the basis, as the 'central idea,' of a political association which, rising upon the strength of this prevailing sentiment at the North, has finally taken possession of the Government of the country. Mr. President, the first fatal stab to this Union was made at the Philadelphia convention, in 1856, when these propositions were incorporated as a part of the Republican platform. There was the birth of Republicanism, and there was the birth of organized sectionalism; its legitimate fruits are agitation, dissension, alienation, and, finally, disunion, in some form or other. In my honest conviction, there is to be found the true origin of disunionism, and there the real responsibility for that catastrophe.

"Now, Mr. President, let us see what it is in this platform that is so offensive to the South; for the real foundation of our complaints is to be found here. Gentlemen of the North seem not to comprehend this. They even take up the idea that it is a mere suspicion that some wrong may be done; some, that it is merely because we were defeated in the election; because we have lost our candidates; because we have failed in holding the Government which

we have held so long, that we manifest such deep concern. I tell them, in all candor, that they are mistaken in this. If Mr. Lincoln had entertained opinions and stood upon a platform that did not, in our estimation, involve our final destruction—I mean the destruction of our Southern interests and institutions—we should have acquiesced in his election as cheerfully as in that of any other man. What, then, is it in this platform to which we take exception? The first thing is, that it recognizes the general principle that ALL men are created equal; and, in recognizing this, asserts, as a fact, that Governments are made for the purpose of securing alike the rights of life and liberty and the pursuit of happiness to the slave and to his owner. That general principle, if applied in the States, would liberate four million slaves. This is a necessary deduction from the assertion of the principle of the equality of the two races. But the Republican party, I must do them the justice to say, do not in their platform make the application of this general principle to the States. They confine it to those places within which Congress has, according to the platform of 1856, 'exclusive jurisdiction.' Then, the position is this: you concede that in the States we have a right to enjoy this property, and you profess to be willing that this constitutional guarantee shall be maintained; yet, in so doing, you avow a principle to be applied to all other places within which Congress has jurisdiction, which principle fixes a stigma on every Southern man who is the owner of a slave; which principle would, if applied, (and which, if you had the power, it is fair to infer, you would apply,) would set free every slave of the South. Without undertaking to say that this would be done without regard to other consequences than the loss of property, yet to a Southern mind these other consequences are so frightful, that when a party plants itself on a principle so alarming and so destructive, if carried out into all its legitimate results, we can but feel that our security is small, when all we have to repose upon is the professions of that party, that it will regard our rights within the States, when the same party tells us that rights which we regard the same outside of the States, it intends to disregard.

"Mr. President, these, in my estimation, are the grounds on which the Southern mind is now resting, and upon which the Southern people have come to the settled conviction that the election of Mr. Lincoln to the Presidency, on the principles laid down in the Republican platform, is tantamount to a declaration of war against an institution which, in the South, is identified with all our interests, with all our happiness, with all our prosperity, socially, politically, and materially. This is our conviction, and this conviction is strengthened when we turn to the antecedents, politically, of the candidate whom you have succeeded in electing."

In his opinion the overwhelming sentiment of the South is that of demanding guarantees

which shall be unalterable—that shall recognize distinctly and fully the rights of the Southern man to his slave as property, and other points of much importance connected with the fugitive slave-law. This the South demands, or it demands secession or revolution. He then alluded to a border State Convention, to determine on these guarantees as a matter of extreme importance.

No direct reply was made to this speaker. Mr. Collamer, of Vermont, who followed, confined his remarks strictly to the question of the admission of Kansas. Much time was afterwards occupied in the details of the bill, and it was passed by the Senate—ayes, 36; noes, 16.

Subsequently the bill to provide a temporary government for the territory of Arizona being before the Senate,

Mr. Brown, of Mississippi, moved an additional section, providing that the act of the Legislature of New Mexico, providing for the protection of property in slaves, be extended to Arizona. To this motion Mr. Trumbull, of Illinois, moved an amendment, providing that the law of Mexico, respecting African slavery, as it existed in said territory upon its acquisition, should remain unchanged.

Mr. Doolittle, of Wisconsin, then took the floor, and declared that he should support the amendment. The people of this country have lived together in peace for more than seventy years. That peace has rested upon two fundamental ideas: first, that the Federal Government and the citizens of the free States shall make no aggression upon slavery in the States; and the other, equally fundamental, that neither the Federal Government nor the slaveholders of the slave States shall make any aggressions upon or undertake to overturn freedom in the territories. Upon these grounds the people may live for generations to come; but if the citizens of the free States or the Federal Government shall undertake, directly or indirectly, to overturn slavery in the States where it exists, or if the citizens of the slave States or the Federal Government shall undertake to overturn freedom in the territories, they cannot have peace.

After examining the Constitution on the subject of slavery, and the objections urged to the Republican platform by Senator Nicholson, he emphatically declared his sentiment thus: "I say to these gentlemen that, upon that idea that the Constitution establishes slavery, you cannot have peace on the slavery question; and you may just as well know it first as last. The people of the United States do not believe that the Constitution is, and will never consent that it shall be altered so that it will become, a slavery-extending Constitution by force of its own terms. We do not ask either that you put upon it that construction which shall abolish slavery in any State or in any territory. We say, let the Constitution be as our fathers made it; let it be neutral—neither affirming nor denying, and then you can have peace."

After discussing the various causes of irritation, he observed that those men who are regarded as the Abolitionists in this country; those men who have denounced the Constitution as being a covenant with hell, because they were bound to return these fugitives to slavery, stand looking on with an anxiety and intensity of interest which cannot be conceived. Their prayers go up, day and night, that this Union may be broken—that the free States of the North may no longer be compelled by the bond of Union to surrender the fugitive slaves; and proceeded by saying that the Constitution of the United States is the supreme law of the land, and every citizen of the United States, therefore, owes a double allegiance; one to this Federal Government, and another to the State in which he lives. He may be guilty of treason against either; he may be guilty of treason against both; but within their spheres each government is sovereign and supreme. If Congress steps beyond the powers delegated by the Constitution, to enact any law, it is absolutely void. If the State should step beyond the Constitution of the United States, which limits the power of the States to enact a law in conflict with it, it is simply unconstitutional, null, and void.

Mr. Benjamin, of Louisiana, wished to ask the gentleman from Wisconsin, if, in his opinion, under that form of government a citizen can be placed, by the conflict between these two governments, in a position where he must of necessity be guilty of treason to the one or the other, and therefore be bound to be hung any way?

Mr. Doolittle replied: "No, sir; he cannot; for if the State declares that to be treason which by the Constitution of the United States is void, as being in conflict with it, it is no treason; for the Constitution of the United States is the fundamental law of your State, and any act or declaration making it treason to do an act which is in conflict with the Constitution of the United States, cannot be made treason by the State, although they may declare it so."

Mr. Benjamin: "If they declare it so, and hang the citizen because they declare it so, what advantage would it be to him that in theory the decision was wrong?"

Mr. Doolittle: "The citizen must judge at his peril. If a law is enacted by Congress which is within the Constitution of the United States, the citizen will judge at his peril; and if he undertakes to break up the Government of the United States, and to be guilty of treason against the Government of the United States, any act which the State may declare in conflict with it is simply unconstitutional, null, and void."

Mr. Benjamin: "As a practical proposition, if the citizen of a State is, by the action of his State, which he cannot control, commanded to do a certain thing under the penalty of being hanged under the law of the State; and if that

thing is treason under the Constitution and laws of the United States, is it possible, under the law of nations, and under the common sentiments of humanity that govern mankind, for the Federal Government to undertake to act upon the individual who is placed under duress to commit treason, instead of first relieving him from that duress by making war upon the State?"

Mr. Doolittle: "If the man is to be hung if he does the act, and to be hung if he does not, undoubtedly, so far as he is concerned, it will make no great difference, (laughter;) but, as a question of law, if he does an act which is treason against the United States, and is compelled to do that act by a law of the State, the State law is void, because it is in conflict with the Constitution of the United States."

Mr. Benjamin: "Then would the hanging be void?"

Mr. Doolittle: "The hanging would be a certainty, (laughter;) it would not be void for uncertainty. I say, Mr. President, that where the Constitution of the United States speaks in language clear enough to delegate power to this Government, it is not in the power of one, ten, one hundred, or all the citizens of a State, to annul that act of Congress; because the Constitution and the acts in pursuance of it are the supreme law of that State, and binding on every citizen and upon all the citizens in that State, and every citizen must, of course, act at his peril."

Mr. Brown, of Mississippi, continued the debate by saying: "It seems to me that Northern Senators most perniciously overlook the main point at issue between the two sections of our Confederacy. We claim that there is property in slaves, and they deny it. Until we shall settle, upon some basis, that point of controversy, it is idle to talk of going any further. The Southern people have \$4,000,000,000 locked up in this kind of property. I do not mean to say that their slaves are worth so much; but their real property, their stock, their household goods, and all that belongs to them, are dependent upon the security of that kind of property."

"During the first forty years of our national existence, I undertake to affirm that no man, North or South, pretended to deny the great fact that there was such a thing as property in slaves. About 1818, 1819, 1820, this doctrine of refusing to recognize the right of property in slaves sprang up. It has continued to intensify from that day to this, until we find ourselves in our present condition. Now, I ask Senators on the other side if, looking at this thing calmly, they can for an instant suppose that, under any possible conceivable state of the case, we can voluntarily consent to live under a Government passing into the hands of a power, on the 4th of March, which openly and undisguisedly tells us that all this vast interest is to be outlawed under the common Government; that the \$4,000,000,000 invested in this property, the accumulation of centuries of hard labor, mus-

cular and physical labor, is going to be voluntarily abandoned—abandoned, I mean, so far as the action of this Federal Government is concerned; and that we, the inhabitants of fifteen States of this Union, will consent to live under a Government outlawed by its authority? That is the stern proposition which you submit to us. That is the proposition which we as sternly reject. Can we ever consent to remain in any Government, and know it only through its taxing power? Do rational men of the North suppose that nine million Southern people can ever consent to live in a Government outlawed by the Government, and known by it only when it wants tribute?"

"I have no hope, no expectation, of changing the judgment of Senators on the other side, and very little hope of ever reaching their constituents; but there are some stubborn facts in history, which it were well enough their constituents should come to learn."

Mr. Green, of Missouri, referring to the question before the Senate, observed that when Mexico ceded all this territory to us by the Gadsden treaty, no slavery existed there except the peonage; but the very moment it became ceded to us, and became part of the United States, it was under the Constitution of the United States. There is no such thing as a constitutional Government acquiring property, and yet that property not be subject to the Constitution; and it is a contradiction to say so. If we have the power to acquire, it is by virtue of our organization under the Constitution; and the moment you acquire it, it is subject to that Constitution.

Mr. Doolittle replied, that the Senator of Missouri assumed, as a proposition which ought not to be doubted, that the Constitution of the United States entered the territory acquired from Mexico, repealed the Mexican law abolishing slavery, and established a law in its favor. This proposition was in direct contravention of the decision of the Supreme Court of the United States in the Prigg case, in which they held expressly that "the state of slavery is deemed to be a mere municipal regulation, founded upon, and limited to, the range of the territorial laws." It was in violation of the decisions of the supreme court of every State, both North and South, previous to 1848. When John C. Calhoun, on the floor of this Senate, first announced the doctrine that the Constitution of the United States, by its own positive force, guaranteed the right to take and hold slaves as property in the territories of the United States, it did not have half a dozen supporters in either House of Congress.

Mr. Mason, of Virginia, wished the privilege of saying, as Mr. Calhoun lives no longer, and had no representative of his State on that floor, that he never understood him, nor ever understood any jurist in the land, in giving a considered view of this question, as declaring that the Constitution of the United States established slavery anywhere; but he understood that

great man, and those who concurred with him in opinion, to say this: that a slave is property, and nothing but property; and that the Constitution of the United States would protect that property in the territories, or upon the high seas as it would protect any other property. It establishes nothing; it recognizes property because it is property. That he understood to be Mr. Calhoun's view. Again he remarked: "We say, not that the Constitution establishes slavery anywhere, but that there is the same obligation upon those who administer the Constitution to protect the property in a slave as property, as in any thing else, wherever the Constitution is administered. That is what we claim."

Mr. Trumbull, of Illinois, observed that here was a region of country about to be organized into a territorial government, which, at the time we acquired it, was under a law excluding African slavery from it. Now, the question was, when it becomes incorporated with this Government, without any action of the people there, or any desire to have that law changed, whether we should not continue the existing state of things.

Mr. Green, of Missouri, urged that this was a mistaken view. The law which the Senator from Mississippi proposes to make the permanent law, is the existing law.

The debate here dropped, and the bill was subsequently passed without any provision for the exclusion of slaves from the territory.

On the 11th of January a resolution was offered in the Senate by Mr. Hunter, of Virginia, authorizing the retrocession by the President of the forts and arsenals within any State upon the application of the Legislature, or a convention of the people of such State, taking at the same time proper security for their safe-keeping and return, or payment for the same.

To this an amendment was offered, by Mr. Trumbull, of Illinois, approving the act of Major Anderson in abandoning Fort Moultrie and taking possession of Fort Sumter.

Mr. Hunter followed in a lengthy speech, embracing all the important points of the crisis. To him it appeared to be a question of reunion. "I say that, so far as I can weigh the question, it is no more a question of Union, but one of reunion. To produce reunion it is essential that the Southern States should be allowed to take that position which it is obvious they are going to take, in peace. You must give, too, all the time you can, and offer all the opportunities you may, to those who desire to make an effort for the reconstruction of this Confederacy. Sir, I say I am one of those; for while I believe that the South owes it to itself first to secure its own position, to provide for its own protection, to unite in such strength as will enable it to defend itself against all goers and comers, I also believe that the interests of mankind, our own interests, and the interests of our confederates, would then require

that we should reconstruct the old Union if we can, or rather construct a new Union on terms of equality and of justice."

Mr. Harlan, of Iowa, replied: "Whatever may be pretended to the contrary, the real grievance inflicted on 'the South by the North,' is the invitation extended to the Southern Democracy, on the 6th day of last November, to resign the reins of Government into the hands of their political opponents. This will become manifest on an examination of the alleged causes of complaint. These are all stated in general and ambiguous terms, without specification. The most usual allegation, which has been reiterated to-day, is that the provisions of the Constitution have been violated. The secession argument which follows is, that when a contract has been violated by one party it may be declared void by the other party to its provisions; that the Constitution of the United States is such a contract between the several States; that the Federal Government is merely their agent appointed to carry out its provisions; that this contract having been broken by some of the States, the other States may voluntarily secede, and demand a division of liabilities and assets."

In regard to the apprehensions expressed relative to the future policy of the Republican party he thus expressed his views: "You may feign fear that we will interfere with your institutions in the slave States. Time at last will develop the fact that all those fears are groundless. If any man will read the speeches and the letters of the President of the United States elect, he can come to no other conclusion than that he will administer the Government, so far as he has power, precisely on the policy originally proposed by Henry Clay, who participated so largely in securing the compromise measures to which I have alluded. Why not consent to this? Why attempt the fearful experiment of destroying this Government, which has stood the test of time so well, under the vain hope of forming a better? But if you must do something to raise a smoke under which to retire from your unenviable position, admit the territories as States, and thus end the controversy forever. If this proposition is acceptable to the Republicans, surely it ought to be acceptable to you."

Mr. Polk, of Missouri, followed on the opposite side, and described the commercial condition of the country as of the most alarming character: "What," he asked, "is the condition of things all over the entire Confederacy, both North and South? Universal panic, prostration of credit, public and private. Our Government has just advertised for a loan of \$5,000,000, and she could only get half of it bid for; nor even that except at usurious rates of interest, running up to the extreme of thirty-six per centum per annum. Failures and bankruptcies, stagnation and embarrassments everywhere and among all classes. Business languishing; trade crippled; commerce curtailed;

industry paralyzed; artisans and mechanics idle for the want of employment; factories stopped and operatives discharged; suffering among the laboring poor; and families without necessities even now and want and perhaps starvation just before them in the future; and this glorious fabric of our Union even now tottering to its fall. Four of the pillars that sustained the towering edifice are already removed; and among them, one of the original thirteen upon which it first reposed. Six others are on the point of being removed; soon to be followed, it may be, by half of the residue, including among the slaveholding States the first and the last to come into the Union."

Passing to an examination of the claims of the South, he urged in the most emphatic terms that they should be conceded, or, if dissolution finally took place, it should be peaceful.

No action was taken by the Senate upon this resolution.

On the 8th of January a message on the state of the Union was received in the Senate, together with copies of documents from the Commissioners from South Carolina.

Mr. Davis, of Mississippi, took the floor after the message had been read, and proceeded to express his views on passing events: "I intended to adduce some evidences, which I thought were conclusive, in favor of the opinions which I entertain; but events, with a current hurrying on as it progresses, have borne me past the point where it would be useful for me to argue, by the citing of authorities, the question of rights. To-day, therefore, it is my purpose to deal with events. Abstract argument has become among the things that are past."

On the seizure of forts in South Carolina and elsewhere, the reason given in justification was that self-preservation is the first law of nature; and when the people there no longer had confidence that this Federal Government would not seize the forts constructed for their defence, and use them for their destruction, they only obeyed the dictates of self-preservation when they seized the forts to prevent the enemy from taking possession of them as a means of coercion, for they then were compelled to believe this Federal Government had become an enemy.

The remedy for this state of affairs Mr. Davis proposed in these words: "To assure them, the people of the South, that you do not intend to use physical force against them is your first remedy; to assure them that you intend to consider calmly all the propositions which they make, and to recognize the rights which the Union was established to secure; that you intend to settle with them upon a basis in accordance with the Declaration of Independence and the Constitution of the United States. When you do that, peace will prevail over the land, and force become a thing that no man will consider necessary."

The right of a State to withdraw from the

Union was then asserted, without any purpose to argue the question, and he proceeded to ask what shall be done with events as they stood? Taking the ground that separation is inevitable, he says: "There remains to us, I believe, as the consideration which is most useful, the inquiry, how can this separation be effected so as to leave to us the power, whenever we shall have the will, to reconstruct? It can only be done by adopting a policy of peace. It can only be done by denying to the Federal Government all power to coerce. It can only be done by returning to the point from which we started, and saying, 'This is a Government of fraternity, a Government of consent; and it shall not be administered in a departure from those principles.'

"There are two modes, however, of dissolving the Union. One alone has been contemplated. It was that which proceeded from States separating themselves from those to whom they are united. There is another. It is by destroying the Constitution; by pulling down the political temple; by forming a consolidated Government. Union, in the very meaning of the word, implies the junction of separate States. Consolidation would be the destruction of the Union, and far more fatal to popular liberty than the separation of the States. But, if fanaticism and sectionalism, like the blind giant of old, shall seize the pillars of the temple to tear them down, in order that they may destroy its inmates, it but remains for us to withdraw, and it will be our purpose to commence the erection of another on the same plan on which our fathers built this. We share no such common ruin as falls upon a people by consolidation and destruction of the principles of liberty contained in the Constitution; by interference with community and social rights; and we go out of such a Government whenever it takes that form, in accordance with the Constitution, and in defence of the principles on which that Constitution rests. We have warned you for many years that you would drive us to this alternative, and you would not heed. I believe that you still look upon it as a mere passing political move, as a device for some party end, knowing little of the deep struggle with which we have contemplated this as a necessity, not as a choice, when we have been brought to stand before the alternative—the destruction of our community independence, or the destruction of that Union which our fathers made. You would not heed us. You deemed our warning to be merely to the end of electing a candidate for the miserable spoils of office, of which I am glad to say I represent a people who have had so little indeed that they have never acquired an appetite for them. Yet you have believed—not looking to the great end to which our eyes were directed—that it was a mere political resort, by which we would intimidate some of your own voters. You have turned upon those true friends of ours at the North who have vindicated

cated the Constitution, and pointed out to you the danger of your course, and held them responsible for the censure you received, as though you had not, in fact, aggressed. Even at this session, after forty years of debate, you have asked us what was the matter."

Mr. Trumbull, of Illinois, immediately rose to reply, saying: "We have listened to the Senator from Mississippi, and one would suppose, in listening to him here, that he was a friend of this Union, that he desired the perpetuity of this Government. He has a most singular way of preserving it, and a most singular way of maintaining the Constitution. What is it? Why, he proposes that the Government should abdicate. If it will simply withdraw its forces from Charleston, and abdicate either in favor of a mob or of the constituted authorities of Charleston, we will have peace! He dreads civil war, and he will avoid it by a surrender! He talks as if we Republicans were responsible for civil war if it ensues. If civil war comes, it comes from those with whom he is acting. Who proposes to make civil war but South Carolina? Who proposes to make civil war but Mississippi and Alabama and Georgia, seizing, by force of arms, upon the public property of the United States? Talk to us of making civil war! You inaugurate it, and then talk of it as if it came from the friends of the Constitution and the Union. Here stands this great Government; here stands the Union—a pillar, so to speak, already erected. Do we propose to pull it down? Do we propose undermining the foundations of the Constitution or disturbing the Union? Not at all; but the proposition comes from the other side. They are making war, and modestly ask us to have peace by submitting to what they ask!"

On a subsequent day the consideration of this message was again called up, and Mr. Seward improved the occasion to address the Senate on the state of public affairs. After saying what actions, in his opinion, would not save the Union, he declared his abhorrence of civil war in these words: "I dread, as in my innermost soul I abhor, civil war. I do not know what the Union would be worth if saved by the use of the sword. Yet, for all this, I do not agree with those who, with a desire to avert that great calamity, advise a conventional or unopposed separation, with a view to what they call a reconstruction. It is enough for me, first, that in this plan, destruction goes before reconstruction; and, secondly, that the strength of the vase in which the hopes of the nation are held consists chiefly in its remaining unbroken.

"Congressional compromises are not likely to save the Union. I know, indeed, that tradition favors this form of remedy. But it is essential to its success, in any case, that there be found a preponderating mass of citizens, so far neutral on the issue which separates parties, that they can intervene, strike down clashing

weapons, and compel an accommodation. Moderate concessions are not customarily asked by a force with its guns in battery; nor are liberal concessions apt to be given by an opposing force not less confident of its own right and its own strength. I think, also, that there is a prevailing conviction that legislative compromises which sacrifice honestly cherished principles, while they anticipate future exigencies, even if they do not assume extra-constitutional powers, are less sure to avert imminent evils than they are certain to produce ultimately even greater dangers.

"Indeed, Mr. President, I think it will be wise to discard two prevalent ideas or prejudices, namely: first, that the Union is to be saved by somebody in particular; and, secondly, that it is to be saved by some cunning and insincere compact of pacification."

The immediate duty of Congress was, he thought, to redress any real grievances of the offended States, and then to supply the President with all the means necessary to maintain the Union in the full exhibition and discreet exercise of its authority. Beyond this, with the proper activity on the part of the Executive, the responsibility of saving the Union belonged to the people, and they are abundantly competent to discharge it.

Instead of regarding the Constitution as a compact upon which the Government was founded, his view of its authority was expressed in these words: "I fully admit the originality, the sovereignty, and the independence of the several States within their spheres. But I hold the Federal Government to be equally original, sovereign, and independent within its sphere. And the government of the State can no more absolve the people residing within its limits from allegiance to the Union, than the Government of the Union can absolve them from allegiance to the State. The Constitution of the United States, and the laws made in pursuance thereof, are the supreme law of the land, paramount to all legislation of the States, whether made under the Constitution, or by even their organic conventions. The Union can be dissolved, not by secession, with or without armed force, but only by the voluntary consent of the people of the United States, collected in the manner prescribed by the Constitution of the United States."

The question of the moment, the simple question to be then decided was, whether it conduces more to the interests of the people of this country to remain, for the general purposes of peace and war, commerce inland and foreign, postal communications at home and abroad, the care and disposition of the public domain, colonization, the organization and admission of new States, and, generally, the enlargement of empire, one nation under our present Constitution, than it would to divide themselves into separate confederacies or States.

The plan which he preferred to adopt in relation to the territories and to the troubles of

the country was thus stated: "When the eccentric movements of secession and disunion shall have ended, in whatever form that end may come, and the angry excitements of the hour shall have subsided, and calmness once more shall have resumed its accustomed sway over the public mind, then, and not until then—one, two, or three years hence—I should cheerfully advise a convention of the people, to be assembled in pursuance of the Constitution, to consider and decide whether any and what amendments of the organic national law ought to be made."

On the conclusion of Mr. Seward's remarks the Senate immediately adjourned, and no action took place upon the message.

The States of Florida and Alabama, having retired from the Union, so far as any action on the part of their State conventions could effect it, the next step was taken by their Senators and Representatives in Congress, who withdrew from their seats. The Senators from South Carolina resigned before the session of Congress commenced. They had not, therefore, been in their seats. The Senate was called to witness this novel scene for the first time on the 21st of January.

Mr. Yulee, from Florida, taking the floor, said: "Mr. President, I rise to make known to the Senate, that in consequence of certain proceedings, which have lately taken place in the State of Florida, my colleague and myself are of the opinion that our connection with this body is legally terminated.

"The State of Florida has, through a convention of her people duly assembled, decided to recall the powers delegated to this Government, and to assume the full exercise of all her sovereign rights as an independent and separate community.

"I am sure that I truly represent her, when I say that her people have not been insensible to the many blessings they have enjoyed under the Constitution of the United States, nor to the proper advantages of a Union directed to the great purposes of 'establishing justice, insuring domestic tranquillity, promoting the general welfare, and securing the blessings of liberty to themselves and their posterity.' They have held in patriotic reverence the memories that belong to the Union of American States in its origin and progress, and have clung with a fond assurance to the hope that its wise plan, and the just principles upon which it was based, would secure for it a perpetual endurance and transcendent usefulness.

"They have decided that their social tranquillity and civil security are jeopardized by a longer continuance in the Union, not from the contemplated or necessary operation of the Constitution, but from the consequences, as they conceive, of an unjust exercise of the powers it conferred, and a persistent disregard of the spirit of fraternity and equality in which it was founded. Recent events have impressed them with the belief that the peace of their

homes and the preservation of their community interest can only be secured by an immediate withdrawal from the dangers of a perverted and hostile employment of the powers of the Federal Government. They are not willing to disturb the peace of their associates by an inflamed and protracted struggle within the Union, for rights they could never, with self-respect or safety, surrender, and against a policy of administration which, although sanctioned and authorized by the late decision of a majority of the States, they regard to be hostile to their best interests, and violative of the legitimate duty and trusts of the Government. They have preferred to abandon all the hopes they rested upon the common growth and common power of the Union, and to assume the serious responsibilities of a separate existence and new and untried relations. It is only under a deep sense of duty to themselves and their posterity that so important a step has been taken. I am sure that the people of Florida will ever preserve a grateful memory of their past connection with this Government, and a just pride in the continued development of American society. They will also remember that although, to their regret, a majority of the people in the States of the Northern section of the Union have seen their duty to lie in a path fatal to the safety of Southern society, they have had the sympathies of a large array of noble spirits in all those States, whose sense of justice, and whose brave efforts to uphold the right, have been not the less appreciated, nor will be the less remembered, because unsuccessful.

"We have not been wanting in timely warning to our associates of the unhappy tendency of their policy. It was in the unhallowed pursuit, as we thought, of sectional aggrandizement, and the indulgence of unregulated sentiments of moral duty, that the equilibrium of power between the sections, which had been maintained until then, was ruthlessly and unwisely destroyed by the legislation of 1850. The injustice and danger of those proceedings were considered by a large portion of the South to be so flagrant, that we resorted to an unusual formality in bringing our views and apprehensions to the attention of the country. Upon our official responsibility, a number of the Senators, those of Florida among them, giving expression to the opinions of their constituents, presented a written protest against the wrong to which our section was subjected, and a fraternal warning against the dangerous tendency of the policy which incited to that wrong. That protest was refused a place in the journals of this body, contrary, as we thought, to the express duty enjoined by the Constitution; but it went before the public, and I think it proper to recall the attention of this body to its contents, in the hour when the apprehensions it expressed are fatally realized.*

* The following is the protest referred to in Mr. Yulee's remarks, and which was presented in the Senate by Mr.

"Let me be pardoned, Mr. President, for detaining the Senate with a further remark. The circumstance that the State of Florida was formed upon territory acquired by the United States, and the paucity of her numbers, has been occasionally remarked upon. Owing to causes she could not control, her settlement has been, until recently, comparatively slow. But her population exceeds that of seven of the sixteen States that composed the Union when the census of 1790 was taken under the new Constitution; and six of the thirteen original States had fewer numbers when they formed the Constitution. Rights of sovereignty and liberty depend not upon numbers.

"It is quite true that her limits comprehend a part of the territory to which the title was acquired by the United States from Spain. But

it is also true that a part of the consideration for the cession was a reservation to the inhabitants of the right to admission into the Federal Union upon terms of equality; and it was in view of this right that most of the inhabitants remained there. If their number has been increased by subsequent immigration, it was mostly of citizens from others of the United States, who were lineal inheritors of the glories and fruits of the American Revolution.

"In pursuance of this stipulation, and of the established policy of the country, they were admitted into the Union; and, in the act of admission, Florida was expressly recognized and 'declared to be a State,' and 'admitted into the Union on an equal footing with the original States in all respects whatever.'

"In the exercise of her equal right in the

Hunter on the 14th of August, 1850, with a motion for leave to have it spread upon the journal of the Senate:

We, the undersigned Senators, deeply impressed with the importance of the occasion, and with a solemn sense of the responsibility under which we are acting, respectfully submit the following protest against the bill admitting California as a State into this Union, and request that it may be entered upon the journal of the Senate. We feel that it is not enough to have resisted in debate alone a bill so fraught with mischief to the Union and the States which we represent, with all the resources of argument which we possessed, but that it is also due to ourselves, the people whose interests have been intrusted to our care, and to posterity, which, even in its most distant generations, may feel its consequences, to leave, in whatever form may be most solemn and enduring, a memorial of the opposition which we have made to this measure, and of the reasons by which we have been governed. Upon the pages of a journal which the Constitution requires to be kept so long as the Senate may have an existence, we desire to place the reasons upon which we are willing to be judged by generations living and yet to come, for our opposition to a bill whose consequences may be so durable and portentous as to make it an object of deep interest to all who may come after us.

We have dissented from this bill because it gives the sanction of law, and thus imparts validity to the unauthorized action of a portion of the inhabitants of California, by which an odious discrimination is made against the property of the fifteen slaveholding States of the Union, who are thus deprived of that position of equality which the Constitution so manifestly designs, and which constitutes the only sure and stable foundation upon which this Union can repose.

Because the right of the slaveholding States to a common and equal enjoyment of the territory of the Union has been defeated by a system of measures which, without the authority of precedent, of law, or of the Constitution, were manifestly contrived for that purpose, and which Congress must sanction and adopt, should this bill become a law. In sanctioning this system of measures, this Government will admit that the inhabitants of its territories, whether permanent or transient, and whether lawfully or unlawfully occupying the same, may form a State without the previous authority of law; without even the partial security of a territorial organization formed by Congress; without any legal census or other sufficient evidence of their possessing the number of citizens necessary to authorize the representation which they may claim; and without any of those safeguards about the ballot-box which can only be provided by law, and which are necessary to ascertain the true sense of a people. It will admit, too, that Congress, having refused to provide a government except upon the condition of excluding slavery by law, the executive branch of this Government may, at its own discretion, invite such inhabitants to meet in convention under such rules as it or its agents may prescribe, and to form a constitution affecting not only their own rights, but those also of fifteen States of the Confederacy, by including territory with the purpose of excluding those States from its enjoyment, and without regard to the natural fitness of boundary, or any of the considerations which should properly determine the limits of a State. It will also admit that the convention thus called into existence by the Executive may be paid by him out of the funds of the United States without the sanction of Congress, in violation not only of the plain provisions of the Constitution, but of those principles of obvious propriety which would forbid any act calculated to make that convention dependent

upon it; and last, but not least, in the series of measures which this Government must adopt and sanction in passing this bill, is the release of the authority of the United States by the Executive alone to a government thus formed, and not presenting even sufficient evidence of its having the assent of a majority of the people for whom it was designed. With a view of all these considerations, the undersigned are constrained to believe that this Government could never be brought to admit a State presenting itself under such circumstances, if it were not for the purpose of excluding the people of the slaveholding States from all opportunity of settling with their property in that territory.

Because, to vote for a bill passed under such circumstances, would be to agree to a principle which may exclude forever hereafter, as it does now, the States which we represent, from all enjoyment of the common territory of the Union—a principle which destroys the equal rights of their constituents, the equality of their States in the Confederacy, the equal dignity of those whom they represent as men and as citizens in the eye of the law, and their equal title to the protection of the Government and the Constitution.

Because the admission of California as a State into the Union without any previous reservation assented to by her of the public domain, might involve an actual surrender of that domain to, or at all events places its future disposal at the mercy of that State, as no reservation in the bill can be binding upon her until she assents to it, and as her dissent "hereafter" would in no manner affect or impair the act of her admission.

Because all the propositions have been rejected which have been made to obtain either a recognition of the right of the slaveholding States to a common enjoyment of all the territory of the United States, or to a fair division of that territory between the slaveholding and non-slaveholding States of the Union; every effort having failed which has been made to obtain a fair division of the territory proposed to be brought in as the State of California.

But lastly, we dissent from this bill, and solemnly protest against its passage, because, in sanctioning measures so contrary to former precedent, to obvious policy, to the spirit and intent of the Constitution of the United States, for the purpose of excluding the slaveholding States from the territory thus to be erected into a State, this Government in effect declares that the exclusion of slavery from the territory of the United States is an object so high and important as to justify a disregard, not only of all the principles of sound policy, but also of the Constitution itself. Against this conclusion we must now and forever protest, as it is destructive of the safety and liberties of those whose rights have been committed to our care, fatal to the peace and equality of the States which we represent, and must lead, if persisted in, to the dissolution of that Confederacy in which the slaveholding States have never sought more than equality, and in which they will not be content to remain with less.

D. L. YULEE,	

SENATE CHAMBER, August 13, 1850.

Union, and moved by a common sympathy with the people of the section of which her territory forms the extreme southern part, and with whose fate her destiny is indissolubly bound, Florida has resolved to withdraw from the present Union. Her course derives sanction from the important fact that she is preceded in it by the chivalrous State which, by a spirited act in 1765, became, by acknowledgment of a Massachusetts historian, 'the founder of the Union.' And her resolution is rendered more fixed by the development, since her movement began, of a general tendency in the public mind of the majority section to a theory of the Constitution, and to principles of construction, which must convert this Government into an unlimited despotism. She sees fast rising above all others the great issue of the right of the people of the States to sovereignty and self-government within their respective territorial boundaries; and in such an issue she is prepared to devote the lives and fortunes of all her people.

"Although the present means of Florida are acknowledged to be limited, yet, having once assumed the rank of a State, she assumed with its rights its duties also, and its responsibilities to her people and their posterity. These she must fulfil, according to her best judgment, with all the more jealousy of control because weak, but with none the less claim on that account to the respect of all true men.

"Acknowledging, Mr. President, with grateful emotions, my obligations for the many courtesies I have enjoyed in my intercourse with the gentlemen of this body, and with most cordial good wishes for their personal welfare, I retire from their midst in willing loyalty to the mandate of my State, and with full approval of her act."

Mr. Mallory, of Florida, followed: "Concurring, as I do, with all that my colleague has said, I ask but to add a word or two.

"In retiring from this body, I cannot but feel, and I will not forbear the expression of, profound regret that existing causes imperatively impel us to this separation. When reason and justice shall have asserted ascendancy over party and passion, they will be justly appreciated; and this Southern movement, demanded by considerations dear to freemen in every age, will stand proudly vindicated.

"Throughout her long and patient endurance of insult and wrong, the South has clung to the Union with unflinching fidelity; a fidelity which, while nourishing irritation in the hearts of her own sons, has but served to nerve the arms of her adversaries.

"Florida came into the Union fifteen years ago, upon an equality with the original States, and their rights in the Confederacy are equally her rights. She could not, if she would, separate her action from her Southern sisters; and, demanded as her action is, by those considerations which a free people can never ignore, she would not if she could. From the Union,

governed by the Constitution as our fathers made it, there breathes not a secessionist upon her soil; but a deep sense of injustice, inequality, and insecurity, produced by the causes to which I have adverted, is brought home to the reason and patriotism of her people; and to secure and maintain those rights which the Constitution no longer accords them, they have placed the State of Florida out of the Confederacy.

"In thus turning from the Union to the veiled and unknown future, we are neither ignorant nor reckless of the lions in our path. We know that the prompt and peaceful organization of a practical republican government, securing liberty, equality, and justice to every citizen, is one of the most difficult, as it is one of the most momentous duties devolving upon men; and nowhere perhaps upon the earth, beyond our own country, could this great work be achieved. But so well are human rights and national liberty understood by our people; so deeply are they imbued with the spirit of freedom and knowledge of government, that were this Republic utterly broken and destroyed, like the shattered vase of the poet, to whose very fragments the scent of the roses still clung, its very ruins breathing the true spirit of civil and religious liberty, would plead for and demand a wise and noble reconstruction.

"Whatever may be the immediate results, therefore, of the momentous crisis now upon us, I have no fears for the freedom of my countrymen. Nor do I admit for a moment that the great American experiment of government has proved or can prove a failure; but I maintain, on the contrary, that passing events should inspire in the hearts of the patriot and statesman, not only hope, but confidence. Five States have already dissolved their connection with the Union; and throughout the several stages by which their people, in their sovereign capacity, have reached secession, they have exhibited a calmness and deliberation which find no parallel in the history of mankind. This is entirely the result of our admirable system of independent State governments. And, sir, were this Federal District, with President, Congress, Departments, and Courts, and all the machinery of Federal Government, suddenly sunk a thousand fathoms deep, under the admirable working of these State governments the rights and liberties of their people would receive no shock or detriment.

"In thus severing our connection with sister States, we desire to go in peace, to maintain towards them an attitude not only of peace, but, if possible, of kindness; and it is for them to determine whether we shall do so or not; and whether commerce, the great pacificator of earth, is to connect us as producers, manufacturers, and consumers, in future friendly relations. If folly, wickedness, or pride shall preclude the hope of peace, they may at once rear up difficulties in our path, leading at once to what I confess I regard and dread as one of the greatest calamities that can befall a nation

—civil war; a civil war embracing equally North and South. But, sir, be our difficulties what they may, we stand forth a united people to grapple with and to conquer them. Our willingness to shed our blood in this cause is the highest proof we can offer of the sincerity of our connections; and I warn, nay, I implore you, not to repeat the fatal folly of the Bourbons, and mistake a nation for a faction; for the people of the South, as one man, declare that, sink or swim, live or die, they will not, as freemen, submit to the degradation of a constrained existence under a violated Constitution. But, sir, we desire to part from you in peace. From the establishment of the Anglo-Saxons upon this continent to this hour, they have never, as colonies or States, shed the blood of each other; and I trust we shall be spared this great calamity. We seek not to war upon or to conquer you; and we know that you cannot conquer us. Imbue your hands in our blood, and the rains of a century will not wash from them the stain, while coming generations will weep for your wickedness and folly.

"In thus leaving the Senate, and returning to my own State, to pursue with unfaltering head and heart that path, be it gloomy or bright, to which her honor and interests may lead, I cannot forbear the acknowledgment of the kindness and courtesy which I have ever received from many of the gentlemen of the Opposition; Senators to whom I am indebted for much that I shall cherish through life with pleasure, and toward whom I entertain none but sentiments of kindness and respect. And I trust, sirs, that when we next confront each other, whether at this bar or that of the just God who knows the hearts of all, our lips shall not have uttered a word, our hands shall not have committed an act, directed against the blood of our people. On this side of the Chamber, we leave, with profound regret, those whom we will cherish in our hearts, and whose names will be hallowed by our children. One by one, we have seen the representatives of the true and fearless friends of the Constitution fall at our side, until hardly a forlorn hope remains; and whatever may be our destiny, the future, with all of life's darker memories, will be brightened by the recollection of their devotion to the true principles of our Government, and of that wealth of head and heart in their intercourse with us, which has endeared them to us and to ours forever."

Mr. Clay: "I rise to announce, in behalf of my colleague and myself, that the people of Alabama, assembled in convention at their capitol on the 11th of this month, have adopted an ordinance whereby they withdraw from the Union, formed under a compact styled the Constitution of the United States, resume the powers delegated to it, and assume their separate station as a sovereign and independent people. This is the act, not of faction or of party, but of the people. True, there is a re-

spectable minority of that convention who opposed this act, not because they desired to preserve the Union, but because they wished to secure the coöperation of all, or of a majority, of the Southern or of the planting States. There are many coöperationists, but I think not one Unionist in the convention; all are in favor of withdrawing from the Union. I am therefore warranted in saying that this is the act of the freemen of Alabama.

"In taking this momentous step they have not acted hastily or unadvisedly. It is not the eruption of sudden, spasmodic, and violent passion. It is the conclusion they have reached after years of bitter experience of enmity, injustice, and injury at the hands of their Northern brethren; after long and painful reflection; after anxious debate and solemn deliberation; and after argument, persuasion, and entreaty have failed to secure them their constitutional rights. Instead of causing surprise and incurring censure, it is rather matter of amazement, if not reproach, that they have endured so much and so long, and have deferred this act of self-defence until to-day.

"It is now nearly forty-two years since Alabama was admitted into the Union. She entered it, as she goes out of it, while the Confederacy was in convulsions, caused by the hostility of the North to the domestic slavery of the South. Not a decade, nor scarce a lustrum, has elapsed, since her birth, that has not been strongly marked by proofs of the growth and power of that anti-slavery spirit of the Northern people which seeks the overthrow of that domestic institution of the South, which is not only the chief source of her prosperity, but the very basis of her social order and State polity. It is to-day the master-spirit of the Northern States, and had, before the secession of Alabama, of Mississippi, of Florida, or of South Carolina, severed most of the bonds of the Union. It denied us Christian communion, because it could not endure what it styles the moral leprosy of slaveholding; it refused us permission to sojourn, or even to pass through the North with our property; it claimed freedom for the slave if brought by his master into a Northern State; it violated the Constitution and treaties and laws of Congress, because designed to protect that property; it refused us any share of lands acquired mainly by our diplomacy and blood and treasure; it refused our property any shelter or security beneath the flag of a common Government; it robbed us of our property, and refused to restore it; it refused to deliver criminals against our laws, who fled to the North with our property or our blood upon their hands; it threatened us by solemn legislative acts, with ignominious punishment if we pursued our property into a Northern State; it murdered Southern men when seeking the recovery of their property on Northern soil; it invaded the borders of Southern States, poisoned their wells, burnt their dwellings, and murdered their people; it de-

nounced us by deliberate resolves of popular meetings, of party conventions, and of religious and even legislative assemblies, as habitual violators of the laws of God and the rights of humanity; it exerted all the moral and physical agencies that human ingenuity can devise or diabolical malice can employ to heap odium and infamy upon us, and to make us a by-word of hissing and of scorn throughout the civilized world. Yet we bore all this for many years, and might have borne it for many more, under the oft-repeated assurance of our Northern friends, and the too fondly cherished hope that these wrongs and injuries were committed by a minority party, and had not the sanction of the majority of the people, who would, in time, rebuke our enemies, and redress our grievances.

"But the fallacy of these promises and folly of our hopes have been too clearly and conclusively proved in late elections, especially the last two Presidential elections, to permit us to indulge longer in such pleasing delusions. The platform of the Republican party of 1856 and 1860 we regard as a libel upon the character and a declaration of war against the lives and property of the Southern people. No bitterer or more offensive calumny could be uttered against them than is expressed in denouncing their system of slavery and polygamy as "twin relics of barbarism." It not only reproaches us as unchristian and heathenish, but imputes a sin and a crime deserving universal scorn and universal enmity. No sentiment is more insulting or more hostile to our domestic tranquillity, to our social order, and our social existence, than is contained in the declaration that our negroes are entitled to liberty and equality with the white man. It is in spirit, if not in effect, as strong an incitement and invocation to servile insurrection, to murder, arson, and other crimes, as any to be found in Abolition literature.

"And to aggravate the insult which is offered us in demanding equality with us for our slaves, the same platform denies us equality with Northern white men or free negroes, and brands us as an inferior race, by pledging the Republican party to resist our entrance into the territories with our slaves, or the extension of slavery, which—as its founders and leaders truly assert—must and will effect its extermination. To crown the climax of insult to our feelings and menace of our rights, this party nominated to the Presidency a man who not only endorses the platform, but promises, in his zealous support of its principles, to disregard the judgments of your courts, the obligations of your Constitution, and the requirements of his official oath, by approving any bill prohibiting slavery in the territories of the United States.

"A large majority of the Northern people have declared at the ballot-box their approval of the platform and the candidates of that party in the late Presidential election. Thus, by the solemn verdict of the people of the North, the

slaveholding communities of the South are 'outlawed, branded with ignominy, consigned to execration, and ultimate destruction.'

"Sir, are we looked upon as more or less than men? Is it expected that we will or can exercise that godlike virtue which 'beareth all things, believeth all things, hopeth all things, endureth all things;' which teaches us to *love our enemies and bless them that curse us*? Are we devoid of the sensibilities, the sentiments, the passions, the reason, and the instincts of mankind? Have we no pride of honor, no sense of shame, no reverence of our ancestors, no care of our posterity, no love of home, or family, or friends? Must we confess our baseness, discredit the fame of our sires, dishonor ourselves, degrade our posterity, abandon our homes, and flee from our country, all for the sake of the Union? Must we agree to live under the ban of our own Government? Must we acquiesce in the inauguration of a President chosen by confederate but unfriendly States, whose political faith constrains him, for his conscience and country's sake, to deny us our constitutional rights, because elected according to the forms of the Constitution? Must we consent to live under a Government which we believe will henceforth be controlled and administered by those who not only deny us justice and equality, and brand us as inferiors, but whose avowed principles and policy must destroy our domestic tranquillity, imperil the lives of our wives and children, degrade and dwarf, and ultimately destroy, our State? Must we live, by choice or compulsion, under the rule of those who present us the dire alternative of an "irrepressible conflict" with the Northern people in defence of our altars and our fireside, or the manumission of our slaves, and the admission of them to social and political equality? No, sir, no! The freemen of Alabama have proclaimed to the world that they will not; and have proved their sincerity by seceding from the Union, and hazarding all the dangers and difficulties of a separate and independent station among the nations of the earth.

"They have learned from history the admonitory truth, that the people who live under governors appointed against their consent by unfriendly foreign or confederate States, will not long enjoy the blessings of liberty, or have the courage to claim them. They feel that were they to consent to do so, they would lose the respect of their foes and the sympathy of their friends. They are resolved not to trust to the hands of their enemies the measure of their rights. They intend to preserve for themselves, and to transmit to their posterity, the freedom they received from their ancestors, or perish in the attempt. Cordially approving this act of my mother State, and acknowledging no other allegiance, I shall return, like a true and loyal son, to her bosom, to defend her honor, maintain her rights, and share her fate."

Mr. Fitzpatrick: "Mr. President, I rise merely to add, that having had an opportunity of

knowing beforehand the sentiments which my colleague has expressed; and believing that they fairly represent the feelings, opinions, and purposes of our constituents, and correctly explain the reason and causes of their late action, he was fully warranted in saying he had my full concurrence in the views which he has just submitted. I therefore deem it unnecessary, if not improper, to abuse the privilege which the courtesy of the Senate accords to me, by further remarks. I feel that I am bound by the act of Alabama, and cannot claim the rights and privileges of a member of this body. I acknowledge no loyalty to any other power than that of my sovereign State; and shall return to her with the purpose to sustain her action and to share her fortunes, for weal or woe."

Mr. Davis: "I rise, Mr. President, for the purpose of announcing to the Senate that I have satisfactory evidence that the State of Mississippi, by a solemn ordinance of her people in convention assembled, has declared her separation from the United States. Under these circumstances, of course, my functions are terminated here. It has seemed to me proper, however, that I should appear in the Senate to announce the fact to my associates, and I will say but very little more. The occasion does not invite me to go into argument; and my physical condition would not permit me to do so if it were otherwise; and yet it seems to become me to say something on the part of the State I here represent, on an occasion so solemn as this.

"It is known to Senators who have served with me here, that I have for many years advocated, as an essential attribute of State sovereignty, the right of a State to secede from the Union. Therefore, if I had not believed there was justifiable cause; if I had thought that Mississippi was acting without sufficient provocation, or without an existing necessity, I should still, under my theory of the Government, because of my allegiance to the State of which I am a citizen, have been bound by her action. I, however, may be permitted to say that I do think she has justifiable cause, and I approve of her act. I conferred with her people before that act was taken, counselled them then that if the state of things which they apprehended, should exist when the convention met, they should take the action which they have now adopted.

"I hope none who hear me will confound this expression of mine with the advocacy of the right of a State to remain in the Union, and to disregard its constitutional obligations by the nullification of the law. Such is not my theory. Nullification and secession, so often confounded, are indeed antagonistic principles. Nullification is a remedy which it is sought to apply within the Union, and against the agent of the States. It is only to be justified when the agent has violated his constitutional obligation, and a State, assuming to judge for itself, denies the right of the agent thus to act, and

appeals to the other States of the Union for a decision; but when the States themselves, and when the people of the States, have so acted as to convince us that they will not regard our constitutional rights, then, and then for the first time, arises the doctrine of secession in its practical application.

"A great man, who now reposes with his fathers, and who has been often arraigned for a want of fealty to the Union, advocated the doctrine of nullification, because it preserved the Union. It was because of his deep-seated attachment to the Union, his determination to find some remedy for existing ills short of a severance of the ties which bound South Carolina to the other States, that Mr. Calhoun advocated the doctrine of nullification, which he proclaimed to be peaceful, to be within the limits of State power, not to disturb the Union, but only to be a means of bringing the agent before the tribunal of the States for their judgment.

"Secession belongs to a different class of remedies. It is to be justified upon the basis that the States are sovereign. There was a time when none denied it. I hope the time may come again, when a better comprehension of the theory of our Government, and the inalienable rights of the people of the States, will prevent any one from denying that each State is a sovereign, and thus may reclaim the grants which it has made to any agent whomsoever.

"I therefore say I concur in the action of the people of Mississippi, believing it to be necessary and proper, and should have been bound by their action, if my belief had been otherwise; and this brings me to the important point which I wish on this last occasion to present to the Senate. It is by this confounding of nullification and secession that the name of a great man, whose ashes now mingle with his mother earth, has been invoked to justify coercion against a seceded State. The phrase "to execute the laws," was an expression which General Jackson applied to the case of a State refusing to obey the laws, while yet a member of the Union. That is not the case which is now presented. The laws are to be executed over the United States, and upon the people of the United States. They have no relation to any foreign country. It is a perversion of terms, at least it is a great misapprehension of the case, which cites that expression for application to a State which has withdrawn from the Union. You may make war on a foreign State. If it be the purpose of gentlemen, they may make war against a State which has withdrawn from the Union; but there are no laws of the United States to be executed within the limits of a seceded State. A State finding herself in the condition in which Mississippi has judged she is, in which her safety requires that she should provide for the maintenance of her rights out of the Union, surrenders all the benefits, (and they are known to be many,) deprives herself of the advantages, (they are

known to be great,) severs all the ties of affection, (and they are close and enduring,) which have bound her to the Union; and thus divesting herself of every benefit, taking upon herself every burden, she claims to be exempt from any power to execute the laws of the United States within her limits.

"I well remember an occasion when Massachusetts was arraigned before the bar of the Senate, and when then the doctrine of coercion was rife, and to be applied against her, because of the rescue of a fugitive slave in Boston. My opinion then was the same that it is now. Not in a spirit of egotism, but to show that I am not influenced in my own opinion because the case is my own, I refer to that time and that occasion as containing the opinion which I then entertained, and on which my present conduct is based. I then said, if Massachusetts, following her through a stated line of conduct, chooses to take the last step which separates her from the Union, it is her right to go, and I will neither vote one dollar nor one man to coerce her back; but will say to her, God speed, in memory of the kind associations which once existed between her and the other States.

"It has been a conviction of pressing necessity, it has been a belief that we are to be deprived in the Union of the rights which our fathers bequeathed to us, which has brought Mississippi into her present decision. She has heard proclaimed the theory that all men are created free and equal, and this made the basis of an attack upon her social institutions; and the sacred Declaration of Independence has been invoked to maintain the position of the equality of the races. That Declaration of Independence is to be construed by the circumstances and purposes for which it was made. The communities were declaring their independence; the people of those communities were asserting that no man was born—to use the language of Mr. Jefferson—booted and spurred to ride over the rest of mankind; that men were created equal—meaning the men of the political community; that there was no divine right to rule; that no man inherited the right to govern; that there were no classes by which power and place descended to families, but that all stations were equally within the grasp of each member of the body-politic. These were the great principles they announced; these were the purposes for which they made their declaration; these were the ends to which their enunciation was directed. They have no reference to the slave; else, how happened it that among the items of arraignment made against George III. was that he endeavored to do just what the North has been endeavoring of late to do—to stir up insurrection among our slaves? Had the Declaration announced that the negroes were free and equal, how was the Prince to be arraigned for stirring up insurrection among them? And how was this to be enumerated among the high crimes which caused the colonies to sever their connection

with the mother country? When our Constitution was formed, the same idea was rendered more palpable, for there we find provision made for that very class of persons as property; they were not put upon the footing of equality with white men—not even upon that of paupers and convicts; but, so far as representation was concerned, were discriminated against as a lower caste only to be represented in the numerical proportion of three-fifths.

"Then, Senators, we recur to the compact which binds us together; we recur to the principles upon which our Government was founded; and when you deny them, and when you deny to us the right to withdraw from a Government which, thus perverted, threatens to be destructive of our rights, we but tread in the path of our fathers when we proclaim our independence, and take the hazard. This is done not in hostility to others, not to injure any section of the country, not even for our own pecuniary benefit; but from the high and solemn motive of defending and protecting the rights we inherited, and which it is our sacred duty to transmit unshorn to our children.

"I find in myself, perhaps, a type of the general feeling of my constituents towards yours. I am sure I feel no hostility to you, Senators from the North. I am sure there is not one of you, whatever sharp discussion there may have been between us, to whom I cannot now say, in the presence of my God, I wish you well; and such, I am sure, is the feeling of the people whom I represent towards those whom you represent. I therefore feel that I but express their desire, when I say I hope, and they hope, for peaceful relations with you, though we must part. They may be mutually beneficial to us in the future, as they have been in the past, if you so will it. The reverse may bring disaster on every portion of the country; and if you will have it thus, we will invoke the God of our fathers, who delivered them from the power of the lion, to protect us from the ravages of the bear; and thus, putting our trust in God, and in our own firm hearts and strong arms, we will vindicate the right as best we may.

"In the course of my service here, associated at different times with a great variety of Senators, I see now around me some with whom I have served long; there have been points of collision; but whatever of offence there has been to me, I leave here; I carry with me no hostile remembrance. Whatever offence I have given, which has not been redressed, or for which satisfaction has not been demanded, I have, Senators, in this hour of our parting, to offer you my apology for any pain which, in heat of discussion, I have inflicted. I go hence unencumbered of the remembrance of any injury received, and having discharged the duty of making the only reparation in my power for any injury offered.

"Mr. President, and Senators, having made the announcement which the occasion seemed

to me to require, it only remains for me to bid you a final adieu."

The State of Louisiana having passed an ordinance of secession from the United States, her Senators in Congress, Messrs. Slidell and Benjamin, took leave of the Senate on the 4th of February.

Mr. Slidell, in addressing the Senate for the last time, made a very full statement of the views and purposes entertained by the seceding States, particularly Louisiana. They anticipated reconstruction, although South Carolina said the Union was gone forever. He said: "The occasion, however, justifies, if it does not call for, some parting words to those whom we leave behind, some forever, others we trust to meet again, and to participate with them in the noble task of constructing and defending a new confederacy; which, if it may want at first the grand proportions and vast resources of the old, will still possess the essential elements of greatness, a people bold, hardy, homogeneous in interests and sentiments, a fertile soil, an extensive territory, the capacity and the will to govern themselves through the forms and in the spirit of the Constitution under which they have been born and educated. Besides all these, they have an advantage which no other people seeking to change the Government under which they had before lived have ever enjoyed; they have to pass through no intervening period of anarchy; they have in their several State Governments, already shaped to their hands, every thing necessary for the preservation of order, the administration of justice, and the protection of their soil and their property from foreign or domestic violence. They can consult with calmness and act with deliberation on every subject, either of immediate interest or future policy.

"But, if we do not greatly mistake the prevailing sentiment of the Southern mind, no attempt will be made to improve the Constitution; we shall take it such as it is; such as has been found sufficient for our security and happiness, so long as its true intent and spirit lived in the hearts of a majority of the people of the free States, and controlled the action not only of the Federal but of the State Legislatures. We will adopt all laws not locally inapplicable or incompatible with our new relations; we will recognize the obligations of all existing treaties—those respecting the African slave trade included. We shall be prepared to assume our just proportion of the national debt; to account for the cost of all the forts and other property of the United States, which we have been compelled to seize in self-defence, if it should appear that our share of such expenditure has been greater than in other sections; and, above all, we shall, as well from the dictates of natural justice and the principles of international law as of political and geographical affinities and of mutual pecuniary interests, recognize the right of the inhabitants

of the valley of the Mississippi and its tributaries to its free navigation; we will guarantee to them a free interchange of all agricultural productions without impost, tax, duty, or toll of any kind; the free transit from foreign countries of every species of merchandise, subject only to such regulations as may be absolutely necessary for the protection of any revenue system we may establish, and for purposes of police.

"As for such States of the Union as may not choose to unite their destinies with ours, we shall consider them, as we shall all other foreign nations, 'enemies in war, in peace friends.' We wish and we hope to part with them amicably; and, so far as depends on us, they shall have no provocation to pursue a hostile course; but in this regard we, from the necessities of the case, can only be passive; it will be for the people of the non-slaveholding States to decide this momentous question. This declaration, however, requires some qualification. Could the issue be fairly presented to the people of those States, we should have little doubt of a peaceful separation, with the possibility of a complete, and the probability of a partial, reconstruction on a basis satisfactory to us and honorable to them; but, with the present representations in either branch of Congress, we see nothing to justify our indulging any such expectation. We must be prepared to resist coercion, whether attempted by avowed enemies, or by a hand heretofore supposed friendly; by open war, or under the more insidious, and, therefore, more dangerous pretext of enforcing the laws, protecting public property, or collecting the revenue. We shall not cavil about words, or discuss legal and technical distinctions; we shall consider the one as equivalent to the other, and shall be prepared to act accordingly. *Utroque arbitrio parati*. You will find us ready to meet you with the outstretched hand of fellowship, or in the mailed panoply of war, as you may will it; elect between these alternatives.

"We have no idea that you will even attempt to invade our soil with your armies; but we acknowledge your superiority on the sea, at present, in some degree accidental, but in the main, natural, and permanent, until we shall have acquired better ports for our marine. You may, if you will it, persist in considering us bound to you during your good pleasure; you may deny the sacred and indefeasible right, we will not say of secession, but of revolution—ay, of rebellion, if you choose so to call our action—the right of every people to establish for itself that form of government which it may, even in its folly, if such you deem it, consider best calculated to secure its safety and promote its welfare. You may ignore the principles of our immortal Declaration of Independence; you may attempt to reduce us to subjection, or you may, under color of enforcing your laws, or collecting your revenue, blockade our ports. This will be war, and we shall meet it with

different but equally efficient weapons. We will not permit the consumption or introduction of any of your manufactures; every sea will swarm with our volunteer militia of the ocean, with the striped bunting floating over their heads, for we do not mean to give up that flag without a bloody struggle—it is ours as much as yours; and although for a time more stars may shine on your banner, our children, if not we, will rally under a constellation more numerous and more resplendent than yours. You may smile at this as an impotent boast, at least for the present, if not for the future; but if we need ships and men for privateering, we shall be amply supplied from the same sources as now almost exclusively furnish the means for carrying on, with such unexampled vigor, the African slave-trade—New York and New England. Your mercantile marine must either sail under foreign flags or rot at your wharves.

“But, premitting these remedies, we will pass to another equally efficacious. Every civilized nation now is governed in its foreign relations by the rule of recognizing governments ‘*de facto*.’ You alone invoke the doctrine of the ‘*de jure*,’ or divine right of lording it over an unwilling people, strong enough to maintain their power within their own limits. How long, think you, will the great naval powers of Europe permit you to impede their free intercourse with their best customers for their various fabrics, and to stop the supplies of the great staple which is the most important basis of their manufacturing industry, by a mere paper blockade? You were, with all the wealth and resources of this once great Confederacy, but a fourth or fifth-rate naval power, with capacities, it is true, for large, and in a just quarrel, almost indefinite, expansion. What will you be when not merely emasculated by the withdrawal of fifteen States, but warred upon by them with active and inveterate hostility?”

“But enough, perhaps somewhat too much, of this. We desire not to speak to you in terms of bravado or menace. Let us treat each other as men, who, determined to break off unpleasant, incompatible, and unprofitable relations, cease to bandy words, and mutually leave each other to determine whether their differences shall be decided by blows or by the code which some of us still recognize as that of honor.”

The cause of their action, he says, is not the mere election by the forms of the Constitution, of a President distasteful to them, as it was so often and so confidently asserted. “It is this: we all consider the election of Mr. Lincoln, with his well-known antecedents and avowed principles and purposes, by a decided majority over all other candidates combined in every non-slaveholding State on this side of the Pacific slope, noble, gallant New Jersey alone excepted, as conclusive evidence of the determined hostility of the Northern masses to our institutions. We believe that he conscientiously entertains the opinions which he has so often and so explicitly declared; and that, having been elected on the issues thus presented, he will honestly endeavor to carry them into execution.”

tiously entertains the opinions which he has so often and so explicitly declared; and that, having been elected on the issues thus presented, he will honestly endeavor to carry them into execution.”

The proceedings of the House of Representatives, from the commencement of the session until this time, although of the same general character with those of the Senate, serve, when taken in connection with the latter, to show more clearly the views thus far entertained of the powers and duties of the Government, and its ability to obviate the crisis. In the House the difficulties of the country produced as much impression as upon the public at large. The first apprehensions had settled into a firm conviction that the movement begun in South Carolina was calm, deliberate, and decided. The leaders in the extreme South made up in bold determination and bitterness of crimination for what they lacked in numbers. The Republicans in the North, restive and uneasy, maintained a firmness and fixedness of purpose which brooked no change, and which was largely due to the extreme portion of their party. Meantime, the mass of the people in the central States, in the heart of the Union, who enjoyed all its genial blessings, were filled with alarm. The defeated Democratic party, always interpreting the Constitution after that strict construction peculiar to the Southern States, and aware by long experience of the true nature of the difficulties, were not only equally alarmed, but greatly embarrassed by being stripped of all political power.

Not a step was taken to arrest the progress of secession before Congress assembled. In the House, a body so sensitive of the public impulses and convictions, a flood of propositions aiming to restore the harmony of the country were promptly introduced. Scarcely had the President's Message been read, when Mr. Bator, of Virginia, and Mr. Cochran, of New York, rose to move resolutions in reference to so much of it as related to the condition of the country.

The resolution adopted was this:

Resolved, That so much of the President's Message as relates to the present perilous condition of the country, be referred to a special committee of one from each State.

The vote was—ayes, 145; noes, 38.

Pending the vote the spirit of many of the members from the most Southern States was conspicuously shown. Mr. Singleton, of Mississippi, declined to vote for the reason that the Legislature of the State of Mississippi had called a convention of the people of that State to take into consideration the subject-matter before the House. He was not sent here for the purpose of making any compromise, or to patch up existing difficulties. “I leave, sir, to the sovereign State of Mississippi to determine for herself her present Federal relations.”

Mr. Hawkins, of Florida, stated that a con-

vention had been called in that State to consider the same subject. The people of that State had resolved to determine in convention, in their sovereign capacity, the time, place, and manner of redress. It was not for him to take any action on the subject. "While I am up, Mr. Speaker, I may as well say, in advance, that I am opposed, and I believe my State is opposed, to all and every compromise. The day of compromise has passed."

Mr. Clopton, of Alabama, declined to vote, for the reason that a convention had been called in Alabama to consider what action is required to maintain her rights, honor, and safety. Believing that a State had a right to secede, and that the only remedy for present evils was secession, he would not hold out any delusive hope, or sanction any temporizing policy.

Mr. Miles, of South Carolina, said: "Mr. Speaker, the South Carolina delegation have not voted on this question because they conceive they have no interest in it. We consider our State as already withdrawn from the Confederacy in every thing except in form."

Mr. Pugh: "As my State of Alabama intends following South Carolina out of the Union by the 10th of January next, I pay no attention to any action taken in this body."

Subsequently the committee was announced by the Speaker to consist of the following members of the House:

Messrs. Corwin, of Ohio; Millson, of Virginia; Adams, of Massachusetts; Winslow, of North Carolina; Humphrey, of New York; Boyce, of South Carolina; Campbell, of Pennsylvania; Love, of Georgia; Ferry, of Connecticut; Davis, of Maryland; Robinson, of Rhode Island; Whiteley, of Delaware; Tappan, of New Hampshire; Stratton, of New Jersey; Bristow, of Kentucky; Morrill, of Vermont; Nelson, of Tennessee; Dunn, of Indiana; Taylor, of Louisiana; Davis, of Mississippi; Kellogg, of Illinois; Houston, of Alabama; Morse, of Maine; Phelps, of Missouri; Rust, of Arkansas; Howard, of Michigan; Hawkins, of Florida; Hamilton, of Texas; Washburn, of Wisconsin; Curtis, of Iowa; Burch, of California; Windom, of Minnesota; and Stout, of Oregon.

Mr. Hawkins, of Florida, asked to be excused, and said: "The idea of getting up this committee was one of unanimity—a great peace and Union-saving measure; and, as I said the other day, I am opposed to any thing of that kind, believing that the day has gone by, and the time for compromise has passed forever."

Mr. Cochran, of New York, replied to this request: "Mr. Speaker, I have listened with a great deal of regret to the application that has been made by my friend from Florida to be excused from service upon this committee. It has been well intimated here to-day that the gray shadow of the dark wing of dissolution is reaching and extending over the House and over the country; and so deep is the gloom

under its influence that hardly can members be brought to attend to their ordinary duties. Men's minds have been devoted, for now these weeks past to this one great absorbing topic of conversation, that enlists all minds, commands all judgments, and demands of every individual, from every section, his best exertions, his purest emotions, and justest wisdom.

"Sir, it is of importance in this issue that the Republic should command the exertions and efforts of all her sons; and I believe, sir, that now, in the midst of a vital crisis, perils impending and dangers upon us, as has been proclaimed, there is no good reason why this assemblage of the representative patriotism of the country should, of either its prudence or discretion, excuse my friend from Florida. I believe that even now, from his State, from its glades and everglades, whence the eyes of his constituents are directed with anxious vigilance upon our proceedings, could their voice penetrate, a beseeching appeal would be heard that their Representative should stand forward at this juncture in the front of the controversy.

"I appeal to him, therefore, sir, in the name of our common humanity; I appeal to him in the hour of peril and in the name of our common country; I appeal to him by the memories of the past, by the prosperity and continued existence of the State sovereignty in which he glories, to remain on the committee to which he is presented. If, sir, this appeal be unheard, should it prove vain and ineffectual, I may be permitted further to appeal to the House, representing that common country whose integrity is threatened, that, without intentional reflection upon him, but under the obligation of a great duty to be performed, it negative the motion that my friend from Florida be excused."

After this eloquent appeal from Mr. Cochran, the House spent some time on minor details relative to its action, and adjourned without taking the question on excusing Mr. Hawkins.

On a subsequent day the question was taken up, and, stating at length his reasons for declining, Mr. Hawkins objected to the composition of the committee as "unfortunate and ill-advised." "No Democrat from the powerful and mighty Northwest was a member." He said: "If asked what is all this to me, inasmuch as I decline to serve upon the committee, I answer, *I want the country to know* that it cannot, does not, represent the true sentiment of some of the States, and that a great moral effect is sought to be produced by something that savors of a constructive fraud. So far as the extreme South is concerned, I tell them this committee is the Grecian horse introduced into Troy. The object is to gain time; delay and demoralize the South by holding forth to its people that there is a great pacificator at work, certain to bring about a political millennium."

Mr. Vallandigham, of Ohio, observed that he

was absolutely precluded from voting to place the member on the committee by the consideration that there was not a single representative of the Democratic party on the committee from the sixteen free States of the Union.

Mr. McClernand, of Illinois, asked what was the cause of this offensive discrimination? Is it because the Northern Democracy have become insignificant in numbers and influence? No, sir. He continued: "Although defeated in the late election, they polled, according to official and unofficial returns, one million three hundred and forty three thousand one hundred and eighty-four votes; and, including the vote of the national Democracy in the South, their whole vote is one million five hundred and sixty-four thousand six hundred and fifty; thus showing that the vote of the Northern Democracy alone is greater than that which elected either Pierce or Buchanan, and is larger than that ever before polled in any Presidential election.

"And how is it with the other political organizations in the country? Let facts speak for themselves. With a popular vote, according to the same returns, of five hundred and eighty thousand two hundred and forty-nine, in the same election, the Union party is represented by three of its members on the committee. With a popular vote of six hundred and seventy-five thousand seven hundred and eighty-two, the Breckinridge party is represented by six members; while the Republican party, comparatively with but few more votes aggregated than the national Democracy, and no votes in most of the slaveholding States, and only twenty-six thousand five hundred and eight votes in all of them, is represented by sixteen members. If so, then the Republican party, with only one million eight hundred and forty-six thousand two hundred and three votes, is represented by sixteen members; while all the votes opposed to it, in the late election, amounting to two millions eight hundred and twenty thousand six hundred and eighty-one, are only represented by eleven members.

"How unjust such constitution of an important committee! There is no parallel or precedent for it in parliamentary history, so far as I know."

On a division, the House refused to excuse the member from Florida from serving on the special committee. Ayes, 95; noes, 101.

Upon a call of the States and territories for bills and resolutions to be submitted to the Committee of Thirty-three, the following propositions were received and referred:

By Mr. Thayer, of Massachusetts: That no territory should ever be acquired, to be owned by the United States or to be governed by Congress; that there should be no congressional legislation whatever on the subject of slavery; that every congressional district should be an election district.

By Mr. Cochran, of New York: That the Constitution be so amended as to make all ter-

ritory north of 36° 30' free territory; and in all territory south of that line neither Congress nor any territorial Government shall pass any law prohibiting or impairing the establishment of slavery. No law shall prohibit or interfere with the trade in slaves between the slaveholding States and territories; importation of slaves from a foreign country prohibited; the surrender of fugitives and the right of transit and temporary sojourn to be guaranteed.

By Mr. Adrain, of New Jersey: The non-intervention by Congress over the subject of slavery in the territories to be adopted; all territories, on application, etc., to be admitted as States, without regard to whether their Constitution permits or prohibits the institution of domestic slavery; all laws of States in conflict with the Constitution to be repealed; no obstacles to be put in the way of the execution of the fugitive slave law by State Legislatures. The people should be permitted to regulate their own internal affairs without interference.

By Mr. Morris, of Pennsylvania: That the committee review the personal liberty laws, and report which of them are in conflict with the Constitution, and also what amendments they are susceptible of to effectually prevent kidnapping.

By Mr. Stewart, of Maryland: That the committee inquire if any measures can be adopted to preserve in their purity the constitutional rights of all the States within the Union; if this appears impracticable, then further to inquire as to the most reasonable mode by which their rights may be secured in a state of separation; each sovereign State, in that event, being repossessed of its delegated authority to the Federal Union, and adjusting the relative liabilities of each, with such other measures of fair settlement as may appear to them just; and recommend some plan by which, in that event, disputes that arise may be fairly and speedily adjusted.

By Mr. Leake, of Virginia: That Congress should be deprived of all power and jurisdiction over the subject of slavery in the States or Territories, or District of Columbia, and also over the internal slave-trade, except to protect slavery by legislation in any territory or district where it exists; that no Territorial Legislature shall have jurisdiction over the subject; that the rights of owners, in sojourn or *in transitu* with their slaves, shall be guaranteed; that fugitives shall be given up on demand, or, where lost in consequence of State legislation, to be paid for by such State.

By Mr. Smith, of Virginia: That the committee consider the policy of declaring out of the Union every member which shall, by her legislation, aim to nullify an act of Congress.

By Mr. Jenkins, of Virginia: That the committee inquire what amendments are necessary to the fugitive slave law; also, to provide for the better security of the rights of slaveholders in the territories; also, what checks are demanded by a sense of self-preservation on the

part of slaveholding States against the operation of the Federal Government, when administered by those who have come into power avowedly on grounds of hostility to their institutions; whether a majority of the slave interest should not be required to sanction the measures of the Government; also, a dual executive be established, etc.

By Mr. Cox, of Ohio: That the committee inquire what further legislation is necessary to carry out the fugitive slave law, especially so as to punish attorneys, judges, and others who obstruct its operation.

By Mr. Hutchins, of Ohio: That the committee inquire what legislation is necessary, if any, to secure to the citizens of each State all the privileges and immunities of the citizens in the several States; also, to secure the right of the people to be secure in their persons, houses, papers, effects, etc.

By Mr. Sherman, of Ohio: That the only effectual remedy for the dissensions is a faithful observance of all the compromises of the Constitution, and the laws made in pursuance thereof.

By Mr. Bingham, of Ohio: That the committee report such further legislation as may be necessary to put down armed rebellion against the laws and authority of the United States, etc.

By Mr. Mallory, of Florida: That the line of 36° 30' be adopted, etc.; all future States to be admitted with or without slavery, as their Constitution may provide; that Congress shall not interfere with the internal slave-trade, or abolish slavery where it has exclusive jurisdiction.

By Mr. Stevenson, of Kentucky: That it be made felony to resist the officers, or to attempt to rescue a fugitive in their custody.

By Mr. English, of Indiana: That the territory of the United States be divided, and that when either portion has a sufficient population, it shall be admitted as a State, without regard to the question of slavery. Congress shall not interfere with the rights of property in the slaveholding portion of the territory; and whenever a fugitive is rescued from his master, the township in which it takes place shall be liable in double the amount.

By Mr. Kilgore, of Indiana: To give right of trial by jury in fugitive slave cases; also, allow a writ of error; rescued slaves to be paid for; and those who obstruct the operation of the law to be criminally prosecuted.

By Mr. Holman, of Indiana: That the Constitution is a compact of mutual and permanent obligation—duty of the Federal Government to enforce the laws, and that the committee inquire if the acts of Congress now in force are sufficient for that purpose.

By Mr. Niblack, of Indiana: That the committee inquire if Congress is competent to provide by law for the payment of the value of fugitives, and, if so, to report accordingly.

By Mr. Noell, of Missouri: That the com-

mittee report the propriety of abolishing the office of President, and establishing an Executive Council of three, each armed with the veto power, etc.; also, report what measures may be necessary to restore the equilibrium of the States.

By Mr. Hickman, of Pennsylvania: An express recognition of the right of property in slaves; a denial to the Government of all right or power to prohibit the trade between the slaveholding States; the right of property in slaves to be protected in the territories; every territory to be admitted with or without slavery, as their Constitution may provide, safety of slave property *in transitu*, etc.

By Mr. Larrabee, of Wisconsin: That it be recommended to the several States to request Congress to call a convention to amend the Constitution.

Mr. Anderson, of Missouri, submitted the following resolution, with a proposition that the questions contained therein be submitted to the Supreme Court for their decision:

That the questions at issue between the slaveholding and non-slaveholding States now involving the integrity and stability of the Union, are: 1. The constitutional power of Congress to prohibit the introduction of slaves into the territories of the United States by persons emigrating to said territories from States wherein slavery exists. 2. The constitutional power of a Territorial Legislature to prohibit or establish slavery. 3. The constitutional right of Congress to protect slave property in the territories of the United States. 4. The constitutional power of Congress to pass laws making it a criminal offence for any person to prevent or obstruct, or attempt to prevent or obstruct the execution of the "fugitive slave act." 5. The constitutional power of Congress to pass laws punishing any person who shall, directly or indirectly, aid or assist any other person held to service or labor in one State, under the laws thereof, to escape from the person to whom such service or labor may be due. 6. The constitutional right of a State to pass laws preventing, hindering, or in any way, directly or indirectly, obstructing the execution of the "fugitive slave act."

Many other propositions were offered and referred to the same committee. They embraced generally the points of the preceding ones, except the following, offered by Mr. Sickles, of New York, as an amendment to the Constitution:

Whenever a convention of delegates, chosen in any State by the people thereof, under the recommendation of its Legislature, shall rescind and annul its ratification of this Constitution, the President shall nominate, and by and with the advice and consent of the Senate shall appoint commissioners, not exceeding three, to confer with the duly appointed agents of such State, and agree upon the disposition of the public property and territory belonging to the United States lying within such State, and upon the proportion of the public debt to be assumed and paid by such State; and if the President shall approve the settlement agreed upon by the commissioners, he shall thereupon transmit the same to the Senate, and upon the ratification thereof by two-thirds of the Senators present, he shall forthwith issue his proclamation declaring the assent of the United States to the withdrawal of such State from the Union.

A series of manoeuvres was then commenced, to secure some kind of expression in the House

which might be looked upon as a proof that conciliation was its ultimate purpose.

Mr. Adrain, of New Jersey, moved a preamble and resolution deprecating the spirit of disobedience, and recommended that all laws conflicting with the Constitution be repealed. On a division of the House this was adopted. Ayes, 153; noes, 14.

As an offset to this, Mr. Lovejoy, of Illinois, offered a preamble and resolution similar to the preceding, except that it embraced also the repeal of all "nullification laws so called," together with other laws conflicting with the Constitution.

Upon this, Mr. Crawford, of Georgia, boldly declared: "The truth is, Mr. Speaker, that there is no propriety, as I conceive, in undertaking to fool each other or the country by the resolutions that may be introduced. Now, let us meet this question fairly. The gentleman from Illinois is not afraid to vote for any thing which he is in favor of; nor am I. Let a resolution be introduced by the member from Ohio, or the member from Illinois, or any other member, stating exactly what each of us understands to be our constitutional rights in regard to slavery, and let us vote on it. I have no objection to vote on any proposition that may be presented."

This resolution of Mr. Lovejoy was adopted by ayes, 136; noes, none.

Upon the first opportunity after the passage of this preamble and resolution, Mr. Morris, of Illinois, claimed the floor. He had been endeavoring for some days, without success, to get before the House a strong Union resolution. The report in detail of the proceedings is not without its interest.

Mr. Morris, of Illinois: "Mr. Speaker, I now send up to the Clerk's desk a resolution upon which I desire the vote of the House."

Mr. Landrum: "I rise to a question of order. I call for the regular order of business."

The Speaker: "The Chair must be allowed to say to the gentleman from Louisiana that, although these proceedings seem a little irregular, yet, under the rules, the House is now proceeding with the regular order of business."

Mr. Morris: "I am now entitled to the floor, and I do not yield it to any one, nor do I intend to be cheated out of it."

The Speaker: "The Chair has assigned the floor to the gentleman from Illinois, and he will submit his proposition."

Mr. Morris: "Yes, sir, I have the floor, and I want to see a fair fight. This House has to-day, by large majorities, recommended the repeal of the acts of the State Legislatures, known as personal liberty laws, recommending the repeal of the nullification laws, and all laws in violation of the Constitution and laws of the United States. Now it only remains for us to declare our devotion to the Union of these States."

Mr. Barksdale: "I call the gentleman from Illinois to order."

Mr. Morris: "I do not yield to the gentleman from Mississippi, or to any other gentleman."

Mr. Hughes: "Permit me to call the attention of the Chair to the question of order before the House. I think that while the House is carrying out the regular order of business under the 130th rule, the motion to suspend the rules is not in order."

Mr. Morris: "I decline to yield the floor to the gentleman from Maryland or to any other gentleman. I ask that my resolution may be read."

The resolution was read, as follows:

Resolved by the House of Representatives, That we properly estimate the immense value of our national Union to our collective and individual happiness; that we cherish a cordial, habitual, and immovable attachment to it; that we will speak of it as of the palladium of our political safety and prosperity; that we will watch its preservation with jealous anxiety; that we will discountenance whatever may suggest even a suspicion that it can, in any event, be abandoned, and indignantly frown upon the first dawning of every attempt to alienate any portion of our country from the rest, or enfeeble the sacred ties which now link together the various parts; that we regard it as a main pillar in the edifice of our real independence, the support of tranquillity at home, our peace abroad, our safety, our prosperity, and that very liberty which we so highly prize; that we have seen nothing in the past, nor do we see any thing in the present, either in the election of Abraham Lincoln to the Presidency of the United States, or from any other existing cause, to justify its dissolution; that we regard its perpetuity as of more value than the temporary triumph of any party or any man; that whatever evils or abuses exist under it ought to be corrected within the Union, in a peaceful and constitutional way; that we believe it has sufficient power to redress every wrong and enforce every right growing out of its organization or pertaining to its proper functions; and that it is a patriotic duty to stand by it as our hope in peace and our defence in war.

Mr. Landrum: "I object to that resolution."

Mr. Branch: "I have no objection to the reception of the resolution; but I move that it be referred to the Select Committee of Thirty-three."

Mr. Morris: "As I understand there is objection to the resolution, I move a suspension of the rules. The resolution is in the language of the Farewell Address of the Father of his Country, and I want to see who will vote against it."

Mr. Jenkins: "I desire to ask the gentleman from Illinois, whether Lincoln had been elected in Washington's time?" [Cries of "Order!"]

The question was taken, and the rules were suspended, (two-thirds having voted therefor.)

Mr. Morris then submitted his resolution, and demanded the previous question upon it.

The previous question was seconded, and the main question ordered to be put.

Mr. Hindman called for the yeas and nays upon the resolution.

The yeas and nays were ordered.

The question was taken, and it was decided in the affirmative. Yeas, 116; nays, 44.

Immediately after these proceedings, Mr. Crawford, of Georgia, offered the following resolution:

Resolved, That the Constitution of the United States recognizes property in slaves; that Congress has passed laws to aid slaveholders in recapturing their slaves whenever they escape and make their way into the free States; that the Supreme Court of the United States have decided that negroes were not included, either in the Declaration of Independence or in the Constitution of the United States, except as slaves, and that they cannot become citizens; and we, the members of this House, hereby sustain and will support this construction of the Constitution, these laws, and said decision of the Supreme Court.

This is a brief expression of the views generally of the Southern members. It was pushed aside for the day, and on the next day various shifts were resorted to for evading the vote, until it was finally laid on the table. Ayes, 88; noes, 81.

While these scenes were passing in the House, a portion of the people were looking with great anxiety to its action, flattering themselves that some measures might be proposed which would be acceptable to all sections, and restore the country to its previous peaceful and prosperous state. Their hopes were vain, and not even their gloomiest visions presented the dread realities which the impenetrable curtain of the future hid from their sight.

At this time the Representatives from the State of South Carolina withdrew. Their reasons are thus very summarily stated:

WASHINGTON, December 21, 1860.

SIR: We avail ourselves of the earliest opportunity, since the official communication of the intelligence, of making known to your honorable body that the people of the State of South Carolina, in their sovereign capacity, have resumed the powers heretofore delegated by them to the Federal Government of the United States, and have thereby dissolved our connection with the House of Representatives.

In taking leave of those with whom we have been associated in a common agency, we, as well as the people of our Commonwealth, desire to do so with feelings of mutual regard and respect for the rights of each other, cherishing the hope that, in our future relations, we may better enjoy that peace and harmony essential to the happiness of a free and enlightened people.

JOHN MCQUEEN,
M. L. BONHAM,
W. W. BOYCE,
J. D. ASHMORE.

HON. WILLIAM PENNINGTON,
Speaker of the House of Representatives.

Mr. Cobb, of Alabama, subsequently rising for a personal explanation, thus alluded to the position which the Republican party had now assumed on the state of affairs:

"But gentlemen say they cannot do any thing. They say that the edict went forth on the sixth day of November last; that the people decided such and such questions involving certain principles in reference to the slavery question. I deny that the jury impanelled at that time gave any such verdict. There were

other questions in issue which entered into that canvass. I tell you what I believe is the truth, and I tell the country what I believe is right; and I say I do not believe the question of slavery was the only question that was submitted to the people, but that other questions entered into that contest which went far to influence the result. Is that so? Have you, Republicans, got a majority of the people of this vast country to indorse your principles?

"I say that the tariff question entered into the controversy at the last election; I say that the internal improvement question entered into that controversy; I say the homestead question entered into that contest; I say the Pacific Railroad question entered into that contest; and I am ashamed to acknowledge that a question entered into that contest in relation to the corruptions of the Administration."

On the great point maintained by the Southern States, that slaves are regarded as property under the Constitution, he laid before the House the following extract from treaties made by the Government in which they are called property, to wit:

"Provisional Articles between the United States of America and his Britannic Majesty."

"Agreed upon by and between Richard Oswald, Esquire, the commissioner of his Britannic Majesty, for treating of peace with the commissioners of the United States of America, in behalf of his said Majesty, on one part, and John Adams, Benjamin Franklin, John Jay, and Henry Laurens, four of the commissioners of the said States, &c.

"ART. VII. * * * * All prisoners on both sides shall be set at liberty, and his Britannic Majesty, with all convenient speed, and without causing any destruction, or carrying away any negroes or other property of the American inhabitants, withdraw all his armies, garrisons, and fleets from the said United States, and from every fort, place, and harbor within the same." * * * * *

"Done at Paris, November 30, 1782.

"RICHARD OSWALD,	[L. S.]
"JOHN ADAMS,	[L. S.]
"B. FRANKLIN,	[L. S.]
"JOHN JAY,	[L. S.]
"HENRY LAURENS.	[L. S.]"

"Definitive Treaty of Peace between the United States of America and his Britannic Majesty."

"ART. VII. * * * * And his Britannic Majesty shall, with all convenient speed, and without causing any destruction, or carrying away any negroes or other property of the American inhabitants, withdraw all his armies, &c.

Done at Paris, September 3, 1783.

"D. HARTLEY,	[L. S.]
"JOHN ADAMS,	[L. S.]
"B. FRANKLIN,	[L. S.]
"JOHN JAY.	[L. S.]"

"Treaty of Peace and Amity between his Britannic Majesty and the United States of America."

"(Ratified and confirmed by and with the advice and consent of the Senate, February 11, 1815.)

"ART. I." * * * * "shall be restored without delay, and without causing any destruction, and without carrying away any of the artillery or other public property originally captured in the said forts or places, and which shall remain therein upon the exchange of

the ratifications of this treaty, or any slaves or other private property."

"Done, in triplicate, at Ghent, December 24, 1814.

"GAMBRIE, [L. S.]

"HENRY COULBURN, [L. S.]

"WILLIAM ADAMS, [L. S.]

"JOHN Q. ADAMS, [L. S.]

"J. A. BAYARD, [L. S.]

"H. CLAY, [L. S.]

"JONA. RUSSELL, [L. S.]

"ALBERT GALLATIN. [L. S.]

"Also, a further evidence that slaves are regarded by the General Government as property, they sell them for debts due the Government."

The movements in South Carolina had been so rapid that her commissioners had already presented themselves to the President, for the purpose of entering into negotiations for the settlement of difficulties as between separate nations. A Message from the President to the House, on the 8th of January, (see previous pages,) states his proceedings relative to this application. It was, after being read, referred to a committee of five, with instructions to report from time to time. No report which led to any important results was made.

The Committee of Thirty-three reported to the House a joint resolution to amend the Constitution of the United States; an act for the admission of New Mexico into the Union as a State; and an amendment to the fugitive slave law, and the law relating to fugitives from justice. A number of minority reports were also made, embracing other propositions.

The debate on these propositions was continued by Messrs. Corwin, Clemens, Bingham, Washburne, Lovejoy, and others.

The state of opinion in the House at this period is thus described by Mr. Montgomery: "I think that every impartial observer, who has witnessed our deliberations since the commencement of the session, will admit that there is nothing like unity of sentiment or concurrence of opinion among us. The votes had on the various propositions of compromise presented from time to time, abundantly prove that there is not the slightest probability that a constitutional majority can be obtained for any proposition which will restore harmony and peace to our distracted country. Day after day is spent in the delivery of speeches, many of which only tend to increase our troubles, and add fuel to the flame of public discord. While we are engaged in this profitless controversy—for I doubt whether any speech that has been made, or that will be made, will change the opinion or vote of a single member—State after State is seceding from this Union, and delegation after delegation is bidding us farewell, and vacating the seats around us. While these things are being done, what are we doing to avert this dreadful calamity? Revolution is sweeping over the land. We can feel the temple of our country's liberty tremble, yet we stand here idle."

A general debate followed in the House, which continued some weeks. It not only em-

braced the topics which had been previously discussed, but looked forward to the great question of the rightfulness and legality of secession, or peace or war, which was coming up for speedy decision.

Mr. Stevens, of Pennsylvania, on this question thus expressed his views: "It is time that this important question was solved. I do not perceive when any better occasion can present itself to decide whether this Union exists by the sufferance of individual States, or whether it requires a constitutional majority to absolve them from their allegiance. If it should be determined that secession is a rightful act, or that there is no power to prevent it, then the Union is not worth preserving for a single day; for whatever disposition shall be made of the present difficulty, fancied wrongs will constantly arise, and induce State after State to withdraw from the Confederacy. If, on the other hand, it should be decided that we are ONE PEOPLE, and that the Government possesses sufficient power to coerce obedience, the public mind will be quieted, plotters of disunion will be regarded as traitors, and we shall long remain a united and happy people."

The members of the House from Louisiana presented the ordinance of that State, seceding from the United States. Upon this occasion, Mr. Taylor addressed the House, and thus expressed the views generally held with regard to the importance of cotton to the manufacturing interests of the world:

"If you fulfil your menaces, and blockade Southern ports, the Southern States will lay an embargo upon all cotton seeking transportation through the Northern channels open to it. Not a bale will be permitted to be moved inland in that direction until the commerce of their ports is freed from your impediments. And if your people could stand this state of things, how long do you suppose that England and France would stand by in silence and inaction? And if the two sections are engaged in actual war, so that the cotton is not only arrested in our ports, but not made, will they stand idly by and see you, who have heretofore been the partisans of the right of self-government, engaged in the despotic work of compelling us to submit to be governed at your mere will and pleasure; and that, too, when, by this most gross and palpable violation of the fundamental principle of your own Government, you inflict on them, in common with other countries, an injury which will shake the whole social system of Europe to its very centre? I, for one, think they will not. If those evil times come, to which you seem to look forward, they will be compelled to interpose in their own interest, and you and we will be at their mercy."

Mr. Boulogney, of the same State, next took the floor, and declared in the most positive language that he should not then withdraw from a seat as a member of the House. He was the only Representative from all the seceding States who maintained his seat in

the House. He thus expressed his reason for his course :

"In the outset permit me to say that, until a few moments ago, I was in the same condition with my colleague, not having received official information of the passage of the ordinance of secession by the convention of my State. Nor have I received from the Legislature of my State, now in session, any information of the passage by that body of a resolution, instructing her Senators or requesting her Representatives to withdraw from Congress. For one, although I respect that body, I shall not obey its request. I was not elected by that body, and I have nothing to do with it, or it with me.

"Mr. Speaker, there is another reason which compels me to differ with the Senators and Representatives of my State. I am the only member of Congress from Louisiana who was elected as an American Union man. To those principles I shall stand forever." [Great applause in the galleries.]

"Again: when I came here, I took the oath to sustain the Constitution of the United States. What does that mean? Does not the Constitution of the United States mean the Union of the United States? I so understand it; and to that oath I shall adhere firmly to the end. Whenever I am instructed by my immediate constituents, and am requested by them to withdraw from Congress, I shall comply with those instructions as soon as they are received. Then, and not until then, I shall resign; and after resigning my position here, I shall yet be a Union man, and stand under the flag of the country which gave me birth." [Great applause in the galleries and on the floor.]

The following resolution was offered at a subsequent session of the House, and unanimously adopted :

Resolved, That neither the Federal Government, nor the people or the governments of the non-slaveholding States, have the right to legislate upon or interfere with slavery in any of the slaveholding States in the Union.

The proposition to organize new Territories was brought forward in the House by a motion of Mr. Thayer, of Massachusetts, to constitute the Dakota Land District, and to provide for the admission to the House of Representatives of a delegate therefrom.

Mr. Cox, of Ohio, wished to inquire of the chairman whether the committee, of which he is chairman, proposed any legislation with respect to this or the other territories? And if so, whether they proposed to change the bills they reported last session, so as to obliterate those obnoxious provisions which caused them to be defeated?

Mr. Grow, of Pennsylvania, replied that the Committee on Territories propose, when they have an opportunity, to submit to this House bills for organizing territories for the people in the region around Pike's Peak; for the people in the region of the Washoe silver mines, called Nevada; for the people of what is called Ari-

zona; and for the people of this very Dakota Territory, and for the territory above it, which will cover all the territory of the nation; and thus arranging the whole matter, they will get rid of this whole territorial legislation. And they propose to report the bills in the usual form.

Mr. Cox further asked: "And do they propose the same proviso in respect to slavery that was contained in the former bills? That is the point."

Mr. Grow replied: "We shall, I take it, report the same proviso as before, with the privilege of any member to move to strike it out; and if a majority is against us upon that question, we propose to vote for those bills. If a majority shall strike the clause out, then you have not a word in the bills about slavery—no reference to it whatever. We propose to leave it to be settled by a majority of the House, whether they will retain that proviso or not; and if a majority say no, it will be out of the bills."

On a subsequent day, bills were introduced by Mr. Grow to provide temporary governments for all the territories above mentioned. These bills were passed after the proviso had been struck out.

Apprehensions began to exist in the minds of many Southern members of the House that the army and navy were to be used for the purpose of coercion against a portion of the States which had endeavored to place themselves out of the Confederacy. These apprehensions were expressed in the House, and an opportunity for discussion was demanded on the naval bill. It was refused on this bill, but when the army appropriation bill was taken up the field for general debate was thrown open.

Mr. McClelland, of Illinois, was the first to address the House. He argued that no State had any lawful or constitutional right to withdraw from the contract of the national Union: *first*, because that contract was made by the people, and not the States; and *second*, because, if made by the States, still, as artificial persons, they were bound by it, and have no independent, constitutional right to withdraw from or rescind it. And again, because, in such case, the contract of Union subordinates the States to a paramount sovereignty ordained by their own act and consent. And again, because that sovereignty acts directly upon the *people* of the "United States;" and by its own independent force must act upon them, despite of whatever the States, as such, may do. Being sovereign, its first duty was to preserve itself; and being sovereign, where is there a power more than sovereign to control it, disintegrate it, or dissolve it? When the States show their right to do so, the paradox will have been established, that the minor is the greater proportion; that the inferior has the right to substitute himself for the superior; that inferiority is sovereignty, and that sovereignty is subordination!

Mr. Cox, of Ohio, followed: "Mr. Chairman,

I speak from and for the capital of the greatest of the States of the great West. That potential section is beginning to be appalled at the colossal strides of revolution. It has immense interests at stake in this Union, as well from its position as its power and patriotism. We have had infidelity to the Union before, but never in such a fearful shape. We had it in the East during the late war with England. Even so late as the admission of Texas, Massachusetts resolved herself out of the Union. That resolution has never been repealed; and one would infer, from much of her conduct, that she did not regard herself as bound by our covenant. Since 1856, in the North, we have had infidelity to the Union, more by insidious infractions of the Constitution than by open rebellion. Now, sir, as a consequence, in part, of these very infractions, we have rebellion itself, open and daring, in terrific proportions, with dangers so formidable as to seem almost remediless. And I must warn the people of Ohio that it is the well-grounded fear, almost the foregone conclusion of the patriotic statesmen here, that the work of breaking up will go on, until the entire South shall be arrayed against the entire North."

He then submitted these propositions for consideration:

That secession is not a right in any possible relation in which it can be viewed; to tolerate it in theory or practice is moral treason to patriotism and good government. That, while it may not involve such direful consequences as other revolutions, still it is revolution. That every effort of conciliation should be exhausted to check it, before force is applied. That, if the North does not do her part fully in recession from aggression, it will be impossible to unite the Northern people, or any portion of the Southern people, in repressing secession. That, if the South will make a patient endeavor, equal to the great occasion, to secure her rights in the Union, he believed that she would succeed; and if she was then repulsed, it would be impossible for her to receive any detriment from the North, but she will depart in peace. If she go inconsiderately, as some States are going, the country may incur the fearful hazard of war. If the South press the one hard overmastering question upon the North, and follow it up with seizure of forts and revenue, cannonading of our vessels, and other aggressive acts, without giving an opportunity for conciliation, there will be no power in the conservatism of the North to restrain the people. No sacrifice will be considered too great to make in the protection and defence of the Union. That, in the present state of facts, so long as the revenues can be collected on land or sea, and the forts and harbors can be commanded by the Federal Government, that Government must be, as to these matters, the Government *de facto*, as well as *de jure*; and that, so long as this *status* can be maintained by the Executive, it should be done by all the legal forces of the Government.

Only when revolution becomes so formidable as to be irresistible, would it be proper to inquire whether coercion would not be both suicidal to the Union and criminal to mankind.

Mr. Reagan, of Texas, replied to both the preceding speakers. He endeavored to correct some of the errors upon which the arguments advanced against the South seemed to be predicated: "We do rightly estimate the value of the Union. We do rightly estimate the value of the blessings of this Government. We have loved and cherished the Union. Nobody has a better right than I have, although I say so myself, to make that declaration. I have loved the Union with an almost extravagant devotion. I have fought its battles whenever they were to be fought in my section of the country. I have met every sectional issue, at home in my section, and in my State particularly, which was attempted to be forced upon the public mind, and which I thought would mar the harmony of the Democratic party. I have fought the battles of the Union without looking forward to the consequences. I have fought them in times when the result for the Union seemed hopeless. If I could believe we could have security of our rights within the Union, I would go home and fight the battles of the Union in the future with the same earnestness and energy that I have done in times past."

The debate was further continued by Mr. Adrain, of New Jersey, Mr. Anderson, of Missouri, Mr. Garnett, of Virginia, and Mr. Gurley, of Ohio.

Mr. Garnett argued that peace might end in reconstruction, but war was inevitable, eternal separation. Supposing war might follow, he submitted what he regarded as the true policy of the seceded States, both in respect to a blockade and an invasion:

"I will suppose you have the naval force necessary, and the revenues, without resorting to loans or direct taxes to maintain it. I will suppose the Southern people quietly submit to it even for a year; and imagine not that their hearts would grow weary, or fail them, once embarked in the great cause. They are the sons of men who endured and suffered under the entire military power of England for ten years, and by endurance came out conquerors. During that period of blockade they would have abundant provisions; for every man who has studied the statistics of the country knows that the South produces more food, in proportion to her population, than the North. For her, it would be the loss of income only; and while her cotton was thus held up for a single year, what would be the consequences to New England, whose whole supply is drawn from the South; to France, where Southern cotton furnishes employment directly to some two hundred and seventy thousand persons, and indirectly to more than a million? Above all, what would be the effect of this withdrawal from Great Britain of three-fourths of the cotton she uses, upon which, as the *London Times*

lately estimated, four million of her people depend for daily bread? Rely upon it, sir, that, bitter and unreasonable as her prejudices may be, the same causes which have reconciled England to the use of slave-grown sugar and cotton, would never suffer either France or herself to acquiesce in this blockade. The South need only wait patiently and silently, with absolute assurance that those great Powers would be forced to an active interference. And then, sir, how would you conduct the war?

"No course would be open to you but actual invasion, which, indeed, passion and resistance would probably bring about at a much earlier period. Invasion, sir! invasion of what? and under what conditions? Of an agricultural country eight hundred and fifty-one thousand square miles in extent—larger than all the empires and kingdoms of central Europe, yet with only about fourteen inhabitants to the square mile, and consequently without large cities or means to sustain an invading host; but, sir, not without brave men, trained to the use of arms, and ready to destroy the invading army, which would melt away like snows of winter every mile as they advanced into the Southern clime, far from their resources. Napoleon, in his disastrous Russian invasion, was not so far from his supplies, and in a country twice as densely peopled, twice as able to sustain him. Your population may outnumber ours by millions; but you would be hundreds of miles from your true base of operations, while we would be at home. You are doubtless as brave as we are, though not more so; but your soldiers would be led on by the unhallowed lust to bring brothers beneath their yoke, while ours would strike for their homes and their altars. I know that fanatics daily depreciate to the Northern people the exertions of the South in the Revolution, and teach that, as slaveholding is the sum of all human villainies, so is it the source of incurable weakness and impotence. But before they believe such teachers, let them read history.

"But, sir, no sane man believes that we could be conquered. If we have no ships of war, you have vessels in abundance who would accept our letters of marque and reprisal; and the same Northern capital that now engages in the slave-trade could be transferred to privateering on your commerce. If we did not invade you, we could at least repel your invasion, and cut off your attacking forces. Patience alone, on our side, would insure a victory. But I will not contemplate such scenes."

Mr. Thomas, of Maryland, followed, saying: "You complain that the seceding States have seized the forts and other public property. These forts were permitted to be erected in these States for their defence, and the arms that have been taken were placed there for the same purpose. The Federal Government has no right to use this property for any other purpose. And whenever the people who had granted the sites of the forts for their defence discovered that they were to be used for the

opposite purpose—of an attack upon them—it was not only just, but wise, for them to see that they were used for their defence, the legitimate purpose for which they were erected."

Mr. Ferry, of Connecticut, said he would have the President collect the revenues in every Southern port, and every other port in the Union, peaceably if he can, forcibly if he must. More than this, he would have him maintain the national flag at every hazard, over every fortification, arsenal, dock-yard, and navy-yard in the Union. If, in the discharge of this duty, he is met by force, then he would place at his command the army and navy and purse of the nation. This Union must and shall be preserved. The experiment of self-government was not yet exhausted. It would be a shame, an everlasting reproach to the American name, to allow it to be destroyed by the hand of domestic violence.

Mr. Sherman, of Ohio, in reply to the assertion that the army should not be used to coerce a State, submitted that if, by this, it was meant that the army should not be used to conquer a State, to compel her to be represented, to maintain the courts or post-offices within her limits, to burn her cities or desolate her fields, it was entirely correct. He did not believe that any Administration will pursue such a policy. But we have a Government, a great Government, to maintain. It was supreme within the powers delegated to it; and it was provided with ample authority to protect itself against foreign or domestic enemies. It had the exclusive right to collect duties on imports. It was the exclusive owner of forts, arsenals, navy-yards, vessels, and munitions of war. It had a flag, the symbol of its nationality, the emblem of its power and determination to protect all those who may of right gather under its folds. It was our duty, as the representatives of this Government, to maintain and defend it in the exercise of its just powers. Had it trespassed upon the rights of a single individual? Did any citizen of South Carolina complain that this Government had done him wrong? No man can say that. The Government for years had been in the hands of the Democratic party, controlled chiefly by Southern citizens. They controlled its power and patronage; and now, when the Republican party was about to assume the reins, they seek to subvert it. They organized revolution under the name of secession.

He continued: "My argument is, that South Carolina is not coerced, but that she is coercing this great Government; that she is coercing all the border slave States; that she is leading them, by wild fanaticism and by the community of interests, to take a step which I do not believe Virginia, or North Carolina, or Maryland, or any of the border States would take, in the light of calm and cool reason.

"Mr. Chairman, I appeal in all candor to the Representatives of the border States to arrest the tide that, but for you, will in a few days

place us in hostile array with each other. I know that the movements in the cotton States have gone so far that we cannot arrest them. I appeal to the Representatives of the border States to arrest the progress of this storm, for a little time at least. Let us see whether there is any hope for peace and conciliation. If there is not, then, if we cannot agree, let us fight; but if we can agree, let us do it like men, and not be hurried off by wild and insane feelings of rage and disappointment by the weakest State in this Confederacy."

The object for which the army was to be used he frankly declared to be, in his opinion, for the purpose of protecting the acknowledged property of the United States, in recovering that which has been unlawfully taken, and in maintaining the Union.

On the subject of compromise, his opinion was expressed in these words: "I say again, Mr. Chairman, that I do not believe any terms which our people could yield and preserve their own self-respect would satisfy South Carolina, Florida, or some of the other Southern States, because they are bent upon disunion."

The proposition made in the Senate by Mr. Crittenden was objected to by Mr. Sherman, because, to use his language, "it protects the institution of slavery in the Territory of New Mexico; it takes away from Congress all power over the subject; it takes away from the people of the territory all power over the subject; it makes this Government establish, protect, and uphold slavery in that territory. I believe that slavery is a local institution, municipal in its character, protected by State laws, having rights exclusively within those States, and having no rights beyond those States except the right to recapture fugitives who escape from service. Believing, as I do, that that is the correct construction of the Constitution, I never will, whatever may be the consequences, vote for a proposition to establish, protect, and uphold slavery anywhere on God's earth."

Mr. Crawford, of Georgia, found himself under the necessity of replying upon the spur of the moment, or the debate would be closed. He commenced by saying that it was with feelings of great distrust that he undertook the vindication of South Carolina and the other seceding States, from the charges made by the gentleman from Ohio; but its very necessity left him no other alternative. His speech, without correction, would have the effect of producing upon the public mind of the North the impression that South Carolina, Georgia, Florida, Alabama, Mississippi, and Louisiana had commenced an aggressive war upon the Government of the United States. "It is not just either to ourselves or to them, that they should believe, for one moment, that we had, or intended to commence, an aggressive war upon this Government or the people of the North. All that they ever intended was to protect and defend themselves against encroach-

ments upon their rights and liberties, come from what quarter they might."

On the movement of Major Anderson to Fort Sumter, his view was thus declared: "This was an act of war. But to make it beyond question, and show that he considered it war, he did that which no sane man would do in peace, which was to destroy as far as possible Fort Moultrie, and render it unfit for use or service as a fortification; add to this the burning of the gun carriages and the spiking of the cannon, and then tell me, either that your Government has kept its faith, or that South Carolina was guilty of the first act of hostility. Up to that moment, nothing had been done by South Carolina inconsistent with the good faith pledged for her by her Representatives; yet when they saw these things done, and were chafing under the *mala fides* of your Government, and losing all hope of any other result than war, they seized such defences as were within their reach, and have held them since for purposes of protection and safety."

Again he said: "And I assert upon Southern honor, that no fort would have been taken, no arsenals seized, and no hostile attitude assumed by a single State, had it not been for the action of Major Anderson at Charleston; and upon him rests whatsoever of blame may attach to the subsequent conduct of South Carolina, Georgia, and the other States."

The fundamental view of the Government formed under the Constitution, entertained by all the Southern members, is thus repeated: "I say that, in view of these things, believing that this creature of ours had no right to use these fortifications, erected for our defence, for our destruction, we seized them under the universally-recognized principle of law, that the rights of the agent are always subordinate to the rights of the principal; and your rights within the limits of our State must be subordinate to ours whenever you violate the compact between us. That is the principle upon which we have acted, and, as I have said before, which we intend to maintain to the very utmost of our men and means."

Mr. Hill, of Georgia, in reply to the assertion of Mr. Sherman, of Ohio, that the South would hearken to no proposition of conciliation, believed that this was said without authority, so far as it related to all the Southern States.

His views were so strongly in contrast with the heated and fiery language so much used by the Southern members, and, withal, so hopeful and conciliatory, that they fell upon the wearied and perplexed assembly like a gentle dream. As his time expired and he was forced to close, cries of "Go on!" "Go on!" rose from all parts of the House.—He proceeded:

"Despite the attitude of South Carolina herself, I believe to-day she is approachable with reason and words of kindness, and that she will listen to the voice of conciliation if it come in so gentle a form as could be tendered by

gentlemen upon the other side of this House. I beg, I invoke it for her, as my mother, who cherished me in the early part of my life, and upon whose bosom sleep my honored parents, and where dwell to-day my near kindred; and I ask you to present to her, far gone as you may consider her, the olive branch. Tender it gracefully; you can afford to do it, as guardians of this great and powerful Government. South Carolina may be, and in my judgment she is, extreme in her precipitancy. I have regretted it; I have remonstrated against it, and I have implored the people of my own State, notwithstanding her example, to delay their action, and never to follow her example until assured that it would meet a hearty and undivided response from the people of Georgia. Will you, under these circumstances, urged and entreated as you are by men who are as much and as faithfully attached to the Union of these States as you yourselves are, refuse to make this last effort in behalf of conciliation between these distracted sections of our common country? I hope not. I hope the door to conciliation is not yet closed. There are good men yet from the North in this House. There are good men yet in the other wing of the Capitol; and I mistake if they do not yet send forth words of love and kindness to soothe an exasperated people, and thus give quiet to an afflicted nation. I regret not to find a greater degree of it in my honorable friend from Ohio. Surely the time has not yet arrived to determine, as positively as he does, that if there can be no reconciliation there must be a resort to the stern arbitrament of war. Surely he does not mean what he says: that there must be an accommodation or a fight. Not yet—not yet, sir, I would hope. Let him, let every man who feels that there is an inevitable result, wait for the accumulated voice of American patriots to come up and determine this question. I abide that result with confidence and hope. I trust that the convention of my own State—which is sitting to-day, and in which is assembled a large amount of the best intelligence and the best patriotism of that State—will give time to the people of the United States to confess their conservatism, their attachment to the Union, and their devotion to the interests of the several States. I believe it will do it; and I trust, if my State shall resolve to secede in this the hour of her extremity, as she believes, that she will make her secession prospective, so as to afford ample time to intervene, and still save the great structure under which we live, and which has blessed us so long.”

Mr. Burnett, of Kentucky, offered the following amendment to the clause making an appropriation:

Provided, That no part of the appropriations made in this bill shall be used by the Federal Government in making war, or in any attempt to subject any State which has or may hereafter secede from the United States.

He said: “I want that the country shall understand, and that we on this side of the House shall understand, distinctly from gentlemen on the other side whether it is their purpose to wage war or not.

“Under the terms of ‘enforcing the law,’ and ‘the execution of the law,’ gentlemen cover up their purposes to make war. [Cries of ‘Oh, no!’ from the Republican side of the House.] It must result in war, gentlemen. You may blockade the port of Charleston to-morrow; send down your floating custom-house, and undertake to collect the revenue, and the first gun that is fired results in civil war.

“It must do that. We all so understand it. I do not want gentlemen, under the term of ‘enforcing the law,’ to shrink from the announcement of their purpose, which is to make war. It is nothing else. The mere blockading of the port of Charleston is, in my judgment, an act of war. I believe, whether gentlemen so regard it or not, that the President has no power to use the army and navy of this country, except as subservient to the civil authority. South Carolina, as has been before remarked on this floor, has no Federal officers. She has no Federal judiciary there. None of the powers in that State recognize the authority of the Federal Government, or can enforce obedience to any of the laws of Congress. And yet you propose to send an army down there, under the name of enforcing laws, to make war upon South Carolina. It is nothing else; and there is not a sensible man on that side of the chamber who does not so understand it. If that be your purpose, come up like men and say so. Do not shrink from it. Do not undertake to carry on war under a specious pretext of enforcing law.”

Mr. Stanton, of Ohio, replied: “Mr. Chairman, I do not apprehend that anybody on this side of the House contemplates making war on any State of this Confederacy, unless war is first made by that State on the Federal Government. There is no war contemplated by this Government, or by any gentleman on this side of the House, except a defensive war, for the protection of its executive officers, and of the men engaged in the discharge of executive and ministerial duties.”

Mr. Burnett: “May I ask the gentleman from Ohio one question?”

Mr. Stanton: “Yes, sir.”

Mr. Burnett: “If you do not intend to make war, why do you object to my amendment?”

Mr. Stanton: “Mr. Chairman, I will tell the gentleman why. If, in the execution of those laws, the officer of the law is resisted by a military power, by State authority; and if it become necessary for his protection, and for the discharge of his duties, that the United States shall defend itself, protect itself, protect its property, its arsenals, its forts, its executive and ministerial officers; if it becomes necessary to make defensive war, then I suppose the money appropriated by this act will

be used in that war. That is what I understand."

The amendment was not voted upon, and the bill was subsequently passed without further debate.

The withdrawal of the members of the House from Georgia was made known by their joint letter to the Speaker, namely:

WASHINGTON CITY, January 23, 1861.

SIR: We have received official information that the people of the State of Georgia, in convention assembled, on the 19th day of January, 1861, adopted and passed an ordinance of secession.

The sovereign State of Georgia, of which we are Representatives in this House, having thereby dissolved the political connection between that State and the Government of the United States, and having thereby repealed the ordinance of 1788, by which the Constitution of the United States was ratified, and having resumed all the powers delegated to the Federal Government, we hereby announce to you that we are no longer members of the House of Representatives of the United States Congress.

PETER C. LOVE,
MARTIN J. CRAWFORD,
THOMAS HARDEMAN, JR.,
LUCIUS J. GARRELL,
JOHN W. H. UNDERWOOD,
JAMES JACKSON,
JOHN J. JONES.

HON. WILLIAM PENNINGTON,
Speaker House of Representatives of the United States.

WASHINGTON CITY, January 23, 1861.

SIR: Satisfied, as I am, that a majority of the convention of the people of Georgia, now sitting, desire that the State should no longer be represented upon this floor, I, in obedience to this wish of the people's representatives, hereby resign the seat I hold as a member of this House.

I am, respectfully, your obedient servant.

JOSHUA HILL.

HON. WILLIAM PENNINGTON,
Speaker House of Representatives of the United States.

It was now the middle of February—Congress had prepared the usual appropriation bills, arranged the measures for procuring the funds necessary to meet the expenses of the Government. A highly protective tariff bill had passed one House and was certain to pass the other, but on the great subject which absorbed the attention of the whole country nothing had been accomplished. The Senate had discussed the point whether there could be a compromise or not, without arriving at any conclusion. Much less had they been able to determine what should be the plan of compromise. The crisis of the country was the great topic of discussion in the House, but the committee had not yet made any formal or final report. It was evident that Congress, with its conflicting and determined elements, could do nothing. Those who looked for a satisfactory adjustment from that quarter now gave up all hopes. In this they were confirmed by the continued unsuccessful action of the Peace Convention, a body which had assembled at Washington, as recommended by the Legislature of Virginia.

The views of Congress relative to the future difficulties of the country manifest at this time a change. Six States had withdrawn from the

Union, no immediate prospect of an adjustment existed, and the question had become one of peace or war. Its solution seemed to be in the hands of the new Administration. An effort was therefore made to discover the purposes of the President elect, either through his own expressions or from those of his friends in Congress. After the delivery of the inaugural, the chief theme of the discussions in the Senate, during its brief session, was whether the meaning of that document was peace or war.

The views of the Republican portion of the Congress, with few exceptions, at this time, are to be found in such declarations as were made in the House. They were opposed to compromise, and demanded the enforcement of the laws.

Mr. Beale, of New York, said: "Sir, I am opposed to any and all compromises—

"1. Because they are to be extorted from us by threats of dissolution of the Union in case we refuse. I desire to see the strength of this Government tested, and to know whether the Union is a Federal rope of sand, to be washed away by every wave of passion, or an 'indissoluble Government.'

"2. Because they will fail to accomplish the reintegration of the Union.

"Six States have already seceded, and will not be parties to the transaction or bound by it; and one, if not more, has avowed her determination never to come back, even upon the principle of reconstruction; and several of them are represented in a convention to form a Southern Confederacy, and have formed such a confederacy.

"3. Because the Republican party is not now in power, and should not submit to any terms as a condition precedent to obtaining it.

"Our candidate has been constitutionally elected; entertains no principles hostile to the interests of any one of the States. We are resolved to inaugurate him in the same constitutional manner. In the words of the distinguished Senator elect from Ohio, 'inauguration first, adjustment afterward.'

"4. Because the sentiment of nine-tenths of the Republicans of the free States is opposed to compromise of principle. I speak not of the commercial circles, where the opinion of Mr. Webster prevails, that 'Governments were instituted to protect property,' no matter of what kind; but of the intelligent masses of the free country, where, upon the mountain sides, in the valleys, and along the rivers of the North, no shackle rings—no unpaid labor degrades, but where to work is to be ennobled, and where the god of Freedom baptizes the foreheads of his sons with the dew of toil. These men want no compromises with slave labor—no unfair competition between their adventurous toil and the investments of Southern capital. These men believe that 'to secure the inalienable rights of life and liberty, governments were instituted among men.'"

After stating the measures to which he was

opposed, he thus declared those of which he was in favor: "Mr. Speaker, having stated thus frankly what I will not support, it may be asked me 'what affirmative action do you propose shall be taken?' This is a most important inquiry. But, sir, aware of all the responsibilities which devolve upon me as a Representative, of all the perils which environ my country, asking for that wisdom of duty which cometh down freely from above, and hoping for that fortitude which renders man 'equal to either fortune,' I have no difficulty in answering the inquiry. I propose that the Constitution of the Republic shall remain forever intact, the same invulnerable, immortal ægis of human rights, forged upon the stithies of our revolutionary demi-gods. I propose that the Union of the States ordained by our fathers, and upon which their and our common Father has smiled glory and prosperity, shall, at all hazard and by every power of the Government, be maintained. I propose that the just laws of my country shall be enforced everywhere throughout her borders, and by every constitutional means; and that such additional legislation shall be immediately had as will enable such object to be accomplished. I propose that the property of the Republic which has been unlawfully seized shall be repossessed; that the civil and military officers of the Government, who for the discharge of their duties have been imprisoned or beleaguered, shall immediately be secured; and that the honor of our flag, which has been tarnished, shall be vindicated before the world. I propose that the will of the people of the Union, mighty, majestic, and constitutionally expressed at the national election, shall be respected and obeyed. And above all, sir, do I propose that liberty shall not again be beaten down upon the threshold and beside the altars of this her temple. That the free principles which underlie the whole structure of the Republic, for which constitutions were ordained, laws enacted, and the will of the people expressed, shall not again be compelled to pass under the yoke of slavery."

Mr. Duell, of New York, also said: "In my judgment, the present is no time for compromise. Until the strength of the Government be tested, it is not right, or legal, or politic to consider concessions. It is only when traitors have been reduced to obedience, or the Government has proved impotent, that we should be constructing articles of agreement. A compromise at this time would be the humiliation of one section, loyal to the Union and obedient to the laws made under the Constitution, to another section in array against the Government of the Union, and defying law, order, justice, and right. My remedy, then, will be found in executing the Constitution as it is, and enforcing the laws of the General Government. I have no sympathy with any man who repudiates the Constitution of our common country, whether he resides North or South.

By that Constitution I abide, both in its letter and in its spirit. Standing firmly upon the principles of freedom and the Constitution we shall have no cause for self-reproach, even if civil war should follow."

Mr. Reynolds, of New York, said: "We are asked to make new laws. I answer, there are too many already. Let the present laws be enforced. Amend the Constitution? Let the people do it in the regular way, whenever they think it desirable. I shall not object. No, sir; obey the Constitution, and administer the laws as they are, and all will be well. Stand by the Union of our fathers. Rally under the glorious folds of the Stars and Stripes, AND THE COUNTRY WILL BE SAVED. And for the rest, let us 'trust in God, and keep our powder dry.'"

In the House the Committee on Military Affairs reported a supplementary bill which proposed to amend the act of 1798, that provides for calling forth the militia to execute the laws of the Union, to suppress insurrection and repel invasion.

Mr. Stanton, of Ohio, thus explained the supplementary bill: "In my judgment, that law covers the case of an insurrection against the authority of the United States, and authorizes the calling out of the militia for the purpose of putting down an insurrection against the authority of the United States. But I find that the late Attorney-General, Mr. Black, has expressed a different opinion to the President of the United States of this section of the law, and holds that it only authorizes the President to call out the militia to aid the officer of the court—the marshal—in the execution of process directed to him, and to overcome combinations against the execution of some particular law, and does not authorize the calling out of the militia for the purpose of putting down a general insurrection against the authority of the United States. In my judgment, the law was intended to go that far; but in order to remove doubt and ambiguity, and to avoid any obscurity, the Committee on Military Affairs deemed it their duty to report this bill."

Mr. Sickles, of New York, inquired: "Do I understand that it is one of the premises upon which this bill is founded that there is a general insurrection against the authority of the United States?"

Mr. Stanton: "Yes, sir."

Mr. Sickles: "Then the gentleman differs broadly with the President elect, who says that there is no danger, no trouble, and treats the idea of apprehension with ridicule. There is a great discrepancy here."

"I will state what I understand to be the present condition of things, and what I understand to be the necessity that exists for the passage of such a measure as this. The incoming Administration does not desire to be under the necessity of running counter to the opinion of the Attorney-General under the present Administration, and of subjecting itself to the charge of usurpation, by exercising powers the

existence of which is denied by that officer. It therefore desires, by remedial legislation, to cure that defect and omission. We have before us six seceding States organized into a separate hostile confederacy. It is said that it is about to have, in thirty days, an army of fifty regiments, backed up by a fund of \$14,000,000."

Mr. Craige, of North Carolina, said: "I desire to correct the gentleman. The Southern Confederacy is not hostile. Its Government desires to be friendly."

Mr. Stanton: "So I understand. It regards the right of secession as a constitutional right, and on that idea claims to be friendly; but, not recognizing that theory, we cannot so regard it."

"Mr. Speaker, we have the important ports of Charleston, Savannah, and New Orleans, in which the authorities of the United States are superseded, where its laws cannot be executed, and where no duties can be collected, unless some mode be adopted, aside from the ordinary mode of collection. One of two things has to be done: either this right of secession has to be recognized, the execution of the laws of the United States in these ports to be abandoned, or they must be treated as free ports, and all the foreign commerce of the country diverted from the ports of Boston, New York, Philadelphia, and Baltimore; or else the duties on imported goods must be collected at those ports, or they may be suspended as ports of entry, and their commerce made illegitimate."

"One of these two things must be done. Now, I take it there are very few gentlemen that are prepared to say that the authority of the United States over those ports shall be surrendered and abandoned; that the whole foreign commerce of the country shall change its course and go to those ports for the purpose of escaping duties. That, I take it, there are very few gentlemen prepared to recognize as a state of things which is to be allowed to continue."

"Now, Mr. Speaker, I have no doubt that it is the expectation of the incoming Administration either to collect duties at those ports by vessels of war stationed off their harbors, or, by some measure to be authorized at this session of Congress, to close their ports, and not regard them any longer as ports of entry. One of these things has to be, and inevitably must be done. Now, if the Southern Confederacy should treat that as a hostile act, an act of war, and should organize an armed force to make an aggressive war upon the United States, this Government must be placed in a position to protect and defend itself. I do not myself suppose that even the possession of the forts in the Southern States will be regarded as a matter of sufficient practical importance to imperil the peace of the country by attempting their recapture, until all hopes of a peaceable adjustment are abandoned. But if there should be a hostile attack made on vessels of the United States stationed off Southern ports, if that mode of executing the laws should be resisted by march-

ing Southern armies into Northern States, or by seeking the capture of the capital of the Republic, then the Administration must be placed in a position to protect and defend itself against aggression."

Mr. Howard, of Michigan, who supported the bill, said: "I suppose the idea of those gentlemen who attack the bill so violently is that, in some way, secession is a peaceful or constitutional remedy; or, in other words, that it has a legal existence. Could any thing be more absurd? Or, if they themselves admit that this is revolution, how can they resist the suppression of revolution? Mr. Speaker, we need but a moment to show that it has no legal foundation whatever; for an ordinance of secession can by no possibility rise higher, in a legal point of view, than the State constitution. If a secession convention be legal, or if it be regular, if it observe all formality, if it receive the unanimous indorsement of the people of the seceding States, then it rises just as high, and no higher, than any other organic act of the State. It is just as high as a State constitution, and no higher. And yet the Constitution makes the Constitution itself, and the laws of the Union, and the treaties made by the authorities of the United States the supreme law of the land, any thing in any State constitution, or, if you please, any thing in your ordinances of secession, to the contrary notwithstanding. It is absurd. It needs only to be stated, to show that it can have no legal foundation whatever. It is, therefore, a revolution—no more and no less."

Mr. Pryor, of Virginia, replied: "In a word, sir, it is a measure of coercion—a measure under the authority of which, the President may carry on a campaign of vigorous hostilities against a State—a measure, in truth, of civil and fraternal war."

"Such, sir, are the object and effect of this bill; but it is distinguished by details of a still more monstrous character. It submits to the fallible and capricious judgment of a single individual—the President of the United States—to determine when occasion shall require the employment of force against a State, and so invests him with the arbitrary power of initiating civil war. To carry out the suggestion of his understanding, (it may be the impulse of his resentment or the dictate of his ambition,) the bill authorizes the President to grasp all the naval and military resources of the country—the militia as well as the regular service—millions of men—and to hurl them in fatal attack upon a member of this Confederacy."

Mr. Curtis, of Iowa, continued the debate, and in reply to the previous speaker said: "To say that we have not the constitutional power to protect ourselves is an absurdity; and to say that we are going to revolutionize ourselves, is to say that we are going to commit suicide, and conclude our career as a *felo de se*. Can it be possible, does anybody suppose, that the Federal Government designs to create revolution; that it designs to promote civil war; that it de-

signs to destroy itself? Does anybody really suppose a nation would be guilty of the folly of raising soldiers for the purpose of desolating and destroying its own fair proportions? Is there any President, any prince, any potentate, that would, with purpose and power, seek to destroy his own power? And will our Government, our republican Government, disregard this fundamental principle of self-preservation?"

On the motion to postpone the further consideration of the bill to a future day, Mr. Bou-ligny, of Louisiana, when the vote was taken, said: "With all due respect to the gentleman who introduced this bill, I must say—and it is my duty to say—that it is the most infamous and outrageous bill that has ever been presented to Congress; and I say, shame on the head of the man who did it. I vote 'aye.'"

The following resolution, censuring the Secretary of the Navy, was reported to the House by Mr. Dawes:

Resolved, That the Secretary of the Navy, in accepting without delay or inquiry the resignations of officers of the navy who were in arms against the Government when tendering the same, and of those who sought to resign that they might be relieved from the restraint imposed upon them by their commissions on engaging in hostility to the constituted authorities of the nation, has committed a grave error, highly prejudicial to the discipline of the service and injurious to the honor and efficiency of the navy; for which he deserves the censure of this House.

On taking the question, it was adopted. Ayes, 95; noes, 62.

Subsequently, the report of the Committee of Thirty-three was taken up for final action. The vote was first taken on the following proposition of Mr. Burch, of California:

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That it be, and is hereby, recommended to the several States of the Union, that they, through their respective Legislatures, request the Congress of the United States to call a convention of all the States, in accordance with article fifth of the Constitution, for the purpose of amending said Constitution, in such manner and with regard to such subjects as will more adequately respond to the wants, and afford more sufficient guarantees to the diversified and growing interests of the Government, and of the people composing the same.

This proposition was rejected by a vote of 74 to 108.

A motion was then made to lay the whole subject on the table, which was lost. Ayes, 14; noes, 179.

A vote was next taken on the following proposition of Mr. Kellogg, of Illinois:

Strike out all after the word "that," and insert:

The following articles be, and are hereby, proposed and submitted as amendments to the Constitution of the United States, which shall be valid, to all intents and purposes, as part of said Constitution, when ratified by Conventions of three-fourths of the several States.

ART. 13. That in all the territory now held by the United States situate north of latitude 36° 30' involuntary servitude, except in the punishment for crime, is prohibited while such territory shall remain under a territorial government; that in all the territory now held south of said line, neither Congress nor any Ter-

ritorial Legislature shall hinder or prevent the emigration to said territory of persons held to service from any State of this Union, when that relation exists by virtue of any law or usage of such State, while it shall remain in a territorial condition; and when any territory north or south of said line, within such boundaries as Congress may prescribe, shall contain the population requisite for a member of Congress, according to the then Federal ratio of representation of the people of the United States, it may, if its form of government be republican, be admitted into the Union on an equal footing with the original States, with or without the relation of persons held to service and labor, as the constitution of such new State may provide.

ART. 14. That nothing in the Constitution of the United States, or any amendment thereto, shall be so construed as to authorize any department of the Government to in any manner interfere with the relation of persons held to service in any State where that relation exists, nor in any manner to establish or sustain that relation in any State where it is prohibited by the laws or constitution of such State. And that this article shall not be altered or amended without the consent of every State in the Union.

ART. 15. The third paragraph of the second section of the fourth article of the Constitution shall be taken and construed to authorize and empower Congress to pass laws necessary to secure the return of persons held to service or labor under the laws of any State, who may have escaped therefrom, to the party to whom such service or labor may be due.

ART. 16. The migration or importation of persons held to service or involuntary servitude, into any State, territory, or place within the United States, from any place or country beyond the limits of the United States or territories thereof, is forever prohibited.

ART. 17. No territory beyond the present limits of the United States and the territories thereof, shall be annexed to or be acquired by the United States, unless by treaty, which treaty shall be ratified by a vote of two-thirds of the Senate.

This proposition was rejected. Ayes, 83; noes, 158.

The vote of the House was next taken on the following proposition, submitted by Mr. Clemens, of Virginia:

Joint Resolution.

Whereas the Union is in danger; and owing to the unhappy divisions existing in Congress, it would be difficult, if not impossible, for that body to concur, in both its branches, by the requisite majority, so as to enable it either to adopt such measures of legislation, or to recommend to the States such amendments to the Constitution, as are deemed necessary and proper to avert that danger; and whereas, in so great an emergency, the opinion and judgment of the people ought to be heard, and would be the best and surest guide to their Representatives: Therefore,

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That provision ought to be made by law, without delay, for taking the sense of the people, and submitting to their vote the following resolutions as the basis for the final and permanent settlement of those disputes that now disturb the peace of the country and threaten the existence of the Union.

Joint Resolutions proposing certain amendments to the Constitution of the United States.

Whereas serious and alarming dissensions have arisen between the Northern and Southern States, concerning the rights and security of the rights of the slaveholding States, and especially their right in the common territory of the United States; and whereas it is eminently desirable and proper that those dissensions, which now threaten the very existence of this

Union, should be permanently quieted and settled by constitutional provisions which shall do equal justice to all sections, and thereby restore to the people that peace and good will which ought to prevail between all the citizens of the United States: Therefore,

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, (two-thirds of both Houses concurring,) That the following articles be, and are hereby, proposed and submitted as amendments to the Constitution of the United States, which shall be valid to all intents and purposes as part of said Constitution, when ratified by conventions of three-fourths of the several States.

ART. 1. In all the territory of the United States now held or hereafter acquired, situate north of the southern boundary of Kansas and the northern boundary of New Mexico, slavery or involuntary servitude, except as a punishment for crime, is prohibited, while such territory shall remain under territorial government. In all the territory south of said line now held or hereafter acquired, slavery of the African race is hereby recognized as existing, and shall not be interfered with by Congress; but shall be protected as property by all the departments of the territorial government during its continuance; and when any territory, north or south of said line, within such boundaries as Congress may prescribe, shall contain the population requisite for a member of Congress, according to the then Federal ratio of representation of the people of the United States, it shall, if its form of government be republican, be admitted into the Union on an equal footing with the original States, with or without slavery, as the constitution of such new State may provide.

ART. 2. Congress shall have no power to abolish slavery in places under its exclusive jurisdiction, and situate within the limits of States that permit the holding of slaves.

ART. 3. Congress shall have no power to abolish slavery within the District of Columbia so long as it exists in the adjoining States of Virginia and Maryland, or either, nor without the consent of the inhabitants, nor without just compensation first made to such owners of slaves as do not consent to such abolishment. Nor shall Congress at any time prohibit officers of the Federal Government, or members of Congress, whose duties require them to be in said district, from bringing with them their slaves, and holding them as such, during the time their duties may require them to remain there, and afterwards taking them from the district.

ART. 4. Congress shall have no power to prohibit, or hinder the transportation of slaves from one State to another, or to a territory in which slaves are by law permitted to be held, whether that transportation be by land, navigable rivers, or by the sea.

ART. 5. That, in addition to the provisions of the third paragraph of the second section of the fourth article of the Constitution of the United States, Congress shall have power to provide by law, and it shall be its duty so to provide, that the United States shall pay to the owner who shall apply for it, the full value of his fugitive slave, in all cases, when the marshal, or other officer, whose duty it was to arrest said fugitive, was prevented from so doing by violence or intimidation, or when, after arrest, said fugitive was rescued by force, and the owner thereby prevented and obstructed in the pursuit of his remedy for the recovery of his fugitive slave, under the said clause of the Constitution and the laws made in pursuance thereof. And in all cases, when the United States shall pay for such fugitive, they shall have the power to reimburse themselves by imposing and collecting a tax on the county or city in which said violence, intimidation, or rescue was committed, equal in amount to the sum paid by them, with the addition of interest and the costs of collection; and the said county or city, after it has paid said amount to the United States, may, for its indemnity, sue and recover from the wrong-doers or rescuers, by whom the owner was prevented from

the recovery of his fugitive slave, in like manner as the owner himself might have sued and recovered.

ART. 6. No future amendment of the Constitution shall affect the five preceding articles, nor the third paragraph of the second section of the first article of the Constitution, nor the third paragraph of the second section of the fourth article of said Constitution; and no amendment shall be made to the Constitution which will authorize or give to Congress any power to abolish or interfere with slavery in any of the States by whose laws it is or may be allowed or permitted.

ART. 7. SEC. 1. The elective franchise and the right to hold office, whether Federal, State, territorial, or municipal, shall not be exercised by persons who are, in whole or in part, of the African race.

SEC. 2. The United States shall have power to acquire, from time to time, districts of country in Africa and South America, for the colonization, at the expense of the Federal Treasury, of such free negroes and mulattoes as the several States may wish to have removed from their limits, and from the District of Columbia, and such other places as may be under the jurisdiction of Congress.

And whereas also, besides those causes of dissension embraced in the foregoing amendments proposed to the Constitution of the United States, there are others which come within the jurisdiction of Congress, and may be remedied by its legislative power; and whereas it is the desire of Congress, as far as its power will extend, to remove all just cause for the popular discontent and agitation which now disturb the peace of the country and threaten the stability of its institutions: Therefore,

1. *Resolved by the Senate and House of Representatives of the United States of America in Congress assembled,* That the laws now in force for the recovery of fugitive slaves are in strict pursuance to the plan and mandatory provisions of the Constitution, and have been sanctioned as valid and constitutional by the judgment of the Supreme Court of the United States; that the slaveholding States are entitled to the faithful observance and execution of those laws, and that they ought not to be repealed, or so modified or changed as to impair their efficiency; and that laws ought to be made for the punishment of those who attempt, by rescue of the slave, or other illegal means, to hinder or defeat the due execution of said laws.

2. That all State laws which conflict with the fugitive slave acts, or any other constitutional acts of Congress, or which, in their operation, impede, hinder, or delay the free course and due execution of any of said acts, are null and void by the plain provisions of the Constitution of the United States. Yet those State laws, void as they are, have given color to practices, and led to consequences which have obstructed the due administration and execution of acts of Congress, and especially the acts for the delivery of fugitive slaves, and have thereby contributed much to the discord and commotion now prevailing. Congress, therefore, in the present perilous juncture, does not deem it improper, respectfully and earnestly, to recommend the repeal of those laws to the several States which have enacted them, or such legislative corrections or explanations of them as may prevent their being used or perverted to such mischievous purposes.

3. That the act of the 18th of September, 1850, commonly called the Fugitive Slave Law, ought to be so amended as to make the fee of the commissioner, mentioned in the eighth section of the act, equal in amount, in the cases decided by him, whether his decision be in favor of, or against the claimant. And to avoid misconception, the last clause of the fifth section of said act, which authorizes the person holding a warrant for the arrest or detention of a fugitive slave, to summon to his aid the *posse comitatus*, and which declares it to be the duty of all good citizens to assist him in its execution, ought to be so amended as to expressly limit the authority and duty to cases in which there shall be resistance, or danger of resistance or rescue.

4. That the laws for the suppression of the African slave trade, and especially those prohibiting the importation of slaves into the United States, ought to be made effectual, and ought to be thoroughly executed, and all further enactments necessary to those ends ought to be promptly made.

This proposition was rejected. Ayes, 80; noes, 113.

The first series of resolutions reported by the Committee of Thirty-three were next put to vote. They were as follows:

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That all attempts on the parts of the Legislatures of any of the States to obstruct or hinder the recovery and surrender of fugitives from service or labor, are in derogation of the Constitution of the United States, inconsistent with the comity and good neighborhood that should prevail among the several States, and dangerous to the peace of the Union.

Resolved, That the several States be respectfully requested to cause their statutes to be revised, with a view to ascertain if any of them are in conflict with or tend to embarrass or hinder the execution of the laws of the United States, made in pursuance of the second section of the fourth article of the Constitution of the United States for the delivering up of persons held to labor by the laws of any State and escaping therefrom; and the Senate and House of Representatives earnestly request that all enactments having such tendency be forthwith repealed, as required by a just sense of constitutional obligations, and by a due regard for the peace of the Republic; and the President of the United States is requested to communicate these resolutions to the Governors of the several States, with a request that they will lay the same before the Legislatures thereof respectively.

Resolved, That we recognize slavery as now existing in fifteen of the United States by the usages and laws of those States; and we recognize no authority, legally or otherwise, outside of a State where it so exists, to interfere with slaves or slavery in such States, in disregard of the rights of their owners or the peace of society.

Resolved, That we recognize the justice and propriety of a faithful execution of the Constitution, and laws made in pursuance thereof, on the subject of fugitive slaves, or fugitives from service or labor, and discountenance all mobs or hindrances to the execution of such laws, and that citizens of each State shall be entitled to all the privileges and immunities of citizens in the several States.

Resolved, That we recognize no such conflicting elements in its composition, or sufficient cause from any source, for a dissolution of this Government; that we were not sent here to destroy, but to sustain and harmonize the institutions of the country, and to see that equal justice is done to all parts of the same; and finally, to perpetuate its existence on terms of equality and justice to all the States.

Resolved, That a faithful observance, on the part of all the States, of all their constitutional obligations to each other and to the Federal Government, is essential to the peace of the country.

Resolved, That it is the duty of the Federal Government to enforce the Federal laws, protect the Federal property, and preserve the Union of these States.

Resolved, That each State be requested to revise its statutes, and, if necessary, so to amend the same as to secure, without legislation by Congress, to citizens of other States travelling therein, the same protection as citizens of such State enjoy; and also to protect the citizens of other States travelling or sojourning therein against popular violence or illegal summary punishment, without trial in due form of law, for imputed crimes.

Resolved, That each State be also respectfully requested to enact such laws as will prevent and punish

any attempt whatever in such State to recognize or set on foot the lawless invasion of any other State or territory.

Resolved, That the President be requested to transmit copies of the foregoing resolutions to the Governors of the several States, with a request that they be communicated to their respective Legislatures.

These resolutions were passed. Ayes, 136; noes, 53.

The next proposition was the report of the committee for an amendment of the Constitution, as follows:

Be it resolved by the Senate and House of Representatives of the United States of America in Congress assembled, (two-thirds of both Houses concurring,) That the following article be proposed to the Legislatures of the several States as an amendment to the Constitution of the United States, which, when ratified by three-fourths of said Legislatures, shall be valid, to all intents and purposes, as a part of the said Constitution, namely:

ART. 12. No amendment shall be made to the Constitution which will authorize or give to Congress the power to abolish or interfere, within any State, with the domestic institutions thereof, including that of persons held to labor or service by the laws of said State.

This proposition failed to receive a two-thirds vote, and was therefore rejected. Ayes, 123; noes, 71.

The vote was subsequently reconsidered, and the resolution was then passed by the constitutional majority. Ayes, 133; noes, 65.

The bill granting to fugitives from labor a trial by jury in certain cases, was then passed.

The next proposition of the committee relative to fugitives from justice was rejected.

In the Senate a bill was introduced which provided that whenever, in the opinion of the Postmaster-General, the postal service cannot be safely continued, or the post-office revenues collected, or the postal laws maintained, or the contents of the mails preserved inviolate till delivered to the proper address, or any post route, by reason of any insurrection or resistance to the laws of the United States, he may discontinue the postal service on such route, or any part thereof, and any post-offices thereon, till the same can be safely restored, and he shall report his action to Congress.

Mr. Douglas, of Illinois, said: "It strikes me it is rather a peace measure than otherwise."

Mr. Wade, of Ohio, said: "I hope that this simple bill, that has been said to be a peaceful measure, which contemplates nothing but peace, will be suffered to pass without involving any of the controverted subjects that undoubtedly will come up better on some other occasion. I am anxious to get it through without any unnecessary delay. We have no time to debate."

Mr. Green, of Missouri, replied: "I am not certain but that the substitute proposed by the Senator from Texas will accomplish all that I desire. It is useless for us to try to deceive each other, and blink a question which underlies the whole proceeding. There is no insurrection in this Union; there is no obstruction to the passage of the mails within this Union;

but this is an indirect attempt to strike at States which claim to have seceded from the Union. That is the sole purpose of it; and why, therefore, shall we undertake to employ terms to deceive the public and mislead honorable citizens, with reference to the real purposes that we have in view?"

Mr. Mason, of Virginia, opposed the bill, saying: "Mr. President, if the bill passes the Senate in this form, it will be as the deliberate sense of Congress that there is no independent government consisting of States that formerly belonged to this Government; that there is no such thing as a new empire under the title which they have recently assumed; that there is no part of that which once constituted the United States that is no longer a part of the United States. It assumes that the Federal Government is just as potential within the limits of those States as it was twelve months ago. It assumes that the whole machinery of this Government is in operation within the limits of those States now, and competent to execute and to enforce the laws. It assumes, in other words, as facts upon which legislation is to rest, those which have no existence but in the chimerical brain of the visionary. Sir, there are no Federal laws—I mean laws of the United States—now in operation in one of those States. There are no Federal officers there—not one. The Post-office Department, as I understand, occupies a very equivocal relation, adopted for the convenience of those States that have abandoned the Union; and so far, without any act disaffirming it on the part of those States—a mere temporary arrangement until some other is made; but there is no Federal law under the sanction of any power here now existing in one of those States. Yet, this bill assumes, as the existing relation between the two separate countries, that the people of one are in a state of insurrection or rebellion."

Again, he said: "When it is determined as the fixed purpose of this Government to treat these States as in insurrection and rebellion, with all the consequences that must enter, let it be done as a deliberate act, and not as a mere recital in a post-office bill; and then, God defend the right!"

Mr. Fessenden, of Maine, alluding to the opposition to the bill, replied, generally: "Sir, what is the secret of all this? The secret is found in the proposition of the Senator from Texas, [Mr. Hemphill.] Gentlemen want us to acknowledge, and to force us to an acknowledgment, on this side of the chamber, that secession is lawful and has been carried into effect. They are perfectly willing to agree to this proposition if we will acknowledge that; and gentlemen here, acting as Senators of the United States, wish to compel the Congress of the United States to make that acknowledgment before they will even pass a measure of peace, before they will even allow the President to suspend the operation and the enforcement of the laws. It seems, from their action, they

would rather force the President into the use of force than pass a measure of this sort without compelling this side of the chamber and Congress to consent and assent to the idea that secession is of itself proper and constitutional, and has been carried into effect, and that we have no right to interfere. They will not let us have a measure of peace, unless we shall give up our opinions on this subject. That is simply the truth about it; and the question is, whether it is to be carried out."

Mr. Douglas later in the day thus expressed his opinion: "Sir, I must say, in all frankness, that I regard no man as friendly to this Union who is unwilling to enter upon such a system of pacification and compromise as will preserve it. In my opinion, there is a deliberate plot to break up this Union, under pretence of preserving it. In my opinion, there are as many disunionists on this floor and on the floor of the other branch of Congress, from the North as from the South; men who have reasoned themselves into the belief that it is wiser and better to drive the sections into collision, to force disunion, and to get up a war, to have bloodshed, and render reunion impossible, and then make a treaty of peace. I hope I am mistaken in this. I have too much respect for the intelligence of the Senators to believe for one moment that they hope to preserve this Union by military force. They know that the use of military force, producing collision and bloodshed, must result in a civil war between fifteen States on one side, and the remainder of the States of the Union on the other. How can you avoid that result? You must do one of two things. Either settle the difficulty amicably, or by the sword. An amicable settlement is a perpetuation of the Union. The use of the sword is war, disunion, and separation, now and forever."

Mr. Hemphill, of Texas, in opposing the bill said: "I intended to say there was but one issue in this case; and that is, whether the laws of the United States are in force in those States that have seceded, or not. There is no other issue whatever. It is impossible to evade or dodge the issue in any way. The only objection I had to the amendment of the Senator from Delaware was, that it contained the words 'till the same can be safely restored.' If that clause was stricken out, I should have no objection to the amendment; but any words or sentence, or any provision whatsoever which in any way whatever intimated that the laws of the United States were still in force in those States, I object to. They are not in force. They have no power whatever there. That is the only and sole issue in this case, as stated by the Senator from Maine [Mr. Fessenden] the other day."

Mr. Nicholson, of Tennessee, took the same view. "I concur with the Senator from Texas, that there is really but one question here; and that is, whether the laws of the United States are in force or not in the States that have seceded? I do not propose to discuss the ques-

tion; but simply to state the reason why I cannot vote for his amendment. According to my view of the relations now subsisting between this Government and the seceding States, the laws of the United States are suspended there by act of revolution, not by act of peaceful secession; and therefore, being in a state of suspension, I think any law on the subject wholly unnecessary."

The last hours of the Thirty-sixth Congress were rapidly approaching, and the remainder of the session was chiefly devoted to making that decision which had already been anticipated. The adjournment of Congress without any action relative to the crisis of the country, had been steadily foretold. The various propositions now came up in each House for the last time.

In the Senate a communication was received from the President of the Peace Conference, (*see* PEACE CONFERENCE,) containing the final action of that body. This was referred to a committee consisting of Messrs. Crittenden, Bigler, Thomson, Seward, and Trumbull. At the next meeting of the Senate the committee reported the propositions as they came from the Peace Conference. After the report was made, Mr. Seward, of New York, rose and said:

"The honorable Senator from Illinois (Mr. Trumbull) and myself constituted a minority of the committee. We dissent from the report, and we proposed in committee to submit a substitute. The majority held that, for some reason sufficient in their estimation, we were not entitled to submit a minority report. I therefore ask leave of the Senate to introduce a joint resolution in my own name, and in which the honorable Senator from Illinois authorized me to say that he concurs with me, and which I ask unanimous consent to have read and printed; and it will be the subject of consideration at such time, hereafter, as the Senate shall choose to hear it, either in connection with the other or not."

The proposition of Mr. Seward was read, as follows:

A joint resolution concerning a national convention to propose amendments to the Constitution of the United States.

Whereas the Legislatures of the States of Kentucky, New Jersey, and Illinois, have applied to Congress to call a convention for proposing amendments to the Constitution of the United States: Therefore,

Be it resolved, &c., That the Legislatures of the other States be invited to take the subject into consideration, and to express their will on that subject to Congress, in pursuance of the fifth article of the Constitution.

Mr. Hunter, of Virginia, moved to amend the first section of the report by substituting the first section of the Crittenden proposition.

A discussion followed on the propriety of amending the recommendation of the Peace Conference, when Mr. Pugh, of Ohio, rose and said:

"I want to make an appeal to the friends of

some proposition of peace. This is the last day of the session but one, and we have not made the progress of one line. We have gone into an eternal discussion about questions of order, and that, too, in defiance of the rule of the Senate. I insist that the question shall be decided without further debate."

Mr. Hunter, of Virginia, replied:

"After as careful an examination as I have been able to give this proposition from the Peace Conference since it was printed, that is to say, within the last day or two, I have come to the conclusion that it would not only make a great many more difficulties than it would remove, if it should be adopted as an amendment to the Constitution, but that it would place the South—the slaveholding States—in a far worse position than they now occupy under the present Constitution, with the Dred Scott decision as its exposition."

Mr. Crittenden followed, urging the Senate to approve of the Peace Conference proposition, and justifying his support of it in preference to his own propositions for the following reasons:

"I do not stop to inquire whether I like these resolutions better than I do those proposed by myself, or the amendments now offered by the Senator from Virginia. We are near the close of our session. I have looked upon the proceedings of this great and eminent body of men as the best evidence of public opinion outside of this body, and of the wish and will of the States they represent. I am for peace. I am for compromise. I have not an opinion on the subject of what would be best that I would not be perfectly willing to sacrifice to obtain any reasonable measure of pacification that would satisfy the majority. I want to save the country and adjust our present difficulties." [Applause.]

The Presiding Officer (Mr. Bright in the chair) called to order.

Mr. Crittenden: "That is what I want to do. That is the object I am aiming at. I attach no particular importance—I feel, at least, no selfish attachment—to any opinions I may have proclaimed on the subject heretofore. I proclaimed those opinions because I thought them right; but I am ready to sacrifice them, any and every one of them, to any more satisfactory proposition that can be offered. I look upon the resolutions proposed by this convention as furnishing us, if not the last, the best hope of an adjustment; the best hope for the safety of the people and the preservation of the Government. I will not stop to cavil about the construction of these words; but I see none of the difficulties that suggest themselves to the mind of my friend from Virginia. Look at that third section, which has been the subject of his particular criticism. Every part and portion of it is a negation of power to Congress, and nothing else; and yet he has argued as if it gave Congress power; as if it conferred more power upon Congress. It leaves to the States all the rights they now have; all the remedies

which they now have; and consists merely in a negation of power to Congress. How can that take away the rights of the people? How can that make our condition worse? I cannot possibly see. It is nothing but a negative from beginning to end; and therefore it cannot take away any thing from the people. It may take from Congress, but cannot take away from the States, or the people, any thing. It is negative in its form and in its language, from beginning to end, that Congress shall have no power to do this, that, or the other. If they have that power under the present Constitution, it is taken away. That is all. It takes away no power from the States. It takes away no rights from individuals. Its simple office is the negation of power to Congress. That is all there is in it; and how, under that, can the gentleman find constructions which are to increase our difficulties and diminish our rights? He says the language will need construction. So does all language need construction. I do not see that this is particularly so.

"Now, sir, the Senator offers my own proposition as an amendment to this. I shall vote against my own proposition here; I shall vote for this.

"I shall vote for the amendments proposed by the convention, and there I shall stand. That is the weapon offered now, and placed in my hand, by which, as I suppose, the Union of these States may be preserved; and I will not, out of any selfish preference for my own original opinions on this subject, sacrifice one idea or one particle of that hope. I go for the country; not for this resolution or that resolution, but any resolution, any proposition, that will pacify the country. Therefore, I vote against my own to give place to a proposition which comes from an authority much higher than mine—from one hundred and thirty of the most eminent men of this country, out of which number a Senate might be selected that might well compare in point of talent and intellect and ability even with this honorable body."

In conclusion he said:

"Mr. President, I have gone perhaps a little further than I ought to have done. It is not now necessary that I should enter into a vindication of every provision of these amendments offered by the convention. It is sufficient to speak to the amendment which the gentleman has offered. Excluding territory hereafter to be acquired, I think in substance we ought to be satisfied with that; I believe that will make peace; I believe that will give substantial security to our rights, and to the rights which the Southern States claim. With that I am satisfied. It is enough for the dreadful occasion. It is the dreadful occasion that I want to get rid of. Rid me of this, rid the nation of this, and I am willing to take my chance for the future, and meet the perils of every day that may come. Now is the appointed time upon which our destiny depends. Now is the emergency and exigency upon us. Let us pro-

vide for them. Save ourselves now, and trust to posterity and that Providence which has so long and so benignly guided this nation, to keep us from the further difficulties which in our national career may be in our way."

Mr. Mason, of Virginia, followed with a careful examination of the proposition of the Peace Conference, and thus expressed his opinion:

"I should have been certainly gratified, if my honored State of Virginia had been successful in the mediation which she invited of all the States, with a view to agree upon an adjustment which would guarantee the rights of the South. I deeply deplore, and I doubt not my State will deplore, that that mediation has not been effected. So far from impugning any motives or purpose of that honorable and distinguished body, I doubt not that, in the short time that was allowed to them, they got together the best mode of adjustment which would satisfy their judgment, but which, I am sure, will not satisfy the judgment of the Southern States, but would place them in still greater peril, if they were to admit that to become a part of the Constitution. I did not intend to do more than state my objections to it as briefly as I could. I have done so temperately and without heat. I regret that I cannot, as one Senator, propose this as an amendment to the Constitution."

In the debate which still further ensued, Mr. Baker of Oregon avowed his purpose to support the proposition, and in justification of his views said:

"Mr. President, let us be just to these propositions. As a Republican, I give up something when I vote for them; but remember, sir, I am not voting for them now; I am only voting to submit them to my people; and I shall go before them, when the time comes, being governed in my opinion and advice as to whether they shall vote for them or not, as I see what Virginia, Tennessee, Kentucky, North Carolina, and Missouri, by their people, desire. To be frank, sir, if this proposition will suit the border States, if there will be peace and union, and loyalty and brotherhood, with this, I will vote for it at the polls with all my heart, and with all my soul; but if I see that the counsels of the Senators from Virginia shall prevail; if my noble friend from Tennessee [Mr. Johnson] shall be overwhelmed; if secession shall still grow in the public mind there; if they are determined, upon artificial causes of complaint, as I believe, still to unite their fate, their destiny, and their hope, with the extremest South, then, perceiving them to be of no avail, I shall refuse them. Therefore, at the polls at last, I shall be governed as an individual citizen by my conviction at the moment of what the ultimate result of these propositions will be; but I am not voting for that to-day. I am saying, 'People of the United States, I submit it to you; twenty States demand it; the peace of the country requires it; there is dissolution in the very atmosphere; States have gone off;

others threaten; the Queen of England upon her throne declares to the whole world her sympathy with our unfortunate condition; foreign Governments denote that there is danger to-day that the greatest Confederation the world has ever seen is to be parted in pieces, never to be reunited.' Now, not what I wish, not what I want, not what I would have, but all that I can get, is before me. I know that I do no harm. If the people of Oregon do not like it, they can easily reject it. If the people of Pennsylvania will not have it, they can easily throw it aside. If they do not believe there is danger of dissolution, if they prefer dissolution, if they think they can compel fifteen States to remain in or come back, or if they believe they will not go out, let them reject it. I repeat again, it is their business, it is not mine.

"But, sir, whether I vote for it at the polls or not, in voting for it here it may be said that I give up some of my principles. Mr. President, we sometimes mistake our opinions for our principles. I am appealed to often; it is said to me: 'you believed in the Chicago platform.' Suppose I did. 'Well, this varies from the Chicago platform.' Suppose it does. I stand to-day, as I believe, in the presence of greater events than those which attend the making of a President. I stand, as I believe, at least, in the presence of peace and war; and if it were true that I did violate the Chicago platform, the Chicago platform is not a Constitution of the United States to me. If events, if circumstances change, I will violate it, appealing to my conscience, to my country, and to my God, to justify me according to the motive."

Mr. Green, of Missouri, emphatically opposed the Peace Conference proposition, saying:

"Now, Mr. President, I want all these propositions voted down, and I hope my friend from Kentucky will revive his propositions and bring them up again. There is some vitality in them; there is some point in them; but as for these wishy-washy resolutions, that amount to nothing, it is impossible that any Senator here will, for a moment, entertain the idea of supporting them. The Peace Conference! And the smallest peace that ever I have heard of. Let the Senator adhere to his original propositions; let the Senator bring them up and press them upon the attention of the Senate. That is as far backing down as I will go. It is a little more than I want; but still, as a last effort to save the Union, I would go that far. Talk about these measures! These measures, that have no vitality—these measures that amount to a total surrender of every principle—I never will vote for; and let the consequences of the future be what they may, I stake my faith and reputation upon the vote I intend to cast."

On the following day the debate was resumed, and Mr. Lane, of Oregon, expressed his opposition to the propositions of the Peace Conference, and gave these reasons:

"I will say only a word, now, as to the amend-

ments proposed to the Constitution. We should never compromise principles nor sacrifice the eternal philosophy of justice. Whenever the Democratic party compromised principle, it laid the foundation of future troubles for itself and for the country. When we do, then, amend the Constitution, it ought to be in the spirit of right and justice to all men, and to all sections. I voted for the Senator's propositions, and I will do so again, if we can get a vote, because there was something in them; something that I could stand by; but there is nothing in the amendments proposed by the Peace Conference. He proposed to establish the line of 36° 30', and to prohibit slavery north of it, and protect it south of it, in all the present territory, or of the territory to be hereafter acquired. In that proposition there was something like justice and right; but there is nothing in the amendments proposed by the Peace Conference that any man, north or south, ought to take. They are a cheat; they are a deception; they are a fraud; they hold out a false idea; and I think, with all due respect to the Senator—for I have the highest regard for him personally—that he is too anxious to heal the trouble that exists in the country. He had better place himself upon the right and stand by it. Let him contend, with me, for the inalienable and constitutional rights of every American citizen. Let him beware of 'compromising' away the vital rights, privileges, and immunities of one portion of the country to appease the graceless, unrelenting, and hostile fanaticism of another portion. Let him labor, with me, to influence every State to mind its own affairs, and to keep the territories entirely free to the enterprise of all, with equal security and protection—without invidious distinctions—to the property of every citizen. Thus, and only thus, can we have peace, happiness, and eternal Union."

Further debate on these propositions was then suspended to take up, on the motion of Mr. Douglas, the joint resolution of the House for the amendment of the Constitution, as follows:

Resolved, &c., That the following article be proposed to the Legislatures of the several States as an amendment to the Constitution of the United States; which, when ratified by three-fourths of said Legislatures, shall be valid to all intents and purposes as part of the said Constitution, namely:

ART. 13. No amendment shall be made to the Constitution which will authorize or give to Congress the power to abolish, or interfere, within any State, with the domestic institutions thereof, including that of persons held to labor or service by the laws of said State.

Mr. Pugh, of Ohio, moved to amend by striking out the words "authorize or"; a lengthy debate followed in opposition to all amendments as sure to cause the defeat of the resolution in consequence of the adjournment of the House on the 4th of March. The amendment was finally rejected.

A motion was then made by the same Senator to amend by striking out all after the caption "Article Thirteen" and inserting the Crit-

tenden proposition. Another lengthy debate followed, when the Senate adjourned at a late hour on Saturday night, to meet on the next evening at seven o'clock.

It was Sunday evening, at seven o'clock, on the third of March, when the Senate next assembled. The final hours of the existence of the Thirty-sixth Congress had come. The curtain was about to fall upon a national career of rising greatness and prosperity unequalled. The future was uncertain, alarming, hidden. At this unusual hour on the close of a peaceful day, the Senate came together once more to adopt or to reject those propositions which the most venerable member of their body had brought forward with the hope of allaying the irritations, of soothing the angry passions, and of satisfying the imperious demands of the conflicting sections of a great nation.

Long before the Senate met, the galleries were densely filled with spectators, and all the available space on the floor of the chamber was occupied by strangers. After this breach of decorum had been corrected by clearing the floor, and order had been restored, a prelude was offered to the business of the night by the Senator from Massachusetts, Mr. Sumner, rising and saying:

"I offer a memorial of five thousand citizens of Massachusetts, in which they call upon Congress to stand by the Constitution as it is, and the Government of the country, and to make no compromise whatever. I understand that there are memorials, signed by thirty-seven thousand persons, similar to this, but they have not yet come to hand. This is simply the forerunner of the others. I offer this now, and ask that it lie on the table."

It was so ordered.

The regular order of business was then called up, and the Senator from Kentucky, Mr. Crittenden, took the floor, saying: "I have not risen with any vain ambition or purpose to play the orator. I have no set speech to make."

[Great disturbance was now occasioned by persons endeavoring to get into the already over-crowded galleries.]

The Presiding Officer: "The Sergeant-at-Arms will be required to prevent other persons from entering the gallery doors, and see that order is maintained. It is impossible to proceed with the business in the present condition of things."

Mr. Crittenden: "The subject, Mr. President, upon which I wish to address the Senate is altogether too solemn and too interesting to the country to be made the occasion for declamation or eloquence. I do not aim at it. I am a plain man, and I wish to speak plainly what I think and what I believe on this great subject; and my wish is to do it with as much brevity as possible."

Mr. Clark: "I do not think it possible at all for the Senator to be heard."

The Presiding Officer: "It is impossible to do business with the prevailing noise."

Mr. Bragg: "I think we shall have to order the galleries to be cleared. I move that the galleries be cleared."

Some brief remarks followed, when the motion was withdrawn, and Mr. Crittenden continued—to be soon interrupted by the tumult in the galleries, and the discussions which followed relative to clearing them. Order being finally restored, he proceeded to examine all the grounds upon which a compromise was urged, with much eloquence and force. In regard to the sentiment of the people upon the proposition for a compromise, he said:

"What is the number of petitions forwarded? I suppose, if I should say we have received petitions from not less than a quarter of a million, I should be within bounds. In addition to that, societies everywhere have been petitioning in the name of their whole body. State Legislatures have memorialized, and, in fact, petitioned Congress in the name of the people of their States. I do not know how many. The chief agents of the great railroad companies, owning railroads in value to the amount of more than three hundred million dollars, traversing the country from North to South in every direction, have petitioned in favor of the adoption of these propositions of peace, and they, gentlemen of the highest standing and the highest respectability, have declared that, as far as all their travels extended along all these mighty railroads, they have found the people, with great unanimity, of the same opinion, and in favor of the adoption of these propositions."

His views were thus embraced in a few words: "My principle, and the doctrine I teach, is, take care of the Union; compromise it; do any thing for it; it is the palladium—so General Washington called it—of your rights; take care of it, and it will take care of you. Yes, sir, let us take care of the Union, and it will certainly take care of us. That is the proposition which I teach."

Mr. Trumbull, of Illinois, followed, and describing the present condition of affairs and examining the measures proposed for adjustment, he thus expressed his views: "Sir, if my friend from Kentucky would employ some of that eloquence of his which he uses in appealing to Republicans, and talking about compromise—in defence of the Constitution as it is, and in favor of maintaining the laws and the Government—we should see a very different state of things in the country. If, instead of coming forward with compromises, instead of asking guarantees, he had put the fault where it belongs; if he called upon the Government to do its duty; if, instead of blaming the North for not making concessions where there is nothing to concede, and not making compromises where there was nothing to compromise about, he had appealed to the South, which was in rebellion against the Government, and painted before them, as only he could do it, the hideousness of the crimes they were committing, and called upon them to return to their allegiance,

and upon the Government to enforce its authority, we would have a very different state of things in this country to-day from what now exists.

"This, in my judgment, is the way to preserve the Union; and I do not expect civil war to follow from it. You have only to put the Government in a position to make itself respected, and it will command respect."

The debate was continued by Mr. Wade, of Ohio, Mr. Baker, of Oregon, Mr. Mason, of Virginia, Mr. Pugh, of Ohio, who made an interesting declaration in his remarks, thus: "The Crittenden proposition has been indorsed by the almost unanimous vote of the Legislature of Kentucky. It has been indorsed by the Legislature of the noble old Commonwealth of Virginia. It has been petitioned for by a larger number of electors of the United States than any proposition that was ever before Congress. I believe in my heart, to-day, that it would carry an overwhelming majority of the people of my State; ay, sir, and of nearly every other State in the Union. Before the Senators from the State of Mississippi left this chamber, I heard one of them who now assumes, at least, to be president of the Southern Confederacy, propose to accept it and to maintain the Union if that proposition could receive the vote it ought to receive from the other side of this chamber. Therefore, of all your propositions, of all your amendments, knowing as I do, and knowing that the historian will write it down, at any time before the 1st of January, a two-thirds vote for the Crittenden resolutions in this chamber would have saved every State in the Union but South Carolina. Georgia would be here by her representatives, and Louisiana also—those two great States, which, at least, would have broken the whole column of secession. Yet, sir, it has been staved off—staved off for your futile railroad bill; and where is it to-night? Staved off by your tariff bill; staved off by your pension bill."

Mr. Douglas, of Illinois, observed in relation to this statement of Mr. Pugh, that it was true. He thus expressed himself: "The Senator has said that if the Crittenden proposition could have been passed early in the session, it would have saved all the States, except South Carolina. I firmly believe it would. While the Crittenden proposition was not in accordance with my cherished views, I avowed my readiness and eagerness to accept it, in order to save the Union, if we could unite upon it. No man has labored harder than I have to get it passed. I can confirm the Senator's declaration, that Senator Davis himself, when on the Committee of Thirteen, was ready, at all times, to compromise on the Crittenden proposition. I will go further, and say that Mr. Toombs was also."

The motion to substitute the Crittenden resolutions in the House joint resolution was rejected. Ayes, 14; noes, 25.

The next amendment was offered by Mr. Bingham, of Michigan, as follows:

Resolved, That the provisions of the Constitution are ample for the preservation of the Union, and the protection of all the material interests of the country; that it needs to be obeyed rather than amended; and that an extrication from our present danger is to be looked for in strenuous efforts to preserve the peace, protect the public property, and enforce the laws, rather than in new guarantees for particular interests, compromises for particular difficulties, or concessions to unreasonable demands.

Resolved, That all attempts to dissolve the present Union, or overthrow or abandon the present Constitution, with the hope or expectation of constructing a new one, are dangerous, illusory, and destructive; that in the opinion of the Senate of the United States no such reconstruction is practicable; and therefore, to the maintenance of the existing Union and Constitution should be directed all the energies of all the departments of the Government, and the efforts of all good citizens.

This was also rejected. Ayes, 13; noes, 25.

Mr. Grimes, of Iowa, now moved the report of the minority of the Senate Committee, which was embraced in the following resolution:

Whereas the Legislatures of the States of Kentucky, New Jersey, and Illinois have applied to Congress to call a convention for proposing amendments to the Constitution of the United States: Therefore,

Be it resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the Legislatures of the other States be invited to take the subject of such a convention into consideration, and to express their will on that subject to Congress, in pursuance of the fifth article of the Constitution.

This was rejected. Ayes, 14; noes, 25.

The propositions submitted by the Peace Conference were then offered as an amendment by Mr. Johnson, of Arkansas, and rejected. Ayes, 3; noes, 34.

The question was then taken on the resolution from the House—ayes 24, noes 12—which the presiding officer decided to be a two-thirds vote.

After a vote on several motions for amendment, the question was finally taken on the joint resolutions of Mr. Crittenden, which were rejected. Ayes, 19; noes, 20.

At a very late hour the Senate took a recess until 10 o'clock A. M., March 4th.

The regular session of Congress was closed at the usual hour by the adjournment of both Houses. Of all the acts and resolutions passed during the session, only two very brief ones appear to have arisen out of, or to refer to, the existing or threatening difficulties of the country. One provides for the suspension of the postal service, and is in these words:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That whenever, in the opinion of the Postmaster-General, the postal service cannot be safely continued, or the Post-office revenues collected, or the postal laws maintained, on any post route, by reason of any cause whatsoever, the Postmaster-General is hereby authorized to discontinue the postal service on such route, or any part thereof, and any post-offices thereon, till the same can be safely restored, and shall report his action to Congress.

APPROVED, February 28, 1861.

The other was a joint resolution for an amendment of the Constitution. (See pp. 157.)

A more conclusive proof of a determination somewhere to prevent every settlement of difficulties by any concession on the part of the North could not be furnished.

The inauguration of Mr. Lincoln took place at 12 o'clock on the 4th of March. Previous to the delivery of his address (*see PUBLIC DOCUMENTS*) a new Senate, composed of members for the Thirty-seventh Congress, were convened and organized for a session of some days.

On the motion to print the usual number of the Inaugural, a debate commenced on the topic whether it was in favor of peace or war.

Mr. Clingman, of North Carolina, commenced the debate by saying: "I have no objection to printing the Inaugural, as a matter of course; but I must say, that I do not wish to be understood, for one Senator, in assenting to the printing of it, as indorsing its positions at all. If I understand it aright, all that is direct in it, I mean at least, that purpose which seems to stand out clearly and directly, is one which I think must lead to war—war against the confederate or seceding States; and, as I think that policy will be very unwise for the United States, I must say frankly to gentlemen on the other side that I do not see, if we adopt the principles of the Inaugural, how that is to be avoided."

Mr. Douglas, of Illinois, replied: "I understand it to contain a distinct pledge that the policy of the Administration shall be conducted with exclusive reference to a peaceful solution of our national difficulties."

An extended debate followed entirely on the part of Senators in opposition to the Administration. It was suspended to consider the following resolution offered by Mr. Foster, of Connecticut:

Whereas Hon. L. T. Wigfall, now a Senator of the United States from the State of Texas, has declared in debate that he is a foreigner; that he owes no allegiance to this Government; but that he belongs to, and owes allegiance to, another and foreign State and Government: Therefore,

Resolved, That the said L. T. Wigfall be, and he hereby is, expelled from this body.

An amendment was moved by Mr. Clingman, of North Carolina, in these words:

It is understood that the State of Texas has seceded from the Union, and is no longer one of the United States: Therefore,

Resolved, That she is not entitled to be represented in this body.

A brief debate ensued, which was suspended on the introduction of other topics, and afterwards continued, fruitless in results, until nearly the close of the month, when the Senate finally adjourned.

The general character of the legislation of this session of Congress may be stated in a few words. No act was passed increasing or strengthening the military power of the Government. The bills having that object in view, designated "force bills," failed. The appropriations were only of such an amount as were necessary for the successful administration of

the Government for the year. The loans authorized were small, one of twenty-five millions and another of ten millions, and designed only to obviate temporary emergencies. Whatever increase was authorized in the navy was no more than might be regarded as necessary to maintain its reputation and efficiency. The troubles of the country, which were referred to this Congress by President Buchanan, received no solution at their hands. They were left as they were found. The olive branch was not offered, nor was the sword loosed from the sheath. A revenue law affording uncommon protection to manufactures was enacted. This was proposed not for the purpose of husbanding the resources of the country in anticipation of approaching strife, but chiefly as a party measure, and to secure an increase of prosperity to this great national interest. It has proved to be the wisest measure adopted during the session. It immediately checked the importation of foreign manufactures, secured the reduction of the debt of the country to other nations, caused a large importation of specie in payment of exports, and thereby enabled the citizens to advance loans to the Government in its most pressing hour.

EXTRA SESSION.

On the 4th of July, 1861, the first or extra session of the Thirty-seventh Congress* convened at Washington, in compliance with a proclamation of President Lincoln issued on April 15th. (*See UNITED STATES.*)

* The following is a list of the members of both Houses:

SENATE.

California.—Milton S. Latham and Jos. A. MacDougall.
Connecticut.—James Dixon and Lafayette S. Foster.
Delaware.—James A. Bayard and Willard Saulsbury.
Illinois.—Orville H. Browning and Lyman Trumbull.
Indiana.—Jesse D. Bright and Henry S. Lane.
Iowa.—James W. Grimes and James Harlan.
Kansas.—James H. Lane and Samuel C. Pomeroy.
Kentucky.—Lazarns W. Powell and Garret Davis.
Maine.—Lot M. Morrill and William Pitt Fessenden.
Massachusetts.—Charles Sumner and Henry Wilson.
Maryland.—Anthony Kennedy and James A. Pearce.
Michigan.—Zachariah Chandler and Jacob M. Howard.
Minnesota.—Henry M. Rice and Morton S. Wilkinson.
Missouri.—Trusten Polk and W. P. Johnson.
New Hampshire.—John P. Hale and Daniel Clark.
New York.—Preston King and Ira Harris.
New Jersey.—John R. Thomson and John C. Ten Eyck.
Ohio.—Benjamin F. Wade and John Sherman.
Oregon.—E. D. Baker and George W. Nesmith.
Pennsylvania.—David Wilmot and Edgar Cowan.
Rhode Island.—Jas. F. Simmons and Henry B. Anthony.
Tennessee.—Andrew Johnson.
Vermont.—Solomon Foote and Jacob Collamer.
Virginia.—Waitman T. Willey and James S. Carlile.
Wisconsin.—James R. Doolittle and Timothy O. Howe.

HOUSE.

California.—Aaron A. Sargent, T. G. Phelps.
Connecticut.—Dwight Loomis, James E. English, Alfred A. Burnham, George C. Woodruff.
Delaware.—George P. Fisher.
Illinois.—Elihu B. Washburne, Isaac N. Arnold, Owen Lovejoy, William Kellogg, William A. Richardson, James C. Robinson, Philip B. Fouke, John A. Logan.
Indiana.—John Law, James A. Cravens, William McKee Dunn, William S. Holman, George W. Julian, Albert G. Porter, Daniel W. Voorhees, Albert S. White, Schuyler Colfax, William Mitchell, John P. C. Shanks.

The Vice-President, Hannibal Hamlin, called the Senate to order.

In the House of Representatives Galusha A. Grow was elected Speaker. He received 99 votes of 159, the whole number cast.

The political complexion of the Senate when all the non-seceding States were represented, was—Republicans, 31; Democrats, 11; Unionists, 5; vacancy, 1. That of the House was—Republicans, 106; Democrats, 42; Unionists, 28; vacancies, 2.

When the oath was administered to the members of the House, Mr. Burnett, of Kentucky, moved the following resolution:

Resolved, That the question of the right of Charles H. Upton, William G. Brown, R. V. Whaley, John S.

Iowa.—James F. Wilson, William Vandever.

Kansas.—Martin F. Conway.

Kentucky.—James S. Jackson, Henry Grider, Aaron Harding, Charles A. Wickliffe, George W. Dunlap, Robert Mallory, John J. Crittenden, William H. Wadsworth, John W. Menzies.

Maine.—John N. Goodwin, Charles W. Walton, Samuel C. Fessenden, Anson P. Morrill, John H. Rice, Frederick A. Pike.

Maryland.—John W. Chrisfield, Edwin H. Webster, Cornelius L. L. Leary, Henry May, Francis Thomas, Charles B. Calvert.

Massachusetts.—Thomas D. Elliot, James Buffinton, Benjamin F. Thomas, Alexander H. Rice, Samuel Hooper, John B. Alley, Daniel W. Gooch, Charles R. Train, Goldsmith F. Bailey, Charles Delano, Henry L. Dawes.

Michigan.—Bradley F. Granger, Fernando C. Beaman, Francis W. Kellogg, Rowland E. Trowbridge.

Minnesota.—Cyrus Aldrich, William Windom.

Missouri.—Francis P. Blair, jr., James S. Rollins, William A. Hall, Elijah F. Norton, Thomas L. Price, John S. Phelps, John W. Noell.

New Hampshire.—Gilman Marston, Edward H. Rollins, Thomas M. Edwards.

New Jersey.—John T. Nixon, John L. N. Stratton, William G. Steele, George T. Cobb, Nehemiah Perry.

New York.—Edward H. Smith, Moses F. Odell, Benjamin Wood, James E. Kerrigan, William Wall, Frederick A. Conkling, Elijah Ward, Isaac C. Dellaplaine, Edward Haight, Charles H. Van Wyck, John B. Steele, Stephen Baker, Abraham B. Olin, Erastus Corning, James B. McKean, William A. Wheeler, Socrates N. Sherman, Chauncey Vibbard, Richard Franchot, Roscoe Conkling, E. Holland Duell, William E. Lansing, Ambrose W. Clark, Charles B. Sedgwick, Theodore M. Pomeroy, Jacob P. Chamberlin, Alexander S. Diven, Robert B. Van Volkenburg, Alfred Ely, Augustus Frank, Burt Van Horn, Elbridge G. Spaulding, Reuben E. Fenton.

Ohio.—George H. Pendleton, John A. Gurley, Clement L. Vallandigham, William Allen, James M. Ashley, Chilton A. White, Richard A. Harrison, Samuel Shellabarger, Warren P. Noble, Carey A. Trimble, Valentine B. Horton, Samuel S. Cox, Samuel T. Worcester, Harrison G. Blake, Robert H. Nugen, William P. Cutler, James R. Morris, Sidney Edgerton, Albert G. Riddle, John Hutchins, John A. Bingham.

Oregon.—George K. Shiel.

Pennsylvania.—William E. Lehman, Charles J. Biddle, John P. Verree, William D. Kelley, William Morris Davis, John Hickman, Thomas B. Cooper, Sydenham E. Ancona, Thaddeus Stevens, John W. Killinger, James H. Campbell, Hendrick B. Wright, Philip Johnson, Galusha A. Grow, James T. Hale, Joseph Bailey, Edward McPherson, Samuel S. Blair, John Covode, Jesse Lazear, James K. Moorhead, Robert McKnight, John W. Wallace, John Patton, Elijah Babbitt.

Rhode Island.—George H. Browne, William P. Sheffield.

Tennessee.—Horace Maynard.

Terront.—Ezekiel P. Walton, Justin S. Morrill, Portus Baxter.

Virginia.—Charles H. Upton, Edmund Pendleton, Wm. G. Brown, Jacob B. Blair, Kellian V. Whaley.

Wisconsin.—John F. Potter, Luther Hanchett, A. Scott Sloan.

Colorado.—Hiram P. Bennett.

Dakota.—John B. S. Todd.

Nebraska.—Samuel G. Daily.

Nevada.—John C. Cradlebaugh.

New Mexico.—John S. Watts.

Utah.—John M. Bernhisel.

Washington.—James H. Wallace.

Carlisle, and E. H. Pendleton, to seats upon this floor, be referred to the Committee of Elections, when formed, and that they report to this House thereon.

On making this motion he said it was not his purpose to offer any factious opposition to the action of the House, but the State Convention repealed the law ordering an election of members of Congress on the 23d of May. That was the day upon which these persons claimed to be elected. "If Virginia still be in the Union, as is contended by many, then, sir, Virginia is sovereign, and she has the right to prescribe the mode, manner, and time of holding her election for members upon this floor. If the reverse of that proposition be true, then she has no right to be represented here."

Mr. Carlile, of Western Virginia, in reply, said, "that he was elected by nearly a unanimous vote, and the only question that could be raised in his case was: had the convention of Virginia—itsself convened by a law enacted by the Legislature, and restricted in its action by that law—had that powerless body the right to annul a solemn act of the Legislature of the State? For, the law convening the convention expressly declared upon its face that no act of that body changing the federal relations of the State, or affecting the organic law of the State, should have any validity until such act of the convention had been referred to the people and ratified by them at the polls."

He further said: "I maintain, and those I represent upon this floor maintain, that we have as much right and as high an interest in the government of the Union as we have in that of our own State. I contend that both proceed from the same sovereign power of the people, and that while the State can change its own organic law, it cannot change its relations to the Federal Union without the consent of those who with the people of that State form the Union."

The whole subject was laid on the table, and the members whose seats were not contested were sworn in.

The Message was communicated to both Houses on the 5th. (*See PUBLIC DOCUMENTS.*)

On the same day, in the Senate, Mr. Chandler, of Michigan, gave notice of his intention to offer a bill to confiscate the property of all Governors of States, members of Legislatures, judges of courts, and all military officers above the rank of lieutenant, who shall take up arms against the Government of the United States, or aid or abet treason against the Government of the United States, and that the said individuals shall be forever disqualified from holding any office of honor, emolument, or trust, under this Government; the property thus confiscated to be used in restoring to the Union men of the rebel States any losses which may have resulted to them in consequence of the present rebellion.

In the House, on the 8th, Mr. Loomis, of Connecticut, offered the following resolution, which was adopted:

Resolved, That the Committee on the Judiciary be, and they are hereby, instructed to prepare and report to this House a bill for a public act to confiscate the property of all persons holding any office whatsoever, either civil or military, under the government of any State of the United States or the so-called Confederate States of America, who have taken up arms, or shall hereafter take up arms, against the Government of the United States.

On the next day Mr. Lovejoy, of Illinois, offered the following resolution:

Resolved, That, in the judgment of this House, it is no part of the duty of the soldiers of the United States to capture and return fugitive slaves.

It was objected to as being out of order, and not a part of the business to which the extra session was confined. This was overruled by the Speaker, and the resolution adopted. Ayes, 93; noes, 55.

In the Senate, on the 10th, the following joint resolution was offered to approve and confirm the acts of the President previous to the commencement of the session:

Whereas, since the adjournment of Congress, on the 4th day of March last, a formidable insurrection in certain States of this Union has arrayed itself in armed hostility to the Government of the United States, constitutionally administered; and whereas the President of the United States did, under the extraordinary exigencies thus presented, exercise certain powers and adopt certain measures for the preservation of this Government—that is to say: First. He did, on the 15th day of April last, issue his proclamation calling upon the several States for seventy-five thousand men to suppress such insurrectionary combinations, and to cause the laws to be faithfully executed. Secondly. He did, on the 19th day of April last, issue a proclamation setting on foot a blockade of the ports within the States of South Carolina, Georgia, Alabama, Florida, Mississippi, Louisiana, and Texas. Thirdly. He did, on the 27th day of April last, issue a proclamation establishing a blockade of the ports within the States of Virginia and North Carolina. Fourthly. He did, by order of the 27th day of April last, addressed to the commanding general of the army of the United States, authorize that officer to suspend the writ of *habeas corpus* at any point on or in the vicinity of any military line between the city of Philadelphia and the city of Washington. Fifthly. He did, on the 3d day of May last, issue a proclamation calling into the service of the United States forty-two thousand and thirty-four volunteers, increasing the regular army by the addition of twenty-two thousand seven hundred and fourteen men, and the navy by an addition of eighteen thousand seamen. Sixthly. He did, on the 10th day of May last, issue a proclamation authorizing the commander of the forces of the United States on the coast of Florida to suspend the writ of *habeas corpus*, if necessary. All of which proclamations and orders have been submitted to this Congress. Now, therefore,

Be it resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That all of the extraordinary acts, proclamations, and orders, hereinbefore mentioned, be, and the same are hereby, approved and declared to be in all respects legal and valid, to the same intent, and with the same effect, as if they had been issued and done under the previous express authority and direction of the Congress of the United States.

Mr. King, of New York, offered the following amendment:

Provided, That within six months after the constitutional authority of the United States Government shall be re-established, and organized resistance to such authority shall no longer exist, the standing

army shall be reduced in its organization to the footing in rank and numbers authorized by law on the 1st day of July, 1861.

Mr. Latham, of California, said: "So far as the exigencies of the country were concerned, making it necessary to order out the military, he believed that the volunteer force of the country would have been sufficient and ample for such exigencies. So far as the proclamation suspending the writ of *habeas corpus* between the city of Philadelphia and Washington city is concerned, he had as yet heard no reason for that extraordinary measure. He was not prepared to indorse blindfold every thing the Government might do."

Mr. Hale, from New Hampshire, hoped the amendment would be adopted. "There was no single feature of the great movement that had taken place in the loyal States that had given him greater and more unalloyed satisfaction than the generous rallying of the people, with blood and treasure, at a moment's call; demonstrating the great truth upon which every republican Government must rest now and forever, that there was no great necessity for standing armies here."

Mr. Kennedy, of Maryland, said: "While I am prepared to sustain the Administration in all just and constitutional measures for the maintenance of the Union and for the restoration of peace, I cannot go quite so far as to indorse all the propositions laid down in this joint resolution. I allude especially to the fourth proposition in regard to the suspension of the writ of *habeas corpus* in the State of Maryland. As one of the Representatives of that State, I desire to say in all sincerity to the Senate that, to-day, I am not informed of the reasons upon which this writ has been suspended in any particular case in the State of Maryland. In my judgment, there was no immediate necessity for it. The State of Maryland is to-day, and was before the military occupation of that State, entirely within the control of the civil authorities of the State. We are here to-day with a representation in Congress for the maintenance of the Union and the preservation of peace, elected by a larger majority than has ever been given heretofore in that State. Six Representatives in the other House have been elected by a vote very nearly approaching to twenty thousand majority out of seventy thousand votes cast. The Executive of that State, holding the power of the State entirely in his hands, was fully able at all times to suppress any insurrectionary movement without the aid of the military power of the Government; and yet all this was done without his ever being called upon. I now say to the Senate and the country, in entering my protest against the action of the Executive of the nation in that particular point, that I conceive it to have been without any necessity whatever, and without the warrant of law itself. If we are to maintain the Government intact; if we are to maintain the principles of the Govern-

ment which has carried us so far on the highway of greatness and of national renown, we must take care not to violate the Constitution when we claim to maintain the Constitution and to enforce the laws. In enforcing the laws we must have a scrupulous regard to the maintenance of the Constitution in all its parts."

Mr. Wilson, of Massachusetts, continued the discussion by saying, "that everybody knows that these acts of the Administration were forced upon it by the condition of the country. The Administration felt that it must exercise all the powers within the Constitution to save the Union. The legislation of the country had not provided the necessary means, and the President took the responsibility, and in doing it he was then sustained by the voice of the loyal portion of the country; and he was sorry now, when those acts had saved the capital and the Government, that there should be any doubt or any hesitation in legalizing by their votes the action of the Government of the country, extorted from it in an emergency."

Mr. King, of New York, said: "My opinion has constantly been, that everywhere, as fast as insurrection assembled, it should be reached, and dispersed as rapidly as it could be; and that the idea of conciliation to men in arms against the country should be entertained with great care and deliberation. If there was on any side of a straight line a doubt in reference to what was wisest and best, I would concede and it is clearly my opinion that forbearance would be the side to err upon; for, bad as these men are behaving, they are our countrymen. I would therefore prefer to forbear more than I should to be severe; but my judgment is, that mercy to them, as well as to the whole country, will be best promoted by vigorous and efficient measures against them."

Mr. Lane, of Indiana, regarded the proclamation of the President of the United States for the organization of eleven additional regiments to the regular army as contemplating a permanent addition to the regular army. The amendment of the honorable Senator from New York, as he understood it, contemplated simply a temporary addition to the regular army during the war.

He said: "I believe that this increase of the regular army is necessary. I believe if we had a standing army of forty thousand true men last January, the present disastrous condition which has overtaken the country never would have befallen it. I think, from the manner in which these new regiments are officered, and the increase to the regular army is proposed to be made, that hereafter we shall have no defection in the regular army, and may rely with confidence upon it.

"One remark fell from the honorable Senator from Maryland, to which I must at this moment enter my dissent; and that was, if I understood him correctly, that he believed that coercion was the means most calculated to bring about a destruction of the Union and the

Government. I believe it is the only means by which the Union and the Government can be supported and maintained. I would use all the power of the regular army and the volunteer force until this rebellion was crushed out. I would contemplate no peace which involved the loss of one single acre of the national territories, or would change the map of the United States. I will sanction no peace which does not imply death to the armed traitors who are leading this rebellion, and not simply a death under the steel of the soldier, but the felon's death with the halter is the fate I would reserve for every single leader in this conspiracy; and I would march your troops freely where-soever it is necessary to march them in putting down this rebellion."

Mr. Kennedy, in reply, said that he was more persuaded now than he had ever been before, that force applied by armies of hundreds of thousands upon either side was not the way to secure and to maintain the union of these States. "I am as persuaded now as I am of any thing on the face of the earth, that you may fight for twenty years and you cannot restore this country to the position in which it was before the rebellion, as you call it, broke out. I call it a revolution. Whether it is right or wrong, I do not now mean to discuss; but it is my solemn conviction that you will never reconstruct the Union by the sword. There was a time, I admit, when peace could have been restored to the country without a compromise of honor upon the part of the majority portion of this Senate. I think now that things have gone so far that little is left to the country to hope for from this course of coercion which is now being pursued. I should be glad, to-day, to accept any measure of conciliation. I am willing to make any concession to bring this country back to the point where we stood one year ago; but I do not believe we shall ever get back to it by the force of arms.

"May I ask the honorable Senator if he is apprised of any necessity for, or of any reasons that require or justify, the suspension of the writ of *habeas corpus* in the State of Maryland? If so, I should like to know them."

Mr. Wilson, of Massachusetts, in reply, said: "If the Senator wishes an answer, I will say that I think the existence of a band of conspirators in the city of Baltimore, men who organized murder and shot down in the streets of that city brave men who were rallying at the call of their country to defend the capital of the nation and uphold the cause of the Republic, is a full, complete justification of the President in authorizing General Scott to suspend the writ of *habeas corpus* in and about that city."

Mr. Baker, of Oregon, approved as a personal and political friend of the President of every measure of his administration in relation to the troubles of the country. "I propose," he said, "to ratify whatever needs ratification. I propose to render my clear and distinct approval

not only of the measure but of the motive which prompted it. I propose to lend the whole power of the country—arms, men, money, and place them in his hands, with authority almost unlimited, until the conclusion of this struggle. He has asked for \$400,000,000. We propose to give him \$500,000,000. He has asked for four hundred thousand men. We propose to give him half a million; and for my part, if, as I do not apprehend, the emergency should be still greater, I will cheerfully add a cipher to either of these figures.

"But, sir, while I do that, I desire, by my word and my vote, to have it clearly understood that I do that as a measure of war. As I had occasion to say, in a very early discussion of this question, I want sudden, bold, forward, determined war; I do not think anybody can conduct war of that kind as well as a dictator. But, as a Senator, I deem it my duty to look forward to returning peace. I do not believe it will be longer than next February

"Till danger's troubled night is o'er,
And the star of peace returns."

"Whether that peace shall be conquered at Richmond, or Montgomery, or New Orleans, or in the wilds of Texas, I do not presume to say; but I do know, if I may use so bold a word, that the determined aggregated power of the whole people of this country—all its treasure, all its arms, all its blood, all its enthusiasm, kindled, concentrated, poured out in one mass of living valor upon any foe—will conquer.

"I believe with most gentlemen that the Union sentiment will yet prevail in the Southern States. Bayonets are sharp remedies, but they are very powerful. I am one of those who believe that there may be reverses. I am not quite confident that we shall overrun the Southern States, as we shall have to overrun them, without severe trials of our courage and our patience. I believe they are a brave, determined people, filled with their enthusiasm, false in its purposes, as I think, but still one which animates almost all classes of their population. But, however that may be, it may be that instead of finding, within a year, loyal States sending members to Congress, and replacing their Senators upon this floor, we may have to reduce them to the condition of territories, and send from Massachusetts or from Illinois Governors to control them. It may be; and, sir, if need come, I am one of those who would be willing to do it. I would do that. I would risk even the stigma of being despotic and oppressive, rather than risk the perpetuity of the Union of these States. I repeat, and with that repetition I close: Fight the war through; accomplish a peace; make it so perfect and so permanent that a boy may preserve it; and when you have done that, you have no more need for a standing army."

Mr. Fessenden, of Maine, proposed to modify the amendment by adding to the resolution simply the words "provided, that nothing here-

in contained shall be construed as authorizing a permanent increase of the army or navy."

This was approved, and the question came up on the passage of the resolution.

Mr. Polk, of Missouri, argued against the resolution, saying: "I am one of those who look upon the action of the President of the United States in this matter as of a character so grave, and, I will add, so perilous, that I cannot, by my vote on this resolution or on any bill or resolution that may be offered, consent to say that he has done right in suspending the writ of *habeas corpus*, or authorizing it to be suspended, or that that writ ought to be suspended, or can properly be suspended, under any state of circumstances that can exist in the country. As far as I know, Merryman is still incarcerated in Fort McHenry. If he has been released I have never known it. The Senator from Maryland (Mr. Kennedy) says he has not been released. If he has been I have never known it. The liberties of that man, as I believe, are trodden down in violation of the Constitution of the United States.

"This Constitution, Mr. President, was adopted without a bill of rights. It was supposed probably by the convention of wise and patriotic men and heroes who adopted it, that no such thing was necessary, because, by the Constitution there was no authority vested in the Government that it created, except that which was expressly delegated. But so jealous were the constituencies of those wise and patriotic men on this point that they were not willing that the Constitution should be adopted or become the permanent basis of Government without recommending amendments, which should constitute a bill of rights; and I call the attention of the Senate and the country to the fourth of these amendments:

"The right of the people to be secure in their persons, houses, papers, and effects, against unreasonable searches and seizures, shall not be violated; and no warrants shall issue, but upon probable cause, supported by oath or affirmation, and particularly describing the place to be searched and the persons or things to be seized."

"The right of the people to be secure in their persons.' I have called attention to the case of Merryman. We have only to look at that case, as it is stated by the Chief Justice in delivering his opinion, to see that this guarantee of the right of the security of the person of that man was trodden down without any authority of law. On the mere intimation of a military general, I believe up in Pennsylvania, he is seized, without any warrant, in the night time, and taken from his family, and put in prison in Fort McHenry; and that in the teeth of a constitutional provision which says that the right of the people to be secure in their persons shall not be violated. Sir, I undertake to say that in the history of England, in the times of the Tudors and the Plantagenets, a case more flagrant than this cannot be found; and this is not a single case. It has occurred here in Maryland repeatedly. It has occurred

in other places. It has occurred in my own State of Missouri, and, if newspapers are to be believed, it has very recently occurred in the case of my former colleague, (Mr. Green.)

"So, also, Mr. President, this other guarantee for papers and effects has been disregarded. I think I am not wrong when I say—if I am wrong, I have been misled by the public prints on the subject—that, under orders from the President of the United States, telegraphic despatches have been seized in different parts of the country. No, those despatches were the private property either of the offices or the authors; and yet they have been seized, when the Constitution says that the people shall be safe in their papers and effects against unreasonable searches and seizures. The seizure has been made without any warrant of law whatever.

"The fifth amendment to this Constitution provides that no person shall be 'deprived of his life, liberty, or property, without due process of law.' This constitutional guarantee has also been trampled upon in the cases which I have referred to. In those cases both the fourth and fifth amendments of the Constitution have been violated. They are twofold violations of this sacred charter of the liberties of the citizen.

"Now, Mr. President, has the President any right to regulate commerce between the States or with foreign countries? Clearly not.' And yet the commerce of the United States has been regulated since the 15th of April; and, in some instances, restricted, so that it has been well-nigh destroyed between the States of the Union. Claiming that the whole of the States are still in the Union, yet this power of regulating commerce has been exerted by the President for the purpose of crippling, restraining, and almost destroying commerce between the States that were unquestionably loyal and those that claim to have seceded. Now, sir, the claim that they have seceded does not mitigate the crime of the President; because he has done these acts, and at the same time has said that these States are still in the Union. If they have seceded legally, then they are foreign States, and by the same clause of the Constitution to which I have just now referred, the President has no right to regulate commerce between the United States and foreign Governments. If their secession be illegal, then the Constitution is still violated.

"I say, then, Mr. President, while the Constitution of the United States provides that 'the Congress shall have power' 'to regulate commerce with foreign nations, and among the several States,' and has given that power to Congress only, the President, notwithstanding this constitutional provision, has undertaken to regulate commerce between the States.

"The Constitution of the United States again says that Congress shall have power to declare war. The President of the United States has involved the country in a war, notwithstanding

this provision of the Constitution. The Constitution says that Congress shall have the power 'to raise and support armies.' The President of the United States has raised armies. The Constitution says that Congress shall have the power 'to provide and maintain a navy.' The President of the United States has attempted to provide a navy. It also says that 'the privilege of the writ of *habeas corpus* shall not be suspended unless when, in cases of rebellion or invasion, the public safety may require it,' and that not even by the Congress of the United States. Yet the President has suspended the writ of *habeas corpus*. It says that 'no preference shall be given by any regulation of commerce or revenue to the ports of one State over those of another.' The President has by his own act, and without any regulation of Congress, blockaded ports, and not merely given a preference to some ports over others, but has actually suspended the commerce of certain ports entirely. The President of the United States has rendered 'the right of the people to be secure in their persons, houses, papers, and effects,' a nullity, by infringing those rights without the warrant of law; and citizens have been deprived of liberty and property without due process of law.

"These are instances of violation of the Constitution in which the President has assumed power to himself. The Constitution tended to limit the power of the President. It has put strict and stringent limitations upon that power, but these acts have had a tendency to increase that power.

"This joint resolution, Mr. President, proposes to approve and legalize these acts. I cannot, as an American Senator, give my consent to approve and legalize them. I cannot do it, especially under the circumstances in which these acts have been done. I am one of those who believe that there was no occasion for them."

Mr. Powell, of Kentucky, in opposition to the resolution, took occasion to charge upon the Republican side of the Senate the responsibility for the existing state of affairs, thus: "I verily believe that those who propose to maintain the Union of these States by arms are disunionists. They may not wish to destroy the Union; but the very means to which they resort for the purpose of saving it, will most assuredly accomplish its destruction. Hence I have been from the beginning opposed to war, and I am now opposed to it. I think that, in this age, as a Christian, enlightened people, we should settle these difficulties without a resort to arms. If Senators on the other side of the chamber last winter had co-operated with Senators on this side, and we could have had a corresponding action in the other House, I have no doubt all these difficulties could have been settled. It is well known that propositions to amend the Constitution were introduced here, and that everybody on this side of the chamber approved them, and

was ready to go for them; and why were they not passed? It was because the whole Republican side of the Senate put their faces against them. With the exception, perhaps, of the distinguished Senator from Oregon, I do not believe they got a vote from that side of the Senate. My friend from Connecticut [Mr. Dixon] I know made a gallant and patriotic speech, but I do not remember that he voted for one of those resolutions, though I will do him the justice to say that I believe, if he thought they would have passed, he would have done so. We did every thing in our power, by proposing constitutional amendments, to avert the difficulty, and to restore harmony to a distracted country. Why was it not done?

"Senators, you on that side of the chamber are responsible for it; and when the passions of men shall have abated, and this wild fanaticism, this warlike spirit that now sweeps over the land, shall have subsided, the people of this country will calmly and dispassionately look into the history of these times, and if it shall be, as I fear it will be, that this Union is forever destroyed, that this mighty fabric of our fathers is torn, this great Government overthrown, history, impartial history, will hold you responsible for it; for you could have settled the controversy; you could have settled it peaceably; you could have settled it without impairing any rights of any man or any State in the North, by granting proper guarantees to the South which would have done you, your property, or your States, no harm. You declined to do it; the responsibility is with you."

Mr. Breckinridge on a subsequent day resumed the debate. He said that Congress, by a joint resolution, had no more right to make valid a violation of the Constitution and the laws by the President, than the President would have by an entry upon the executive journal to make valid a usurpation of the executive power by the legislative department. Congress had no more right to make valid an unconstitutional act of the President, than the President would have to make valid an act of the Supreme Court of the United States encroaching upon executive power; or than the Supreme Court would have the right to make valid an act of the Executive encroaching upon the judicial power.

To say that Congress, by joint resolution, might indemnify the President against a breach of the Constitution, is substantially to declare that Congress may alter the Constitution in a manner not provided by the instrument; may add to it or take from it. If a bare majority of the two Houses of Congress can, by resolution, make that constitutional and valid which was unconstitutional, by the same authority it may confer upon the President in the future powers not granted by the Constitution; so that, sir, in whatever aspect the subject may be viewed, it appears to me the principles involved in this joint resolution are utterly subversive of the Constitution, and contain the

very essence of a government without limitation of powers. He had supposed that these general principles were too clear and too well recognized in this country to need statement or illustration.

He then proceeded: "What is the excuse; what is the justification; what is the plea? Necessity. Necessity? I answer, first, there was no necessity. Was it necessary to preserve the visible emblems of Federal authority here, that the Southern coast should have been blockaded? Did not the same necessity exist when Congress, at its last session, refused to pass the force bill, that existed at the time the President assumed these powers? As Congress refused to do it, and adjudged that there was no necessity at that time, what was the additional necessity afterwards? Was it necessary, until Congress should meet, to the existence of the union of these States, and of its Constitution, that powers not conferred by the instrument should be assumed? Was there any necessity for overrunning the State of Missouri? Was there a necessity for raising the largest armies ever assembled upon the American continent, and fitting out the largest fleets ever seen in an American harbor?

"But, Mr. President, I deny this doctrine of necessity. I deny that the President of the United States may violate the Constitution upon the ground of necessity. The doctrine is utterly subversive of the Constitution; it is utterly subversive of all written limitations of government; and it substitutes, especially where you make him the ultimate judge of that necessity, and his decision not to be appealed from, the will of one man for a written constitution. Mr. President, the Government of the United States, which draws its life from the Constitution, and which was made by that instrument, does not rest, as does the Constitution in many other countries, upon usage or upon implied consent. It rests upon express written consent. The Government of the United States may exercise such powers, and such only, as are given in this written form of government and bond which unites the States; none others. The people of the States conferred upon this agent of theirs just such powers as they deemed necessary, and no more; all others they retained. That Constitution was made for all contingencies; for peace and for war. They conferred all the powers they deemed necessary, and more cannot be assumed, to carry on the Government. They intended to provide for all contingencies that they thought ought to be provided for, and they retained to the States all the powers not granted by the instrument. If in any instance it may be supposed that the powers conferred are not sufficient, still none others were granted, and none others can be exercised. Will this be denied, sir? Or is the doctrine to be advanced that all constitutional questions are to be made entirely subordinate to the opinions and ideas that may prevail at the hour in reference to

political unity and association? It has been held heretofore—I thought it was axiomatic, and received everywhere—that the terms of the Constitution of the United States were the measure of power on one side, and of obedience on the other.”

Mr. Lane, of Indiana, replied by saying: “What is it that the President has done since the last meeting of Congress? First, he has declared a blockade of the Southern ports; and gentlemen tell us there is no constitutional authority for that. It is the first duty of the President to see that the laws are faithfully executed. We have a tariff law imposing duties upon foreign importations. That has been disregarded by the seceding States; they have assumed to pass a tariff act different from ours. That law of Congress cannot be enforced by the ordinary course of procedure under your collections of revenue at the proper ports established by law. There is no higher power in the Constitution of the United States delegated to the President than the power to ‘take care that the laws be faithfully executed.’ These high and extraordinary powers, although not perhaps technically granted in the Constitution, result as an incident to the war power, which is invoked, and constitutionally invoked, under that provision of the Constitution which authorizes the President to use force to suppress insurrection and to put down rebellion. I sanction, then, the proclamation establishing a blockade.

“The next objection is to the declaration of martial law, by which the writ of *habeas corpus* was suspended. I only regret that when the writ was suspended, the *corpus* of Baltimore treason was not ‘suspended’ too. It is necessary to the enforcement of the laws and to the preservation of the Union that this writ of *habeas corpus* should be suspended; and the Constitution of the United States says, in express terms, it may be suspended in case of rebellion and insurrection. Then the whole question comes to this: Who is to judge? Where is the discretion lodged? Clearly with the President of the United States; and it can be safely lodged nowhere else.

“One word, before I forget it, on the subject of this war, and the object of the war. There is no war levied against any State, or against any State institutions. The President has called out troops to suppress insurrection, and put down rebellion. These are the objects for which your troops have been called into the field. The abolition of slavery is no object contemplated for which this war is to be prosecuted. But let me tell gentlemen, that although the abolition of slavery is not an object of the war, they may, in their madness and folly and treason, make the abolition of slavery one of the results of this war. That is what I understand to be precisely the position of the Administration upon the subject of this war.”

On a subsequent day Mr. Latham, of California, said that he held the line of demarkation

in indorsing the conduct of the Executive to be this: whatever imperious necessity required him to do to support the Government, to enforce the laws, and secure obedience to the constituted authorities, it was right and proper he should do, even though in the doing he may have committed a technical infraction of the authority delegated to him. Wherever there was not that imperious necessity, he did not justify him. So far as the violation of the writ of *habeas corpus* in the State of Maryland was concerned, he refused to give him his sanction for that act. He refused it because that State had shown, by the return of her delegates to the other House, her allegiance to the Government of the United States; and though there might be many citizens in her midst who sympathized with the disloyal spirit of the Southern States; though there may have been disgraceful mobs and riots in the city of Baltimore; unless there was clear evidence that the judiciary of that State were tainted with that disloyalty, and were unwilling to do their duty, under the Constitution, in acting upon these writs of *habeas corpus*, he would not justify any officer in the suspension of that sacred privilege. No Senator for one moment doubted the loyalty of the Chief Justice of the United States, who issued the writ; or, if he did, he had never made it known upon this floor. His character is pure, spotless, and untainted; his life has been one of devotion to his country and the enforcement of its laws; and now, in his honored old age, he could scarcely stigmatize a long list of years of service by refusing to obey those laws and those principles of justice which he has sworn to carry out. Hence he regarded the act of the President of the United States in suspending the writ of *habeas corpus*, as this joint resolution says, “between the city of Philadelphia and the city of Washington,” as an unnecessary violation of the powers possessed by him under the Constitution; and, as a conscientious guardian of the liberties of the people, he refused him his indorsement for that act.

So, too, as to the increase of the regular standing army of the country. The purposes for which he was striving could have been as easily accomplished by the volunteer force of the country; and therefore the exercise of power in increasing the regular standing army was not warranted by the exigencies. He declined, therefore, his indorsement for this act also. But, sir, as to the other acts of the Government—ordering the blockade; calling out the volunteers of the country; suspension of the writ of *habeas corpus* in Florida, it being in open rebellion to your Government; and all the other acts enumerated in this joint resolution—he had his hearty approval; and “I now say, as the representative of a sovereign State and a loyal people, that if he had not exercised those powers, I would have voted to impeach him as unworthy the place he occupies, and most derelict in his duties to the Government.”

On the 2d of August, the debate on the resolution was resumed in the Senate. The motion was made by Mr. Wilson of Massachusetts to postpone the unfinished business and take up this joint resolution.

Mr. Trumbull, of Illinois, objected, saying: "I hope not. I hope we shall go on with the unfinished business of yesterday. That is germane to this same question. Let us get through with the bill which is the unfinished business, and then we shall be prepared to vote on that joint resolution. I would like to have the bill finished, and get rid of it. I hope the Senator from Massachusetts will not insist on taking up the joint resolution. The debate will go on upon that, and we shall gain nothing by it."

The question was put, and it appeared there was no quorum voting. A quorum soon appearing, the yeas and nays were ordered on the question of taking up the resolution.

Mr. Trumbull, of Illinois, then took the floor in order to state briefly his objection. The resolution was germane to the bill which was the unfinished business. It proposed to declare legal the acts which have been done by the President in the recess of Congress. Would our declaration make them legal if they were not legal? Would it make them so if they were unconstitutional and void? Now there was a bill pending, proposing to confer certain powers upon the executive authority, which related to this subject. He was disposed to give the necessary power to the Administration to suppress this rebellion; but he was not disposed to say that the Administration had unlimited power and could do what it pleases, after Congress meets. He was willing to excuse it for all it had done, and to sustain it in all it had done; but if you propose to pass a resolution approving the exercise of powers for which you may be unable to find in strict law the warrant, and then refuse to grant by law the authority to do what is necessary to be done, it seemed to him it would be a very strange proceeding. He thought they had better let this resolution lie until they disposed of the bill, and then he should be prepared to sanction what the Administration had done and provide for the future, so that the necessary power might be in the President's hands.

Mr. Morrill, of Maine, said: "I am inclined to concur with the gentleman from Illinois, and believe that we had better go on with the unfinished business. It is agreed on all hands that the bill which was under consideration yesterday is an important bill; that it is important to give efficiency to the measures of the Administration, and for that reason, I think we ought to attend to it now; and I am in favor of it, as against the resolution proposed to be taken up by the motion of the Senator from Massachusetts, upon the ground that I do not consider that resolution important. I do not agree with the Senator in attaching very much importance to the resolution that was offered in the early part of the session, to render legal

and valid the doings of the President. I believe they are valid. I believe what he has done is constitutional, and can be demonstrated to be so. It does not need to be ratified. It does not need to be rendered valid by a resolution of Congress. I know it has been said from the first day of the session until now, iterated and reiterated, that the President has trampled upon the Constitution of his country; that we had conceded as much, in that we had offered a resolution here to render his acts legal and valid."

Mr. Polk of Missouri rose to ask the Senator if, at an early day of the session, he did not vote against the motion made by the Senator from Kentucky to postpone the consideration of this resolution for one day, which motion was made for his convenience?

Mr. Morrill replied that he had no distinct recollection upon the subject. Very likely he did; and if it were up now, he should vote in favor of instant action upon it. He did not perceive any inconsistency between his argument now and his vote then.

Mr. Polk in answer said: "It seems to me a marvellous change has come over the opinions of some Senators in regard to this resolution. It was about the first business that was called up in order before the Senate at the present session; the question was on its passage; and it was upon the very point of being put upon its passage, when I rose, stating that I had some views that I desired to express, and that I wished indulgence for one day. If my recollection does not fail me, the Senator from Kentucky [Mr. Powell] then made a motion to postpone the resolution for one day; but his motion was voted down almost unanimously by the Senate. I believe almost every gentleman on the other side voted against the postponement, as I supposed, acting contrary to what had always been the courtesies of the Senate under all similar circumstances.

"Now, when the Senator from Massachusetts moves to take up this resolution for the purpose of having action upon it, it is to be postponed again. The Senator from Maine thinks it does not deserve, does not need, does not require, any action at all. At the beginning, it was so important to be acted on at once, that it could not be postponed for a single day to enable a Senator to address the Senate properly upon the subject; but he was forced into the debate precipitately."

On a division the resolution was ordered to be taken up. Yeas, 28; noes, 11.

The question then being on its passage, Mr. Doolittle, of Wisconsin, moved to refer it to the Committee on the Judiciary, as it was too late to move a reconsideration for the purpose of amendment.

Mr. Wilson, of Massachusetts, opposed the motion, saying: "I do not like to resist this motion, but I must confess my surprise at it. Day after day this question has been laid aside to accommodate Senators. It is a plain and simple prop-

osition; there is no ambiguity about it; it is as clear as sunlight, as simple as any thing can be, to the comprehension of the Senator from Wisconsin, or any other Senator. I shall vote against the reference; but if the Senate chooses to recommit it, very well; they can take the responsibility."

Mr. Breckinridge, of Kentucky, said: "The only gratification that I derive from the motion of the Senator from Wisconsin is, the confirmation it affords to what I had the honor to remark a short time ago, that the Senate does not intend to pass the resolution. I am glad it does not; but it does not seem disposed to vote directly, but will consign it to the dungeons of a committee-room."

The question of reference was then taken and lost. Ayes, 17; noes, 23.

Mr. Sherman, of Ohio, thus expressed his views of the acts of the President: "The first three acts enumerated in the preamble of this resolution, I would vote heartily to approve. I believe they were right and proper—strictly legal, and strictly constitutional. I believe that the President had the right, and that it was his duty, to issue the proclamation of April last. I believe he had a right—it was a part of the power of suppressing an insurrection—to blockade the ports of the United States, or any of them. I do not believe the President of the United States has the power to suspend the writ of *habeas corpus*, because that power is expressly given to Congress, and to Congress alone. I do not believe the President of the United States has the power to increase the regular army, because that power is expressly given by the Constitution to Congress alone; and therefore I cannot vote for either of the last three propositions—the fourth, the fifth, or the sixth. Still I approve of the action of the President. I believe the President did right. He did precisely what I would have done if I had been in his place—no more, no less; but I cannot here, in my place, as a Senator, under oath, declare that what he did do was legal. I may say it was proper, and was justified by the necessity of the case; but I cannot here in my place, under oath, declare that it was strictly legal, and in consonance with the provisions of the Constitution. I shall therefore be compelled to vote against the resolution."

The bill was further debated, and finally, on the 6th of August, taken up for consideration and laid aside for Executive business. The object of the resolution was secured by making it a clause in one of the other bills passed at this session.

On the 11th of July Mr. Clark, of New Hampshire, offered the following resolution:

Whereas a conspiracy has been formed against the peace, union, and liberties of the people and Government of the United States; and in furtherance of such conspiracy a portion of the people of the States of Virginia, North Carolina, South Carolina, Tennessee, Arkansas, and Texas, have attempted to withdraw those States from the Union, and are now in arms against the Government; and whereas James M. Ma-

son and Robert M. T. Hunter, Senators from Virginia; Thomas L. Clingman and Thomas Bragg, Senators from North Carolina; James Chesnut, jr., a Senator from South Carolina; A. O. P. Nicholson, a Senator from Tennessee; William K. Sebastian and Charles B. Mitchell, Senators from Arkansas; and John Hemphill and Louis T. Wigfall, Senators from Texas, have failed to appear in their seats in the Senate and to aid the Government in this important crisis; and it is apparent to the Senate that said Senators are engaged in said conspiracy for the destruction of the Union and Government, or, with full knowledge of such conspiracy, have failed to advise the Government of its progress or aid in its suppression: Therefore,

Resolved, That the said Mason, Hunter, Clingman, Bragg, Chesnut, Nicholson, Sebastian, Mitchell, Hemphill, and Wigfall be, and they hereby are, each and all of them, expelled from the Senate of the United States.

Mr. Bayard, of Delaware, opposed the resolution, saying: "I can see no reason why we should depart from the determination of the Senate at the last session, in declaring the seats vacant, and adopt now the rule of expulsion. I know of no conspiracy on the part of the Senators named in the resolution. I cannot say that it has not existed, but I know the general fact, that, claiming the right of secession for their States (though I differed from them in that) as a right under the Constitution, they have acted openly with their States. Their States have chosen to leave this Union. Whether they have the authority or not, is questioned. They consider it a legitimate exercise of reserved rights under the Constitution. I consider the act as revolutionary. There is the difference. Shall I exercise the power of expulsion against a Senator on the ground of conspiracy, because he may be erroneous in point of law as to the effect of the action of his State? Am I to condemn him individually for the action of his State?"

Mr. Clark, of New Hampshire, in reply declared: "I dare say the Senator would be glad that these seats should be declared vacant, and that the question should be left in abeyance whether they have the right to go out; but I want to deny here, on the floor of the Senate, the right of any State to secede; and when a Senator accedes to that action of his State, or the people of the State, I want to declare that he puts himself in a hostile attitude to this Government, and deserves expulsion from the councils of the nation. I hope that no such tame measure as declaring these seats vacant will be adopted by the Senate. I want the Senate to proclaim to the nation that we will not have these men in our councils, and that they shall go out. We let certain Senators withdraw at the last session—no, sir, we did not let them withdraw; they withdrew themselves, and left their seats vacant, and we declared them vacant by that act of virtual resignation. But now, sir, this revolution has gone on; it has made rapid progress; they have taken up arms against the Government; they have not only seized your arms, but they have assaulted your fortifications; their guns are now within sound of your capital; and shall we sit here in the

Senate and deliberate and doubt whether we shall turn out of this Senate the very men who are ready to explode those guns against your capital? No, Mr. President; let the judgment of the Senate be as summary, as decisive, and as signal, as their revolution has been rapid; and let them be ejected from the councils of the nation."

Mr. Latham, of California, continued the debate by saying: "I shall not vote for this resolution as it stands. I will vote to strike the names of these gentlemen from the roll, and to declare their seats vacant. I will not vote to expel them, because I think, as to some Senators named, that that would be unjust and improper. Expulsion implies turpitude. It is a reflection upon the personal character of the individual; it is a stain. Now I know myself that some Senators—two in particular—named in that resolution, did not indorse the right of secession. They disapproved of it; they never sanctioned it; and they did not think they could occupy a seat on this floor after their State had seceded."

Mr. MacDougal, of California, on the contrary, wished to say that he did not vote for the expulsion of these members upon the ground that their States have declared themselves out of the Union. The expulsion is for personal cause. It is, that they have espoused the controversy made against the Republic, evidenced by one circumstance—perhaps sufficient, independent of what history has already reported of them—that they are not here. Now, there may be no turpitude in this act of theirs, or in their espousing the adversary cause. Treason was always a gentlemanly crime, and in ancient times a man who committed it was entitled to the axe instead of the halter.

The resolution was agreed to. Ayes, 32; noes, 10.

"On the 13th of July Mr. Johnson, of Tennessee, presented the credentials of W. T. Willey and J. S. Carlisle, elected Senators by the Legislature of Western Virginia, acting as the Legislature of the entire State.

Mr. Bayard, of Delaware, protested against administering the oath to them, saying: "I think these credentials ought to be referred to the Committee on the Judiciary. They involve very grave questions. You are undertaking to recognize a government of the State of Virginia, which is not the regular State government, even though that State government may be in what you call a state of rebellion. You are bound to take notice of the fact that Mr. Letcher is Governor of Virginia, and that his term of office, under the constitution and laws of Virginia, has not yet expired. If you say he is in rebellion, that does not authorize a portion of the people of Virginia to form a Legislature for the purpose of electing Senators to take seats in this body. You have no authority to create a new State out of a part of an existing State. I think the questions are very grave."

Mr. Johnson replied: "I hope the motion of

the Senator from Delaware will not prevail. These certificates from the Commonwealth of Virginia afford *prima facie* evidence that the election has taken place regularly, and that these gentlemen have been regularly certified here as the Senators from that Commonwealth. Is there any proof before this body, presented in any way, that the election has not taken place regularly, according to the Constitution of the United States and of the State of Virginia? The certificates themselves furnish *prima facie* evidence that these gentlemen are the Senators elect from the Commonwealth of Virginia. The other great fact is equally clear, without regard to what the Senate did yesterday, that these vacancies did exist on the 9th of the month, when this election took place. That fact is known to this body; it is known to the country. The late Senators from Virginia were not here. The vacancies did in fact exist when this election took place.

"These are facts within the cognizance of this body. They are known to every member here. Here are the certificates of election of these gentlemen, and there is not a single scintilla of proof from any quarter that they are not the Senators, and have not been properly and regularly elected. There is no one else claiming the seats, no one making a contest for them. There is not a particle of evidence from any quarter that these gentlemen are not the Senators elect according to the forms of law and the Constitution."

Mr. Bayard replied: "In my judgment, it is an utter abandonment of the whole form of your Government; it is, by the action of the Senate, recognizing insurrection in a State, for the purpose of overthrowing the government of the State, by a very small minority of its people."

Mr. Hale, of New Hampshire, replied to Mr. Bayard by saying: "He says that the recognition of these gentlemen under the commission that they bear, will be recognizing insurrection in a State. I deny it, sir; I deny it utterly. I say that a greater perversion of terms never could be used. It is because we will not recognize insurrection in a State, that we admit these gentlemen. The part of the State to which the Senator alludes are themselves in a state of insurrection, and it becomes this Government to recognize the loyal and the true men that still cling to the Union and support the Constitution, and call upon this Government to maintain its constitutional obligations and put down insurrection. Talk about precedents, sir! Why, the whole thing is new. These States have parted so far as they could, or the men under whose control they are, have parted from their constitutional obligations. There is no precedent, because the world never saw such a state of things.

"I hope that the Senate will not hesitate. Sir, this is no question of form, no question of ceremony; it is a question of life or death with this Republic, and with this Government. The

men that are in arms against you are in arms against your very existence. The idea of your national life a day after you yield to their position, is absurd and inconsistent. Sir, this Government had borne and forborne until your forbearance was construed into pusillanimity; and during the last session of Congress the most insulting language that ever fell from human lips was uttered in reference to this very General Government."

Mr. Powell, of Kentucky, spoke in answer, expressing his views thus: "My friend from New Hampshire tells us that this is a contest between despotism and constitutional liberty. Sir, so far as I have witnessed the action of the Executive, and, I regret to say, some of the acts of this body, it does not seem to me that the Constitution is much regarded. This proceeding is, in my judgment, an overthrow of the Constitution and the forms of our Government. As I said the other day, we have but little left save the Constitution, and I invoke Senators to preserve that."

The debate was continued for some time, when a division was taken on the motion to refer, and it was lost. Ayes, 5; noes, 35.

In the Senate the Army bill being under consideration on the 18th of July, Mr. Powell, of Kentucky, moved to amend it by adding the following section:

And be it further enacted, That no part of the army or navy of the United States shall be employed or used in subjecting or holding as a conquered province any sovereign State now or lately one of the United States, or in abolishing or interfering with African slavery in any of the States.

Mr. Sherman, of Ohio, immediately took the floor saying: "I shall vote against the amendment, as a matter of course, because it is out of place, and ought not to be offered here, in my judgment; but I wish it distinctly understood that in voting against it, I do not assent to the proposition, or the imputation, that this is a war for the purpose of subjugating any State or freeing any slave. If I understand the purpose of this war, it is to maintain the national honor, to defend the national property, to uphold the national flag everywhere wherever by right it floats, whether it be in South Carolina, or Florida, or Louisiana; but I say here, as I have said elsewhere, that there is no purpose in conducting this war to subjugate a State, to free a slave, or to interfere with the social or domestic institutions of any State or of any people. The purpose of the war, as I understand it, is to preserve this Union; to maintain the Constitution as it is in all its clauses, in all its guarantees, without change or limitation."

Mr. Powell, of Kentucky, replied: "I am pleased to hear the conservative sentiments uttered by the Senator from Ohio; but the Senator, I think, was unnecessarily surprised in his astonishment at the idea of any Senator supposing the result of this war would be probably the emancipation of the slaves, or the overthrow of State sovereignty. Does not the Senator from

Ohio know that more than one of those who have been heretofore considered the most conservative Senators on the other side of this Chamber have declared that if the necessity existed, they were for emancipating the slaves in the southern States? It was so announced by the Senator from Connecticut, (Mr. Dixon.) It was affirmed by the Senator from Michigan, (Mr. Bingham.) The Senator from Kansas (Mr. Pomeroy) introduced a bill into the Senate, which is now before the Judiciary Committee, and has been printed, for the purpose of abolishing slavery in all the seceded States. When we witness all this, should the Senator from Ohio be surprised that the representatives of the slaveholding States fear that it may be and is the purpose of those in power to use the Army for the purpose of abolishing the institution of slavery and overthrowing the States? Did not the Senator from Oregon (Mr. Baker) the other day declare that if it were necessary, he would vote to reduce the seceded States to provinces, and send Governors there from other States to govern them as Territories? When we hear all these declarations, I think the Senator should not be surprised at the fear which I have expressed."

Mr. Dixon, of Connecticut, next rose, saying: "What I said was this: that if the war should be persisted in, and be long protracted on the part of the South, and in the course of its progress it should turn out that either this Government or slavery must be destroyed, then the people of the North—the conservative people of the North—would say, rather than let the Government perish, let slavery perish. That is what I said, and say it now, and shall continue at all times to say the same; not by any means as a threat, but as a warning and an admonition."

Mr. Lane, of Kansas, followed, saying: "We would have stood by the compromises of the Constitution, and permitted slavery to exist in the States where it was planted; would not, by word or act, have disturbed it; but they have forced upon us this struggle, and I, for one, am willing that it shall be followed to its logical conclusion."

"I do believe, Mr. President, that the institution of slavery will not survive, in any State of this Union, the march of the Union armies, and I thank God that it is so. It is an institution that has been the curse of the country ever since my recollection; these Halls have been accursed with it; the people of the States where it exists have been accursed with it, and the people of the free States have been accursed with it."

Mr. Carlile, from Western Virginia, did not intend to vote for the resolution. But this was no war of subjugation. There was no power in this Government to carry on such a war; no constitutional, no physical power, to carry it on. This was a war for the maintenance of the existence of the Constitution, and the Union under it; and it was a war in which the hearts

of the loyal people of the so-called seceded States are as much enlisted as are the hearts of the constituency which the honorable Senator from Connecticut represented. He did not understand him to say that he desired that this war should be prosecuted to the extermination of the institution of slavery. He merely understood him to say that those who have inaugurated this rebellion, who seem determined to push it to its extremities, may by their act, and by their act alone, effect the destruction which the Abolitionists never could have accomplished. "I believe this a war constitutionally waged for the perpetuity of the Government, in which are bound up all our hopes, the hopes of posterity, and the hopes of the civilized world."

Mr. Browning, of Illinois, explicitly said: "Mr. President, I am not prepared to admit, as some gentlemen take pains to explain, that this is not a war of subjugation. If it is not a war of subjugation, what is it? What was it set on foot for, if it is not for the sole identical purpose of subjugating the atrocious rebellion that now exists in the country?"

Mr. Sherman: "My friend misunderstood my language. I said distinctly that it was not the purpose of this war to subjugate a State, a political community; but I will go as far as he or any other living man to uphold the Government against all rebellious citizens, whether there be one or many of them in a State. If nine-tenths of the people of any State rebel against the authority of this Government, the physical power of this Government should be brought to reduce those citizens to subjection; the State survives."

Mr. Browning: "I will not stop to deal with technicalities; I care not whether you call it the subjugation of the people or the subjugation of the State. Where all the authorities of a State, where all the officers, who are the embodiment of the power of the State, who speak for the State, who represent the government of the State, where they are all disloyal and banded in treasonable confederation against this Government, I, for one, am for subjugating them, and you may call it the subjugation of the State or of the people, just as you please. I am for subjugation, and you may apply the term subjugation to the State or the people. I want this rebellion put down, this wicked and causeless treason punished, and an example given to the world that will teach them that there is a power in the freemen of this continent to maintain a constitutional Government."

Relative to the abolition or destruction of slavery, he expressed these views: "But, sir, let us understand another thing. As I have already said, the power to terminate this war now is not with us. The power is with us, but not to terminate it instantly. We will terminate it, if it is not terminated, as it should be, by those who began it. But, sir, I say for one—I speak for myself and myself only, but I be-

lieve in so speaking I utter the sentiments which will burst from every free heart in all the northern States of the Confederacy—that if our brethren of the South do force upon us the distinct issue, shall this Government be overthrown, and it and all the hopes of civil liberty, all the hopes for the oppressed and down-trodden of all the despotisms of the earth go down in one dark, dreary night of hopelessness and despair—if they force upon us the issue, whether the Government shall go down to maintain the institutions of slavery, or whether slavery shall be obliterated to sustain the Constitution and the Government for which our fathers fought and bled, and the principles that were concentrated in their blood—I say, sir, when the issue comes, if they force it upon us, that one or the other is to be overthrown, then I am for the Government and against slavery, and my voice and my vote shall be for sweeping the last vestige of barbarism from the face of the continent. I trust that necessity may not be forced on us; but when it is forced upon us, let us meet it like men, and not shrink from the high, and holy, and sacred duties that are laid upon us, as the conservators not only of Government, but as the conservators of the eternal principles of justice and freedom for the whole human family."

Mr. Carlile replied: "I desired to be understood as saying that the institution of slavery did not, of necessity, produce this rebellion; and, therefore, gentlemen had no right, in justice, to level all their artillery against the rights of the people of one section of the Union, to the property which is tolerated and acknowledged by their laws. Because a conspiracy has been inaugurated to overthrow and destroy the Government, are you to overthrow and destroy the rights of property in one-half of the States of this Union? Did gentlemen attempt to destroy commerce in 1832, because the tariff was made the pretext for the rebellion that was attempted to be inaugurated then? Does it follow that commerce is an evil, because resistance to tariffs, growing out of commerce, was made the pretext by South Carolina, in 1832, for an attempt to throw off her allegiance to this Government and to disconnect her people from it? As well should you have made a war upon commerce then, as to attempt now to make war upon an institution existing in one-half of the States of this Union; and in the very breath that you speak when you advocate such a war, you say that you are waging it—for what? For the maintenance of the Constitution! And do you not violate the Constitution in any effort that you may make to destroy an institution known to the laws of the States of the Union? What right have you, sir, as a Senator upon this floor, to go into my State and to thrust yourself between me and my property, and to say that I shall not own it and dispose of it in accordance with the laws of my State? What would the Government be, that would be preserved after conduct like that?"

Mr. Lane, of Kansas: "I desire to ask the Senator a question. Should the armies of the Union march into the slave States, and the slaves themselves should get up an insurrection, as I believe will be the case, and flee to the armies of the Union, or march out by the roads that the Union armies march in, will the Senator, under such circumstances, expect the people of the North, or the armies of the North, to become the servants of the traitors, and return those slaves to their traitorous masters?"

Mr. Carlile: "The gentleman is putting a question to me entirely foreign to the subject; but I will answer him in the language of the proclamation of the gallant general, issued to the people of Virginia when his army entered upon our soil: 'We come not among you, Virginians, to interfere with your rights of property; and should an insurrection be gotten up in your midst, the iron heel of this army will be yours to suppress it.' Sir, that is the language of a man who loves his country, and who is disposed to obey its laws and be at the head of the army of deliverance—as I trust in God the armies of the Government of the Union will be everywhere—to deliver the people of the States that have been silenced and intimidated; many of them driven from their homes; and those who are left behind terrified by the conduct of disloyal men in their midst. That should be the name—'the army of deliverance'—that should be given to the forces of the United States everywhere, to protect us in our rights in the Union of every and any description."

Mr. Lane, of Kansas: "While I think that policy might be a correct one, so far as returning slaves to the Union men is concerned, I should think it highly impolitic, and in a military sense highly improper, so far as the traitors are concerned."

Mr. Powell, of Kentucky, asked: "What would be thought if you were to march an army against New York or against any of the northern States, and to despoil their people of their houses, their goods, their chattels, and their lands? Would not the whole world look upon it, and justly, too, as an overthrow of the constitutional liberties of those people? And yet you propose to do that in the name of the Constitution! Professedly executing the laws and maintaining the Constitution, you will destroy the Constitution, you will set the laws at defiance, and you will commit acts revolting to men and to God."

The question being taken on this amendment, it was rejected and the bill passed.

On the bill to authorize the President to accept the services of volunteers, to the number of five hundred thousand, being under consideration, Mr. Saulsbury, of Delaware, moved to amend by striking out "five" and inserting "two." He said: "As I remarked early in the last session of Congress, my State having been the first to adopt the Constitution and to enter the Union, she would and will be the last to aban-

don it, so I repeat now, however trite it may be. We have not a handful of secessionists or disunionists in the State of Delaware. But, sir, we have a people, and, as I believe, a majority of our people are honestly in favor of a peaceful settlement of this question, and they do believe that if opportunity is allowed to the people of this country, that there is love of country enough, that there is patriotism enough, that there is intelligence enough in the people of this country, both North and South, to settle this question without the bloody scenes which have been portrayed here to-day by the Senator from Oregon (Mr. Baker) and others. Sir, if we are invited to enter upon such scenes, if there is to be a war of subjugation, if fire and sword are to sweep over this land, if there are to be hundreds and thousands and millions of fatherless children, and of widows, then I say that the sentiment of my State is against such a policy.

"Mr. President, I do not profess to know as much in reference to the state of the country as many other gentlemen; but I do say, that I as firmly believe, as I believe that the sun shines in heaven, that if this Congress would adopt those propositions, maintain the integrity of the Union as it now exists, and turn the Richmond Government, or the Montgomery Government, over to its own people, in less than four years that old glorious flag which has been so eloquently alluded to here to-day would float in peace over every acre of American soil."

The amendment was then rejected and the bill passed. *Ayes, 34; noes, 4.

On the 11th of July, the bill making additional appropriations for the support of the army was taken up, and an animated debate ensued, which brought out the views of the House on the conduct of the war.

Mr. Stevens, of Pennsylvania, regarded the increase of the army at this time as very necessary. It was not known how long the war might continue. The importance of having old disciplined troops as a nucleus for all new troops to rally around was so obvious that it hardly required any other argument. If this army be found too large after this rebellion is suppressed, it is very easy for Congress to repeal that law and reduce the army to a peace standard. This is the war standard of the army. This is the standard which in the present time, having a vast country to subdue, it is necessary to have. "When peace is upon us, I shall, if I happen to be here, go as far as any others to reduce the expenses by reducing the army to the peace standard. But I do not think fifty thousand men too large a standing army as a war standard. Hence I hope this bill will pass as it has been reported."

Mr. McClernand, of Illinois, said: "All who are in favor of a vigorous and successful prosecution of this war until rebellion and treason shall be crushed out; all who are in favor of this—and I am one of them; all such persons—

and they are overwhelmingly in the majority—are in favor of an increase of the military force, in such form and proportions as will insure this most important and desirable result.

"But, sir, what of this clamor about the increase of the regular army, and a standing army? Has it been too large? Will the proposed addition make it too large? I assert, sir, that it has been too small for ten or fifteen years—ever since the close of the Mexican war; and I think that must be the judgment of all intelligent men who have carefully reflected upon the subject. Had our standing army, after the close of that war, been raised to the standard required by the new order of things, many Indian forays might have been averted, and much human blood saved from being shed upon the borders of Texas, and our dependent Territories, by the savage tomahawk and butcher knife.

"Again, sir, what was the state of the case at the time this unholy rebellion broke out? The regular army had been dispersed all over the country in small bodies. If the purpose had been to place them out of the way, so as to enable premeditated rebellion to make head against the Government, it could not have been more effectually accomplished. And even had they been concentrated, so limited as their numbers were, could they have arrested the progress and development of a conspiracy which included the rulers of several States?

"Circumstances have changed. We are no longer an infant and small nation. We have come to be a great empire—a Republic of thirty-four States, and some thirty or more million people; and an Army of fourteen or fifteen thousand men is not a sufficient military police to preserve order everywhere within our extended dominions, and to restrain Indian hostilities along our extended and exposed borders. It appears to me that every gentleman must see this."

Mr. Burnett, of Kentucky replied, that he had thought, not like the honorable gentleman from Illinois, that this was not a great empire, but a confederacy of sovereign and co-equal States. He had thought that this was a government resting for its support upon the affections and the consent of the governed; that it did not require a standing army to keep the people in order; that it did not require even fourteen or fifteen thousand men as a police to keep the people of this country in order.

Mr. McClernand desired to ask the member from Kentucky one question: "Will he vote for a volunteer force to put down this rebellion?"

Mr. Burnett in reply said: "Not for one man. I am not willing to vote for them for I do not believe you can hold this Government together at the point of the bayonet, or at the cannon's mouth, any more than you can hold the lightnings of heaven, or gather the winds in the hollow of your hands.

"No, sir; I say to the gentleman now, and I say it in the fulness of my heart, that five hundred thousand men and \$500,000,000, if raised

by this House for the subjugation of a portion of this country, will not accomplish that purpose. They may desolate the country; they may lay waste cities and towns; but when they meet here again on the first Monday in December next, they will find their \$500,000,000 gone; they will find their five hundred thousand soldiers still in the field; but no nearer a peace than now.

"This much, sir, I desire to say, and these are the reasons why I will not vote for men or money. I have, from the commencement, been for a peaceful solution of this struggle, and I am for it now. I have been published to the country as a secessionist; but, sir, in the last speech which I had the honor to make upon this floor, I announced my opinion that there was no warrant in the Constitution for the doctrine of secession.

"Sir, I do not believe in it, as a constitutional doctrine; I believe it is the theory of our Government that it rests for its support upon the affections and the consent of the governed. I do regard, as one of the citizens of this country, and one of the representatives of the people, that the resort to armies and navies and the horrors of war will sound the death-knell of the Republic; and for that reason I enter my solemn protest against this whole measure."

Mr. McClernand, in answer, continued: "It is important that I should notice what has fallen from the gentleman from Kentucky. He very candidly informs the House, and, through the House, the country, that not one dollar will he vote to put down, either by regular or volunteer force, this rebellion against the country. Sir, when he took his seat upon this floor, he took upon himself a solemn obligation, sanctioned by an oath in the sight of the country and before God, that he would support the Constitution. Can he do so by folding his arms while the batteries of rebellion are levelled at the capital? Is that the way he proposes to discharge his obligation? I leave it for all impartial men to decide whether it is the proper way.

"The gentleman assumes—he must assume as the basis of his assertion—that all of the seceded States are disloyal. I respectfully deny the correctness of the assumption. On the contrary, I assert, and with entire confidence, that just as the Federal flag advances towards the heart of this rebellion, thousands and tens of thousands of loyal men in the seceded States will be found rallying around it, ready to uphold it. I also deny, sir, that this is a war of conquest. Far from it. It is a war to put down rebels and rebellion, and to guarantee security of person and property to the Union men of those States; it is a war waged in behalf of the Constitution and laws. This is its purpose and mission; and it will fulfil it, with the blessing of God. Nor is there one of those States in which there are not ample numbers of Union men to maintain a State government after the rebellion shall have been put down."

Mr. Hickman, of Pennsylvania, followed:—"If it be asserted with any degree of authority by the gentleman from Kentucky, that five hundred thousand men will not be able to subdue the rebellion in the southern disloyal States, then I am for employing twice five hundred thousand men, and the eighteen States of the North are in favor of doing the same thing. We intend that the Constitution and the Union shall be maintained; and we intend that rebellion, come in what shape it may, and backed by what numbers it may be, shall not be enabled to destroy either the one or the other. I trust in God that the gentleman from Kentucky does not speak even the sentiment of his own section, much less the sentiment of his State; but, whether he does or does not, permit me to say to him here, very frankly, that it matters not to those who are engaged in this work of preservation whether he does or not; for, no matter what their opinion may be, this Government will be preserved, and the gallows will eventually perform its office."

Mr. Burnett, in answer, said: "I tell gentlemen now, carry out the picture painted in full; carry on this war; drench this country in blood; have your armed five hundred thousand men in the field; desolate the fair fields of both sections of the country; let the streams run with blood; let all that the gentleman from Pennsylvania can desire be accomplished; and then tell me, will you, what your country is worth when the *finale* comes? Tell me, will you, what will your Government be worth when you have accomplished all that you ask shall be done? Sir, when the pen of the historian shall come to write the history of the times in which we live, I tell gentlemen upon this floor now, there will be a fearful accountability for some of us to render. Sir, when the gentleman tells me that this war must be prosecuted, I say, go on; you have the power; I prefer peace to war, but I am powerless here. Let me remind him that when my venerable colleague (Mr. Crittenden) and other southern men in this House, and at the other end of the Capitol, were begging you, at the last session of Congress, on bended knees, and with tears in our eyes, to give us something to restore peace and fraternity to our common country, and to stay this revolution, all those appeals and entreaties were not only resisted, but treated with silent contempt and indignant scorn; and all propositions looking to that end were voted down; and now, by the act of the President of the United States, without authority of law, and in violation of the Constitution, war has been inaugurated; and here, as one of the people's representatives, I boldly enter my solemn protest against it."

Mr. Lovejoy, of Illinois, said it was not a question whether this war, or this suppression of rebellion, shall be carried on till the Stars and Stripes float in every place where they have a right to float.

"The question is, who is to do it? The ques-

tion is, shall it be done by the increase of the regular army, or whether you will take these patriotic volunteers, who have flocked here in thousands and thousands, and let the citizen soldier accomplish this, his appropriate work? That is the question, and I will not allow the issue to be changed. Take your men, in God's name. You can have half a million or a million of them; you can have four or five hundred million dollars. The people are pressing the bit like a restive horse to put down this rebellion. I am willing to carry on this war until, if it is necessary, some future historian shall write of us as Tacitus wrote of the Romans: *Solitudinem faciunt et pacem appellant*. Aye, sir, if there is no other way to quell this rebellion, we will make a solitude, and call it peace. And I tell the gentleman from Kentucky that he need not make any appeals to us about peace; he need not talk to us about the shedding of blood and the burning of houses, and villages, and cities. 'There is no peace to the wicked, saith my God;' there is no peace to these rebels and traitors, who have raised their hands against the Government. We will carry on this war; the people will carry it on; the citizen soldier will fight this battle. He is impatient to do it now; but we do not want—certainly not now—to increase the regular army."

Mr. Pendleton, of Ohio, desired to vote for all measures asked for to enable the Government to maintain its honor and dignity, which might be sanctioned by the Constitution, and by any reasonable view of the necessity of the case. He would heartily, zealously, gladly support any honest effort to maintain the Union, and reinvigorate the ties which bind these States together. But he was not willing to vote for more men or more money than the Administration asks; more than it can fairly use; more than General Scott, who advised and controlled the Administration, tells us he thinks necessary.

Mr. Blair, of Missouri, was of the opinion that if more men should be needed after Congress had adjourned, it was proper to put it in the power of the President to call for them.

Mr. Diven, of New York, would give the President a million if half a million of men were not sufficient to put down this rebellion.

Mr. Hickman again alluded to the question of subjugation of the South, and said: "I entertain the opinion now, and I have long entertained it, that one hundred thousand men will be entirely sufficient to accomplish the restoration of the Constitution in the seceded States; but the smaller the number of men employed, the greater will be the length of time necessary to accomplish the object in view. I do not see, myself, that increasing the number of men will necessarily increase the hazard of subjugating the South. I do not myself know whether it is contemplated to subjugate the South. I do know, however, that it is fully contemplated to force the South into submission. There can be no loyalty without submission; and these men

are to be taught by a strong hand that they are to pay the same regard to the Constitution and laws as commoner people are forced to render to them. These men believe that they have a right to declare themselves out of the pale of legitimate Government whenever it shall suit their interests to do so, or whenever it shall be in accordance with the lead of their passions to do so. We, the people of the North, of the loyal States, and all who act with the North, intend to educate these men in a different doctrine; and if we shall eventually be forced to bring them into subjection—abject subjection to the Constitution of the United States—it will be their fault, and not ours.

"Now, sir, an army will be needed upon the southern coast. Every foot of the southern coast will have to be threatened; and perhaps every foot of the southern coast will eventually have to be invaded. An army will have to be started upon the nearest southern frontier here, and it will have to be marched until it shall meet the army threatening the coast; and perhaps it will be necessary—it is well for gentlemen from the southern States to consider whether it may not be necessary—to leave the track of the chariot wheels of war so deep on the southern soil that a century may not obliterate it. I am not willing to stint the Government either in men or money. I am determined, so far as my influence, and my voice, and my vote, will go, to make this war an effectual one—a terror to evil-doers for all time to come; so that, when the Constitution and Union shall be reestablished, they shall have a permanence which shall satisfy all true lovers of liberty."

Mr. Burnett, of Kentucky, said that the member from Pennsylvania did not conceal his purpose; he tells the country that it is the purpose of the eighteen northern States to reduce the southern States to abject submission.

Mr. Hickman replied: "I believe my remark was—at least I intended that it should be—this: that our intentions are to bring the disloyal to submission or acquiescence. I understand that to mean submission to the binding obligation of the laws. That is what I mean. Whether it shall be necessary to go further than that, is for the gentlemen who occupy the position of rebellion to determine."

Mr. Vallandigham, of Ohio, offered the following proviso:

Provided, further, That before the President shall have the right to call out any more volunteers than are already in the service, he shall appoint seven commissioners, whose mission shall be to accompany the army on its march, to receive and consider such propositions, if any, as may at any time be submitted from the Executive of the so-called Confederate States, or of any one of them, looking to a suspension of hostilities and the return of said States, or any one of them, to the Union, and to obedience to the Federal Constitution and authority.

On a division, there were only twenty-one votes in its favor:

In the Senate, on the 26th of July, Mr. Johnson, of Tennessee, offered the following resolution:—

Resolved, That the present deplorable civil war has been forced upon the country by the disunionists of the Southern States now in revolt against the constitutional Government and in arms around the capital; that in this national emergency Congress, banishing all feeling of mere passion or resentment, will recollect only its duty to the whole country; that this war is not prosecuted upon our part in any spirit of oppression, nor for any purpose of conquest or subjugation, nor for the purpose of overthrowing or interfering with the rights or established institutions of those States, but to defend and maintain the supremacy of the Constitution and all laws made in pursuance thereof, and to preserve the Union, with all the dignity, equality, and rights of the several States unimpaired; that as soon as these objects are accomplished the war ought to cease.

Mr. Polk, of Missouri, proposed to amend it so as to read:

That the present deplorable civil war has been forced upon the country by the disunionists of the Southern and the Northern States; that in this national emergency, &c., &c.

This was voted down by ayes, 4; noes, 33.

Mr. Trumbull, of Illinois, thus expressed his views of the object of the war: "I trust this war is prosecuted for the purpose of subjugating all rebels and traitors who are in arms against the Government. What do you mean by 'subjugation?' I know that persons in the southern States have sought to make this a controversy between States and the Federal Government, and have talked about coercing States and subjugating States; but, sir, it has never been proposed, so far as I know, on the part of the Union people of the United States, to subjugate States or coerce States. It is proposed, however, to subjugate citizens who are standing out in defiance of the laws of the Union, and to coerce them into obedience to the laws of the Union. I dislike that word in this connection. In its broadest sense I am opposed to it. If it means the war is not for the purpose of the subjugation of traitors and rebels into obedience to the laws, then I am opposed to it. I trust the war is prosecuted for that very purpose."

Mr. Johnson, of Tennessee, explained the resolution in these words: "The resolution simply states that we are not waging a war for the subjugation of States. If the Constitution is maintained and the laws carried out, the States take their places and all rebel citizens must submit. That is the whole of it."

Mr. Collamer, of Vermont, declared that he was for subjugation, in the sense in which that word was ordinarily received. He did not mean its classic meaning. He knew its literal, classic meaning was to pass under the yoke, *sub juga*. He proposed to pass nobody under the yoke; but in the ordinary and popular acceptance of that term he used it, that is, that all the people of the United States shall submit to the laws and Constitution of the United States everywhere.

Mr. Fessenden, of Maine, said: "I do not

want to carry on this war for the purpose of subjugating the people of any State, in any shape or form; and it is a false idea gotten up by bad men for bad purposes that it ever has been the purpose of any portion of the people of this country. I am willing, therefore, to meet them face to face, and say I never had that purpose, and have it not now. But we say, notwithstanding we have not that purpose, and distinctly avow it, we have a purpose, and that is to defend the Constitution and the laws of the country, and to put down this revolt at whatever hazard; and it is for them to say whether it is necessary for us in the course of accomplishing a legitimate and proper object to subjugate them in order to do it. I hope not; and if it is necessary and we could do it, I should want to keep them subjugated no longer than was necessary to secure that purpose. That far it must go, and no further. To that it must go at all events and hazards. As to the word, sir, I would as soon take that as any other. It expresses the idea clearly, and I am satisfied with it."

Mr. Doolittle, of Wisconsin, regarded the resolution as an act not altogether legislative in its character, but as a declaration of the purpose of the Government. It was a deed in that sense, which is to have its effect upon the American people, and he desired that it should be passed in the language in which it had been presented.

Mr. Willey, of Western Virginia, stated the views of the people of the Old Dominion on the war. He said: "There is a fear among many, there is a prejudice wide extended in the public sentiment of Virginia, that the design of this war is subjugation; that the design of this war is to reduce the Old Dominion into a province; that the design of this war, literally, in the language of the honorable Senator from Vermont, is to pass our people under the yoke.

"Sir, I do not understand such to be the purpose of this war. The Legislature of the State which I represent does not understand such to be the purpose of this war. My constituency are for the preservation of the Union, the vindication of the Constitution, and the execution of the laws. We believe that in the success of this war, in carrying out these legitimate purposes, is involved the great question of constitutional liberty itself now and forever among our people, and among all people; and I here, from the Old Dominion, as an humble member on this floor, am instructed by my Legislature, and am prepared to vote for every necessary measure, and for every necessary man, without stint, let, or hinderance, to carry on the war until all resistance to lawful authority is put down; until the Constitution is vindicated, and restored to all its legitimate supremacy; and until the Union is reestablished on a basis never to be overthrown.

"But, sir, candor constrains me to say, that if any different purpose shall be avowed, if it shall ever be intimated or declared that this is

to be a war upon the domestic institutions of the South, and upon the rights of private property, every loyal arm on the soil of the Old Dominion will be instantly paralyzed. Sir, pass this resolution in the language in which it is printed, and you give muscle and vigor to every loyal arm in the Old Dominion, and you will multiply the friends of the Union by thousands whenever our people are disimbuied of the prejudices that exist in their minds."

Mr. Hale, of New Hampshire, stated that he had repeatedly, as long as he had been in Congress, and before that, avowed his sentiment to be that the Government had no more right, no more legal or constitutional authority to interfere with slavery in the States than they had to interfere with the condition of the serfs in Russia, or with the rights and wrongs of the laboring classes in England. "I said that when I acted—I was going to say with the party out of power; but when I acted out of power, without a party—when I acted as the soldier did, fighting on his own hook. That has always been my sentiment. I have always proclaimed it, whenever I had occasion to speak upon it; and, acting with the party that is in power to-day, I am willing to stand by the profession that I made when I was out of power. I believe that the General Government have no power upon this subject at all, and that they cannot have under the Constitution."

Mr. Kennedy, of Maryland, thus expressed his views: "I indicated by my vote a few minutes ago that my opinion is that this deplorable civil war has been forced on the country by the disunionists of the Southern and Northern States. I wanted to go no further, but merely to express that idea. I am not prepared to admit that it was brought on exclusively by the Southern States, because it will be very well recollected by gentlemen here that there were propositions of peace offered at the last session of Congress, in the very closing days of that session, which, if they had been accepted at that time by the majority party in the Senate, would have avoided the war which is upon us to-day.

"It was the refusal in part of the majority party to accept of measures of conciliation and peace before Congress adjourned last spring. It is also perfectly true that if the members of the Southern States who vacated these seats long before Congress adjourned, had remained here, there would not have been war. I believe that if the majority party had pursued a different course before Congress adjourned than the one that they elected in rejecting every overture and every proposition for peace, we should have been to-day without the sad calamity that has befallen us."

Mr. Breckinridge, of Kentucky, could not vote for the resolution, because he did not agree with the statement of facts contained in it. He said: "I do not intend to go into the antecedents of this unhappy difficulty. My own opinion is, that there have been errors upon

both sides; my own opinion is, that these sectional Federal difficulties might have been settled last winter; my opinion is, that the present condition of affairs is due, principally, to the absolute refusal of the majority in this Chamber to agree to any proposition of adjustment, as I have taken occasion to state, and tried to show heretofore; and I think to that persistent and obstinate refusal, more than to any other cause, is due the present condition of public affairs.

"I think, sir, that this war is prosecuted, according to the purposes of a majority of those who are managing the legislation that leads to its prosecution, for objects of subjugation. I believe that, unless those States which have seceded from the Federal Union, lay down their arms and surrender at discretion, the majority in Congress will hear to no terms of settlement, and that those who may attempt to mediate will speak to the winds. I believe, therefore, that the war, in the sense and spirit entertained by these gentlemen, is a war of subjugation. The eminent Senator from Ohio, (Mr. Sherman,) not less conservative than a majority of the organization with which he is connected, went so far, in the warmth of his feelings, the other day, as to declare that, unless the people of certain States in the South yielded willing obedience, he would depopulate them and people them over again. That I call not only a war of subjugation, but a war of extermination.

"On the day before yesterday, I think, sir, an amendment offered by the Senator from Illinois (Mr. Trumbull) to one of the general bills before the Senate, received the vote of an overwhelming majority of this body, which declares that any person held to service or labor, who should be employed to aid the rebellion in any form, should be discharged from service and labor. These were the general vague terms of that proposition. I think I have the very words.

"I consider that amendment passed by a vote of the Senate, so far as the vote of this Senate can go, a general act of emancipation. I should like to know if those held to service or labor, who are employed as agricultural laborers in the South in raising cotton, in raising corn and other products which are used by the mass of the population, cannot readily be considered by a rampant and fanatic spirit as being employed in aiding the rebellion. Certainly as readily as every means of subsistence can be cut off from that whole country by the act of the Executive, approved by the legislative department of the Government."

Mr. Sherman, of Ohio, followed, saying:—"The Senator from Kentucky and the disunionists of the Southern States have no right to come to me and say, 'you have involved your country in civil war because you would not do as we wanted you to do.' Because we would not change the Constitution, because we would not ingraft new provisions in it that were un-

known to it; especially because we will not disregard the popular voice at the last election, we are charged with involving our country in civil war. It is idle to answer this kind of argument.

"Mr. President, the disunionists of the Southern States are traitors to their country; they must, and I repeat they will, be subdued. This war is prosecuted for the purpose of subduing those men, and compelling them to obey the laws, just as you, sir, and I, are bound to do; to make them just as loyal subjects as you and I now are. Because this purpose is announced and declared by the resolution introduced by the honorable Senator from Tennessee, we are to have clamor about subjugation. I am a subject; you are a subject; there is not a Senator within the sound of my voice who is not a subject. The Lieutenant-General is a subject, the President of the United States is a subject, just precisely in the same sense that we intend to make all these people in the Southern States subjects to the Constitution. All this clap-trap about subjugation, it seems to me, ought to be dismissed from the Senate. These men must be subjugated to obedience to the Constitution; and when that is accomplished, then this resolution declares our purpose to be to give them all the rights conferred upon them by the Constitution, and that the very moment the object is accomplished the war shall cease.

"In regard to the proposition offered by the Senator from Illinois, (Mr. Trumbull,) I have but this to say: if a slave is used by his master in the actual prosecution of this war, that slave ought to be freed; the master ought to forfeit all right to him. Does the Senator deny this? If a slave is used by his master to accomplish the work of treason—I mean actively, according to the language of that bill—ought that master still to own the labor of that slave? Certainly not; and yet it seems to me, in declaring this principle, we do not interfere at all in the slightest degree with the relations of master and slave, except where the master uses that slave as an instrument to erect barricades—to accomplish treason. As a matter of course, then, he ought to lose his right to the slave—all claim, ownership, or control over him. There is no objection to this doctrine."

The debate was continued by Mr. Breckinridge, to whom Mr. Doolittle, of Wisconsin, replied: "The Senator charges upon the majority, or those representing the majority upon this floor, the responsibility of involving the country in civil war. He charges that last winter, if the majority had yielded to the demands of the minority, the country would now be at peace. Sir, what were those demands made by the minority? Not to support the Constitution; not to stand by the Constitution as it is; but to make a new Constitution, and a new Constitution by the provisions of which the institution of slavery should be carried into all the territories we now have south of 36° 30', and all the territories we can ever acquire,

even to Cape Horn. Sir, not only did they make the demand of a new Constitution, but they demanded it with arms in their hands. Do you suppose, when a demand like this was made, with arms in the hands of a minority, threatening to overturn the Government, that such a demand would be acquiesced in by the representatives of a majority of the American people?

"Does that honorable Senator, when defeated in the election, suppose that the majority, under the Constitution, would yield to the minority, who were already in arms to prevent the inauguration of their candidate? That because the majority refused to submit to this humiliating demand of a minority, as a condition precedent, the majority are responsible for this war? Behold those gentle advocates of peace seizing our forts, firing upon our flag, at the mouths of their cannon demanding a new Constitution, or that the old one should be overthrown! Worse than all, Mr. President, when the question was put to the representatives of this minority in the peace congress, 'If we yield to your demand, if we now agree that the Constitution shall be changed so that the institution of slavery, by virtue of the Constitution, shall be carried into all the territories we now have south of 36° 30', and all we may ever acquire in Mexico, Central and Southern America, will you then give up your doctrine of secession and stand by the Union?' the answer was, 'Not at all.' Sir, we could have no Union worth having on any terms whatever."

On a division, the resolution was adopted. Ayes, 30; noes, 5.

On the 15th of July, Mr. Wood, of New York, offered the following resolution:

Resolved, That this Congress recommend the Governors of the several States to convene their Legislatures for the purpose of calling an election to select two delegates from each congressional district, to meet in general convention at Louisville, in Kentucky, on the first Monday in September next; the purpose of the said convention to be to devise measures for the restoration of peace to our country.

This was laid on the table. Ayes, 92; noes, 51.

On the same day, Mr. Allen, of Ohio, offered the following resolutions:

Resolved, That whenever the States now in rebellion against the General Government shall cease their rebellion and become loyal to the Union, it is the duty of the Government to suspend the further prosecution of the present war.

Resolved, That it is no part of the object of the present war against the rebellious States to interfere with the institution of slavery therein.

These were ruled out of order, as in conflict with the resolution prescribing the business of the extra session.

On the same day, Mr. McClelland offered the following preamble and resolution:

Whereas, a portion of the people of the United States, in violation of their constitutional obligations, have taken up arms against the national Government, and are now striving, by aggressive and iniquitous war, to

overthrow it, and break up the Union of these States: Therefore,

Resolved, That this House hereby pledges itself to vote for any amount of money and any number of men which may be necessary to insure a speedy and effectual suppression of such rebellion, and the permanent restoration of the Federal authority everywhere within the limits and jurisdiction of the United States.

This was adopted. Ayes, 121; noes, 5.

On the 22d of July, Mr. Crittenden, of Kentucky, offered in the House the following resolution:

Resolved by the House of Representatives of the Congress of the United States, That the present deplorable civil war has been forced upon the country by the disunionists of the Southern States, now in arms against the constitutional Government, and in arms around the capital; that in this national emergency, Congress, banishing all feelings of mere passion or resentment, will recollect only its duty to the whole country; that this war is not waged on their part in any spirit of oppression, or for any purpose of conquest or subjugation, or purpose of overthrowing or interfering with the rights or established institutions of those States, but to defend and maintain the supremacy of the Constitution, and to preserve the Union with all the dignity, equality, and rights of the several States unimpaired; and that as soon as these objects are accomplished the war ought to cease.

The resolution was decided to be divisible, and the first part of it, to wit:

Resolved by the House of Representatives of the Congress of the United States, That the present deplorable civil war has been forced upon the country by the disunionists of the Southern States now in revolt against the constitutional Government, and in arms around the capital—

was adopted. Yeas, 121; nays, 2.

The remainder of the resolution was then adopted. Yeas, 117; nays, 2.

In the House, on the 24th of July, a bill was reported to appropriate \$100,000 in payment of the police force organized by the United States in the city of Baltimore.

Mr. Burnett, of Kentucky, in opposing the bill, said: "I tell you, gentlemen, that you may carry on these acts, for there is no one here with power enough to prevent them; but you will be held responsible for all that has been done here. You are writing, by indorsing and ratifying the illegal acts of this Administration, one of the saddest, blackest pages in the history of this country."

Mr. Richardson, of Illinois, in reply, took occasion to make some statements, which, although not applicable to the subject under debate, yet belong to the facts of history. He said: "I have desired, during this entire session of Congress, to say a word or two to my friend from Kentucky, [Mr. Burnett.*] More than any other man in this house he is responsible this day for the condition in which the country now finds itself. When he aided, by his counsel, advice, and coöperation, the division of the Democratic party at Charleston

* Mr. Burnett returned to Kentucky at the close of this session of Congress, and subsequently became, during the year, a member of the Confederate Congress from Kentucky, and took a seat in that body at Richmond.

and Baltimore, he brought the existing sad calamity upon the Union. Sir, I have no regard for your position. You have stood with the Republicans, and have aided them in elevating Mr. Lincoln to the Presidency, by dividing the Democratic party; and now, sir, you make that the pretext for breaking up this Government. I stand here and declare that fact in the face of the nation. It is true, sir. I understand it as well as any man in this house or in this country."

Mr. Burnett: "Will the gentleman permit me to ask him a question?"

Mr. Richardson: "Certainly, sir."

Mr. Burnett: "Then, when the gentleman states that at Charleston—and I do not mean to go into a discussion of the matter—I was engaged in plotting to break up the Democratic party, he states that of which he knows nothing, for, sir, I had no agency or hand in it; and, if he will permit me to say one more word, I will tell him that, when State delegations went out of the Charleston convention, I was the only man, I believe, from any of the slave States, who went into the hall and made a speech appealing to them to come back."

Mr. Richardson: "I am not mistaken, Mr. Speaker, in the position I assume. I found the gentleman there in association and coöperation with those who created distraction in that convention, and who did all that was done to destroy it. I stand here and say that; and for what I say I am responsible."

"Mr. Speaker, I have spoken of this conspiracy to break up the Democratic party and the country, and I have said that the gentleman from Kentucky was in it. I know the fact, and I will not permit him to shrink from it."

Mr. Burnett: "Let me tell the gentleman from Illinois, once for all—"

Mr. Richardson: "I know you were in it, and that is enough."

The Speaker: "Does the gentleman yield to the gentleman from Kentucky?"

Mr. Richardson: "I do not yield. I have one more word to say, and I want to say it to the other side of this House. This organization of the Breckinridge party was for the purpose of destroying the Government. That was its purpose and its object. What do we see? Without the aid and coöperation of the men of the North, that party was powerless. The men from the Northern States, who aided and encouraged this organization which is in rebellion, are at the head to-day of our army. Butler of Massachusetts, Dix of New York, and Patterson of Pennsylvania, and Cadwalader—all of them in this movement to break down and disorganize the Democratic party and the country. Why is it? This Douglas party furnished you one-half of your entire army. Where is your general—where is your man in command to-day who belongs to that party? Why is this? Have you Republicans sympathized with this Breckinridge party? Are you sympathizing with them, and lending your aid to the men

who lead our armies into misfortune and disgrace? I ask you to look."

"I stand here to-day for the purpose of saying one word more. I have spoken with some feeling. I have spoken with feeling because I feel, and feel deeply. You have at the head of your army a man who carried your flag through the war of 1812, and through the war with Mexico, with a strategy unequalled. You have sought to disgrace him, and you have sought to impair the public confidence in him. He fought this battle over here,* which was disastrous to our army, against his judgment. Who caused it? You have forced it upon him. I tell you that, unless you rally around him, this great fighting army at the North, which is Democratic, will not support you. I have no sympathy with General Scott's political opinions—not a particle. When he was a candidate for the Presidency, I fought against and resisted his election with all my power. I would vote against him for the Presidency to-morrow; but I tell you that, when you look over the list of all the military men of the earth, he is the greatest of them all. He fought the battle of Sunday last against his plan. The strategy of General Scott was the finest ever seen. If he had not been forced to precipitate our army, he would have won a victory without fighting a battle. Again I say, you have forced this battle upon General Scott, and it has been lost because you have forced it upon him; and I declare before God to-day, as my solemn conviction, that if this thing is to be permitted to continue, you destroy this Government forever. I stand here in my place and make the declaration that, if General Scott cannot conduct this war, we have nobody that can. If he cannot, by strategy, skill, and courage, save this Government, it is impossible to save it. On this matter I have said all I desire to say."

Mr. Blair, of Missouri, followed: "The gentleman alleges that General Scott was driven into this battle the other day by some of the persons upon this side of the House, as I understood him. Now, there has been nothing said of General Scott here so derogatory to him as that which the gentleman himself has uttered. Is he fit to command the army of the United States if he can be forced into a battle when he is not prepared for it, and against his own best judgment, by the outcries of outsiders, as the gentleman has characterized them? No one here has attempted to traduce or say aught against General Scott, except the gentleman himself, and he has levelled at him a charge which is derogatory to him in the very highest degree."

Mr. Richardson: "Well, I take it back if I have."

Mr. Blair: "If he takes it back, I have nothing further to say upon the matter."

Mr. Richardson: "I believe the gentleman from Missouri has taken issue with me upon the

* Bull Run.

fact that General Scott was forced to fight this battle. I will tell the gentleman what occurred yesterday morning in the presence of my friends McClernand, Logan, and Washburne, of Illinois, and also in the presence of the President of the United States and the Secretary of War. I will try and repeat what was said. General Scott said: 'Sir, I am the greatest coward in America.' I rose from my seat immediately. 'Stop, sir,' said he, 'I will prove it; I have fought this battle, sir, against my judgment; I think the President of the United States ought to remove me to-day for doing it. As God is my judge, after my superiors had determined to fight it, I did all in my power to make the army efficient. I deserve removal because I did not stand up, when my army was not in condition for fighting, and resist it to the last.' If the gentleman controverts what I say, I furnish the evidence, the proof. Here are the gentlemen present who heard this conversation. There is your Secretary of War and your President. He said that he ought to be removed because he had fought the battle against his judgment. I stand here to vindicate him.

"I am indebted to the gentleman from Missouri for the compliment which he has passed upon me. I desire to say for myself that I stand here the remains of three generations that have fallen in battle. The bones of my father and grandfather bleach upon the battle-fields where they fell beneath the flag of my country. I have stood beneath its folds at home and abroad in the storm of battle, and, with God's blessing, I will stand beneath it to the end, and defend it with my life against foreign or domestic foe."

Mr. Washburne: "As my colleague has referred to that conversation, I hope he will state to the House what the President said to General Scott."

Mr. Richardson: "I will state it. The President said: 'Your conversation seems to imply that I forced you to fight this battle.' General Scott then said: 'I have never served a President who has been kinder to me than you have been.' But, sir, he did not relieve the Cabinet from the imputation of having forced him to fight this battle. He paid a compliment to President Lincoln personally; and, Mr. Speaker, standing here in my place, I desire to say of Abraham Lincoln—and I have known him from boyhood's hour till now—if you let him alone, he is an honest man; but I am afraid he has not the will to stand up against the wily politicians who surround him and knead him to their purposes."

On a subsequent day this subject came up again in the House, when Mr. Richardson said in explanation, he did not intend to charge that General Scott, even by implication, declared that President Lincoln had contributed to force him into the battle of Bull Run.

Mr. Blair, of Missouri, replied: "I allude to this matter for a double purpose. I find that the gentleman is reported as stating that Gen-

eral Scott intended to pay a personal compliment to Mr. Lincoln; but that he did not exonerate the Cabinet.

"I say that all that has been said on that occasion goes to show that General Scott did intend to exonerate the President from the allegation that he had forced him into a fight. I undertake to say that such is the fact, and I want it to go upon the record."

Mr. Richardson: "Let us have no misunderstanding about this matter. My colleagues understood that I gave the language as near as I could. Whether I have been correctly reported or not, I do not know. If I did not then make the correct statement, let me do it now."

"I did not understand General Scott, nor did I mean so to be understood, as implying that the President had forced him to fight that battle."

Mr. Blair: "That is the very essence of this matter. But I go further, in reference to what occurred prior to that battle, and say that the President, after he had information that General Johnston had escaped through the hands of General Patterson, and had joined General Beauregard on Friday evening, went to General Scott and suggested the propriety of waiting until Patterson's corps could come up and reinforce the army that was then before Manassas; but so firmly fixed was General Scott's determination to attack the enemy then and there, that the President's suggestion was disregarded. The Secretary of War also returned from the field before the battle, and endeavored to induce General Scott to send forward reinforcements; he urged it again and again; and finally succeeded in having five regiments sent, two of which reached Centreville before the retreat commenced. I make these statements, and I make them for the purpose of preventing General Scott from being exhibited to the country, as has been attempted to be done by his friends, as assailing the President and his Administration. This conversation, as reported in the speech of the gentleman from Illinois—and that speech has other marks indicating a design to attack the Administration—holds out General Scott as assailing the President and the Cabinet."

"But I have another purpose far more important; and that is, that the President shall retain the confidence of the people of this country—of all who are in favor of preserving the Union; but as long as he is held out as interposing and forcing the Commanding General to fight a battle against his will, he cannot command that confidence. When the country knows the truth, as they will know, that the President did not take the responsibility to order a battle before our troops were prepared for it, he will retain, as he deserves, the confidence of the people of this country in the war."

The Senate bill "to confiscate property used for insurrectionary purposes" was reported back by the Judiciary Committee with an amendment in the nature of a substitute. It

provided that whenever hereafter, during the existence of the present insurrection against the Government of the United States, any person held to labor or service under the laws of any State shall be required or permitted, by the person to whom such labor or service is due, or his legal agent, to take up arms against the United States, or to work or be employed in or about any fort, navy-yard, armory, dock-yard, ship, or in any military or naval service, against the Government of the United States, or as the servant of any person engaged in active hostilities against the United States, then the person to whom such labor is due shall forfeit all claim to such service or labor, any law of any State, or of the United States, to the contrary notwithstanding; and, in case of a claim for such labor, such facts shall be a full and sufficient answer.

Mr. Wickliffe, of Kentucky, said: "I desire to ask the chairman of the Committee on the Judiciary whether it is the design of this bill to confiscate the property of citizens in persons described there where they may be found at labor of any description which can be connected with war, except the carrying of arms? Suppose my negroes—I being a national man and a Union man—are taken without my leave and against my consent, to drive teams and carry provender to the rebel army: are my negroes to be confiscated?"

Mr. Bingham, of Ohio, answered: "I will state in reply to the inquiry of the gentleman from Kentucky, that this bill is drafted—the original bill as well as the substitute—in such a manner as expressly to preclude such a construction; because both the original bill and the substitute limit the penalties prescribed to such persons as are engaged in this rebellion by their own act."

Mr. Burnett, of Kentucky, said: "Now, let me ask the gentleman from Ohio whether the Senate bill does not apply to all slaves who may be owned by persons now in this rebellion, and to their services in any wise used in aiding this rebellion, without limitation?"

Mr. Bingham: "I state, unhesitatingly, that the Senate bill does no such thing, for it has limitation—that such services must be by the direct act of the owner himself; by the direct act of the owner, or by the act of his agent or employee."

The substitute was rejected by the House, and the question recurred on the Senate bill. To this Mr. Bingham offered an amendment, "limiting the operation of the bill to the present insurrection."

The fourth section of the Senate bill was then read as called for. It was as follows:

Whenever any person claiming to be entitled to the service or labor of any other person, under the laws of any State, shall employ such person in aiding or promoting any insurrection, or in resisting the laws of the United States, or shall permit him to be so employed, he shall forfeit all right to such service or labor, and the person whose labor or service is thus claimed shall be thenceforth discharged therefrom, any law to the contrary notwithstanding.

Mr. Burnett: "The use of a slave, by authority of the owner, in any mode which will tend to aid or promote this insurrection, will entitle that slave to his freedom."

Mr. Bingham: "Certainly it will."

Mr. Burnett: "Now we understand each other. I ask the gentleman whether this bill is not to be construed by the executive authorities of the Government?"

Mr. Bingham: "No, sir; I undertake to say that this provision is like many others now standing upon our statute-books subject to judicial decision. It is simply an act which may become the subject of adjudication in the courts as between the owner of a person so employed and the person so claimed."

Mr. Burnett: "That is what the gentleman says, but does it not mislead the House? On a certain state of facts to be assumed, and they are to a certain extent set out in the bill, then the contingency occurs upon which the slave is entitled to his freedom. Whenever that question is settled by judicial procedure hereafter, the slave sets up the fact that he was used in any way—"

Mr. Bingham: "By his master."

Mr. Burnett: "Or with his consent, or the consent of his agent, in any mode whatever, then that negro is entitled to his freedom."

Mr. Bingham: "Yes, sir."

Mr. Burnett: "Then, that amounts to a wholesale emancipation of the slaves in the seceding or rebellious States."

Mr. Bingham replied: "I undertake to say that no just court in America will ever construe this fourth section, if it becomes a law, to the effect that, because it happens that citizens of the United States residing in a seceding State hold slaves, this law amounts to an emancipation of their slaves. I deny that that was the intention of the law, or that it will bear any such construction by a court of justice. I assert, further, that the very words of the statute eschew any such construction. By the express words of the act it is limited in its effect to those persons who themselves, by their own direct acts, for the purpose of overturning the powers of the Government, employ, or consent that others shall employ, the services of their slaves to that end. Does the gentleman complain that the Congress of the United States shall provide by law that any person owning slaves within his own State of Kentucky, who shall feloniously employ them in insurrection within his own State against the combined authority of the United States and of the State of Kentucky, for the destruction of his own life, or the lives of his kindred and friends, shall be so tenderly cared for, that he shall not forfeit his control over his slaves? I aver that a traitor should not only forfeit his slave, but he should forfeit his life as well. A traitor justly forfeits both life and property."

Mr. Burnett followed: "The gentleman propounds to me the question whether I am willing that the slaves shall be used against the

authority of the United States? This is what I object to: that when you pass a law in reference to property, you should take one species of property and put it upon a different footing from another. This Congress has no power, and the power exists nowhere in this Government, to set at liberty the slaves now held in bondage in the slave States; and when Congress undertakes to confiscate slave property, that species of property should be put upon the very same basis as all other property confiscated by the General Government. Let me state a case to the gentleman, and ask him a question.

"I am a citizen of the State of Tennessee, which is now one of the rebellious States; I own slaves; I use those slaves upon my farm in the culture of tobacco, wheat, and the usual products of that State; they make corn and wheat and hay; and I take those things, the products of slave labor, and sell them to that rebel army. Now, the gentleman is a lawyer, and will he say that, by the provisions of this bill, my slaves are not entitled to their freedom?"

Mr. Bingham: "I think, when the gentleman sells his produce to the rebels, he ought to forfeit all he has."

Mr. Burnett: "Exactly; and that is this bill."

Mr. Crittenden: "Mr. Speaker, it has been conceded in all time, I believe, that the Federal Government, the Congress of the United States, has no power to legislate upon the subject of slavery within the States. It has been conceded that that was a subject for State legislation only. Does war change the powers of Congress in this respect? It is the absence of all power upon the subject which has prevented your legislation. Absence of all power of legislation in time of peace must be the absence of the same power at all times. The constitutional power of this House does not come and go with a change of circumstances. That is a fixed rule of Congress, permanent, immutable, and made to govern Congress. Now, sir, if you can legislate in regard to slavery in this instance, and if you can, upon certain conditions in time of war, destroy the right of the master to his slave, why cannot you, upon conditions, in time of peace do the same thing? You do it here because the slave is employed to aid the master in the commission of a great crime, that is, the uniting in a civil war. Could you not apply the principle to times of peace, and make the conditions then? If a master uses his slave to aid in the commission of a trespass, or it may be a murder, can you declare that to be sufficient cause for the liberation of the slave? Why can you not? Because you have no power by your Constitution to touch slavery at all."

Mr. Kellogg, of Illinois: "I wish to make this suggestion: while we concede that there is no power to interfere with the right to hold slaves in Kentucky, I suggest to him whether it is not competent to forfeit the claim that a man has to his slaves for treason in the master, in the same way that he would forfeit his claim

to his horse, and yet not at all in conflict with, or abrogate the law that authorizes the holding of slaves? I deny any disposition on my own part to interfere with the laws of the States in reference to holding slaves, but I insist upon our power to make a forfeiture of the right to service or labor of a person or the title to a horse, when the master of one, or the owner of the other, has become a traitor to his country, and uses that property or right for the destruction of the Government. I wish the gentleman to make a distinction between the right a master has, and the idea of abrogating the State law of Kentucky, for instance, allowing him to hold slaves; and that is the point to which I wish to call his attention."

Mr. Crittenden: "I answer the gentleman in the same general terms in which he argues his case. If you have no power, there the question ends. Well, have you a power to legislate concerning a slave in Kentucky, as to his rights present or future? Have you a right to impose any terms or conditions on the master, in time of peace, on which the slave shall be entitled to his liberty?"

Mr. Kellogg, of Illinois: "My idea on that point is simply this: that the citizen of Kentucky, like the citizen of any State, by an infraction of law—of the highest law of the country—is liable to penalties and forfeitures. It operates on the person to forfeit his right by his own crime, and does not at all attack or invalidate the right to hold slaves or abolish slavery in Kentucky. It operates as a forfeiture on the person for his crime in precisely the same way as it operates as a forfeiture on other kinds of property."

Mr. Crittenden: "I say, if you have no power directly, no matter what the advantages of the exercise of that power would be, no matter how just, no matter how necessary to the preservation of the Union, you cannot legislate about it for want of power. That is my point. You cannot make a general law that shall regulate slavery, that shall regulate the rights of the master or the rights of the servant, in a State of this Union, in time of peace. That will be admitted, I think. You cannot punish any crime in the State; that is for the State. It is a part of its interior police. It is the law, and you were willing to put it in the Constitution as a thing never denied. Now, I ask my friend if this bill is not getting around that, making use of a state of war, of a state of things that highly excites us all?"

Mr. Kellogg, of Illinois: "I repeat that we have no more power to legislate on the subject of slavery in time of war than we have in time of peace. If a citizen of the United States commits high treason, or any other great crime known to the law, it is competent for the United States Legislature, if the crime be within its cognizance, (and treason is,) to provide for the forfeiture and confiscation of the offender's property. And it is because he is a criminal before the law that I propose that his horses,

his houses, his lands, his mules, his cannon, yea, his right to service in another, shall be confiscated; not annulling the law by which he holds it: for that is a matter which neither in war nor in peace can we reach. But because of the crime, we may either in war or peace impose the penalty of the confiscation of the offender's right to hold property, or of the right to the service and labor of another. This bill is put on the ground of confiscation, on the ground of forfeiture."

Mr. Crittenden: "Mr. Speaker, it is the crime against which we are legislating that irritates and provokes us to extremity in our legislation on this subject. We have a power in all cases within our jurisdiction to try persons in our courts for the crime alleged against them; and all the consequences which the law annexes under the Constitution follow the judgment.

"Now, in reference to treason, which is the crime here. The Constitution defines what it is, and provides for its punishment. It declares that treason against the United States shall consist in levying war against them; and that no person shall be convicted of treason except on the testimony of two witnesses to the same overt act, or on his confession in open court. It declares that Congress shall have the power to declare the punishment of treason; but no attainder of treason shall work corruption of blood, or forfeiture, except during the life of the offender.

"Now, sir, the crime declared by this bill, and for which this forfeiture is to take place, is treason—treason by its very definition. It is so considered in this bill. It is so considered by my friend from Illinois. This law undertakes to deprive the owner of slaves of his entire property, and to give complete freedom to the slave. The Constitution says that even on conviction of treason, there shall be no forfeiture of property, of any description, beyond the lifetime of the offender.

"Now, I ask my friends everywhere if it is not a plain breach of the Constitution that a man shall forfeit his slaves? Whatsoever of property he employs, or permits to be employed in a certain way in aid of treasonable purposes, he shall forfeit it absolutely, says this bill; and especially shall he forfeit his slaves forever. That is the language of the bill. The language of the Constitution is, that no title of his property shall be forfeited for longer than his life. In this, however else we may differ, there is an apparent unconstitutionality in this bill.

"Gentlemen, for the sake of our country, I ask you not to enter upon such an experiment. Your laws already declare what is treason; they define what shall be the penalties of that crime. They are sufficient, and I hope there will be no further action, such as this bill contemplates.

"Let us act our part like men; let us look above these little means of penal laws which, give me leave to say, will furnish those in arms against the Government a pretext for misrepres-

senting the purposes and objects of this war. We have declared that this war is not for the subjugation of the South, not for the overthrow of slavery, nor for the overthrow of their social institutions, but simply for the noble purpose of restoring our country and preserving the Union. That is our object. Let the means with which we pursue that object be as noble and elevated as the object itself. Let us raise ourselves to that high level. But what will be the effect of these penal laws? Does any man suppose they will assist you in gaining a single battle? When we have before us the noble purpose of uniting our countrymen under a common Government, and of restoring the supremacy of the Constitution, is it necessary to rake in the dust for these small, petty means of annoyance, the effect of which will only be to render those now in arms against the Government more bitter against us?"

Mr. Diven, of New York, asked: "Is there any man who thinks that the passage of a law authorizing the confiscation of property can promote the success of our army? Why, then, do not other nations think so? When we were prosecuting our war against Mexico we respected the property of the enemy. When Garibaldi was prosecuting the war of independence in Italy, he respected the property of the Italians, without regard to what army they were giving their sympathies to. Have not the stern rigors of ancient law been relaxed in favor of justice? Why have we protested against indiscriminate piracy on the seas? Why has the custom been abandoned of giving up cities that had been besieged to the sack of the soldiery, as was once the universal usage of war? Did the sacking of cities promote the success of the besiegers? On the contrary, it stimulated the besieged to a more obstinate and determined resistance. If any man doubts it, let him read the wars of the Peninsula, where women, rather than undergo the rigors of such a code, fought and perished, till the streets reeked with their putrid bodies. No, sir. The attaching of such rigors and penalties to warfare only stimulates the resistance of the enemy. Let it be understood that all these Southern States, which may be regarded as in rebellion against the Government, are to have their property all confiscated if we are successful in the war, and do you not see that they will fight the battle to the bitter end? Do you not see that there is no hope for them, no home, no hearthstone; and that they may as well conclude to die on the field of battle as to surrender?"

Mr. Stevens, of Pennsylvania, replied: "Mr. Speaker, I thought the time had come when the laws of war were to govern our action; when constitutions, if they stood in the way of the laws of war in dealing with the enemy, had no right to intervene. Who pleads the Constitution against our proposed action? Who says the Constitution must come in, in bar of our action? It is the advocates of rebels, of rebels who have sought to overthrow the Constitution and trample it in the dust—who repudiate the

Constitution. Sir, these rebels, who have disregarded and set at defiance that instrument, are, by every rule of municipal and international law, estopped from pleading it against our action. Who, then, is it that comes to us and says, 'you cannot do this thing, because your Constitution does not permit it?' The Constitution! Our Constitution, which you repudiate and trample under foot, forbids it? Sir, it is an absurdity. There must be a party in court to plead it, and that party, to be entitled to plead it in court, must first acknowledge its supremacy, or he has no business to be in court at all. I repeat, then, that those who bring in this plea here, in bar of our action, are the advocates of rebels. They are nothing else, whatever they intend. I mean it, of course, in a legal sense. I mean they are acting in the capacity of counsellors-at-law for the rebels; they are speaking for them, and not for us, who are the plaintiffs in this transaction. I deny that they have any right to plead at all. I deny that they have any standing in court. I deny that they have any right to invoke this Constitution, which they deny has any authority over them, which they set at defiance and trample under foot. I deny that they can be permitted to come here and tell us we must be loyal to the Constitution."

The bill was re-committed to the Judiciary Committee, and on a subsequent day reported back with a recommendation to strike out the fourth section, and insert the following:

That whenever hereafter, during the present insurrection against the Government of the United States, any person claimed to be held to labor or service, under the laws of any State, shall be required or permitted by the person to whom such labor or service is claimed to be due, or by the lawful agent of such person, to take up arms against the United States, or shall be required or permitted by the person to whom such service or labor is claimed to be due, or his lawful agent, to work or to be employed in or upon any fort, navy-yard, dock, armory, ship, or intrenchment, or in any military or naval service whatever, against the Government and lawful authority of the United States, then, and in every such case, the person to whom such service is claimed to be due, shall forfeit his claim to such labor, any law of the State, or of the United States, to the contrary notwithstanding; and whenever thereafter the person claiming such labor or service shall seek to enforce his claim, it shall be a full and sufficient answer to such claim that the person whose service or labor is claimed had been employed in hostile service against the Government of the United States, contrary to the provisions of this act.

This was adopted, and the bill passed. Ayes, 60; noes, 48.

This extra session of Congress was closed August 6th. Called at the time when the President's proclamation was issued summoning an armed force to the aid of the Government, its business was primarily to provide ways and means for efficiently carrying on the military operations thus commenced. This object was met in a most liberal manner. Duties on certain imports were increased; a loan of two hundred and fifty millions was authorized; the issue

of fifty millions of Treasury notes, reissuable as often as they might return to the Treasury, was also granted; taxes collectable at a future day were also laid, with a guarantee that they would be collected if needed.

The repeal of the specie clause of the Sub-treasury act, this departure from the established policy of the Government in time of peace, made the paper currency of the country at once available for the uses of the Government, and relieved the banks from the restraint which had been held upon over-issues of their circulation. The army was increased to almost any extent the President might require. One bill alone authorized the enlistment of five hundred thousand volunteers. In short, every thing in the power of Congress was done to give strength to the arm of the Government. The spirit and opinions of the people expressed through their representatives in Congress, as shown in the preceding sketches, were of the most patriotic and harmonious character, creating sanguine anticipations of a bright, and prosperous, and united future to the whole country.

The position taken by the members from the Southern States, that their constituents regarded the election of Mr. Lincoln as a proof that the people of the North had become so abolitionized as to intend the destruction of their domestic institutions, remained to be proved. At the extra session, when the entire control of Congress was placed in the hands of the North, no decisive expression of Northern sentiment on this point was manifested.

CONNECTICUT. One of the Southern New England States, bounded north by Massachusetts, east by Rhode Island, south by Long Island Sound, and west by New York; area, 4,674 square miles; pop. in 1860, 460,147; watered by the Connecticut, Housatonic, Thames, and their tributaries, and numerous smaller rivers; the State is divided into 8 counties, viz., Hartford, Tolland, Windham, New London, Middlesex, New Haven, Fairfield, and Litchfield; and into 4 congressional districts, each comprising two counties, in the order above stated. Its Legislature meets annually, and consists of a Senate of 21 members, and a House of Representatives of about 260. This State held its annual election for State officers, and its biennial one for members of Congress, on the 1st of April, 1861. It resulted in the election of William A. Buckingham, the Republican candidate for Governor, by a majority of 2,086, and the entire Republican State ticket; a large Union and Republican majority in both branches of the State Legislature, and the election of Messrs. Dwight Loomis, and Alfred A. Burnham, Republican members of Congress in the 1st and 3d districts, and of Messrs. James E. English and Geo. C. Woodruff, Democratic members of Congress in the 2d and 4th districts.

On the 15th of April Governor Buckingham received the President's Message, calling for 75,000 soldiers and immediately issued a proc-

lamation calling upon the patriotic citizens of the State to volunteer their services in aid of the General Government. The proportion of the 75,000 men required from the State was one regiment of 780 men; and the banks of the State promptly proffered the money necessary for raising, equipping, and maintaining the troops.

The State Legislature met on the 1st of May, and Gov. Buckingham, in his Message, announced that 41 volunteer companies had already been accepted, and that a fifth regiment would be full in a few days. The regiments would not leave the State till they were fully equipped with camp and baggage trains, and prepared to take care of themselves on all occasions. He recommended also the organization of an efficient State militia. The Legislature promptly responded to the Governor's suggestions. On the 3d of May, an act to provide for the organization and equipment of a volunteer militia and for the public defence, passed both Houses.

This bill authorized and empowered the Governor to cause to be enlisted, enrolled, and mustered into the service of the State of Connecticut, for such time as he might deem expedient, volunteers, in his discretion as to numbers, not to exceed ten thousand men, to be officered, organized, armed, and equipped, in such manner as the Governor should order and direct, said force hereby authorized being in addition to the present military organization, and a part of the militia thereof. The officers and men to receive the same pay and rations while under the provisions of this act, until mustered into the service of the United States, as officers and men of the same rank and arm of service in the army of the United States. They were to be liable at all times to be turned over by the Governor to the service of the nation. They were to be paid by the State only for the time actually spent in organization, drilling, and instruction. All expenditures for arms, supplies, equipments, and transportation to be paid for by the Governor out of the State Treasury. Each volunteer was to receive ten dollars a month in addition to the regular pay of the United States, which is eleven dollars a month. Two millions of dollars were appropriated to pay the expenditures under the act.

The first regiment, of 834 men, commanded by Col. Alfred H. Terry, left the State on the 10th of May; the second regiment, of 800 men, commanded by Col. Daniel Tyler, on the 13th or 14th of the same month; the third, of over 800 men, under Col. J. Arnold, on the 22d; and the fourth, of over 1,000 men, commanded by Col. Levi Woodhouse, on the 10th of June.

While the great body of the people of the State were earnestly in favor of the war, there were a number who believed that the Union never could be restored by hostile measures, and who boldly avowed this opinion. These persons called what they termed "Peace Meetings," and attempted to raise "peace flags" in

various parts of the State. These proceedings roused the indignation of the citizens, who generally advocated a vigorous prosecution of the war, and led in several instances to serious collisions and acts of violence. Gov. Buckingham, on the 15th August, issued a call for four regiments of infantry to volunteer for three years or the war; and immediately on the publication of this summons, a "peace" meeting was called at Saybrook, Conn., on the 16th August, and an announcement was made that a peace flag would be raised. Those of opposite views rallied in much larger numbers than the "peace" party, and raised the Stars and Stripes, and the "peace" party attacked the Union party, but were beaten off, some of them being seriously wounded. Union speeches were then made and a guard placed on the ground to prevent the raising of a "peace" flag.

On the 26th August, a "peace" flag was raised at New Fairfield, Conn., and an attempt to pull it down led to a vigorous fight, in which two of the "peace" men were seriously, and it was thought fatally, wounded. A similar meeting was attempted the same day at Stepney, but the peace flag was torn down, the Stars and Stripes raised, and several Union speeches made. Among those present at Stepney was a considerable party of Union men from Bridgeport, and on their return, as they passed the office of the Bridgeport "Farmer," which had been the leading organ of the "peace" party, they were, or conceived that they were, hissed and insulted; whereupon the volunteers, who formed a considerable portion of the company, attacked and sacked the office of the "Farmer."

The recurrence of these disturbances in several parts of the State led Gov. Buckingham to issue the following proclamation:

A PROCLAMATION.

Eleven States of the Union are now armed and in open rebellion against Federal authority; they have paralyzed the business of the nation, have involved us in civil war, and are now exerting their combined energies to rob us of the blessings of a free government. The greatness of their crime has no parallel in the history of human governments. At this critical juncture, our liberties are still further imperilled by the utterance of seditious language; by a traitorous press, which excuses or justifies the rebellion; by secret organizations, which propose to resist the execution of the laws of this State by force; by the public exhibition of "peace flags," falsely so called; and by an effort to redress grievances regardless of the forms and officers of the law.

The very existence of our Government, the future prosperity of this entire nation, and the hopes of universal freedom demand that these outrages be suppressed.

The Constitution guarantees liberty of speech and of the press, but holds the person and the press responsible for the evils which result from this liberty. It guarantees the protection of property, but it regards no property as sacred which is used to subvert governmental authority. It guarantees the person from unreasonable seizure, but it protects no individual from arrest and punishment who gives aid and comfort to the enemies of our country. It provides by law for the punishment of offences, but allows no grievance to be redressed by violence.

I, therefore, call upon the citizens of this State to support and uphold the authority and dignity of the Government, and to abstain from every act which can tend to encourage and strengthen this conspiracy; and I call upon the officers of the law to be active, diligent, and fearless in arresting and in instituting legal proceedings for the punishment of those who disturb the public peace, of those who are guilty of sedition and treason, and of those who are embraced in combinations to obstruct the execution of the laws; so that peace may again be restored to our distracted country, and the liberties of the people be preserved.

Given under my hand and the seal of this State, at Hartford, this thirty-first day of August, A. D. 1861.

WM. A. BUCKINGHAM.

By His Excellency's command,

J. HAMMOND TRUMBULL,
Secretary of State.

On the 9th of October the Legislature met in extra session on the call of the Governor, to provide for more soldiers and do it liberally; to rectify some errors in the militia laws passed the previous session, and to decide whether the State would assume its share of the direct national tax or leave the Government to collect it. In his Message, Gov. Buckingham stated to the Legislature that the expense incurred to the 1st of October, on account of volunteers, had been \$943,939, which had been met by the money in the Treasury, and the sale of \$800,000 of the bonds authorized by the Legislature, which had commanded a premium, the State having no previous debt. He then proceeded to say:

"The calls made upon volunteers, for the national defence, have met with a hearty response, and but for a hesitancy on the part of the General Government to accept more troops, we might have had twelve or fifteen thousand men in the field to-day. We have, however, organized, equipped, sent into the field, and have now ready nine regiments of infantry. Their camp equipage was complete, and their appointments were highly respectable. About five thousand Sharp's and Enfield rifles have been purchased, and contracts made for an equal number of the latter arms, which have not yet been delivered. Arrangements have also been made to arm, uniform, and furnish complete equipments for two other regiments now rendezvousing, and for one not yet organized."

The Legislature held a session of one week, and before adjourning conferred on the Governor unlimited power to raise volunteers; authorized another loan of two million dollars, and the assuming of the collection of the national tax, by which 15 per cent. would be saved to the people of the State.

Before the 1st of January, the State had thirteen fully and well equipped regiments in the field; and before the 1st of March, 1862, the number had been increased to fifteen regiments, besides a large number of her citizens who had joined regiments in other States or arms of the service, not represented in the volunteer corps of the State.

CONWAY, WILLIAM. An aged seaman, who was a quartermaster in the navy, on duty in

the navy-yard at Warrington, Florida, when it was surrendered on the 12th of January. When ordered by Lieutenant Commanding Francis B. Renshaw to haul down the national flag, he promptly and indignantly refused to obey the order. A naval general court-martial held for the trial of the commandant of the yard submitted to the Secretary of the Navy, "the propriety, justice, and good policy of bestowing some appropriate mark of approbation of the loyalty, spirit, and good conduct of Conway." The Department ordered this testimonial of the court to be publicly read by the commanders of all naval stations, and all vessels in commission.

COTTON. The consumption of cotton in the year 1861 was greatly curtailed by the unfortunate events in the United States, which cut off the largest source of supply to the manufacturing world. Comparatively, the quantities consumed were as follows:

	1826.	1860.	1861.
Great Britain, bales.....	560,000	2,633,000	2,253,000
United States, "	93,110	972,053	843,740
France, "	231,100	625,501	575,200
Europe generally, "	129,600	970,200	991,000
Total bales.....	1,058,810	5,200,754	4,666,940

The increase of consumption as expressed in bales does not represent the whole increase, for the reason that the process of packing has gradually improved, and the bales, without occupying more room, contain more cotton. In 1850 the average weight of bales was 392 lbs.; in 1861, 425 lbs. *The weight of United States cotton in 1850 was 423 lbs., and in 1861 500 lbs. Hence the actual increase of consumption has been fivefold since 1826, and nearly the whole of the increase has been supplied from the United States. The actual production and consumption in the United States, with the average annual export price, down to the close of the fiscal year 1861, are given in the following table. (See p. 253.)

The consumption of cotton in the United States has increased very rapidly without diminishing the surplus spared for exportation. On the other hand, the quantity exported has annually and largely increased. The United States surplus has in fact long been the sole dependence for supplying cotton goods to Great Britain and Europe. This fact has been a source of anxiety to the English Government as well as to the spinners, who have foreseen the great calamity of a "cotton famine" which sooner or later would overtake them, and they have long sought other sources of supply. For more than fifty years India has been the scene of extensive enterprises, and the results may be expressed in the language of the report of the Bombay Chamber of Commerce, January, 1861: "The East India Company's experiments for the purpose of introducing American cotton are now brought to a close. They commenced in 1788, and have hitherto resulted, notwithstanding an expenditure of \$1,750,000, in signal failure." That India, as well as many

other places on the globe's surface, does produce cotton there is no doubt; but the cotton is nowhere equal to the American.

The cotton mostly manufactured is of several sorts: A fine long-stapled cotton called "Sea Island," grown only on the coast of Georgia. It has a small black seed, and is easily cleaned. The quantity is very small, not over 20,000,000 lbs. per annum being made. It is used mostly for muslin thread and the finest numbers of yarns—100 and upwards. It will command generally 50 cents per lb.; but as it is used in those descriptions of goods of which the greatest cost is the labor, the price is not so material.

A similar description of poorer quality is grown in Australia to a small extent. There is also a long, strong, fine yellowish cotton grown in Egypt. From Brazil comes a coarse, harsh, bright-colored cotton, but strong and long-stapled, and a very small quantity of similar cotton from the West Indies. These long-stapled cottons are required to spin into yarns higher than No. 50's, and make the "warp," that is, the longitudinal threads of cloth. The short cottons will not answer for these yarns.

The great American crop is a soft, white, silky medium staple, and is used for the lower or coarse numbers of warp and mostly for the weft. Every piece of cotton cloth requires two to five times as much weft as warp, and the whole manufacture requires nine pounds

of this American cotton for one of any other. Its price ranges from 6 to 12 cents. It is now 25 cents, as a war price.

The Indian or Surat cotton is a dry, fuzzy, harsh, and very short-stapled article. It is used exclusively for weft, mixed with American. If it is used alone the cloth has a rough, woolly feel, and after washing or bleaching has a thin, meagre look. It has, however, a good color, and is cheap. Its market price is generally two-thirds that of the United States cotton. If the United States article were sufficiently abundant, and as cheap, the Surat cotton would not be used at all. The greatest efforts have been made to naturalize the American cotton in India; but where it lives at all, it in three years degenerates into the Surat sort.

Thus the difficulty in supply is not so much quantity as quality, but the quantity is also a serious matter. The present United States growth has been developed under the most favorable circumstances of new land and labor in the space of sixty-six years, and in the last ten the consumption has so outrun production that the price has constantly risen without drawing from other sources much if any increase of supply.

The supply of cotton from sources other than the United States exceeded that of the latter by 44 per cent. up to 1820. From that time up to 1845 the United States supply gained rapidly. After that date the spread of manufacture in the United States trenching upon the quantities that otherwise could have been exported, while on the part of other producing countries the machine-made goods of England gradually supplanted the local hand manufactures. The result was a larger quantity of raw cotton to be sent to England, but also a larger demand for goods thence, until all the cotton-producing countries, except the United States, buy more cotton of England than they send thither. The proof is in the following table, showing from the official sources the weight of cotton imported, and the weight of cotton goods returned to each country in 1861:

Cotton Imported, Goods and Yarn Exp'd.		
	lbs.	lbs.
East Indies.....	377,616,500	273,286,110
Brazils.....	18,170,100	20,181,000
Egypt.....	85,890,601	16,351,000
West Indies.....	1,950,110	10,271,100
Total lbs.....	443,637,311	319,889,210

There were re-exported from England 166,000,000 lbs. of the products of other countries to mix with the American cotton used in Europe. Hence it will be observed that the American supply is alone that on which the trade depends. In those years in which the American crop falls short the price rises in Liverpool, and, as a consequence, more is drawn from the other countries, as in the year 1861.

The following table shows the quantities imported into Great Britain from each chief source since 1820, with the average price of leading descriptions in Liverpool for each year.

These have been the sources of supply, and it is to be observed that high as the prices have risen in the markets of the world under the effective demand of increased consumption among the growing numbers and improved condition of the people of most civilized countries, there has been no marked increase of production among the old sources of supply, nor have any new ones made their appearance, notwithstanding the long-continued efforts of the Cotton Supply Association. These efforts have been numerous and well directed through the agency of the British consuls and commercial agents in all parts of the world. Seeds and machines have been placed at the command of cultivators, and great numbers have entered into the culture without, as yet, much result. In the past year the efforts of the Association have been directed to the following places:

Turkey in Europe has begun the culture under great difficulties, arising from the nature of the government.

Greece has had seeds distributed throughout its departments.

Cyprus has 80,000 acres under cotton, with English capital.

Asia Minor. Under Sir Macdonald Stephenson seeds have been distributed in the valley of the Meander.

Egypt. There are efforts being made to in-

crease the production from 100,000 bales to 1,000,000, by English agency.

Tunis. The English influence with the Bey of Tunis has impressed him with the importance of rivaling Egypt in cotton.

Madeira. Cotton has been introduced with success.

Sierra Leone. An English trader has commenced the culture, and native merchants are purchasing cotton-gins in England.

Sherbo. The supply of native cotton is fair, and with a steady demand will increase, it is supposed.

Liberia. Great efforts are made to introduce cotton as the staple culture.

Gold Coast. The English governor is very active in promoting the cotton culture. Two societies have the matter in charge, and taxes are payable in cotton, which sells at one cent per lb. in the seed. When cleaned it brings fifteen in Liverpool. There are many millions of Africans who may be engaged in the cotton trade.

Lagos supplies the present African cotton, and the quantity is about 3,500 bales. The New York Civilization Society have made arrangements with the chiefs of the neighborhood for an allotment of five hundred acres land to be cultivated with cotton by a colony of free blacks from the United States. A similar company is organized in London.

River Niger. Great progress has been made in extending the culture.

Angola, under the Portuguese government, gives supplies for the Lisbon market.

Natal. The culture is extending by the introduction of seed, and making the tax payable in cotton. The advantages are represented as great.

Cape Colony. Cotton is supplanting the grain culture, which does not do well.

East Coast. Native cotton is said to do well.

Cuba. There is an Anglo-Spanish Cotton Company, capital \$4,000,000, having for its object the extension of the cotton culture.

Jamaica. The British Cotton Company is having good success, both in relation to quality and quantity.

Tobago, Barbadoes. In both islands cotton has been planted.

Peru. There are four cotton companies, and a large number of small farmers are operating upon a large scale with some success.

Venezuela, N. Granada, have both been supplied with seed, and the culture progresses.

British Guiana is also the scene of missionary efforts to promote the cotton culture.

Batavia. One proprietor has raised 272,000 lbs. from N. Orleans seed, and 1,000,000 lbs. from other seed.

Java. An estate has been devoted to the culture.

Feejee Islands. The native cotton is good, and grows with little care.

Australia. The capabilities are very great, and efforts are being made to devote many large tracts to the culture.

Ceylon. The Kandy Agricultural Society have applied for permission to the people to pay taxes in cotton, in order to encourage the growth.

Pegu, it is said, may prove a most extensive cotton-growing region.

These places will not all succeed in raising cotton, but many of them may. If they do, the most that can be expected from them is, that they will assist in meeting the increased demand. Thus in 1840, the United States exported, as compared with 1860, as follows:

	<i>lbs.</i>	<i>\$</i>	<i>cts.</i>
1840.....	743,941,061	\$63,870,807	8.5
1860.....	1,767,686,338	191,806,553	10.85

In the next twenty years the demand may be two thousand millions lbs. greater. The United States cannot supply it, and new sources must be opened to prevent a continued rise in price.

The seceding States of the Union entertained the opinion that in case of hostilities with the Federal Government, a blockade of their ports could not be maintained, because the demand for cotton in Great Britain and France would be so urgent and powerful as to compel those powers to interfere and break up the blockade. This was a chief reliance with them for success in such a contest. (*See CONGRESS, U. S.*) Two important considerations were, however, overlooked by them in the formation of this opin-

ion: Great Britain and France were so committed to the doctrine of the rights of neutrals, that any interference by them in an effective blockade would be condemned by all mankind, and the existence of hostilities in the United States would so diminish the market for cotton manufactures as to render a reduced supply of the raw material ample for a length of time.

CURRENCY. (*See BANKS.*)

CZARTORYSKI, PRINCE ADAM GEORGE, Duke of Klewan and Zukow, a Polish statesman, born at Warsaw, Jan. 14, 1770, died in Paris, July 15, 1861. He commenced his studies in the house of his father, Prince Adam Casimir Czartoryski, and continued them at the University of Edinburgh, and afterwards at London. In 1792 he fought in the ranks of the Polish army against the Russians. After the partition of Poland he was sent with his brother Constantine as a hostage to the court of Catharine II., where, being attached to the person of the Grand-Duke Alexander, (afterward Alexander I.,) he became his intimate friend. In 1797, the Czar, Paul I., sent him as ambassador to Turin. After the accession of Alexander to the throne, he returned to Russia, and the Czar made him Minister of Foreign Affairs. He signed in this capacity the treaty with England in April, 1805. He soon after resigned his portfolio to accompany the Czar in the Austrian campaign, and was present in most of the great battles between Austerlitz and the Treaty of Tilsit, and, unlike most of his countrymen, having no confidence in the disposition or ability of Napoleon to restore Poland to her ancient condition, he adhered faithfully to Alexander, whom he accompanied in 1814 to Paris and Vienna.

In 1815, being made senator palatine of the new kingdom of Poland, by Alexander, he manifested his sympathies for a constitutional monarchy, which, however, Alexander would not grant. As curator of the University of Wilna, he often had occasion to protect the students against the Russian police, and in 1821, finding himself powerless to prevent their persecution, he resigned, and retired to his estate of Pulawy, where he remained in retirement till the revolution of 1830, when he was called to preside over the provisional government. He convoked the diet of Dec. 18, 1830, which proclaimed the independence of Poland, Jan. 25, 1831, and was elected President of the National Government, to accept which he sacrificed his immense wealth. On the 15th of August, 1831, after the scenes of terror which transpired, he resigned the presidency, and served as a private soldier in the ranks of the army under Romarino. On the defeat of that general, and the capture of Warsaw, in Sept. 1831, he escaped to Paris. His ancestral estates in Russian Poland were all confiscated, and when, in 1846, he declared in favor of the revolutionary movement which drove the Austrians out of Cracow, those in Austria were also sequestered, but were restored in 1848. In March, 1848, in an eloquent

address, he called upon the representatives of Germany and France to aid in the restoration of Poland. In April of the same year, he abolished serfdom on his estates of Sieniawa, and gave the lands in fee simple to the serfs. During the Crimean war, he attempted to unite the

cause of Poland with that of Turkey in the councils of the Western powers, but without success. His hotel at Paris was always a place of refuge for his suffering countrymen, who regarded him as in some sort the constitutional King of Poland.

D

DELAWARE, the smallest State of the Federal Union, except Rhode Island, is bounded north by Pennsylvania, east by the Delaware River and Bay (which separate it from New Jersey) and the Atlantic Ocean, south and west by Maryland. It is about ninety-six miles in length, and thirty-seven in its greatest breadth; and includes an area of 2,120 square miles. The population of the State in 1860 was, whites, 90,697; free colored, 19,723; slaves, 1,798. The Governor is chosen for four years. The Senate consists of nine members, elected for four years, and the House of twenty-one members, elected for one year. The Governor in 1861 was William Burton, whose term expires in 1863. This State has been classed with the Southern or slaveholding States, in distinction from the Northern and free labor States.

On the 2d of January the Legislature assembled at Dover, the capital; and on the next day, the commissioner from Mississippi, Henry Dickinson, appeared before the House, and made an address. In the name of the State of Mississippi, he invited Delaware to join the Southern Confederacy which was about to be formed. He claimed the right of a State to secede from the Federal Union, and said, if it was not admitted, war would be inevitable. After his speech, the House resolved unanimously, and the Senate concurred by a majority, that, "having extended to the Hon. H. Dickinson, the commissioner of Mississippi, the courtesy due him, as the representative of a sovereign State of the Confederacy, as well as to the State he represents, we deem it proper and due to ourselves and the people of Delaware to express our unqualified disapproval of the remedy for existing difficulties suggested by the resolutions of the Legislature of Mississippi."

In compliance with the requisition of the Secretary of War, Governor Burton issued a proclamation on the 23d of April, calling for the enlistment of volunteers. It was as follows:

Whereas a requisition has been made upon the undersigned, as Executive of the said State of Delaware, by the Secretary of War, for one regiment, consisting of seven hundred and eighty men, to be immediately detached from the militia of this State, "to serve as infantry or riflemen for the period of three months, unless sooner discharged;" and, whereas, the laws of this State do not confer upon the Executive any authority enabling him to comply with such requisition, there being no organized militia nor any law requiring such organization; and whereas, it is the duty of all good and law-abiding citizens to preserve the peace and sustain the laws and Government under which we live, and by which our citizens are protected:

Therefore I, William Burton, Governor of the said

State of Delaware, recommend the formation of volunteer companies for the protection of the lives and property of the people of this State against violence of any sort to which they may be exposed. For these purposes such companies, when formed, will be under the control of the State authorities, though not subject to be ordered by the Executive into the United States service—the law not vesting in him such authority. They will, however, have the option of offering their services to the General Government for the defence of its capital and the support of the Constitution and laws of the country.

WILLIAM BURTON.

The State had no militia for the Governor to call out, therefore his object was to encourage the formation of volunteer companies. This was the utmost extent to which he could officially act, and it was in compliance with the wishes of a large majority of the people of the State, who were resolved to sustain the Government and defend the Union, without regard to the person who might be the President of the United States. On the 1st of May, the Governor, finding that volunteers were freely offered, issued the following orders:

DOVER, DELAWARE, May 1, 1861.

The undersigned, the constitutional commander of the forces of the State of Delaware, directs that those volunteer companies of the State that desire to be mustered into the service of the United States, under the call of the President, will rendezvous to the City of Washington with the least possible delay, where they will be mustered into the service of the United States by Major Ruff, who has been detailed by the War Department for that purpose, and who has reported himself to me and received my instructions. The regiment will consist of ten companies, to serve for the period of three months. WILLIAM BURTON, Governor, and Commander-in-Chief.

A regiment was promptly formed and mustered into the service of the United States. It consisted of three-months men, and numbered about 775 men. Subsequently, two regiments, containing about 2,000 men, were enlisted for the war, and equipped by the State, and mustered in the United States army.

Still a portion of the people of the State were not disposed to sustain, by active efforts, the hostilities in which the Federal Government had now become involved. They thought that the power of the North would be insufficient to bring the Southern States back into the Union; and if they ever again became a part of it, they must come back voluntarily. Assuming this position, the views entertained under it were exceedingly various, and some possessed so great latitude as to embrace those who favored the cause of the Confederate States. To those even who honestly entertained these views, war held out no prospect but that of mutual destruction. A separation and an acknowl-

edgment of the Confederacy were regarded as the course of wisdom. Some believed that by peace and conciliation, the seceding States might finally be induced to return. The peace men in Delaware, Connecticut, and all the Northern States, were thus actuated, although some carried their views to an extreme. As a general fact, they were men who loved the Union, and earnestly desired its restoration. They had no antipathy to the institutions of the Southern States, and were in a manner devoid of every feeling of interest or anxiety on the point concerning which those who elected the Federal Administration and those who plotted and organized the Confederate States had for years been at issue. War, with them, as with Senator Douglas of Illinois, "was final, inevitable dissolution."

In Delaware, there were not only many citizens opposed to the war, but there were a few who heartily desired the success of the Confederate States. The Secretary of War, in his report, at the session of Congress which commenced in December, 1861, says: "At the date of my last report in July, the States of Delaware, Maryland, Kentucky, and Missouri, were threatened with rebellion. In Delaware, the good sense and patriotism of the people have triumphed over the unholy schemes of traitors."

On the 27th of June, a "peace" Convention assembled at Dover, the capital of the State, and was held in the open air. A large number of persons—nearly two thousand—were present. The first speaker began by observing that eleven States had gone out of the Union, which he deplored, but they were determined to go out, and had gone, acting upon the glorious principle, that all government derived its power from the consent of the governed. "They, eight millions of freemen, had resented continued aggression and intermeddling, until the election of a Republican placed the last feather upon the back of the people, and they had calmly, quietly, determinedly retired. In God's name let them go unmolested. Would Delaware give money or men to hold States as conquered provinces? or allow the seceded States to be governed by free people, in whatever manner they chose to be governed? Could the South be subjugated? Never. All the wealth of mines and kingdoms would not restore the country to its unembarrassed condition. All expenditures were needless, as there were not men enough in the North to conquer a free people fighting for their rights, even against any odds. Who would not, therefore, favor peace now, if ages would still produce the same results? Let the tax-payers of Delaware come forth for peace, which would accomplish all that war could do."

Of the resolutions adopted, the first repudiated war in any case, and preferred a peaceable recognition of the Confederate States to the shedding of blood. The second stated that the appellation "traitor," as applied to citizens of Delaware, using the right of free speech, could neither intimidate nor convince them.

The other resolutions related to local affairs. The effect of all these movements was not only to call in question the uprightness of the contest, but to withhold and embarrass, so far as their small influence extended, the energy of the Government. The popular favor, however, was so strong in support of the Government, and of a vigorous prosecution of the war, that, in consequence of the indignation manifested by the people, and the arrest by the Government of persons of disloyal sentiments, all these "peace" movements soon subsided.

On the 25th of December, the Legislature of the State assembled at Dover. The Governor, in his Message to this body, said: "Our citizens have acted in a manner highly creditable to them, and well deserve the quiet they have enjoyed. Those, if there be any, and doubtless there are some everywhere, whose sympathies incline to the South, are quiescent, laying no impediments in the way of the Government, nor affording its enemies any sort of aid. Some of the innumerable rumors afloat throughout the country may, perhaps, represent a different state of things; but were the test of truth properly applied to these reports, most of them would be found wholly unreliable."

Some movement was made at this session to pass a bill, providing for the ultimate abolition of slavery within the State. The scheme was based upon the payment by the United States of a certain sum to establish a fund towards securing full and fair compensation to the owners. It was not successful.

DERBY, GEORGE H., was born in Norfolk County, Massachusetts, and died in New York, on the 15th of July, 1861, aged thirty-seven years. He was descended from E. H. Derby, of Salem, who fitted out many armed ships during the war of the Revolution, and afterwards became the pioneer in opening from Salem the trade to India, China, and the Baltic.

George H. Derby graduated at West Point in the class of 1846, in which he attained a prominent position. He was at once promoted to the rank of Second Lieutenant in the ordnance, and for his excellence as a topographer, was transferred in 1847 to the Corps of Topographical Engineers.

Severely wounded in the battle of Cerro Gordo, in 1847, he was brevetted to the post of First Lieutenant "for his gallant and meritorious conduct" on this occasion. He subsequently rose to the rank of Captain, and for two years was employed by Government to erect several lighthouses on the coast of Florida and Alabama. In the discharge of his duty, he exposed himself to a sun-stroke, which affected his sight and resulted in a softening of the brain, terminating his life in the prime of manhood. He was alike distinguished as an officer and a writer. His *Phoenixiana* has circulated from California to Maine, while his brilliant talents, genial humor, and sparkling wit endeared him both to the army and a wide circle of acquaintance.

DIPLOMATIC CORRESPONDENCE OF THE UNITED STATES GOVERNMENT IN 1861. The diplomatic correspondence of the United States Government for the year 1861 properly commences at the Inauguration of the President on the 4th of March. A new President, a new party, a new Cabinet, composed of public men who had never before held such positions, came into power on that day. New and unusual scenes could be discerned rapidly rising to view in the future which would raise new questions and new aspects of old ones. Commencing about this date, the Secretary of State of the retiring Administration, Mr. Black, appears on the 28th of February addressing a circular "to all the ministers of the United States," in which he states that "the election of last November resulted in the choice of Mr. Abraham Lincoln; that he was the candidate of the republican or anti-slavery party; that the preceding discussion had been confined almost entirely to topics connected, directly or indirectly, with the subject of negro slavery; that every Northern State cast its whole electoral vote (except three in New Jersey) for Mr. Lincoln, while in the whole South the popular sentiment against him was almost absolutely universal. Some of the Southern States, immediately after the election, took measures for separating themselves from the Union, and others soon followed their example." The result of this was the assembling of a congress of Representatives from South Carolina, Georgia, Florida, Alabama, Mississippi, and Louisiana, and the adoption of a provisional Constitution for what was styled the "Confederate States of America." He then proceeded to say:

It is not improbable that persons claiming to represent the States which have thus attempted to throw off their Federal obligations will seek a recognition of their independence by the European powers. In the event of such an effort being made, you are expected by the President to use such means as may in your judgment be proper and necessary to prevent its success.

The reasons set forth in the President's Message at the opening of the present session of Congress, in support of his opinion that the States have no constitutional power to secede from the Union, are still unanswered, and are believed to be unanswerable. The grounds upon which they have attempted to justify the revolutionary act of severing the bonds which connect them with their sister States, are regarded as wholly insufficient. This Government has not relinquished its constitutional jurisdiction within the territory of those States, and does not desire to do so.

On the 9th of March, Mr. Seward, the newly-appointed Secretary of State, addressed a circular to "all the Ministers of the United States," in which he alluded to the instructions of his predecessor, and stated that the President, having assumed the administration of the Government, in pursuance of an unquestioned election, and of the directions of the Constitution, renewed the injunction above mentioned, and relied upon the exercise of the greatest possible diligence and fidelity on their part to counteract and prevent the designs of those

who would invoke foreign intervention to embarrass or overthrow the Republic. They were instructed to urge upon the Governments to which they were commissioned, the consideration that "the present disturbances had their origin only in popular passions excited under novel circumstances of a very transient character, and that while not one person of well-balanced mind has attempted to show that dismemberment of the Union would be permanently conducive to the safety and welfare of even his own State or section, much less of all the States and sections of our country, the people themselves still retain and cherish a profound confidence in our happy Constitution, together with a veneration and affection for it such as no other form of government ever received at the hands of those for whom it was established."

Another circular was issued by the Secretary to the Ministers of the United States in Great Britain, France, Russia, Prussia, Austria, Belgium, Italy, and Denmark, on the 24th of April, relative to the rights of neutrals in maritime war. It presents the whole case as it stood at that date. It states the position of the United States, our proposition to the Paris congress in 1856, the action of that congress, and the ground the Administration was ready to assume on the subject. The entire letter is too important to be abridged, as it contains propositions which were the subject of negotiation in all the courts above named for ensuing months:

DEPARTMENT OF STATE, }
WASHINGTON, April 24, 1861. }

SIR: The advocates of benevolence and the believers in human progress, encouraged by the slow though marked meliorations of the barbarities of war which have obtained in modern times, have been, as you are well aware, recently engaged with much assiduity in endeavoring to effect some modifications of the law of nations in regard to the rights of neutrals in maritime war. In the spirit of these movements the President of the United States, in the year 1854, submitted to the several maritime nations two propositions, to which he solicited their assent as permanent principles of international law, which were as follows:

1. Free ships make free goods; that is to say, that the effects or goods belonging to subjects or citizens of a power or State at war are free from capture or confiscation when found on board of neutral vessels, with the exception of articles contraband of war.
2. That the property of neutrals on board an enemy's vessel is not subject to confiscation unless the same be contraband of war.

Several of the Governments to which these propositions were submitted expressed their willingness to accept them, while some others, which were in a state of war, intimated a desire to defer acting thereon until the return of peace should present what they thought would be a more auspicious season for such interesting negotiations.

On the 16th of April, 1856, a congress was in session at Paris. It consisted of several maritime powers, represented by their plenipotentiaries, namely, Great Britain, Austria, France, Russia, Prussia, Sardinia, and Turkey. That congress having taken up the general subject to which allusion has already been made in this letter, on the day before mentioned, came to an agreement, which they adopted in the form of a declaration, to the effect following, namely:

1. Privateering is and remains abolished.

2. The neutral flag covers enemy's goods, with the exception of contraband of war.

3. Neutral goods, with the exception of contraband of war, are not liable to capture under enemy's flag.

4. Blockades, in order to be binding, must be effective; that is to say, maintained by forces sufficient really to prevent access to the coast of the enemy.

The agreement pledged the parties constituting the congress to bring the declaration thus made to the knowledge of the States which had not been represented in that body, and to invite them to accede to it. The congress, however, at the same time insisted, in the first place, that the declaration should be binding only on the powers who were or should become parties to it as one whole and indivisible compact; and, secondly, that the parties who had agreed, and those who should afterwards accede to it, should, after the adoption of the same, enter into no arrangement on the application of maritime law in time of war without stipulating for a strict observance of the four points resolved by the declaration.

The declaration, which I have thus substantially recited, of course prevented all the powers which became parties to it from accepting the two propositions which had been before submitted to the maritime nations by the President of the United States.

The declaration was, in due time, submitted by the Governments represented in the congress at Paris to the Government of the United States.

The President, about the 14th of July, 1856, made known to the States concerned his unwillingness to accede to the declaration. In making that announcement on behalf of this Government, my predecessor, Mr. Marcy, called the attention of those States to the following points, namely:

1st. That the second and third propositions, contained in the Paris declaration, are substantially the same with the two propositions which had before been submitted to the maritime States by the President.

2d. That the Paris declaration, with the conditions annexed, was inadmissible by the United States in three respects, namely: 1st. That the Government of the United States could not give its assent to the first proposition contained in the declaration, namely, that "Privateering is and remains abolished," although it was willing to accept it with an amendment which should exempt the private property of individuals, though belonging to belligerent States, from seizure or confiscation by national vessels in maritime war. 2d. That for this reason the stipulation annexed to the declaration, viz.: that the propositions must be taken altogether or rejected altogether, without modification, could not be allowed. 3d. That the fourth condition annexed to the declaration, which provided that the parties acceding to it should enter into no negotiation for any modifications of the law of maritime war with nations which should not contain the four points contained in the Paris declaration, seemed inconsistent with a proper regard to the national sovereignty of the United States.

On the 29th of July, 1856, Mr. Mason, then minister of the United States at Paris, was instructed by the President to propose to the Government of France to enter into an arrangement for its adherence, with the United States, to the four principles of the declaration of the Congress of Paris, provided the first of them should be amended as specified in Mr. Marcy's note to the Count de Sartiges on the 28th of July, 1856. Mr. Mason accordingly brought the subject to the notice of the imperial Government of France, which was disposed to entertain the matter favorably, but which failed to communicate its decision on the subject to him. Similar instructions regarding the matter were addressed by this department to Mr. Dallas, our minister at London, on the 31st day of January, 1857; but the proposition above referred to had not been directly presented to the British Government by him when the administration of this Government by Franklin Pierce, during whose term these proceedings occurred, came to an end on the 3d of March, 1857, and was succeeded

by that of James Buchanan, who directed the negotiations to be arrested for the purpose of enabling him to examine the questions involved, and they have ever since remained in that state of suspension.

The President of the United States has now taken the subject into consideration, and he is prepared to communicate his views upon it, with a disposition to bring the negotiation to a speedy and satisfactory conclusion.

For that purpose you are hereby instructed to seek an early opportunity to call the attention of her Majesty's Government to the subject, and to ascertain whether it is disposed to enter into negotiations for the accession of the Government of the United States to the declaration of the Paris congress, with the conditions annexed by that body to the same; and if you shall find that Government so disposed, you will then enter into a convention to that effect, substantially in the form of a project for that purpose herewith transmitted to you; the convention to take effect from the time when the due ratifications of the same shall have been exchanged. It is presumed that you will need no special explanation of the sentiments of the President on this subject for the purpose of conducting the necessary conferences with the Government to which you are accredited. Its assent is expected on the ground that the proposition is accepted at its suggestion, and in the form it has preferred. For your own information it will be sufficient to say that the President adheres to the opinion expressed by my predecessor, Mr. Marcy, that it would be eminently desirable for the good of all nations that the property and effects of private individuals, not contraband, should be exempt from seizure and confiscation by national vessels in maritime war. If the time and circumstances were propitious to a prosecution of the negotiation with that object in view, he would direct that it should be assiduously pursued. But the right season seems to have passed, at least for the present. Europe seems once more on the verge of quite general wars. On the other hand, a portion of the American people have raised the standard of insurrection, and proclaimed a provisional government, and, through their organs, have taken the bad resolution to invite privateers to prey upon the peaceful commerce of the United States.

Prudence and humanity combine in persuading the President, under the circumstances, that it is wise to secure the lesser good offered by the Paris congress, without waiting indefinitely in hope to obtain the greater one offered to the maritime nations by the President of the United States.

I am, sir, respectfully, your obedient servant,

WILLIAM H. SEWARD.

CHARLES FRANCIS ADAMS, Esq., &c., &c.

Convention upon the subject of the rights of belligerents and neutrals in time of war, between the United States of America and her Majesty the Queen of Great Britain and Ireland.

The United States of America and her Majesty the Queen of Great Britain and Ireland, being equally animated by a desire to define with more precision the rights of belligerents and neutrals in time of war, have, for that purpose, conferred full powers, the President of the United States upon Charles F. Adams, accredited as their envoy extraordinary and minister plenipotentiary to her said Majesty, and her Majesty the Queen of Great Britain and Ireland, upon

And the said plenipotentiaries, after having exchanged their full powers, have concluded the following articles:

ARTICLE I. 1. Privateering is and remains abolished. 2. The neutral flag covers enemy's goods, with the exception of contraband of war. 3. Neutral goods, with the exception of contraband of war, are not liable to capture under enemy's flag. 4. Blockades, in order to be binding, must be effective; that is to say, maintained by a force sufficient really to prevent access to the coast of the enemy.

ARTICLE II. The present convention shall be ratified

by the President of the United States of America, by and with the advice and consent of the Senate, and by her Majesty the Queen of Great Britain and Ireland, and the ratifications shall be exchanged at Washington, within the space of six months from the signature, or sooner if possible. In faith whereof, the respective plenipotentiaries have signed the present convention in duplicate, and have thereto affixed their seals.

Done at London, the day of , in the year of our Lord, one thousand eight hundred and sixty-one (1861.)

Prussia.—These circulars are followed by extracts from the correspondence with each of the ministers of this country to foreign courts, in copious detail. Commencing with Prussia, the letter of instructions to Mr. Judd, the newly-appointed minister, is under the date of March. Mr. Seward writes:

SIR: Contrary to what usually happens in giving instructions to a minister going abroad, I am directed by the President to ask you to fix your attention in the first instance, and to keep it constantly fixed, on the actual condition of affairs at home. I allude, of course, to the unlawful and unconstitutional attempt which is being made to detach several of the States from the Federal Union, and to organize them as an independent republic under the name of the "Confederate States of America."

You are well aware of what you will find Europeans unable to understand, namely, that owing to the very peculiar structure of our Federal Government, and the equally singular character and habits of the American people, this Government not only wisely but necessarily hesitates to resort to coercion and compulsion to secure a return of the disaffected portion of the people to their customary allegiance. The Union was formed upon popular consent, and must always practically stand on the same basis. The temporary causes of alienation must pass away; there must needs be disasters and disappointments resulting from the exercise of unlawful authority by the revolutionists, while happily it is certain that there is a general and profound sentiment of loyalty pervading the public mind throughout the United States. While it is the intention of the President to maintain the sovereignty and rightful authority of the Union everywhere with firmness as well as discretion, he at the same time relies with great confidence on the salutary working of the agencies I have mentioned, to restore the harmony and Union of the States. But to this end it is of the greatest importance that the disaffected States shall not succeed in obtaining favor or recognition from foreign nations.

It is understood that the so-called Confederate States of America have sent, or are about to send, agents to solicit such recognition in Europe, although there is no special reason for supposing Prussia to be one of the nations to which application will be made. An almost electric political connection, however, exists between the several capitals of western Europe, and therefore your most efficient and unflinching efforts must be put forth directly, and even indirectly, to prevent the success of that ill-starred design.

Mr. Seward then calls the attention of Mr. Judd to his general circular to all our ministers, dated March 9th, and says:

It may be well to call your attention to the fact that in that communication, as in this, I have forbore altogether from discussing the groundless complaints and pretexts which have been put forth by the organs of disunion to justify the rash and perilous revolution which they are attempting to inaugurate. I have practised this reticence not because the point is unimportant, but because the dispute is purely a domestic one, and the President would not willingly have the archives of our legations bear testimony to so un-

American a proceeding as an acknowledgment, even by indirection, that this Government ever consented to join issue upon a purely family matter of this kind with a portion of our own citizens before a foreign tribunal. Nevertheless, should you find that any weight is given to those complaints and pretexts in the court to which you are accredited, your perfect knowledge of all the transactions involved, will, I am sure, enable you to meet them conclusively and satisfactorily without precise instructions on that point.

Mr. Wright, who continued to represent the United States at the Court of Prussia until the arrival of Mr. Judd, writes to Mr. Seward under date of Berlin, May 8th: "Baron Schleinitz, the Minister for Foreign Affairs, gave me the most positive assurance that this Government, from the principle of unrelenting opposition to all revolutionary movements, would be one of the last to recognize any *de facto* government of the disaffected States of the American Union."

Again, under date of May 15th, he writes: "Baron Schleinitz informed me that, in his opinion, no apprehension need be entertained as to Prussian subjects engaging under the authority of the so-called Confederate States in fitting out privateers, or in any manner interfering with our commerce."

Again, under date of May 26th, he writes to Mr. Seward: "Prussia will take efficient steps to sustain the Government of the United States in the protection of property and commerce, and will do all she can, consistently with her obligations to other Governments, to sustain the vigorous action of our Government in maintaining law and order."

On the 18th of June, Baron Schleinitz addressed a note to Baron Gerolt, the Prussian Minister at Washington, referring to doubts prevailing in Europe about the treatment to which neutral shipping might be subjected during the continuance of the disturbances in the United States, and requests him to obtain an explanation of the views of the Federal Government thereupon.

Mr. Seward, in reply, on the 16th of June, further adds:

Baron Schleinitz, in this communication, has remarked that it would certainly be most desirable for Prussia that this Government should embrace this occasion to announce its adhesion to the celebrated declaration of Paris. But that if this could not be attained, then, for the present, the Government of Prussia would urge that an exposition might be made, to be obligatory during the present intestine disturbances in the United States, in regard to the application generally of the second and third principles of the Paris declaration to neutral shipping.

The second principle of the Paris declaration is, that the neutral flag covers the enemy's goods, not contraband of war.

The third principle is, that the goods, not contraband of war, of a neutral found on board an enemy's vessel are exempt from confiscation.

The undersigned has the pleasure of informing Baron Gerolt, by authority of the President of the United States, that the Government cheerfully declares its assent to these principles in the present case, and to continue until the insurrection which now unhappily exists in the United States shall have come to an end, and they will be fully observed by this Government in its relations with Prussia.

At the same time he states that the newly-appointed Minister, Mr. Judd, was authorized to enter into a treaty with the kingdom of Prussia for the adhesion of the United States Government to the declaration of the Congress at Paris.

Similar instructions and powers were given to all the Ministers appointed to conduct diplomatic intercourse with all existing maritime powers. This Government, in these instructions, declared its continued desire and preference for the amendment of the Paris declaration proposed by this Government in 1856, to the effect that private or individual property of non-combatants, whether belonging to belligerent States or not, should be exempted from confiscation in maritime war. But recurring to the previous failure to secure the adoption of that amendment, this Government instructed its ministers, if they should find it necessary, to waive it for the present, and to negotiate our adhesion to the declaration pure and simple.

The right of the United States to close any of the national ports "which have already fallen, or which may fall into the hands of the insurgents, either directly or in the lenient and equitable form of the blockade," is understood as not qualified or modified.

The conclusion reached was an indirect intimation that a separate treaty with Prussia was not considered necessary by that court, but the simple adhesion of the Government of the United States to the articles of the Paris treaty would be sufficient.

Belgium.—On the 26th of March, Mr. Seward addressed instructions to Mr. Sanford, the United States Minister to Belgium. The policy of the Administration toward the seceded States at that date is thus stated :

Formidable as the conspiracy seemed at the beginning, it is now confidently believed that the policy of the present Administration in regard to it will be supported by the people—a policy of conciliation, forbearance, and firmness—and that the conspiracy will thus fall for want of ultimate adoption by the States themselves which are expected to constitute the new Confederacy.

The most important duty of the diplomatic representatives of the United States in Europe, says the Secretary, will be to counteract, by all proper means, the efforts of the agents of that projected Confederacy at their respective courts. They are expected not to engage in any discussion which the agents of the disunionists may attempt to initiate on the merits of their proposed revolution. The President will not consent, directly or indirectly, to the interpellation of any foreign power in a controversy which is merely a domestic one. He then proceeds:

There is some reason to suppose that the agents of the disunionists will attempt to win favor for their scheme of recognition by affecting to sympathize with the manufacturing interests of the European nations in their discontent with the tariff laws of the United States, and by promising to receive the fabrics of such nations on more favorable terms. You will be able to reply to such seductions as these that the new tariff laws thus complained of are revenue laws deemed by the legislature of the United States necessary under new and peculiar circumstances; that all experience shows that such laws are not, and cannot be,

permanent; that if, as is now pretended, they shall prove to be onerous to foreign commerce, they will, of course, prove also to be unfruitful of revenue, and that, in that case, they will necessarily be promptly modified. The inconvenience, if any shall result from them, will therefore be temporary and practically harmless. Nor will any statesman of a foreign country need to be informed that the consumption of the fabrics which it is proposed shall be favored by the so-called seceding States chiefly takes place, not within those States, but in a very large degree in the States which remain undisturbed by this unhappy attempt at revolution.

Under date of May 10th, Mr. Sanford wrote that he had been received by the King on the 8th, who spoke but generally of the insurrection in the Southern States, said he hoped some peaceful issue would be found, and that the spirit of conciliation would prevail, and then referred to the growing markets they had for manufactures in the United States.

Again, on the 26th of May, he writes to Mr. Seward that he had a conversation with M. de Vrière on the subject of the efforts of the commissioners of the Confederate States to obtain a recognition of the European powers. M. de Vrière replied that no application had been made to him in this view, "nor would it now be entertained if made. The revolution would receive no sanction by any act of Belgium." He also spoke of the new tariff with a great deal of feeling, and said it was highly prejudicial to their interests, instancing in point that forty furnaces for the manufacture of window-glass had been stopped in consequence.

On the 6th of May, Mr. Seward writes to Mr. Sanford that the negotiation of a convention with the Government of Belgium, on the rights of belligerents and neutrals in time of war, was desirable; and he was instructed to endeavor to effect that object. Again, on the 21st of June, Mr. Seward writes:

You are aware that the declaration of Paris enjoins each of the parties that have signed it not to negotiate any other changes of the law of nations concerning the rights of neutrals in maritime war. We have supposed that this would operate to prevent Great Britain, and probably France, from receiving our accession to the declaration, if we should insist on the amendment proposed by Mr. Marcy, namely, the exemption of private property of non-belligerents from confiscation. But we should now, as the instructions heretofore given you have already informed you, vastly prefer to have that amendment accepted. Nevertheless, if this cannot be done, let the convention be made for adherence to the declaration pure and simple.

No answer was received from the Belgian Government on this proposition, as they preferred to await the action of France and England; and on the 5th of August Mr. Seward again wrote to Mr. Sanford that "there is no especial urgency on our part for the consideration, by the Belgian Government, of our proposition to accede to the declaration of the Congress of Paris, before the similar propositions, submitted to the British and French Governments, shall have been acted upon by them; although we hold ourselves ready to carry overtures into effect when the Belgian Government shall desire."

Mexico.—The instructions to Mr. Corwin, the American Minister to Mexico, are dated April 6th. Mr. Seward writes:

The President does not expect that you will allude to the origin or causes of our domestic difficulties in your intercourse with the Government of Mexico, although that Government will rightfully, as well as reasonably, ask what are his expectations of their course and their end. On the contrary, the President will not suffer the representatives of the United States to engage in any discussion of the merits of those difficulties in the presence of foreign powers, much less to invoke even their censure against those of our fellow-citizens who have arrayed themselves in opposition to its authority.

But you are instructed to assure the Government of Mexico that these difficulties having arisen out of no deep and permanent popular discontent, either in regard to our system of government itself, or to the exercise of its authority, and being attended by social evils which are as ruinous as they are unnecessary, while no organic change that is contemplated could possibly bring to any portion of the American people any advantages of security, peace, prosperity, or happiness, equal to those which the Federal Union so effectually guarantees, the President confidently believes and expects that the people of the United States, in the exercise of the wisdom that hitherto has never failed them, will speedily and in a constitutional way adopt all necessary remedies for the restoration of the public peace and the preservation of the Federal Union.

The success of this Government, in conducting affairs to that consummation, may depend in some small degree on the action of the Government and people of Mexico in this new emergency. The President could not fail to see that Mexico, instead of being benefited by the prostration or the obstruction of Federal authority in this country, would be exposed by it to new and fearful dangers. On the other hand, a condition of anarchy in Mexico must necessarily operate as a seduction to those who are conspiring against the integrity of the Union to seek strength and aggrandizement for themselves by conquests in Mexico and other parts of Spanish America. Thus, even the duller observer is at last able to see what was long ago distinctly seen by those who are endowed with any considerable perspicacity, that peace, order, and constitutional authority in each and all of the several republics of this continent are not exclusively an interest of any one or more of them, but a common and indispensable interest of them all.

Again, Mr. Seward says:

You may possibly meet agents of this projected Confederacy busy in preparing some further revolution in Mexico. You will not fail to assure the Government of Mexico that the President never has, nor can ever have, any sympathy with such designs, in whatever quarter they may arise, or whatever character they may take on.

Mr. Corwin, on the 29th of May, writes in reply: "The present Government of Mexico is well affected towards us in our present difficulties, but, for obvious reasons, will be unwilling to enter into any engagement which might produce war with the South, unless protected by promise of aid from the United States."

On the 29th of June, Mr. Corwin again writes: "I am quite sure that whilst this Government will endeavor to preserve peaceful relations with all the European powers on fair terms, it regards the United States as its true and only reliable friend in any struggle which may involve the national existence."

Great Britain.—In a letter of instructions to

Mr. Adams, dated April 10th, Mr. Seward first presents a dispassionate view of the disunion movement, and then proceeds to consider the manner in which that movement and its agents should be treated by Mr. Adams at the court of Great Britain. He says:

Before considering the arguments you are to use, it is important to indicate those which you are not to employ in executing that mission:

First. The President has noticed, as the whole American people have, with much emotion, the expressions of good-will and friendship toward the United States, and of concern for their present embarrassments, which have been made on apt occasions by her Majesty and her ministers. You will make due acknowledgment for these manifestations, but at the same time you will not rely on any mere sympathies or national kindness. You will make no admissions of weakness in our Constitution, or of apprehension on the part of the Government. You will further prove, as you easily can, by comparing the history of our country with that of other States, that its Constitution and government are really the strongest and surest which have ever been erected for the safety of any people. You will in no case listen to any suggestions of compromise by this Government, under foreign auspices, with its discontented citizens. If, as the President does not at all apprehend, you shall unhappily find her Majesty's Government tolerating the application of the so-called seceding States, or wavering about it, you will not leave them to suppose for a moment that they can grant that application and remain the friends of the United States. You may even assure them promptly, in that case, that if they determine to recognize, they may at the same time prepare to enter into alliance with the enemies of this republic. You alone will represent your country at London, and you will represent the whole of it there. When you are asked to divide that duty with others, diplomatic relations between the Government of Great Britain and this Government will be suspended, and will remain so until it shall be seen which of the two is most strongly entrenched in the confidence of their respective nations and of mankind.

You will not be allowed, however, even if you were disposed, as the President is sure you will not be, to rest your opposition to the application of the Confederate States on the ground of any favor this Administration, or the party which chiefly called it into existence, proposes to show to Great Britain, or claims that Great Britain ought to show them. You will not consent to draw into debate before the British Government any opposing moral principles which may be supposed to lie at the foundation of the controversy between those States and the Federal Union.

You will indulge in no expressions of harshness or disrespect, or even impatience, concerning the seceding States, their agents, or their people. But you will, on the contrary, all the while remember that those States are now, as they always heretofore have been, and notwithstanding their temporary self-delusion, they must always continue to be, equal and honored members of this Federal Union, and that their citizens throughout all political misunderstandings and alienations still are and always must be our kindred and countrymen. In short, all your arguments must belong to one of three classes, namely: First. Arguments drawn from the principles of public law and natural justice, which regulate the intercourse of equal States. Secondly. Arguments which concern equally the honor, welfare, and happiness of the discontented States, and the honor, welfare, and happiness of the whole Union. Thirdly. Arguments which are equally conservative of the rights and interests, and even sentiments of the United States, and just in their bearing upon the rights, interests, and sentiments of Great Britain and all other nations.

On the 9th of April, Mr. Dallas writes to Mr.

Seward that he had submitted to Lord John Russell the representations of his general circular, with the inaugural address of the President. He says:

His lordship assured me with great earnestness that there was not the slightest disposition in the British Government to grasp at any advantage which might be supposed to arise from the unpleasant domestic differences in the United States; but, on the contrary, that they would be highly gratified if those differences were adjusted, and the Union restored to its former unbroken position.

I pressed upon him, in concluding, if that were the case—and I was quite convinced that it was—how important it must be that this country and France should abstain, at least for a considerable time, from doing what, by encouraging groundless hopes, would widen a breach still thought capable of being closed.

He seemed to think the matter not ripe for decision one way or the other, and remarked that what he had said was all that at present it was in his power to say.

Mr. Seward, writing to Mr. Adams under date of April 27th, in reference to this communication of Mr. Dallas, says: "You will hardly need to be told that these last remarks of his lordship are by no means satisfactory to this Government."

On the 2d of May, Mr. Dallas writes to Mr. Seward that, at an interview with Lord John Russell, the latter stated that the three representatives of the Southern Confederacy were in London; that he had not seen them, but was not unwilling to do so unofficially; that there existed an understanding between his Government and that of France, which would lead both to take the same course as to recognition, whatever that course might be. He then referred to the rumor of a meditated blockade of Southern ports, and their discontinuance as points of entry.

On the 21st of May, Mr. Seward writes to Mr. Adams that "this Government considers that our relations in Europe have reached a crisis in which it is necessary for it to take a decided stand, on which not only its immediate measures, but its ultimate and permanent policy, can be determined and defined." He then informs Mr. Adams that the contents of this letter are not to be read or shown to the British Secretary of State, nor any of its positions prematurely, unnecessarily, or indiscreetly made known; but its spirit will be his guide.

A paper thus containing the private instructions of the Government, at such a time, to its representative at the principal court of Europe, is of more than ordinary interest to the American people. Mr. Seward then proceeds:

The President regrets that Mr. Dallas did not protest against the proposed unofficial intercourse between the British Government and the missionaries of the insurgents. It is due, however, to Mr. Dallas to say that our instructions had been given only to you and not to him, and that his loyalty and fidelity, too rare in these times, are appreciated.

Intercourse of any kind with the so-called commissioners is liable to be construed as a recognition of the authority which appointed them. Such intercourse would be none the less hurtful to us for being called unofficial, and it might be even more injurious, because we should have no means of knowing what points

might be resolved by it. Moreover, unofficial intercourse is useless and meaningless if it is not expected to ripen into official intercourse and direct recognition. It is left doubtful here whether the proposed unofficial intercourse has yet actually begun. Your own antecedent instructions are deemed explicit enough, and it is hoped that you have not misunderstood them. You will, in any event, desist from all intercourse whatever, unofficial as well as official, with the British Government, so long as it shall continue intercourse of any kind with the domestic enemies of this country. When intercourse shall have been arrested for this cause, you will communicate with this department and receive further directions.

Lord John Russell has informed us of an understanding between the British and French Governments that they will act together in regard to our affairs. This communication, however, loses something of its value from the circumstance that the communication was withheld until after knowledge of the fact had been acquired by us from other sources. We know also another fact that has not yet been officially communicated to us, namely: That other European States are apprised by France and England of their agreement, and are expected to concur with or follow them in whatever measures they adopt on the subject of recognition. The United States have been impartial and just in all their conduct towards the several nations of Europe. They will not complain, however, of the combination now announced by the two leading powers, although they think they had a right to expect a more independent, if not a more friendly course, from each of them. You will take no notice of that or any other alliance. Whenever the European Governments shall see fit to communicate directly with us, we shall be, as heretofore, frank and explicit in our reply.

As to the blockade, you will say that by our own laws and the laws of nature, and the laws of nations, this Government has a clear right to suppress insurrection. An exclusion of commerce from national ports which have been seized by insurgents, in the equitable form of blockade, is a proper means to that end. You will not insist that our blockade is to be respected, if it be not maintained by a competent force; but passing by that question as not now a practical or at least an urgent one, you will add that the blockade is now, and it will continue to be, so maintained, and therefore we expect it to be respected by Great Britain. You will add that we have already revoked the exequatur of a Russian consul who had enlisted in the military service of the insurgents, and we shall dismiss or demand the recall of every foreign agent, consular or diplomatic, who shall either disobey the Federal laws or disown the Federal authority.

As to the recognition of the so-called Southern Confederacy, it is not to be made a subject of technical definition. It is, of course, direct recognition to publish an acknowledgment of the sovereignty and independence of a new power. It is direct recognition to receive its ambassadors, ministers, agents, or commissioners, officially. A concession of belligerent rights is liable to be construed as a recognition of them. No one of these proceedings will pass unquestioned by the United States in this case.

Hitherto, recognition has been moved only on the assumption that the so-called Confederate States are *de facto* a self-sustaining power. Now, after long forbearance, designed to soothe discontent and avert the need of civil war, the land and naval forces of the United States have been put in motion to repress insurrection. The true character of the pretended new State is at once revealed. It is seen to be a power existing in pronunciamiento only. It has never won a field. It has obtained no forts that were not virtually betrayed into its hands, or seized in breach of trust. It commands not a single port on the coast, nor any highway out from its pretended capital by land. Under these circumstances, Great Britain is called upon to intervene and give it body and independence by resisting our measures of suppression. British recognition

would be British intervention, to create within our territory a hostile state by overthrowing this republic itself. * * * * *

As to the treatment of privateers in the insurgent service, you will say that this is a question exclusively our own. We treat them as pirates. They are our own citizens, or persons employed by our citizens, preying on the commerce of our country. If Great Britain shall choose to recognize them as lawful belligerents, and give them shelter from our pursuit and punishment, the laws of nations afford an adequate and proper remedy.

Happily, however, her Britannic Majesty's Government can avoid all these difficulties. It invited us in 1856 to accede to the declaration of the Congress of Paris, of which body Great Britain was herself a member, abolishing privateering everywhere in all cases and forever. You already have our authority to propose to her our accession to that declaration. If she refuse it, it can only be because she is willing to become the patron of privateering when aimed at our devastation.

These positions are not elaborately defended now, because to vindicate them would imply a possibility of our waiving them.

We are not insensible of the grave importance of this occasion. We see how, upon the result of the debate in which we are engaged, a war may ensue between the United States and one, two, or even more European nations. War in any case is as exceptionable from the habits as it is revolting from the sentiments of the American people. But if it come it will be fully seen that it results from the action of Great Britain, not our own; that Great Britain will have decided to fraternize with our domestic enemy, either without waiting to hear from you our remonstrances and our warnings, or after having heard them. War in defence of national life is not immoral, and war in defence of independence is an inevitable part of the discipline of nations.

The dispute will be between the European and the American branches of the British race. All who belong to that race will especially deprecate it, as they ought. It may well be believed that men of every race and kindred will deplore it. A war not unlike it, between the same parties, occurred at the close of the last century. Europe atoned by forty years of suffering for the error that Great Britain committed in provoking that contest. If that nation shall now repeat the same great error, the social convulsions which will follow may not be so long, but they will be more general. When they shall have ceased, it will, we think, be seen, whatever may have been the fortunes of other nations, that it is not the United States that will have come out of them with its precious Constitution altered, or its honestly obtained dominions in any degree abridged. Great Britain has but to wait a few months, and all her present inconveniences will cease with all our own troubles. If she take a different course she will calculate for herself the ultimate, as well as the immediate consequences, and will consider what position she will hold when she shall have forever lost the sympathies and affections of the only nation on whose sympathies and affections she has a natural claim. In making that calculation she will do well to remember that in the controversy she proposes to open we shall be actuated by neither pride, nor passion, nor cupidity, nor ambition; but we shall stand simply on the principle of self-preservation, and that our cause will involve the independence of nations and the rights of human nature.

Under date of May 21st, Mr. Adams writes to Mr. Seward, giving an account of his interview with Lord John Russell. The most important portion of their conversation, so far as regards its public interests, consists in the views of the English Government relative to regarding the Confederate States as a belligerent. On this point Mr. Adams thus writes:

I then alluded more especially to the brief report of the Lord Chancellor's speech on Thursday last, in which he had characterized the rebellious portion of my country as a belligerent State, and the war that was going on as *justum bellum*.

To this his lordship replied that he thought more stress was laid upon these events than they deserved. The fact was that a necessity seemed to exist to define the course of the Government in regard to the participation of the subjects of Great Britain in the impending conflict. To that end the legal questions involved had been referred to those officers most conversant with them, and their advice had been taken in shaping the result. Their conclusion had been that, as a question merely of *fact*, a war existed. A considerable number of the States, at least seven, occupying a wide extent of country, were in open resistance, whilst one or more of the others were associating themselves in the same struggle, and as yet there were no indications of any other result than a contest of arms more or less severe. In many preceding cases, much less formidable demonstrations had been recognized. Under such circumstances it seemed scarcely possible to avoid speaking of this in the technical sense as *justum bellum*, that is, a war of two sides, without in any way implying an opinion of its justice, as well as to withhold an endeavor, so far as possible, to bring the management of it within the rules of modern civilized warfare. This was all that was contemplated by the Queen's proclamation. It was designed to show the purport of existing laws, and to explain to British subjects their liabilities in case they should engage in the war. And however strongly the people of the United States might feel against their enemies, it was hardly to be supposed that in practice they would now vary from their uniformly humane policy heretofore in endeavoring to assuage and mitigate the horrors of war.

On the 3d of June Mr. Seward writes to Mr. Adams stating the views of the President relative to foreign interference, thus:

Every instruction you have received from this department is full of evidence of the fact that the principal danger in the present insurrection which the President has apprehended was that of foreign intervention, aid, or sympathy; and especially of such intervention, aid, or sympathy on the part of the Government of Great Britain.

The justice of this apprehension has been vindicated by the following facts, namely:

1. A guarded reserve on the part of the British Secretary of State, when Mr. Dallas presented to him our protest against the recognition of the insurgents, which seemed to imply that, in some conditions, not explained to us, such a recognition might be made.

2. The contracting of an engagement by the Government of Great Britain with that of France, without consulting us, to the effect that both Governments should adopt one and the same course of procedure in regard to the insurrection.

3. Lord John Russell's announcement to Mr. Dallas that he was not unwilling to receive the so-called commissioners of the insurgents unofficially.

4. The issue of the Queen's proclamation, remarkable, first, for the circumstances under which it was made, namely, on the very day of your arrival in London, which had been anticipated so far as to provide for your reception by the British secretary, but without affording you the interview promised before any decisive action should be adopted; secondly, the tenor of the proclamation itself, which seems to recognize, in a vague manner indeed, but does seem to recognize, the insurgents as a *belligerent* national power.

That proclamation, unmodified and unexplained, would leave us no alternative but to regard the Government of Great Britain as questioning our free exercise of all the rights of self-defence guaranteed to us by our Constitution and the laws of nature and of nations to suppress the insurrection.

I should have proceeded at once to direct you to

communicate to the British Government the definitive views of the President on the grave subject, if there were not especial reasons for some little delay.

These reasons Mr. Seward states to be, the information that England and France were preparing communications concerning the attitude to be assumed by them, and an interview which it was presumed Mr. Adams had with Lord John Russell.

The view taken by the Administration of their own position at this time, is described by Mr. Seward in a despatch dated June 8th:

This Government insists, as all the world might have known that it must and would, under all circumstances, insist, on the integrity of the Union, as the chief element of national life. Since, after trials of every form of forbearance and conciliation, it has been rendered certain and apparent that this paramount and vital object can be saved only by our acceptance of civil war as an indispensable condition, that condition, with all its hazards and deplorable evils, has not been declined. The acceptance, however, is attended with a strong desire and fixed purpose that the war shall be as short and accompanied by as little suffering as possible. Foreign intervention, aid, or sympathy in favor of the insurgents, especially on the part of Great Britain, manifestly could only protract and aggravate the war. Accordingly, Mr. Dallas, under instructions from the President, in an interview conceded to him by the British Secretary of State for Foreign Affairs, presented our protest against any such intervention.

The views of the Administration towards England are thus expressed:

This Government has no disposition to lift questions of even national pride or sensibility up to the level of diplomatic controversy, because it earnestly and ardently desires to maintain peace, harmony, and cordial friendship with Great Britain.

Again, he says:

It is the purpose of this Government, if possible, consistently with the national welfare and honor, to have no serious controversy with Great Britain at all; and if this shall ultimately prove impossible, then to have both the defensive position and the clear right on our side.

On the 14th of June, Mr. Adams relates another interview had with Lord John Russell. After allusion to the proclamation of the Queen by Mr. Adams, as having been hastily issued, Lord John Russell's reply is thus given:

He went over the ground once more which he occupied in the former interview—the necessity of doing something to relieve the officers of their ships from the responsibility of treating these persons as pirates if they met them on the seas. For his part, he could not believe the United States would persevere in the idea of hanging them, for it was not in consonance with their well-known character. But what would be their own situation if they should be found practising upon a harsher system than the Americans themselves?

Here was a very large territory—a number of States—and people counted by millions, who were in a state of actual war. The fact was undeniable, and the embarrassment unavoidable. Under such circumstances the law officers of the crown advised the policy which had been adopted. It was designed only as a preventive to immediate evils. The United States should not have thought hard of it. They meant to be entirely neutral.

On the 15th of June the British and French Ministers had an interview with Mr. Seward, at which they proposed to read to him certain in-

structions from their Governments. Mr. Seward declined to hear them officially until he knew the nature of their contents. For this purpose they were left for his perusal. He afterwards declined to hear them read, or to receive official notice of them. In a letter to Mr. Adams on the 19th, he thus states the contents of this paper:

That paper purports to contain a decision at which the British Government has arrived, to the effect that this country is divided into two belligerent parties, of which this Government represents one, and that Great Britain assumes the attitude of a neutral between them.

This Government could not, consistently with a just regard for the sovereignty of the United States, permit itself to debate these novel and extraordinary positions with the Government of her Britannic Majesty; much less can we consent that that Government shall announce to us a decision derogating from that sovereignty, at which it has arrived without previously conferring with us upon the question. The United States are still solely and exclusively sovereign within the territories they have lawfully acquired and long possessed, as they have always been. They are at peace with all the world, as, with unimportant exceptions, they have always been. They are living under the obligations of the law of nations, and of treaties with Great Britain, just the same now as heretofore; they are, of course, the friend of Great Britain, and they insist that Great Britain shall remain their friend now, just as she has hitherto been. Great Britain, by virtue of these relations, is a stranger to parties and sections in this country, whether they are loyal to the United States or not, and Great Britain can neither rightfully qualify the sovereignty of the United States, nor concede, nor recognize any rights, or interests, or power of any party, State, or section, in contravention to the unbroken sovereignty of the Federal Union. What is now seen in this country is the occurrence, by no means peculiar, but frequent in all countries, more frequent even in Great Britain than here, of an armed insurrection engaged in attempting to overthrow the regularly constituted and established Government. There is, of course, the employment of force by the Government to suppress the insurrection, as every other government necessarily employs force in such cases. But these incidents by no means constitute a state of war impairing the sovereignty of the Government, creating belligerent sections, and entitling foreign States to intervene or to act as neutrals between them, or in any other way to cast off their lawful obligations to the nation thus for the moment disturbed. Any other principle than this would be to resolve government everywhere into a thing of accident and caprice, and ultimately all human society into a state of perpetual war.

We do not go into any argument of fact or of law in support of the positions we have thus assumed. They are simply the suggestions of the instinct of self-defence, the primary law of human action, not more the law of individual than of national life.

On the 21st of June Mr. Adams writes:

I am now earnestly assured on all sides that the sympathy with the Government of the United States is general; that the indignation felt in America is not founded in reason; that the British desire only to be perfectly neutral, giving no aid nor comfort to the insurgents. I believe that this sentiment is now growing to be universal. It inspires her Majesty's Ministers, and is not without its effect on the opposition.

The views of the Administration concerning the principle of the law of Congress which authorized the President to close the ports of the seceded States, were set forth with much eloquence by Mr. Seward, in a despatch to Mr. Adams, on July 21st. The occasion for the

despatch arose out of a debate in Parliament, and a statement by Lord John Russell, that the law officers were of opinion that the ports, of New Grenada for instance, could not be closed as against foreign nations, except by the regular form of blockade. After a general survey of the relations of the two countries subsequent to the outbreak in April, with a statement of the efforts of the United States to avoid all occasions for irritation, Mr. Seward proceeds:

The case then seemed to me to stand thus: The two nations had, indeed, failed to find a common ground or principle on which they could stand together; but they had succeeded in reaching a perfect understanding of the nature and extent of their disagreement, and in finding a line of mutual, practical forbearance. It was under this aspect of the positions of the two Governments that the President thought himself authorized to inform Congress on its coming together on the 4th of July instant, in extra session, that the sovereignty of the United States was practically respected by all nations.

Nothing has occurred to change this condition of affairs, unless it be the attitude which Lord John Russell has indicated for the British Government in regard to an apprehended closing of the insurrectionary ports, and the passage of the law of Congress which authorizes that measure in the discretion of the President.

It is my purpose not to anticipate or even indicate the decision which will be made, but simply to suggest to you what you may properly and advantageously say while the subject is under consideration. First, You will, of course, prevent misconception of the measure by stating that the law only authorizes the President to close the ports in his discretion, according as he shall regard exigencies now existing or hereafter to arise.

Secondly. The passage of the law, taken in connection with attendant circumstances, does not necessarily indicate a legislative conviction that the ports ought to be closed, but only shows the purpose of Congress that the closing of the ports, if it is now or shall become necessary, shall not fail for want of power explicitly conferred by law. When, on the 13th of April last, disloyal citizens defiantly inaugurated an armed insurrection by the bombardment of Fort Sumter, the President's constitutional obligation to suppress the insurrection became imperative.

But the case was new, and had not been adequately provided for by express law. The President called military and naval forces into activity, instituted a blockade, and incurred great expense, for all which no direct legal provisions existed. He convened Congress at the earliest possible day to confirm these measures, if they should see fit.

Congress, when it came together, confronted these facts. It has employed itself less in directing how and in what way the Union shall be maintained, than in confirming what the President had already done, and in putting into his hands more ample means and greater power than he has exercised or asked.

The law in question was passed in this generous and patriotic spirit. Whether it shall be put into execution to-day or to-morrow, or at what time, will depend on the condition of things at home and abroad, and a careful weighing of the advantages of so stringent a measure against those which are derived from the existing blockade.

Thirdly. You may assure the British Government that no change of policy now pursued, injuriously affecting foreign commerce, will be made from motives of aggression against nations which practically respect the sovereignty of the United States, or without due consideration of all the circumstances, foreign as well as domestic, bearing upon the question. The same spirit of forbearance towards foreign nations, arising from a desire to confine the calamities of the unhappy contest as much as possible, and to bring it

to a close by the complete restoration of the authority of the Government as speedily as possible, that has hitherto regulated the action of the Government, will continue to control its counsels.

On the other hand, you will not leave it at all doubtful that the President fully adheres to the position that this Government so early adopted, and which I have so continually throughout this controversy maintained; consequently he fully agrees with Congress in the principle of the law which authorizes him to close the ports which have been seized by the insurgents, and he will put into execution and maintain it with all the means at his command, at the hazard of whatever consequences, whenever it shall appear that the safety of the nation requires it.

I cannot leave the subject without endeavoring once more, as I have so often done before, to induce the British Government to realize the conviction which I have more than once expressed in this correspondence, that the policy of the Government is one that is based on interests of the greatest importance, and sentiments of the highest virtue, and therefore is in no case likely to be changed, whatever may be the varying fortunes of the war at home or the action of foreign nations on this subject, while the policy of foreign States rests on ephemeral interests of commerce or of ambition merely. The policy of these United States is not a creature of the Government but an inspiration of the people, while the policies of foreign States are at the choice mainly of the governments presiding over them. If, through error, on whatever side this civil contention shall transcend the national bounds and involve foreign States, the energies of all commercial nations, including our own, will necessarily be turned to war, and a general carnival of the adventurous and the reckless of all countries, at the cost of the existing commerce of the world, must ensue. Beyond that painful scene upon the seas there lie, but dimly concealed from our vision, scenes of devastation and desolation which will leave no roots remaining out of which trade between the United States and Great Britain, as it has hitherto flourished, can ever again spring up.

The correspondence next enters upon the subject of the adhesion of the United States to the declaration of the Congress of Paris on neutral rights. The Government of the United States proposed to accede to this declaration if the proposition of Mr. Marcy could be added thereto. This soon appeared impracticable. It was then proposed by the American Government to accede to the declaration of the Paris Congress simply. This was to be accomplished by the negotiation of a separate convention with each nation represented in the congress. The secondary powers deferred to the action of Great Britain and France. On the 18th of July, Lord John Russell wrote to Mr. Adams that—

Her Majesty's Government would deem themselves authorized to advise the Queen to conclude a convention on this subject with the President of the United States so soon as they shall have been informed that a similar convention has been agreed upon, and is ready for signature, between the President of the United States and the Emperor of the French, so that the two conventions might be signed simultaneously and on the same day.

Mr. Adams corresponds with Mr. Dayton at Paris, who enters upon the negotiation at that city; and on the 29th of July writes to Lord John Russell, stating the progress of negotiations. To this Lord John Russell replies, and after recapitulating previous statements, says:

I shall be ready to carry on the negotiations as soon

as the necessary arrangements can be perfected in London and Paris, so that the conventions may be signed simultaneously at those two capitals.

I need scarcely add that on the part of Great Britain the engagement will be prospective, and will not invalidate any thing already done.

Mr. Seward's opinion of this qualification of Lord John Russell appears in a letter addressed to Mr. Adams on the 17th of August, in which he writes thus:

Your letter to Lord John Russell is judicious, and is approved. Lord John Russell's answer is satisfactory, with the exception of a single passage, upon which it is my duty to instruct you to ask the British Secretary for Foreign Affairs for an explanation. That passage is as follows:

"I need scarcely add that on the part of Great Britain the engagement will be prospective, and will not invalidate any thing already done."

A brief statement of the objects of the proposed negotiation will bring the necessity for an explanation of this passage into a strong light. We have heretofore proposed to other maritime States certain meliorations of the laws of maritime war affecting the rights of neutrals. These meliorations are: 1st. That the neutral flag shall protect enemy's goods not contraband of war. 2d. That the goods of neutrals, not contraband, though found under an enemy's flag, shall not be confiscated. 3d. That blockades, to be respected, must be effective.

The Congress at Paris adopted these three principles, adding a fourth, namely, that privateering shall be abolished. The powers which constituted that congress invited the adhesion of the United States to that declaration. The United States answered that they would accede on condition that the other powers would accept a fifth proposition, namely, that the goods of private persons, non-combatants, should be exempt from confiscation in maritime war.

When this answer was given by the United States, the British Government declined to accept the proposed amendment, or fifth proposition, thus offered by the United States, and the negotiation was then suspended. We have now proposed to resume the negotiation, offering our adhesion to the declaration of Paris, as before, with the amendment which would exempt private property from confiscation in maritime war.

The British Government now, as before, declares this amendment or fifth proposition inadmissible. It results that, if the United States can at all become a party to the declaration of the Congress of Paris by the necessary consent of the parties already committed to it, this can be done only by their accepting that declaration without any amendment whatever—in other words, "pure and simple." Under these circumstances you have proposed in your letter to Lord John Russell to negotiate our adhesion to the declaration in that form. It is at this stage of the affair that Lord John Russell interposes, by way of caution, the remark, that "on the part of Great Britain the engagement will be prospective, and will not invalidate any thing already done."

I need dwell on this remark only one moment to show that, although expressed in a very simple form and in a quite casual manner, it contains what amounts to a preliminary condition, which must be conceded by the United States to Great Britain, and either be inserted in the convention, and so modify our adhesion to the declaration of Paris, or else must be in some confidential manner implied and reserved, with the same effect.

The letter then enlarges upon the possible meaning and object of the British Government without arriving at a satisfactory impression, and concludes with instructions to Mr. Adams to request respectfully, and with reasonable prompt-

ness, an explanation. This had been previously done, and Lord John Russell's explanation was given on the 19th of August, in a letter to Mr. Adams:

SIR: I have the honor to enclose a copy of a declaration which I propose to make upon signing the convention of which you gave me a draft embodying the articles of the declaration of Paris.

I propose to make the declaration in question in a written form, and to furnish you with a copy of it.

You will observe that it is intended to prevent any misconception as to the nature of the engagement to be taken by her Majesty.

If you have no objection to name a day in the course of this week for the signature of the convention, Mr. Dayton can on that day, and at the same time, sign with M. Thouvenel a convention identical with that which you propose to sign with me.

Draft of Declaration.—In affixing his signature to the convention of this day between her Majesty the Queen of Great Britain and Ireland, and the United States of America, the Earl Russell declares, by order of her Majesty, that her Majesty does not intend thereby to undertake any engagement which shall have any bearing, direct or indirect, on the internal differences now prevailing in the United States.

Mr. Adams writes to Mr. Seward in August 23d, that this proceeding was "of so grave and novel a character as to render further action unadvisable until he obtained further instructions." The reply of Mr. Seward to this declaration, and the course decided upon by the Government, are stated by Mr. Seward in a letter to Mr. Adams dated September 7th:

I am instructed by the President to say that the proposed declaration is inadmissible.

It would be virtually a new and distinct article incorporated into the projected convention. To admit such a new article would, for the first time in the history of the United States, be to permit a foreign power to take cognizance of and adjust its relations upon assumed internal and purely domestic differences existing within our own country.

This broad consideration supersedes any necessity for considering in what manner or in what degree the projected convention, if completed either subject to the explanation proposed or not, would bear directly or indirectly on the internal differences which the British Government assume to be prevailing in the United States.

I do not enlarge upon this branch of the subject. It is enough to say that the view thus adopted by the President seems to be in harmony equally with a prudent regard to the safety of the Republic and a just sense of its honor and dignity.

The proposed declaration is inadmissible, among other reasons, because it is not mutual. It proposes a special rule by which her Majesty's obligations shall be meliorated in their bearing upon internal difficulties now prevailing in the United States, while the obligations to be assumed by the United States shall not be similarly meliorated or at all affected in their bearing on internal differences that may now be prevailing, or may hereafter arise and prevail, in Great Britain.

It is inadmissible, because it would be a substantial and even a radical departure from the declaration of the Congress at Paris. That declaration makes no exception in favor of any of the parties to it in regard to the bearing of their obligations upon internal differences which may prevail in the territories or dominions of other parties.

The declaration of the Congress of Paris is the joint act of forty-six great and enlightened powers, designing to alleviate the evils of maritime war, and promote the first interest of humanity, which is peace. The Government of Great Britain will not, I am sure, ex-

pect us to accede to this noble act otherwise than upon the same equal footing upon which all the other parties to it are standing. We could not consent to accede to the declaration with a modification of its terms unless all the present parties to it should stipulate that the modification should be adopted as one of universal application. The British Government cannot but know that there would be little prospect of an entire reformation of the declaration of Paris at the present time, and it has not even told us that it would accept the modification as a general one if it were proposed.

It results that the United States must accede to the declaration of the Congress of Paris on the same terms with all the other parties to it, or that they do not accede to it at all.

Thus ended this negotiation, and the question arises, says Mr. Seward—

What, then, are to be the views and policy of the United States in regard to the rights of neutrals in maritime war in the present case? My previous despatches leave no uncertainty on this point. We regard Great Britain as a friend. Her Majesty's flag, according to our traditional principles, covers enemy's goods not contraband of war. Goods of her Majesty's subjects, not contraband of war, are exempt from confiscation though found under a neutral or disloyal flag. No depredations shall be committed by our naval forces or by those of any of our citizens, so far as we can prevent it, upon the vessels or property of British subjects. Our blockade, being effective, must be respected.

The unfortunate failure of our negotiations to amend the law of nations in regard to maritime war does not make us enemies, although, if they had been successful, we should have perhaps been more assured friends.

The reasons for inserting the declaration proposed by Lord John Russell in the convention contemplated with the United States, are stated by him in a letter to Mr. Adams dated August 28th:

The undersigned has notified Mr. Adams his intention to accompany his signature of the proposed convention with a declaration to the effect that her Majesty "does not intend thereby to undertake any engagement which shall have any bearing, direct or indirect, on the internal differences now prevailing in the United States."

The reasons for this course can be easily explained. On some recent occasions, as on the fulfilment of the treaty of 1846, respecting the boundary, and with respect to the treaty called by the name of the "Clayton-Bulwer treaty," serious differences have arisen with regard to the precise meaning of words, and the intention of those who framed them.

It was most desirable in framing a new agreement not to give rise to a fresh dispute.

But the different attitude of Great Britain and of the United States in regard to the internal dissensions now unhappily prevailing in the United States, gave warning that such a dispute might arise out of the proposed convention.

Her Majesty's Government, upon receiving intelligence that the President had declared by proclamation his intention to blockade the ports of nine of the States of the Union, and that Mr. Davis, speaking in the name of those nine States, had declared his intention to issue letters of marque and reprisals; and having also received certain information of the design of both sides to arm, had come to the conclusion that civil war existed in America, and her Majesty had thereupon proclaimed her neutrality in the approaching contest.

The Government of the United States, on the other hand, spoke only of unlawful combinations, and designated those concerned in them as rebels and pirates. It would follow logically and consistently, from the

attitude taken by her Majesty's Government, that the so-called Confederate States, being acknowledged as a belligerent, might, by the law of nations, arm privateers, and that their privateers must be regarded as the armed vessels of a belligerent.

With equal logic and consistency it would follow, from the position taken by the United States, that the privateers of the Southern States might be decreed to be pirates, and it might be further argued by the Government of the United States that a European power signing a convention with the United States, declaring that privateering was and remains abolished, would be bound to treat the privateers of the so-called Confederate States as pirates.

Hence, instead of an agreement, charges of bad faith and violation of a convention might be brought in the United States against the power signing such a convention, and treating the privateers of the so-called Confederate States as those of a belligerent power.

The undersigned had at first intended to make verbally the declaration proposed. But he considered it would be more clear, more open, more fair to Mr. Adams to put the declaration in writing, and give notice of it to Mr. Adams before signing the convention.

The remainder of this extensive correspondence with the British Government is devoted to the cases of individuals and of vessels supposed to have infringed upon the strict laws of neutrality; and although many interesting topics were discussed, no important principle was disputed. For correspondence on the capture of Mason and Slidell from the steamer *Trent*, see page 276.

France.—The correspondence with the French Government is no less interesting than that with the Government of Great Britain. The letter of instructions to Mr. Dayton, Minister to France, commences with a simple statement of the origin, nature, and purposes of the contest in which the United States was involved. Secretary Seward says: "I have thus written only for the purpose of deducing from it the arguments you will find it necessary to employ in opposing the application of the so-called Confederate States to the Government of his Majesty the Emperor, for recognition of its independence and sovereignty." He then proceeds to deduce these arguments:

The President neither expects nor desires any intervention, or even any favor, from the Government of France, or any other, in this emergency. Whatever else he may consent to do, he will never invoke nor even admit foreign interference or influence in this or any other controversy in which the Government of the United States may be engaged with any portion of the American people. It has been simply his aim to show that the present controversy furnishes no one ground on which a great and friendly power, like France, can justly lend aid or sympathy to the party engaged in insurrection, and therefore he instructs you to insist on the practice of neutrality by the Government of the Emperor, as all our representatives are instructed to insist on the neutrality of the several powers to which they are accredited.

Not entertaining the least apprehension of the departure from that course by his Majesty's Government, it is not without some reluctance that the President consents to the suggestion of some considerations affecting France herself, which you may urge in support of it. France is an agricultural and manufacturing country. Her industry depends very largely on a consumption of her productions and fabrics within the United States, and on the receipt, in exchange, of cotton, or other staples, or their equivalent in money, from the United States. The ability of the United States to thus consume and furnish depends on their ability to maintain and preserve peace. War here will

in any case be less flagrant, and peace, when broken, will be restored all the more quickly and all the more perfectly if foreign nations shall have the sagacity, not to say the magnanimity, to practise the neutrality we demand.

Foreign intervention would oblige us to treat those who should yield it as allies of the insurrectionary party, and to carry on the war against them as enemies. The case would not be relieved, but, on the contrary, would only be aggravated, if several European States should combine in that intervention. The President and the people of the United States deem the Union, which would then be at stake, worth all the cost and all the sacrifices of a contest with the world in arms, if such a contest should prove inevitable.

However other European powers may mistake, his Majesty is the last one of those sovereigns to misapprehend the nature of this controversy. He knows that the revolution of 1775 in this country was a successful contest of the great American idea of free popular government against resisting prejudices and errors. He knows that the conflict awakened the sympathies of mankind, and that ultimately the triumph of that idea has been hailed by all European nations. He knows at what cost European nations resisted for a time the progress of that idea, and perhaps is not unwilling to confess how much France, especially, has profited by it. He will not fail to recognize the presence of that one great idea in the present conflict, nor will he mistake the side on which it will be found. It is, in short, the very principle of universal suffrage, with its claim to obedience to its decrees, on which the Government of France is built, that is put in issue by the insurrection here, and is in this emergency to be vindicated, and, more effectually than ever, established by the Government of the United States.

I forbear from treating of questions arising out of the revenue laws of the United States, which lately have been supposed to have some bearing on the subject. They have already passed away before the proclamation of the blockade of ports in the hands of the revolutionary party. Nor could considerations so merely mercenary and ephemeral in any case enter into the counsels of the Emperor of France.

You will, naturally enough, be asked what is the President's expectation concerning the progress of the contest and the prospect of its termination. It is, of course, impossible to speculate, with any confidence, upon the course of a revolution, and to fix times and seasons for the occurrence of political events affected by the excitement of popular passions; but there are two things which may be assumed as certain: First, That the union of these States is an object of supreme and undying devotion on the part of the American people, and, therefore, it will be vindicated and maintained. Secondly, The American people, notwithstanding any temporary disturbance of their equanimity, are yet a sagacious and practical people, and less experience of evils than any other nation would require will bring them back to their customary and habitual exercise of reason and reflection, and, through that process, to the settlement of the controversy without further devastation and demoralization by needless continuance in a state of civil war.

The President recognizes, to a certain extent, the European idea of the balance of power. If the principle has any foundation at all, the independence and the stability of these United States just in their present form, properties, and character, are essential to the preservation of the balance between the nations of the earth as it now exists. It is not easy to see how France, Great Britain, Russia, or even reviving Spain, could hope to suppress wars of ambition which must inevitably break out if this continent of North America, now, after the exclusion of foreign interests for three-quarters of a century, is again to become a theatre for the ambition and cupidity of European nations.

It stands forth now to the glory of France that she contributed to the emancipation of this continent from

the control of European States—an emancipation which has rendered only less benefit to those nations than to America itself. The present enlightened monarch of France is too ambitious, in the generous sense of the word, to signalize his reign by an attempt to reverse that great and magnanimous transaction. He is, moreover, too wise not to understand that the safety and advancement of the United States are guaranteed by the necessities, and, therefore, by the sympathies of mankind.

On the 19th of March Mr. Faulkner replies to the letter of Mr. Black, dated February 28th. In this answer he thus describes the views and intentions of the French Government:

I have no hesitation in expressing it as my opinion, founded upon frequent general interviews with the Emperor, although in no instance touching this particular point, that France will act upon this delicate question when it shall be presented to her consideration in the spirit of a most friendly power; that she will be the last of the great States of Europe to give a hasty encouragement to the dismemberment of the Union, or to afford to the Government of the United States, in the contingency to which you refer, any just cause of complaint. The unhappy divisions which have afflicted our country have attracted the Emperor's earnest attention since the first of January last, and he has never, but upon one occasion of our meeting since, failed to make them the subject of friendly inquiry, and often of comment. He looks upon the dismemberment of the American Confederacy with no pleasure, but as a calamity to be deplored by every enlightened friend of human progress. And he would act, not only in conflict with sentiments often expressed, but in opposition to the well-understood feelings of the French people, if he should precipitately adopt any step whatever tending to give force and efficacy to those movements of separation, so long as a reasonable hope remains that the Federal authority can or should be maintained over the seceding States.

The Emperor Napoleon has no selfish purpose to accomplish by the dismemberment of the American Union. As he has upon more than one occasion said to me, "There are no points of collision between France and the United States; their interests are harmonious, and they point to one policy, the closest friendship, and the freest commercial intercourse." He knows full well that the greatness of our republic cannot endanger the stability of his throne, or cast a shadow over the glory of France. He would rather see us united and powerful than dissevered and weak. He is too enlightened to misapprehend the spirit of conciliation which now actuates the conduct of the Federal authorities. He knows that appeals to the public judgment perform that function in our republic which is elsewhere only accomplished by brute force. And if armies have not been marshalled, as they would have been ere this in Europe, to give effect to the Federal authority, he is aware that it is not because the General Government disclaims authority over the seceding States, or is destitute of the means and resources of war, but from an enlightened conviction on its part that time and reflection will be more efficacious than arms in reestablishing the Federal authority, and restoring that sentiment of loyalty to the Union which was once the pride of every American heart.

I have not, so far, heard that any commissioners have been sent by the seceding States to France. Should they, as you anticipate, arrive shortly, I think I am not mistaken in saying that they will find that the Imperial Government is not yet prepared to look favorably upon the object of this mission.

Again, on the 15th of April, Mr. Faulkner describes to Mr. Seward his interview with the French Minister of Foreign Affairs, M. Thouvenel. In reply to the request of Mr. Faulkner that no proposition recognizing the permanent

dismemberment of the American Union should be considered by the French Government until after the arrival and reception of the new Minister accredited by the United States, M. Thouvenel said:

That no application had yet been made to him by the Confederate States, in any form, for the recognition of their independence; that the French Government was not in the habit of acting hastily upon such questions, as might be seen by its tardiness in recognizing the new kingdom of Italy; that he believed the maintenance of the Federal Union, in its integrity, was to be desired for the benefit of the people North and South, as well as for the interests of France, and the Government of the United States might rest well assured that no hasty or precipitate action would be taken on that subject by the Emperor. But whilst he gave utterance of these views, he was equally bound to say that the practice and usage of the present century had fully established the right of *de facto* Governments to recognition when a proper case was made out for the decision of foreign powers. Here the official interview ended.

The conversation was then further protracted by an inquiry from M. Thouvenel when the new tariff would go into operation, and whether it was to be regarded as the settled policy of the Government. I told him that the first day of the present month had been prescribed as the period when the new duties would take effect; that I had not yet examined its provisions with such care as would justify me in pronouncing an opinion upon its merits; that it was condemned by the commercial classes of the country, and that I had no doubt, from the discontent manifested in several quarters, that the subject would engage the attention of Congress at its next meeting, and probably some important modifications would be made in it. The finances of the Government were at this time temporarily embarrassed, and I had no doubt the provisions of the new tariff were adopted with a view, although probably a mistaken one, of sustaining the credit of the treasury as much as of reviving the protective policy. He then asked me my opinion as to the course of policy that would be adopted towards the seceding States, and whether I thought force would be employed to coerce them into submission to the Federal authority. I told him that I could only give him my individual opinion, and that I thought force would not be employed; that ours was a Government of public opinion, and although the Union unquestionably possessed all the ordinary powers necessary for its preservation, as had been shown in several partial insurrections which had occurred in our history, yet that the extreme powers of Government could only be used in accordance with public opinion, and that I was satisfied that the sentiment of the people was opposed to the employment of force against the seceding States. So sincere was the deference felt in that country for the great principles of self-government, and so great the respect for the action of the people, when adopted under the imposing forms of State organization and State sovereignty, that I did not think the employment of force would be tolerated for a moment, and I thought the only solution of our difficulties would be found in such modifications of our constitutional compact as would invite the seceding States back into the Union or a peaceable acquiescence in the assertion of their claims to a separate sovereignty.

On the 4th of May Mr. Seward writes to Mr. Dayton that the question had been asked of Mr. Faulkner by M. Thouvenel, whether there was not some diversity of opinion in the cabinet of the President as to the proper mode of meeting the difficulties which disturbed the relations of the States and the General Government. He instructs Mr. Dayton to recall that conversation and to assure M. Thouvenel explicitly that there

was no difference of opinion whatever between the President and his constitutional advisers, or among those advisers themselves, concerning the policy that had been pursued, and which was prosecuted by the Administration in regard to the unhappy disturbances existing in the country. The path of executive duty has thus far been too plainly marked out by stern necessities to be mistaken, while the solemnity of the great emergency and the responsibilities it devolves have extinguished in the public councils every emotion but those of loyalty and patriotism. It is not in the hands of this Administration that this Government is to come to an end at all—much less for want of harmony and devotion to the country. He further adds:

You cannot be too decided or too explicit in making known to the French Government that there is not now, nor has there been, nor will there be, any the least idea existing in this Government of suffering a dissolution of this Union to take place in any way whatever.

There will be here only one nation and one Government, and there will be the same republic, and the same constitutional Union that have already survived a dozen national changes, and changes of government in almost every other country. These will stand hereafter, as they are now, objects of human wonder and human affection.

You have seen, on the eve of your departure, the elasticity of the national spirit, the vigor of the national Government, and the lavish devotion of the national treasures to this great cause. Tell M. Thouvenel, then, with the highest consideration and good feeling, that the thought of a dissolution of this Union, peaceably or by force, has never entered into the mind of any candid statesman here, and it is high time that it be dismissed by statesmen in Europe.

Again, on the 22d of May Mr. Dayton reports his arrival at Paris, and his first interview with the French Minister on the 16th. He thus relates the conversation:

M. Thouvenel, in the course of the conversation, took occasion to say that he deeply regretted the condition of things in the United States, and that in this expression of feeling he represented the views and feelings of the Emperor; that so deeply concerned was the Emperor that he had felt disposed to offer his good offices, but had been deterred from the fear that his offer might not be well received; but should occasion for this arise, he would always be ready and happy to be of use. He made special inquiry as to the policy of our Government in regard to neutral rights, particularly in reference to neutral property found in Southern ships. He went into considerable detail to show that historical precedents were in favor of treating Southern vessels as those of a regular belligerent, and applying the same doctrine to them as had always been upheld by the United States. He dwelt particularly upon the fact that Great Britain, during our revolutionary war, had not considered our privateers as pirates. I understood him to say that, as respects an effective blockade, it would be fully recognized and respected; but he seemed much impressed with the importance of understanding clearly the intentions of our Government in reference to these matters as respects the foreign world.

The recognition of the Southern Confederates as possessing belligerent rights he did not consider at all as recognizing them as independent States.

On the next day he was received by the Emperor, who said in substance: "That he felt great interest in the condition of things in the United States; that he was very anxious the

difficulties should be settled amicably; that he had been and yet was ready to offer his kind offices, if such offer would be mutually agreeable to the contending parties; that whatever tended to affect injuriously American interests was detrimental to the interests of France, and that he desired a perpetuation of the Union of the States," with some additional remarks of like tenor and character.

On the 20th of May another interview with the French Minister was had, in which the conversation turned on "neutral rights" and "belligerent rights." Mr. Dayton thus describes it:

He said, in substance, that they held that the flag covers the cargo; and that if a Southern ship carrying neutral property was captured, the property would not be condemned, &c. He hoped our Government would recognize principles for which it had always contended. I told him it would certainly do so, but the question here was, whether there *was a flag*; that our Government insisted that the Confederates, being merely in rebellion, had no flag, and I could not exactly understand how a foreign Government which had not recognized them as an independent power could recognize them as having a flag. He said, furthermore, that the French Government had given no warning to their citizens, &c., (as the English Government had,) by proclamation, because it was unnecessary; that the statute law of France (of 1825, April 10, I think) declared that any French citizen taking service under a foreign power lost all claim to protection as a citizen; that if a subject of France should take service on board of a letter of marque licensed by the Confederate States, it would be, as I understood him, piratical on the part of such subject. He said, furthermore, that no letters of marque could be fitted out in their ports, or *even sheltered* there, unless they came in from necessity, (as stress of weather, &c.,) and then could remain, I think, but twenty-four hours; that consequently there could be no bringing of prizes into French ports, and while there a condemnation of them in the courts of the Southern States.

On the 30th of May, Mr. Seward, writing to Mr. Dayton, alludes to the conversation between Mr. Faulkner and M. Thouvenel, in which it was said by the latter, "that in view of the great commercial interests involved in the domestic controversy agitating the United States, the French Government had felt itself constrained to take measures in conjunction with the Government of Great Britain to meet a condition of things which imperilled those interests. Communications of a similar tenor would be addressed by both Governments to the Government of the United States," &c. The occasion is thus taken to state more explicitly the position of the United States. Mr. Seward writes:

First, I desire that M. Thouvenel may be informed that this Government cannot but regard any communications held by the French Government, even though unofficial, with the agents of the insurrectionary movement in this country as exceptionable and injurious to the dignity and honor of the United States. They protest against this intercourse, however, not so much on that ground as on another. They desire to maintain the most cordial relations with the Government of France, and would therefore, if possible, refrain from complaint. But it is manifest that even an unofficial reception of the emissaries of disunion has a certain though measured tendency to give them a prestige which would encourage their efforts to prosecute a

civil war destructive to the prosperity of this country and aimed at the overthrow of the Government itself. It is earnestly hoped that this protest may be sufficient to relieve this Government from the necessity of any action on the unpleasant subject to which it relates.

Secondly, The United States cannot for a moment allow the French Government to rest under the delusive belief that they will be content to have the Confederate States recognized as a belligerent power by States with which this nation is in amity. No concert of action among foreign States so recognizing the insurgents can reconcile the United States to such a proceeding, whatever may be the consequences of resistance.

The measures we have adopted, and are now vigorously pursuing, will terminate the unhappy contest at an early day, and be followed by benefits to ourselves and to all nations greater and better assured than those which have hitherto attended our national progress. Nothing is wanting to that success except that foreign nations shall leave us, as is our right, to manage our own affairs in our own way. They, as well as we, can only suffer by their intervention. No one, we are sure, can judge better than the Emperor of France how dangerous and deplorable would be the emergency that should intrude Europeans into the political contests of the American people.

On the 30th of May Mr. Dayton writes to Mr. Seward:

I am happy to say that there is no disposition manifested here, so far as I have observed, to favor the rebellion in our Southern States, or to recognize them as an independent power. All recognition of rights on their part is for commercial purposes only. But the Government of France cannot, it says, look at this rebellion as a small matter. That, embracing as it does a large section and many States, they cannot apply to it the same reasoning as if it were an unimportant matter or confined to a small locality.

M. Thouvenel says he has had no application from Southern Commissioners for any purpose of recognition, and he does not know even that such persons are or have been in Paris.

Again, in June, he writes:

I think I may say with some confidence that all the efforts of the agents of the Confederates on this side of the channel have thus far been abortive. They have no encouragement to their hopes of recognition. They have met with no success in their attempts to negotiate a loan. I do not believe they have got any considerable supply of arms, and I think that we know substantially what they have done and are attempting to do. My only fear is of a possible, not probable, reverse to our arms in Virginia, and a rush, under the excitement of a first victory, upon the city of Washington. Should they get possession, by any possibility, of that point, the prestige it would give them (aside from any strategic advantage) might be productive of most unhappy results. God grant that no such future may hang over us.

On the 31st of May Mr. Dayton addressed to M. Thouvenel the proposition for the accession of the United States to the Declaration of the Paris Conference with the amendment proposed by Secretary Marcy.

On the 17th of June Mr. Seward informs Mr. Dayton of the visit of the British and French Ministers to lay before him conjointly certain views of their respective Governments, and that he declined to receive the same officially, and his reasons for adopting this course. The entire despatch is one of the ablest in the correspondence with the French Government, and explains very fully the views entertained by

the Government relative to the Confederate States:

Every instruction which this Government has given to its representatives abroad, since the recent change of Administration took place, has expressed our profound anxiety lest the disloyal citizens who are engaged in an attempt to overthrow the Union should obtain aid and assistance from foreign nations, either in the form of a recognition of their pretended sovereignty, or in some other and more qualified or guarded manner. Every instruction has expressed our full belief that, without such aid or assistance, the insurrection would speedily come to an end, while any advantage that it could derive from such aid or assistance could serve no other purpose than to protract the existing struggle and aggravate the evils it is inflicting on our own country and on foreign and friendly nations. Every instruction bears evidence of an earnest solicitude to avoid even an appearance of menace or of want of comity towards foreign powers; but at the same time it has emphatically announced, as is now seen to have been necessary, our purpose not to allow any one of them to expect to remain in friendship with us if it should, with whatever motive, practically render such aid or assistance to the insurgents. We have intended not to leave it doubtful that a concession of sovereignty to the insurgents, though it should be indirect or unofficial, or though it should be qualified so as to concede only belligerent or other partial rights, would be regarded as inconsistent with the relations due to us by friendly nations. Nor has it been left at all uncertain that we shall, in every event, insist that these United States must be considered and dealt with now, as heretofore, by such nations as exclusively sovereign for all purposes whatsoever within the territories over which the Constitution has been extended. On the other hand we have not, at any time, been unmindful of the peculiar circumstances which might excite apprehensions on the part of commercial nations for the safety of their subjects and their property in the conflicts which might occur upon sea as well as on land between the forces of the United States and those of the insurgents.

The United States have never disclaimed the employment of letters of marque as a means of maritime war. The insurgents early announced their intention to commission privateers. We knew that friendly nations would be anxious for guarantees of safety from injury by that form of depredation upon the national commerce. We knew also that such nations would desire to be informed whether their flags should be regarded as protecting goods, not contraband of war, of disloyal citizens, found under them, and whether the goods, not contraband, of subjects of such nations would be safe from confiscation when found in vessels of disloyal citizens of the United States. This Administration, free from some of the complications of those which had preceded it, promptly took up the negotiations relating to the declaration of the Congress of Paris, just at the point where they had been suspended by President Buchanan. We found it just and humane in itself so far as it goes, and that it had only failed to be accepted by the United States because foreign nations had refused to accept an additional principle proposed by this Government, yet more just and humane than any which it does contain, namely, that the property of private citizens, not contraband, should be exempted from confiscation in maritime war. While still willing and desirous to have that further principle incorporated in the law of nations, we nevertheless instructed you, and all our representatives in foreign countries, to waive it, if necessary, and to stipulate, subject to the concurrence of the Senate of the United States, our adhesion to the declaration of the Congress of Paris as a whole and unmodified. This was done so early as the 25th day of April last, long before the date of the instructions which Mr. Mercier proposed to submit to us. We have ever since that time been waiting for the responses of foreign powers to this high and liberal demonstration on our part. We have,

however, received no decisive answers on the subject from those powers.

It was under these circumstances that, on the 15th day of June instant, the Minister from France and the Minister from Great Britain, having previously requested an interview, were received by me. Each of them announced that he was charged by his Government to read a despatch to me and to give me a copy if I should desire it.

I answered that, owing to the peculiar circumstances of the times, I could not consent to an official reading or delivery of these papers without first knowing their characters and objects. They confidentially and with entire frankness put the despatches into my hands for an informal preliminary examination. Having thus become possessed of their characters, I replied to those Ministers that I could not allow them to be officially communicated to this Government. They will doubtless mention this answer to their respective States.

I give you now the reasons of this Government for pursuing this course in regard to the despatch from France, that you may communicate them to the French Government, if you shall find it necessary or expedient.

Some time ago we learned, through our legation at St. Petersburg, that an understanding had been effected between the Governments of Great Britain and France that they should take one and the same course on the subject of the political disturbances in this country, including the possible recognition of the insurgents. At a later period this understanding was distinctly avowed by M. Thouvenel to Mr. Sanford, who had been informally introduced by me to the French Minister for Foreign Affairs, and by Lord John Russell to Mr. Dallas, our late Minister in London. The avowal in each case preceded the arrival of our newly appointed Ministers in Europe, with their instructions for the discharge of their respective missions.

On receiving their avowals I immediately instructed yourself and Mr. Adams "that although we might have expected a different course on the part of these two great powers, yet, as the fact that an understanding existed between them did not certainly imply an unfriendly spirit, we should not complain of it, but that it must be understood by the French and British Governments that we shall deal hereafter, as heretofore, in this case, as in all others, with each power separately, and that the agreement for concerted action between them would not at all influence the course we should pursue." The concert thus avowed has been carried out. The Ministers came to me together; the instructions they proposed to me differ in form, but are counterparts in effect.

Adhering to our previous decision, which before this time has doubtless been made known to the Government of France, we do not make this concert, under the circumstances, a reason for declining to hear the instruction with which Mr. Mercier is charged.

That paper does not expressly deny the sovereignty of the United States of America, but it does assume, inconsistently with that sovereignty, that the United States are not altogether and for all purposes one sovereign power, but that this nation consists of two parties, of which this Government is one. France proposes to take cognizance of both parties as belligerents, and for some purposes to hold communication with each. The instruction would advise us indeed that we must not be surprised if France shall address herself to a Government which she says is to be installed at Montgomery for certain explanations. This intimation is conclusive in determining this Government not to allow the instruction to be read to it.

The United States, rightly jealous, as we think, of their sovereignty, cannot suffer themselves to debate any abridgment of that sovereignty with France or with any other nation. Much less can they consent that France shall announce to them a conclusion of her own against that sovereignty, which conclusion France has adopted without any previous conference with the

United States on the subject. This Government insists that the United States are one whole undivided nation, especially so far as foreign nations are concerned, and that France is, by the law of nations and by treaties, not a neutral power between two imaginary parties here, but a friend of the United States.

In the spirit of this understanding of the case, we are not only not wishing to seek or to give offence to France, but, on the contrary, we desire to preserve peace and friendship with that great power, as with all other nations. We do not feel at liberty to think, and do not think, that France intended any want of consideration towards the United States in directing that the instruction in question should be read to us. Outside of that paper we have abundant evidence of the good feeling and good wishes of the Emperor, and even his anxious solicitude for the same consummation which is the supreme object of our own desires and labors, namely, the preservation of the American Union in its full and absolute integrity.

Doubtless the proceeding has been the result of inadvertence. We feel ourselves at liberty to think that it would not have occurred if we had been so fortunate as to have been heard through you in the consultations of the French Government. We think we can easily see how the inadvertence has occurred. France seems to have mistaken a mere casual and ephemeral insurrection here, such as is incidental in the experience of all nations, because all nations are merely human societies, such as have sometimes happened in the history of France herself, for a war which has flagrantly separated this nation into two coexisting political powers which are contending in arms against each other after the separation.

It is erroneous, so far as foreign nations are concerned, to suppose that any war exists in the United States. Certainly there cannot be two belligerent powers where there is no war. There is here, as there has always been, one political power, namely, the United States of America, competent to make war and peace, and conduct commerce and alliances with all foreign nations. There is none other, either in fact, or recognized by foreign nations. There is, indeed, an armed sedition seeking to overthrow the Government, and the Government is employing military and naval forces to repress it. But these facts do not constitute a war presenting two belligerent powers, and modifying the national character, rights, and responsibilities, or the characters, rights, and responsibilities of foreign nations. It is true that insurrection may ripen into revolution, and that revolution thus ripened may extinguish a previously existing State, or divide it into one or more independent States, and that if such States continue their strife after such division, then there exists a state of war affecting the characters, rights, and duties of all parties concerned. But this only happens when the revolution has run its successful course.

The French Government says, in the instruction which has been tendered to us, that certain facts which it assumes confer upon the insurgents of this country, in the eyes of foreign powers, all the appearances of a government *de facto*; wherefore, whatever may be its regrets, the French Government must consider the two contending parties as employing the forces at their disposal in conformity with the laws of war.

This statement assumes not only that the law of nations entitles any insurrectionary faction, when it establishes a *de facto* government, to be treated as a belligerent, but also that the fact of the attainment of this status is to be determined by the appearance of it in the eyes of foreign nations. If we should concede both of these positions, we should still insist that the existence of a *de facto* government, entitled to belligerent rights, is not established in the present case. We have already heard from most of the foreign nations. There are only two which seem so to construe appearances, and France is one of them. Are the judgments of these two to outweigh those of all other nations? Doubtless each nation may judge and act

for itself, but it certainly cannot expect the United States to accept its decision upon a question vital to their national existence. The United States will not refine upon the question when and how new nations are born out of existing nations. They are well aware that the rights of the States involve their duties and their destinies, and they hold those rights to be absolute as against all foreign nations. These rights do not at all depend on the appearances which their condition may assume in the eyes of foreign nations, whether strangers, neutrals, friends, or even allies. The United States will maintain and defend their sovereignty throughout the bounds of the republic, and they deem all other nations bound to respect that sovereignty until, if ever, Providence shall consent that it shall be successfully overthrown. Any system of public law or national morality that conflicts with this would resolve society, first in this hemisphere and then in the other, into anarchy and chaos.

This Government is sensible of the importance of the step it takes in declining to hear the communication the tender of which has drawn out these explanations. It believes, however, that it need not disturb the good relations which have so long and so happily subsisted between the United States and France.

The paper, as understood, while implying a disposition on the part of France to accord belligerent rights to the insurgents, does not name, specify, or even indicate one such belligerent right. On the other hand, the rights which it asserts that France expects, as a neutral, from the United States, as a belligerent, are even less than this Government, on the 25th of April, instructed you to concede and guarantee to her by treaty, as a friend. On that day we offered to her our adhesion to the declaration of Paris, which contains four propositions, namely: 1st. That privateering shall be abolished. 2d. That a neutral flag covers enemy's goods not contraband of war. 3d. That goods of a neutral, not contraband, shall not be confiscated though found in an enemy's vessel. 4th. That blockades, in order to be lawful, must be maintained by competent force. We have always, when at war, conceded the three last of these rights to neutrals; *a fortiori*, we could not when at peace deny them to friendly nations. The first-named concession was proposed on the grounds already mentioned. We are still ready to guarantee these rights, by convention with France, whenever she shall authorize either you or her Minister here to enter into convention. There is no reservation or difficulty about their application in the present case. We hold all the citizens of the United States, loyal or disloyal, alike included by the law of nations and treaties; and we hold ourselves bound by the same obligations to see, so far as may be in our power, that all our citizens, whether maintaining this Government or engaged in overthrowing it, respect those rights in favor of France and of every other friendly nation. In any case, not only shall we allow no privateer or national vessel to violate the rights of friendly nations as I have thus described them, but we shall also employ all our naval force to prevent the insurgents from violating them just as much as we do to prevent them from violating the laws of our own country.

What, then, does France claim of us that we do not accord to her? Nothing. What do we refuse to France by declining to receive the communication sent to us through the hands of Mr. Mercier? Nothing but the privilege of telling us that we are at war, when we maintain we are at peace, and that she is a neutral, when we prefer to recognize her as a friend.

Of course, it is understood that on this occasion we reserve, as on all others, our right to suppress the insurrection by naval as well as by military power, and for that purpose to close such of our ports as have fallen or may fall into the hands of the insurgents, either directly or in the more lenient and equitable form of a blockade, which for the present we have adopted. It is thus seen that there is no practical subject of difference between the two Governments. The United States will hope that France will not think

it necessary to adhere to and practise upon the speculation concerning the condition of our internal affairs which she has proposed to communicate to us. But however this may be, the United States will not anticipate any occasion for a change of the relations which, with scarcely any interruption, have existed between the two nations for three-quarters of a century, and have been very instrumental in promoting, not merely the prosperity and greatness of each State, but the cause of civil and religious liberty and free institutions throughout the world.

This Government understands equally the interest of friendly nations and its own in the present emergency. If they shall not interfere, the attempt at revolution here will cease without inflicting serious evils upon foreign nations. All that they can do by any interference, with a view to modify our action, will only serve to prolong the present unpleasant condition of things, and possibly to produce results that would be as universally calamitous as they would be irretrievable.

The case, as it now stands, is the simple, ordinary one that has happened at all times and in all countries. A discontented domestic faction seeks foreign intervention to overthrow the Constitution and the liberties of its own country. Such intervention, if yielded, is ultimately disastrous to the cause it is designed to aid. Every uncorrupted nation, in its deliberate moments, prefers its own integrity, even with unbearable evils, to division through the power or influence of any foreign State. This is so in France. It is not less so in this country. Down deep in the heart of the American people—deeper than the love of trade, or of freedom—deeper than the attachment to any local or sectional interest, or partisan pride or individual ambition—deeper than any other sentiment—is that one out of which the Constitution of this Union arose, namely, American independence—independence of all foreign control, alliance, or influence. Next above it lies the conviction that neither peace, nor safety, nor public liberty, nor prosperity, nor greatness, nor empire, can be attained here with the sacrifice of the unity of the people of North America. Those who, in a frenzy of passion, are building expectations on other principles, do not know what they are doing. Whenever one part of this Union shall be found assuming bonds of dependence or of fraternity towards any foreign people, to the exclusion of the sympathies of their native land, then, even if not before, that spirit will be reawakened which brought the States of this republic into existence, and which will preserve them united until the common destiny which it opened to them shall be fully and completely realized.

On the 6th of July, writing to Mr. Dayton, Mr. Seward gives the reasons why a speedy adhesion to the declaration of the Paris Congress had been desired. This letter presents also the aspect of the question of neutral rights as viewed by our Government, and was intended when written to be regarded as a private communication between himself and Mr. Dayton.

The reason why we wished it done immediately was, that we supposed the French Government would naturally feel a deep anxiety about the safety of their commerce, threatened distinctly with privateering by the insurgents, while at the same time, as this Government had heretofore persistently declined to relinquish the right of issuing letters of marque, it would be apprehended by France that we too should take up that form of maritime warfare in the present domestic controversy. We apprehended that the danger of such a case of depredation upon commerce equally by the Government itself, and by its enemies, would operate as a provocation to France and other commercial nations to recognize the insurrectionary party in violation of our national rights and sovereignty. On the contrary, we did not desire to depredate on friendly commerce ourselves, and we thought it our duty to

prevent such depredations by the insurgents by executing our own laws, which make privateering by disloyal citizens piracy, and punish its pursuit as such. We thought it wise, just, and prudent to give, unasked, guarantees to France and other friendly nations for the security of their commerce from exposure to such depredations on either side, at the very moment when we were delivering to them our protest against the recognition of the insurgents. The accession to the declaration of Paris would be the form in which these guarantees could be given—that for obvious reasons must be more unobjectionable to France and to other commercial nations than any other. It was safe on our part, because we tendered it, of course, as the act of this Federal Government, to be obligatory equally upon disloyal as upon loyal citizens.

The instructions waived the Marcy amendment, (which proposed to exempt private property from confiscation in maritime war,) and required you to propose our accession to the declaration of the Congress of Paris, pure and simple. These were the reasons for this course, namely: First, it was as well understood by this Government then, as it is now by yourself, that an article of that celebrated declaration prohibits every one of the parties to it from negotiating upon the subject of neutral rights in maritime warfare with any nation not a party to it, except for the adhesion of such outstanding party to the declaration of the Congress of Paris, pure and simple. An attempt to obtain an acceptance of Mr. Marcy's amendment would require a negotiation not merely with France alone, but with all the other original parties of the Congress of Paris, and every Government that has since acceded to the declaration. Nay, more: we must obtain their unanimous consent to the amendment before being able to commit ourselves or to engage any other nation, however well disposed, to commit itself to us on the propositions actually contained in the declaration. On the other hand, each nation which is a party to the declaration of Paris is at liberty to stipulate singly with us for acceptance of that declaration for the government of our neutral relations. If, therefore, we should waive the Marcy proposition, or leave it for ultimate consideration, we could establish a complete agreement between ourselves and France on a subject which, if it should be left open, might produce consequences very much to be deprecated. It is almost unnecessary to say that what we proposed to France was equally and simultaneously proposed to every other maritime power. In this way we expected to remove every cause that any foreign power could have for the recognition of the insurgents as a belligerent power.

The matter stood in this plain and intelligible way until certain declarations or expressions of the French Government induced you to believe that they would recognize and treat the insurgents as a distinct national power for belligerent purposes. It was not altogether unreasonable that you, being at Paris, should suppose that this Government would think itself obliged to acquiesce in such a course by the Government of France. So assuming, you thought that we would not adhere to our proposition to accede to the declaration, pure and simple, since such a course would, as you thought, be effective to bind this Government without binding the insurgents, and would leave France at liberty to hold us bound, and the insurgents free from the obligations created by our adhesion. Moreover, if we correctly understand your despatch on that subject, you supposed that you might propose our adhesion to the treaty of Paris, not pure and simple, but with the addition of the Marcy proposition in the first instance, and might afterwards, in case of its being declined in that form, withdraw the addition, and then propose our accession to the declaration of Paris, pure and simple.

While you were acting on these views on your side of the Atlantic, we on this side, not less confident in our strength than in our rights, as you are now aware, were acting on another view, which is altogether different, namely, that we shall not acquiesce in any declaration of the Government of France that assumes that this Government is not now, as it always has been,

exclusive sovereign, for war as well as for peace, within the States and Territories of the Federal Union, and over all citizens, the disloyal and loyal all alike. We treat in that character, which is our legal character, or we do not treat at all, and we in no way consent to compromise that character in the least degree; we do not even suffer this character to become the subject of discussion. Good faith and honor, as well as the same expediency which prompted the proffer of our accession to the declaration of Paris, pure and simple, in the first instance, now require us to adhere to that proposition and abide by it; and we do adhere to it, not, however, as a divided, but as an undivided nation. The proposition is tendered to France not as a neutral but as a friend, and the agreement is to be obligatory upon the United States and France and all their legal dependencies just alike.

The case was peculiar, and in the aspect in which it presented itself to you portentous. We were content that you might risk the experiment, so, however, that you should not bring any responsibility for delay upon this Government. But you now see that by incorporating the Marcy amendment in your proposition, you have encountered the very difficulty which was at first foreseen by us. The following nations are parties to the declaration of Paris, namely: Baden, Bavaria, Belgium, Bremen, Brazil, Duchy of Brunswick, Chili, the Argentine Confederation, the Germanic Confederation, Denmark, the two Sicilies, the Republic of the Equator, the Roman States, Greece, Guatemala, Hayti, Hamburg, Hanover, the two Hesses, Lubeck, Mecklenburgh Strelitz, Mecklenburgh Schwerin, Nassau, Oldenburgh, Parma, Holland, Peru, Portugal, Saxony, Saxe Altenburgh, Saxe Coburg Gotha, Saxe Meinungen, Saxe Weimar, Sweden, Switzerland, Tuscany, Wurtemberg, Anhalt-Dessau, Modena, New Granada, and Uruguay.

The great exigency in our affairs will have passed away—for the preservation or destruction of the American Union—before we could bring all these nations to unanimity on the subject, as you have submitted it to M. Thouvenel. It is a time not for propagandism, but for energetic acting to arrest the worst of all national calamities. We therefore expect you now to renew the proposition in the form originally prescribed. But in doing this you will neither unnecessarily raise a question about the character in which this Government acts, (being exclusive sovereign,) nor, on the other hand, in any way compromise that character in any degree. Whenever such a question occurs to hinder you, let it come up from the other party in the negotiation. It will be time then to stop and wait for such further instructions as the new exigency may require.

One word more. You will, in any case, avow our preference for the proposition with the Marcy amendment incorporated, and will assure the Government of France that whenever there shall be any hope for the adoption of that beneficent feature by the necessary parties, as a principle of the law of nations, we shall be ready not only to agree to it, but even to propose it, and to lead in the necessary negotiations.

On the 2d of August Mr. Dayton proposed to open negotiations with M. Thouvenel relative to the accession of his Government to the declaration of the Paris Congress. On the 22d of August these negotiations had reached a crisis which Mr. Dayton thus reports to Secretary Seward:

My anticipations expressed in despatch No. 10 are fully realized. Both Lord John Russell and M. Thouvenel refuse to negotiate for an accession by the United States to the treaty of Paris of 1856, except on the distinct understanding that it is to have no bearing, directly or indirectly, on the question of our Southern or domestic difficulty, and to render the matter certain they each propose to make a written declaration simultaneous with the execution of the convention, of which I herewith send you a copy and a translation.

I likewise send you a copy of M. Thouvenel's note to me, with its translation.

I had an interview on Tuesday, the 20th instant, with M. Thouvenel by appointment in reference to the subject-matter of the convention, and then he gave me the first notice of the purpose of the French Government to execute this outside declaration, predicated as it was, beyond all doubt, upon a note he had just received from Lord John Russell, dated only the day preceding. He said that both France and Great Britain had already announced that they would take no part in our domestic controversy, and they thought that a frank and open declaration in advance of the execution of this convention might save difficulty and misconception hereafter. He further said, in the way of specification, that the provisions of the treaty standing alone might bind England and France to pursue and punish the privateers of the South as pirates. That they were unwilling to do this, and had already so declared. He said that we could deal with these people as we chose, and they could only express their regrets on the score of humanity if we should deal with them as pirates, but they could not participate in such a course. He said, further, that, although both England and France were anxious to have the adhesion of the United States to the declaration of Paris, they would rather dispense with it altogether than be drawn into our domestic controversy. He insisted somewhat pointedly that I could take no just exception to this outside declaration, simultaneous with the execution of the convention, unless we intended they should be made parties to our controversy; and that the very fact of my hesitation was an additional reason why they should insist upon making such contemporaneous declaration. These are the general views expressed by him.

In answer I assented at once to the propriety of such declaration being made in advance if France and England did not mean to abide by the terms of the treaty. I stated that I had no reason to suppose that the United States desired to embroil these countries in our domestic difficulties—that in point of fact our great desire had been that they should keep out of them; but they proposed now to make a declaration to accompany the execution of the convention which they admitted would vary its obligations. That my instructions were to negotiate that convention, and that I had no authority to do any thing or listen to any thing which would waive any rights or relieve from any obligation which might fairly arise from a just construction of its terms. He said they did not mean to alter its terms, that it was not like an addition of other provisions to the terms of the treaty itself. To this I replied, that for the purpose intended, it was precisely the same as if this declaration they proposed to make were to be incorporated into the treaty itself. In the course of our conversation I told him that any declaration or action which looked to or recognized a difference or distinction between the North and South was a matter upon which our Government was, under the circumstances, peculiarly sensitive; that we treated with foreign Governments for our whole country, North and South, and for all its citizens, whether true men or rebels, and when we could not so treat, we would cease to treat at all. He answered that they did not mean to contest our right to treat for the whole country, and that was not the purpose of the outside declaration they proposed to make; but having heretofore adopted a course of strict neutrality, the declaration in question was right and proper to prevent misconception and controversy in the future.

The reservation which the French Minister proposed to the declaration of the Congress of Paris, was inadmissible. The negotiation on this subject failed. The remainder of the correspondence with the French Government possesses less importance.

The diplomatic correspondence with Russia, although brief, was marked by a very friendly

letter from Prince Gortchakoff to the Russian Minister at Washington, expressive of the views of the Emperor. (See PUBLIC DOCUMENTS.)

The diplomatic correspondence with Spain contains a decree relative to the position of the Spanish Government on American affairs. (See PUBLIC DOCUMENTS.) The King of Portugal issued a similar decree. (See PUBLIC DOCUMENTS.)

The Trent Affair.—Near the close of the year a supplement was added to the correspondence with Great Britain, by the occurrence of the "Trent affair," as it is called. (See TRENT.)

On the 30th of November, Mr. Seward writes to Mr. Adams that Capt. Wilkes, in the steamer *San Jacinto*, had boarded a British colonial steamer, and taken from her deck two insurgents who were proceeding to England on an errand of treason against their own country. He then proceeds:

We have done nothing on the subject to anticipate the discussion, and we have not furnished you with any explanations. We adhere to that course now, because we think it more prudent that the ground taken by the British Government should be first made known to us here, and that the discussion, if there must be one, shall be had here. It is proper, however, that you should know one fact in the case, without indicating that we attach much importance to it, namely, that, in the capture of Messrs. Mason and Slidell on board a British vessel, Captain Wilkes having acted without any instructions from the Government, the subject is therefore free from the embarrassment which might have resulted if the act had been specially directed by us.

Earl Russell on the same day writes to Lord Lyons, the British Minister at Washington, relating the facts of the case as he had received them from the commander of the colonial steamer *Trent*, and thus states the demands of his Government in relation to the matter:

Her Majesty's Government, bearing in mind the friendly relations which have long subsisted between Great Britain and the United States, are willing to believe that the United States naval officer who committed the aggression was not acting in compliance with any authority from his Government, or that if he conceived himself to be so authorized he greatly misunderstood the instructions which he had received. For the Government of the United States must be fully aware that the British Government could not allow such an affront to the national honor to pass without full reparation, and her Majesty's Government are unwilling to believe that it could be the deliberate intention of the Government of the United States unnecessarily to force into discussion between the two Governments a question of so grave a character, and with regard to which the whole British nation would be sure to entertain such unanimity of feeling.

Her Majesty's Government, therefore, trust that when this matter shall have been brought under the consideration of the Government of the United States, that Government will, of its own accord, offer to the British Government such redress as alone could satisfy the British nation, namely, the liberation of the four gentlemen and their delivery to your lordship, in order that they may again be placed under British protection, and a suitable apology for the aggression which has been committed.

Should these terms not be offered by Mr. Seward you will propose them to him.

Later, on the same day, Lord John Russell addressed another note to Lord Lyons, of a private nature, as follows:

In my previous despatch of this date I have instructed you, by command of her Majesty, to make certain demands of the Government of the United States.

Should Mr. Seward ask for delay in order that this grave and painful matter should be deliberately considered, you will consent to a delay not exceeding seven days. If, at the end of that time, no answer is given, or if any other answer is given except that of a compliance with the demands of her Majesty's Government, your lordship is instructed to leave Washington with all the members of your legation, bringing with you the archives of the legation, and to repair immediately to London.

If, however, you should be of opinion that the requirements of her Majesty's Government are substantially complied with, you may report the facts to her Majesty's Government for their consideration, and remain at your post till you receive further orders.

A copy of the first despatch was sent to Mr. Seward by Lord Lyons, who gave him a reply on the 26th of December. After stating the facts in the case, Mr. Seward proceeds thus:

Your lordship will now perceive that the case before us, instead of presenting a merely flagrant act of violence on the part of Captain Wilkes, as might well be inferred from the incomplete statement of it that went up to the British Government, was undertaken as a simple legal and customary belligerent proceeding by Captain Wilkes to arrest and capture a neutral vessel engaged in carrying contraband of war for the use and benefit of the insurgents.

The question before us is, whether this proceeding was authorized by, and conducted according to the law of nations. It involves the following inquiries:

1st. Were the persons named and their supposed despatches contraband of war?

2d. Might Captain Wilkes lawfully stop and search the *Trent* for these contraband persons and despatches?

3d. Did he exercise that right in a lawful and proper manner?

4th. Having found the contraband persons on board and in presumed possession of the contraband despatches, had he a right to capture the persons?

5th. Did he exercise that right of capture in the manner allowed and recognized by the law of nations?

If all these inquiries shall be resolved in the affirmative, the British Government will have no claim for reparation.

The first four questions are briefly answered by himself in the affirmative, and only the fifth remained for consideration. This he examines at some length, and thus draws to a conclusion the most important paper that has emanated from his department:

I trust that I have shown to the satisfaction of the British Government, by a very simple and natural statement of the facts, and analysis of the law applicable to them, that this Government has neither meditated, nor practised, nor approved any deliberate wrong in the transaction to which they have called its attention; and, on the contrary, that what has happened has been simply an inadvertency, consisting in a departure, by the naval officer, free from any wrongful motive, from a rule uncertainly established, and probably by the several parties concerned either imperfectly understood or entirely unknown. For this error the British Government has a right to expect the same reparation that we, as an independent State, should expect from Great Britain or from any other friendly nation in a similar case.

I have not been unaware that, in examining this question, I have fallen into an argument for what seems to be the British side of it against my own country. But I am relieved from all embarrassment on that subject. I had hardly fallen into that line of argument when I discovered that I was really defending and maintain-

ing, not an exclusively British interest, but an old, honored, and cherished American cause, not upon British authorities, but upon principles that constitute a large portion of the distinctive policy by which the United States have developed the resources of a continent, and thus becoming a considerable maritime power, have won the respect and confidence of many nations. These principles were laid down for us in 1804, by James Madison, when Secretary of State in the administration of Thomas Jefferson, in instructions given to James Monroe, our Minister to England. Although the case before him concerned a description of persons different from those who are incidentally the subjects of the present discussion, the ground he assumed then was the same I now occupy, and the arguments by which he sustained himself upon it, have been an inspiration to me in preparing this reply.

"Whenever," he says, "property found in a neutral vessel is supposed to be liable on any ground to capture and condemnation, the rule in all cases is, that the question shall not be decided by the captor, but be carried before a legal tribunal, where a regular trial may be had, and where the captor himself is liable to damages for an abuse of his power. Can it be reasonable then, or just, that a belligerent commander who is thus restricted, and thus responsible in a case of mere property of trivial amount, should be permitted, without recurring to any tribunal whatever, to examine the crew of a neutral vessel, to decide the important question of their respective allegiances, and to carry that decision into execution by forcing every individual he may choose into a service abhorrent to his feelings, cutting him off from his most tender connections, exposing his mind and his person to the most humiliating discipline, and his life itself to the greatest danger. Reason, justice, and humanity unite in protesting against so extravagant a proceeding."

If I decide this case in favor of my own Government, I must disavow its most cherished principles, and reverse and forever abandon its essential policy. The country cannot afford the sacrifice. If I maintain those principles, and adhere to that policy, I must surrender the case itself. It will be seen, therefore, that this Government could not deny the justice of the claim presented to us in this respect upon its merits. We are asked to do to the British nation just what we have always insisted all nations ought to do to us.

The claim of the British Government is not made in a discourteous manner. This Government, since its first organization, has never used more guarded language in a similar case.

In coming to my conclusion I have not forgotten that, if the safety of this Union required the detention of the captured persons, it would be the right and duty of this Government to detain them. But the effectual check and waning proportions of the existing insurrection, as well as the comparative unimportance of the captured persons themselves, when dispassionately weighed, happily forbid me from resorting to that defence.

Nor am I unaware that American citizens are not in any case to be unnecessarily surrendered for any purpose into the keeping of a foreign State. Only the captured persons, however, or others who are interested in them, could justly raise a question on that ground.

Nor have I been tempted at all by suggestions that cases might be found in history where Great Britain refused to yield to other nations, and even to ourselves, claims like that which is now before us. Those cases occurred when Great Britain, as well as the United States, was the home of generations, which, with all their peculiar interests and passions, have passed away. She could in no other way so effectually disavow any such injury as we think she does by assuming now as her own the ground upon which we then stood. It would tell little for our own claims to the character of a just and magnanimous people if we should so far consent to be guided by the law of retaliation as to lift up buried injuries from their graves

to oppose against what national consistency and the national conscience compel us to regard as a claim intrinsically right.

Putting behind me all suggestions of this kind, I prefer to express my satisfaction that, by the adjustment of the present case upon principles confessedly American, and yet, as I trust, mutually satisfactory to both of the nations concerned, a question is finally and rightly settled between them, which, heretofore exhausting not only all forms of peaceful discussion, but also the arbitrament of war itself, for more than half a century alienated the two countries from each other, and perplexed with fears and apprehensions all other nations.

The four persons in question are now held in military custody at Fort Warren, in the State of Massachusetts. They will be cheerfully liberated. Your lordship will please indicate a time and place for receiving them.

Other nations besides Great Britain took a lively interest in this seizure of Messrs. Mason and Slidell. On the 10th of December, the Minister of France for Foreign Affairs writes to the representative of that court at Washington that "the arrest had produced in France, if not the same emotion as in England, at least extreme astonishment and sensation. Public sentiment was at once engrossed with the unlawfulness and the consequences of such an act." Again he says:

The desire to contribute to prevent a conflict, perhaps imminent, between two powers for which the French Government is animated by sentiments equally friendly, and the duty to uphold, for the purpose of placing the right of its own flag under shelter from any attack, certain principles, essential to the security of neutrals, have, after mature reflection, convinced it that it could not, under the circumstances, remain entirely silent.

After examining the reasons which might be urged to justify the arrest of Mason and Slidell, if the United States approved of the act, he proceeds to show the disastrous effects which their detention would have on the principles governing neutral rights.

There remains, therefore, to invoke, in explanation of their capture, only the pretext that they were the bearers of official despatches from the enemy; but this is the moment to recall a circumstance which governs all this affair, and which renders the conduct of the American cruiser unjustifiable.

The Trent was not destined to a point belonging to one of the belligerents. She was carrying to a neutral country her cargo and her passengers; and, moreover, it was in a neutral port that they were taken.

The Cabinet of Washington could not, without striking a blow at the principles which all neutral nations are alike interested in holding in respect, nor without taking the attitude of contradiction of its own course up to this time, give its approbation to the proceedings of the commander of the San Jacinto. In this state of things it evidently should not, according to our views, hesitate about the determination to be taken.

The result of this occurrence was highly favorable to the United States. It caused the courts of Great Britain and France to manifest a degree of respect for her which had been in a great measure withheld so far during the troubles of the country. The recognition of the Confederate States was emphatically declined, and all hope of encouragement on their part from those powers, was destroyed.

DIPLOMATIC CORRESPONDENCE OF THE CONFEDERATE STATES. On the 4th of May, Messrs. Yancey, Mann, and Rost, the commissioners from the Confederate States to obtain their recognition in Europe as an independent nation, waited upon Lord John Russell, the British Minister for Foreign Affairs. Their interview is described in a letter from Lord Russell to Lord Lyons, the British Minister resident at Washington. He writes:

One of these gentlemen, speaking for the others, dilated on the causes which had induced the Southern States to secede from the Northern. The principal of these causes, he said, was not slavery, but the very high price which, for the sake of protecting the Northern manufacturers, the South were obliged to pay for the manufactured goods which they required. One of the first acts of the Southern Congress was to reduce these duties, and, to prove their sincerity, he gave as an instance that Louisiana had given up altogether that protection on her sugar which she enjoyed by the legislation of the United States.

As a proof of the riches of the South, he stated that of \$350,000,000 of exports of produce to foreign countries, \$270,000,000 were furnished by the Southern States.

I said that I could hold no official communication with the delegates of the Southern States. That, however, when the question of recognition came to be formally discussed, there were two points upon which inquiry must be made: first, whether the body seeking recognition could maintain its position as an independent State; secondly, in what manner it was proposed to maintain relations with foreign States.

After speaking at some length on the first of these points, and alluding to the news of the secession of Virginia, and other intelligence favorable to their cause, these gentlemen called my attention to the article in their constitution prohibiting the slave trade.

I said that it was alleged very currently that if the slave States found that they could not compete successfully with the cotton of other countries, they would revive the slave trade for the purpose of diminishing the cost of production. They said this was a suspicion unsupported by any proof. The fact was they had prohibited the slave trade, and did not mean to revive it. They pointed to the new tariff of the United States as a proof that British manufactures would be nearly excluded from the North, and freely admitted in the South.

Other observations were made, but not of very great importance. The delegates concluded by stating that they should remain in London for the present, in the hope that the recognition of the Southern Confederacy would not be long delayed.

On the 14th of August, the same commissioners address a lengthy note to Lord John Russell, again urging the recognition of the Confederate States, for the reasons set forth in their letter. They thus allude to their first interview:

At an early day after the arrival of the undersigned in London, at an informal interview which your lordship was pleased to accord to them, they informed your lordship of the object of their mission, and endeavored to impress upon your lordship that the action of the seven Confederate States had been based upon repeated attempts on the part of the Federal Government, and of many of the more Northern States which composed the late Union, during a series of years which extended over near half a century, to rule the people of the Southern section of that Union by means of the unconstitutional exercise of power; and that secession from that Union had been resorted to as, in the opinion of the seceding States, the best and surest mode of saving the liberties which their Federal and State constitutions were designed to secure to them. They also

endeavored to place before your lordship satisfactory evidence that the justice of this great movement upon the part of the cotton States was so palpable that it would be endorsed by many, if not by all, of the Southern States which were then adhering to the Union, which would sooner or later become convinced that the security of their rights could only be maintained by pursuing the like process of secession from the late Federal Union, and accession to the constitution of the government of the Confederate States of America.

They next proceed to state the reasons for which the people of the Confederate States believe they violated no principle of allegiance in their act of secession. They then refer to the British declaration of neutrality, respecting which they present the following views:

The undersigned, however, received with some surprise and regret the avowal of her Britannic Majesty's government that, in order to the observance of a strict neutrality, the public and private armed vessels of neither of the contending parties would be permitted to enter her Majesty's ports with prizes. The undersigned do not contest the right of the British Government to make such regulations, but have been disposed to think that it has been unusual for her Majesty's Government to exercise such right, and that in this instance the practical operation of the rule has been to favor the government at Washington, and to cripple the exercise of an undoubted public right of the Government of the Confederate States. This Government commenced its career entirely without a navy. Owing to the high sense of duty which distinguished the Southern officers who were lately in commission in the United States navy, the ships which otherwise might have been brought into Southern ports were honorably delivered up to the United States Government, and the navy, built for the protection of the people of all the States, is now used by the Government at Washington to coerce the people and blockade the ports of one-third of the States of the late Union.

The people of the Confederate States are an agricultural, not a manufacturing or commercial people. They own but few ships. Hence there has been not the least necessity for the Government at Washington to issue letters of marque. The people of the Confederate States have but few ships, and not much commerce upon which such private armed vessels could operate. The commodities produced in the Confederate States are such as the world needs more than any other, and the nations of the earth have heretofore sent their ships to our wharves, and there the merchants buy and receive our cotton and tobacco.

But it is far otherwise with the people of the present United States. They are a manufacturing and commercial people. They do a large part of the carrying trade of the world. Their ships and commerce afford them the sinews of war, and keep their industry afloat. To cripple this industry and commerce, to destroy their ships, or cause them to be dismantled and tied up to their rotting wharves, are legitimate objects and means of warfare.

Having no navy, no commercial marine, out of which to improvise public armed vessels to any considerable extent, the Confederate States were compelled to resort to the issuance of letters of marque, a mode of warfare as fully and clearly recognized by the law and usage of nations as any other arm of war, and most assuredly more humane and more civilized in its practice than that which appears to have distinguished the march of the troops of the Government of the United States upon the soil and among the villages of Virginia.

These facts tend to show that the practical working of the rule that forbids the entry of the public and private armed vessels of either party into British ports with prizes, operates exclusively to prevent the exercise of this legitimate mode of warfare by the Confed-

erate States, while it is, to a great degree, a practical protection to the commerce and ships of the United States.

The inefficiency of the Federal Administration, and the ill success of all its military efforts, are next related. The commercial resources of the South are then stated for the purpose of removing any impression which might be entertained that the South was a poor country. After which it is argued that the Abolition sentiment of England can hope for nothing from the Administration of Mr. Lincoln, which "proposes no freedom to the slave." In this connection it would be well to read the views expressed in Congress at the session previous to Mr. Lincoln's inauguration. [See CONGRESS U. S.] The views of the Southern Commissioners, so entirely opposite to those of Southern Senators and Representatives, were thus expressed:

The undersigned are also aware that the anti-slavery sentiment, so universally prevalent in England, has sprung from the idea of forming friendly public relations with a government recognizing the slavery of a part of the human race. The question of the morality of slavery it is not for the undersigned to discuss with any foreign Power. The authors of the American Declaration of Independence found the African race in the colonies to be slaves, both by colonial and English law, and by the law of nations. Those great and good men left that fact and the responsibility for its existence where they found it; and thus finding that there were two distinct races in the colonies, one free and capable of maintaining their freedom, and the other slave, and, in their opinion, unfitted to enter upon that contest and to govern themselves, they made their famous declaration of freedom for the white race alone. They eventually planned and put in operation, in the course of a few years, two plans of government, both resting upon that great and recognized distinction between the white and the black man, and perpetuating that distinction as the fundamental law of the Government they framed, which they declared to be framed for the benefit of themselves and their posterity—in their own language, "to secure the blessings of liberty to ourselves and our posterity."

The wisdom of that course is not a matter for discussion with foreign nations. Suffice it to say that thus were the great American institutions framed, and thus have they remained unchanged to this day. It was from no fear that the slaves would be liberated that secession took place. The very party in power has proposed to guarantee slavery forever in the States, if the South would but remain in the Union. Mr. Lincoln's message proposes no freedom to the slave, but announces subjection of his owner to the will of the Union—in other words, to the will of the North. Even after the battle of Bull Run, both branches of the Congress at Washington passed resolutions that the war is only waged in order to uphold that (pro-slavery) Constitution, and to enforce the laws, (many of them pro-slavery,) and out of one hundred and seventy-two votes in the Lower House they received all but two, and in the Senate all but one vote. As the army commenced its march, the Commanding General issued an order that no slaves should be received into, or allowed to follow, the camp. The great object of the war, therefore, as now officially announced, is not to free the slave, but to keep him in subjection to his owner, and to control his labor through the legislative channels, which the Lincoln Government designs to force upon the master. The undersigned, therefore, submit with confidence that, as far as the anti-slavery sentiment of England is concerned, it can have no sympathy with the North; nay, it will probably become disgusted with a canting

hypocrisy which would enlist those sympathies on false pretences. The undersigned are, however, not insensible to the surmise that the Lincoln Government may, under stress of circumstances, change its policy—a policy based at present more upon a wily view of what is to be its effect in rearing up an element in the Confederate States favorable to the reconstruction of the Union, than from any honest desire to uphold a Constitution, the main provisions of which it has most shamelessly violated. But they confidently submit to your lordship's consideration, that success in producing so abrupt and violent a destruction of a system of labor which has reared up so vast a commerce between America and the great States of Europe, which, it is supposed, now gives bread to 10,000,000 of the population of those States, which, it may be safely assumed, is intimately blended with the basis of the great manufacturing and navigating prosperity that distinguishes the age, and probably not the least of the elements of this prosperity, would be visited with results disastrous to the world, as well as to the master and slave.

Resort to servile war has, it is true, as we have heretofore stated, not been proclaimed, but officially abandoned. It has been, however, recommended by persons of influence in the United States; and when all other means shall fail, as the undersigned assure your lordship they will, to bring the Confederate States into subjection to the power of Mr. Lincoln's Government, it is by no means improbable that it may be inaugurated.

Other reasons are advanced for a speedy recognition of the Confederate States.

On the 24th of August, Lord John Russell gave his reply, as follows:

The undersigned has had the honor to receive the letter of the 14th inst., addressed to him by Messrs. Yancey, Rost and Mann, on behalf of the so-styled Confederate States of North America.

The British Government do not pretend in any way to pronounce a judgment upon the questions in debate between the United States and their adversaries in North America; the British Government can only regret that these differences have unfortunately been submitted to the arbitrament of arms. Her Majesty has considered this contest as constituting a civil war, and her Majesty has, by her royal proclamation, declared her intention to preserve a strict neutrality between the contending parties in that war.

Her Majesty will strictly perform the duties which belong to a neutral. Her Majesty cannot undertake to determine by anticipation what may be the issue of the contest, nor can she acknowledge the independence of the nine States which are now combined against the President and Congress of the United States, until the fortune of arms, or the more peaceful mode of negotiation, shall have more clearly determined the respective positions of the two belligerents.

Her Majesty can, in the mean time, only express a hope that some adjustment, satisfactory to both parties, may be come to, without the calamities which must ensue in the event of an embittered and protracted conflict.

On the 30th of November, the Commissioners, under instructions from the President of the Confederate States, urge upon her Majesty's Government the ineffective nature of the blockade, and the paramount interests affected by the blockade. To this appeal a brief reply was given on the 7th of December, as follows:

Lord Russell presents his compliments to Mr. Yancey, Mr. Rost, and Mr. Mann. He has had the honor to receive their letters and inclosures of the 27th and 30th of November; but, in the present state of affairs, he must decline to enter into any official communication with them.

DOUGLASS, SIR HOWARD, an English general, born in Gosport, Hampshire, July 1st, 1776, and died on the 8th of Nov. 1861, in the 86th year of his age. His career, military, political, and scientific, was long and distinguished. Some thirty years since he was well known on this side of the Atlantic as the Governor of New Brunswick, a position which he held from 1823 to 1829. His name is more particularly identified with military matters, for which he had a decided preference, as is shown by long, active service, as well as by many able treatises on fortifications and gunnery, which he has written. He entered the British army early in life, served in Portugal and Spain in 1808-'9, took a prominent part in the expedition to Walcheren in 1810, returned to the Peninsula in 1811, and served there until the close of the campaign in 1812. He was Lord High Commissioner of the Ionian Islands from 1835 to 1840, and represented Liverpool in parliament from 1842 to 1847. Among the productions of his pen is an essay "On the Construction of Military Bridges," and "A Treatise on Naval Gunnery." He was lineally descended from one of the most illustrious families of Scotland.

DOUGLAS, STEPHEN ARNOLD, an American statesman, born at Brandon, Vermont, April 23, 1813, and died at Chicago, Illinois, June 3, 1861. With his mother and step-father he removed to Canandaigua, New York, about the age of eighteen years, and entered as a student in the academy at that place, in which he continued until 1833. At the same time he pursued the study of the law, and finally adopted that profession. He commenced the practice of the law at Jacksonville, Illinois, and in 1835, when scarcely twenty-two years of age, was elected attorney-general of the State. In 1835 he resigned, and became a member of the Legislature, and in 1837 was appointed register of the land office at Springfield, and resigned in 1839. In 1840 he was appointed Secretary of State, and in 1841 elected by the Legislature a Judge of the Supreme Court, which he resigned in 1843, and was elected a member of Congress, and again reelected, and in 1847 was chosen Senator for six years from the 4th of March; which position he continued to hold until the time of his death. He was a candidate for the Presidency of the United States in 1852, and again in 1856, and in 1860 received a nomination. (For the details of his distinguished career up to this period *see* NEW AMERICAN CYCLOPÆDIA.) The vote at the Presidential election in 1860 resulted in the electoral college as follows:

Douglas, 12.	Lincoln, 180.
Bell, 39.	Breckinridge, 72.

The popular vote was as follows:

Douglas, 1,365,976.	Lincoln, 1,857,610.
Bell, 590,631.	Breckinridge, 847,953.

Senator Douglas took a lively interest in the exciting troubles which commenced subsequently to this election. His views were freely and forcibly expressed in his place in the Sen-

ate, (*see* CONGRESS, U. S.,) and his determination to sustain and defend the Government at every cost.

Soon after the close of the extra session of the Senate he left Washington for Chicago. On the 20th of April, 1861, he was detained at Belair, Ohio, in consequence of the railroad train having missed a connection. No sooner was it known that the distinguished Senator was there than the town became alive with excitement, and in the afternoon a crowd of the citizens, and a large delegation from Wheeling, and hundreds from the surrounding country, gathered in front of the house where he was stopping. They cheered him and the Union, and Major Anderson, and the Stars and Stripes.

Finally Mr. Douglas made his appearance, and found it impossible to refrain from speaking. In a lengthy speech he thus expressed in a few words the matter at issue before the country:

We in the northwest of this great valley can never recognize either the propriety or the right of States bordering along upon the Gulf of Mexico and upon the Atlantic Ocean, or upon the Pacific, to separate from the Union of our fathers, and establish and erect tax-gatherers and custom-houses upon our commerce in its passage to the Gulf or the ocean. If we recognize the right in one case we give our assent to it in all cases; and if the few States upon the Gulf now are to separate themselves from us and erect a barrier across the mouth of that great river, of which the Ohio is a tributary, how long will it be before New York may come to the conclusion that she may set up for herself and levy taxes upon every dollar's worth of goods imported and consumed in the Northwest, and taxes upon every bushel of wheat and every pound of pork and beef or other productions that may be sent from the Northwest to the Atlantic in search of a market? The very existence of the people in this great valley depends upon maintaining inviolate and forever that great right secured by the Constitution, of freedom of trade, of transit, and of commerce, from the centre of the continent to the ocean that surrounds it. This right can never be surrendered; our very existence depends upon maintaining it.

The proposition now is, to separate these United States into little petty confederacies. First, divide them into two; and then, when either party gets beaten at the next election, subdivide again; then, whenever one gets beat again, another subdivision; and then, when you beat on Governor's election, the discomfited will rebel again, and so it will go on. And if this new system of resistance by the sword and bayonet to the result of the ballot-box shall prevail here in this country of ours, the history of the United States is already written in the history of Mexico.

On the 25th of the same month the Legislature of Illinois assembled to hear an address from him, in which he discussed with considerable fullness the exciting topics of the day. On the 1st of May he returned to his home in Chicago, somewhat indisposed at the time with the incipient stages of inflammatory rheumatism. His primary attack rapidly assumed a typhoid character, and continued from the outset very unyielding. After some ten or twelve days his attack was complicated with an ulcerated sore throat, which soon disappeared. At this time he writes to the Chairman of the State Democratic Committee, giving, in a candid, friendly manner, his views

upon the posture of affairs. This letter is rendered more valuable by being the expression of his sentiments in a form which he did not anticipate would be given to the public; at the same time it was probably one of the last letters from this distinguished man:

CHICAGO, May 10, 1861.

MY DEAR SIR: Being deprived of the use of my arms for the present by a severe attack of rheumatism, I am compelled to avail myself of the services of an amanuensis in reply to your two letters.

It seems that some of my friends are unable to comprehend the difference between arguments used in favor of an equitable compromise, with the hope of averting the horrors of war, and those urged in support of the Government and flag of our country, when war is being waged against the United States with the avowed purpose of producing a permanent disruption of the Union and a total destruction of its Government. All hope of compromise with the cotton States was abandoned when they assumed the position that the separation of the Union was complete and final, and that they would never consent to a reconstruction in any contingency—not even if we would furnish them with a blank sheet of paper and permit them to inscribe their own terms. Still the hope was cherished that reasonable and satisfactory terms of adjustment could be agreed upon with Tennessee, North Carolina, and the Border States, and that whatever terms would prove satisfactory to these loyal States would create a Union party in the cotton States which would be powerful enough at the ballot-box to destroy the revolutionary Government, and bring those States back into the Union by the voice of their own people. This hope was cherished by Union men North and South, and was never abandoned until actual war was levied at Charleston, and the authoritative announcement made by the revolutionary Government at Montgomery, that the secession flag should be planted upon the walls of the Capitol at Washington, and a proclamation issued inviting the pirates of the world to prey upon the commerce of the United States.

These startling facts, taken in connection with the boastful announcement that the ravages of war and carnage should be quickly transferred from the cotton-fields of the South to the wheat-fields and corn-fields of the North, furnish conclusive evidence that it was the fixed purpose of the Secessionists utterly to destroy the Government of our fathers and obliterate the United States from the map of the world.

In view of this state of facts there was but one path of duty left to patriotic men. It was not a party question, nor a question involving partisan policy; it was a question of Government or no Government, country or no country; and hence it became the imperative duty of every Union man, every friend of constitutional liberty, to rally to the support of our common country, its Government and flag, as the only means of checking the progress of revolution and of preserving the Union of the States.

I am unable to answer your questions in respect to the policy of Mr. Lincoln and his Cabinet. I am not in their confidence, as you and the whole country ought to be aware. I am neither the supporter of the partisan policy nor the apologist for the errors of the Administration. My previous relations to them remain unchanged; but I trust the time will never come when I shall not be willing to make any needful sacrifice of personal feeling and party policy for the honor and integrity of my country.

I know of no mode by which a loyal citizen may so well demonstrate his devotion to his country as by sustaining the flag, the Constitution, and the Union, under all circumstances, and under every Administration, (regardless of party politics,) against all assailants, at home and abroad. The course of Clay and Webster towards the Administration of General Jackson, in the days of nullification, presents a noble and worthy example for all true patriots. At the very

moment when that fearful crisis was precipitated upon the country, partisan strife between Whigs and Democrats was quite as bitter and relentless as now between Democrats and Republicans. The gulf which separated party leaders in those days was quite as broad and deep as that which now separates the Democracy from the Republicans. But the moment an enemy rose in our midst, plotting the dismemberment of the Union and the destruction of the Government, the voice of partisan strife was hushed in patriotic silence. One of the brightest chapters in the history of our country will record the fact that, during this eventful period, the great leaders of the opposition, sinking the partisan in the patriot, rushed to the support of the Government, and became its ablest and bravest defenders against all assailants until the conspiracy was crushed and abandoned, when they resumed their former positions as party leaders upon political issues.

These acts of patriotic devotion have never been deemed evidences of infidelity or political treachery, on the part of Clay and Webster, to the principles and organization of the old Whig party. Nor have I any apprehension that the firm and unanimous support which the Democratic leaders and masses are now giving to the Constitution and the Union will ever be deemed evidences of infidelity to democratic principles, or a want of loyalty to the organization and creed of the Democratic party. If we hope to regain and perpetuate the ascendancy of our party, we should never forget that a man cannot be a true Democrat unless he is a loyal patriot.

With the sincere hope that these my conscientious convictions may coincide with those of my friends,

I am, very truly, yours,

STEPHEN A. DOUGLAS.

To VIRGIL HICOX, Esq.,

Chairman State Democratic Committee.

Torpor of the liver and constipation soon ensued, followed by a jaundiced condition which still more prostrated his nervous system. A wandering and delirious state accompanied his illness more or less to its fatal close. The salvation of the Republic was uppermost in his thoughts by day and by night. His own condition, the imminent peril of his death, his complicated affairs, gave him no concern. Almost his last coherent words expressed an ardent wish for the honor and prosperity of his country by the defeat and dispersion of her enemies.

DRANESVILLE is 17 miles west of Washington, in Fairfax County, Virginia. A skirmish took place in its neighborhood on the 26th of November. The First Pennsylvania Cavalry, under Colonel Bayard, were ordered to proceed to the village, and arrest certain citizens who were openly and actively aiding the Confederate cause. Having accomplished this object without meeting any of the Confederate force, except two picket men, who were captured, the party set out on their return, when a fire was opened upon them from a thick pine wood a few miles from the village. The wood was immediately surrounded, and four were captured, and two killed, of the hostile force. Another conflict took place near the village on the 20th of December, which was a sharp affair. Its success was so complete in favor of the Union troops that much credit was bestowed upon them. A brigade of General McCall's division, under the command of General E. O. C. Orde, having been ordered to advance in the direction of

Dranesville, for the purpose of obtaining a quantity of forage known to be in the possession of secessionists, they marched from camp about 6 o'clock in the morning. Apprehending that they might be attacked, General McCall ordered another brigade, under General Reynolds, to follow at 8 o'clock. Meantime, General Orde's brigade, having advanced nearly to Dranesville, were assailed by a Confederate force in ambush. A spirited engagement ensued, which lasted nearly an hour, when the enemy's force fled in the direction of Fairfax Court House, abandoning on the field a number of their killed and wounded, besides arms, clothing, and other articles. The force under General Reynolds did not come up until the

action was over. The Union force, after remaining at Dranesville till near sundown, returned to their camp, which they reached between 9 and 10 o'clock at night, bringing with them fifty wagon loads of forage, and the prisoners and abandoned articles.

The enemy's force was composed of the First and Eleventh Kentucky regiments, and the Tenth Alabama, with a regiment of cavalry and a battery of cannon, all under the command of Colonel John H. Forney, acting Brigadier-General. They left on the field ninety dead bodies, and ten of their wounded. Eight of their number, unhurt, were taken prisoners.

On the Union side, about seven were killed, and sixty-three wounded.

E

EARTHQUAKES AND ERUPTIONS OF VOLCANOES. One of the most disastrous earthquakes of modern times occurred on the 20th of March, 1861, along the western border of the Argentine Republic and the eastern foot of the Andes, totally destroying the city of Mendoza and the greater part of San Juan, lying 120 miles further north. On the eastern side of the mountains the shock was felt at about half-past eight in the morning, at Valparaiso and Santiago, causing great alarm and confusion to the people, who at that time were assembled in great numbers in the churches, it being near the close of Lent. To the east the subterranean movement extended to the borders of the Atlantic, being felt at Buenos Ayres, 323 leagues from Mendoza, where it was observed that the movement of pendulums vibrating north and south was accelerated, while those moving east and west were not affected. At Cordova, 150 leagues east from Mendoza, a church was thrown down. The shock was felt at Mendoza in the evening of March 20th, at the time when a large congregation was dispersing from the Jesuit church. Those who had reached the Plaza were saved, but many were destroyed by the falling in of the walls and roof of the building. In a short space, computed at only six or eight seconds, every building, public and private, in the city was thrown down, burying a large portion of the population in the ruins. Flames soon burst forth from these, consuming the dead and wounded entangled in them. The air was filled with the awful sound of the subterranean rumblings, and affrighted animals ran howling about; while from the gaping fissures floods of water were vomited forth. For several days the earth continued to tremble at intervals, till every portion of the walls that had resisted the first shock had fallen to the earth. For some leagues towards the Andes the roads were rendered almost impassable, by the fissures and deep holes opened by the earthquake; while upon the mountains huge masses of rock were precipi-

tated down the steep slopes, filling the road, and occasionally falling for days after the first catastrophe. The city of Mendoza is described as one of the most attractive of that portion of South America, pleasantly situated, about 2,900 feet above the level of the sea, near the Andes, its houses adorned with porticoes, and surrounded with gardens and orchards. Its public promenade, called the Alameda, was about a mile long, bordered with stately poplars. The total population was about 15,000, of whom it is reported that three-fourths were destroyed, though in some of the accounts the number is given at about one-half the whole population. At San Juan it is reported that about 3,000 persons were destroyed.

Earthquake and Volcanic Eruption on the East Coast of Africa.—On the night of the 7th of May, or morning of the 8th, earthquake shocks were felt for about an hour, at Edd, about half-way between Massonah and the Straits of Bab-el-Mandel. Fine dust, at first white and afterwards red, continued to fall during the day, becoming in places nearly knee-deep. This ceased to fall on the 9th, and at night fire and smoke were seen issuing from Jebel Dubbeh, a mountain about a day's journey inland, never before known to be a volcano; and sounds like the firing of cannon were heard at Perim—these sounds were heard at 2 A. M. on the 8th, and at long intervals up to the 10th or 11th. The dust was also met with at sea, and along the entire coast of Yemen it fell for several days. Several shocks were felt on the 8th at Mocha and Hodeida.

Eruption of Vesuvius.—One of the great eruptions of Vesuvius, such as occur but once in the course of centuries, took place on the 8th of December, 1861. It was preceded by a succession of subterranean movements during the night, which were felt at Naples, violently shaking the furniture in the houses, and causing no little alarm to the people in their beds. The eruption commenced at about one o'clock Sunday morning, just over Torre del Greco,

about one-fourth the distance up the mountain. In a short time there were six openings in full operation, sending forth enormous jets of flame, accompanied with terrific explosions. This was in an inhabited district, and some of the houses were thrown into the air by the eruptions. The lava commenced to flow on Sunday morning, and destroyed several houses and villas at Torre del Greco; but more buildings were destroyed at this place by the tremblings of the earth, which caused the walls and roofs to be fissured or thrown down. According to the official report the number thus injured was from 400 to 500, but from private accounts it would appear that none seemed to be in a secure state. The inhabitants reported that about 22,000 in number fled at the first alarm towards Naples, and the city was left to the depredations of thieves. At about two o'clock on Monday morning, the grand crater at the summit of the mountain, which had been for a long period comparatively dormant, burst out with a tremendous noise, and the escape of its pent-up fires gave hopes to the despairing population that their dwellings might yet be saved. The opening of this new outlet, no doubt, checked the flow of lava from the lower craters; and the total destruction of Torre del Greco, which had already been laid waste nine times within the historic period, was averted by the diversion of the lava streams, caused by elevations above the town that lay in their course. Within a quarter of a mile of the town the lava stream was seen on Monday, slowly moving down about half a mile below the craters that fed it, covering about half a mile in width and reaching to the height of about 24 feet. It is remarkable that in these terrible scenes, the loss of human life should have been so small, only two deaths being recorded—one that of a guide who was killed by the falling of a stone upon his head as he was attempting to procure a piece of the semi-fluid lava, in which to imbed a coin; and the other, of a person who fell into the molten stream. The scene is described by those who witnessed it as one of unparalleled magnificence, both by day and night. The volume of smoke that poured forth from the craters was remarkably dense and black, and charged with enormous quantities of fine dust and sand, which were carried up in the heated column to great heights, and hung suspended over the bay in the calm atmosphere, or were swept onward by the winds, overshadowing the sea and hiding the islands and headlands from view. In the morning and evening the rising and setting sun illuminated these dense clouds, tinting them with a profusion of rich colors, and giving to their irregular forms the appearance of solidity, with hues of fiery brilliancy. From the craters the clouds were renewed with wonderful rapidity, rolling over each other in magnificent involutions; while each eruption was preceded by a sound as of the heaviest artillery, followed by a shaking of the mountain itself, which was felt at Naples and by vessels

at sea, many miles from the shore. Everywhere in the vicinity the fine black dust settled down upon the surface, and at Torre del Greco attained the depth of $4\frac{1}{2}$ inches. At night, under the pall of the dark cloud the volcanic fires appeared like brilliant fireworks upon the grandest scale. Then the immense quantities of stones thrown high up into the air were seen to be of an intense red heat and rose like Roman candles. Bright flames were seen shooting upward through the dense smoke, and appearances resembling forked lightning darting around with globes of electric light. On Tuesday, the 10th, the violence of the eruption had greatly subsided, and it was an occasion of regret to the people that the volcano did not continue in more vigorous action; as this would have insured a cessation of the earthquake shocks which still continued at intervals, doing increased injury to Torre del Greco and the other towns. These continued even into the first week of the new year; and the vicinity of the volcano was rendered almost insufferable from the shocks, and from the exhalations of gas, especially about Torre and Resina. This gas, upon the land, was said to be carbonic acid, intermixed with a small quantity of carburetted hydrogen; and at sea chiefly the latter intermixed with a small portion of the former. About the close of the year the people who had returned to their houses, were again driven forth by the shock of an earthquake, and a new volcanic opening was produced under the sea, causing the water to be thrown into violent commotion, like boiling, for a considerable distance.

Earthquake on the Island of Penang.—Feb. 16, 1861, a severe earthquake occurred at half-past 7 P. M., in three distinct shocks, each of which seemed to pass from north to south and to continue about thirty seconds. The ground undulated, causing persons to be affected with nausea, crockery to be thrown from shelves, &c. The shock was also felt at the same time at Malacca and Singapore, where no earthquake had been known for the seventeen preceding years. The sky was clear at the time, no air stirring; thermometer at 91° F.

Earthquakes in the United States.—During the year a number of earthquakes occurred in the United States, but none of serious character. At Syracuse, N. Y., at about 9 P. M. of July 11, a very sensible shock was felt, which extended over most of the county. It lasted about four seconds, and was so severe as to cause dwelling-houses to rock, and in some cases furniture was removed and persons tipped in chairs to and fro. The shock was preceded by a sudden change in the weather, which became cold and chilly, after having been intensely hot for several days previous.

On the 31st August at 5 h. 22 m. A. M., two marked shocks of an earthquake were felt at the Washington Observatory, each being a succession of long waves of slight elevation apparently proceeding from south to north. The in-

terval between the shocks was perhaps five seconds. They were accompanied by the usual rumbling noise, and were sufficient to jar the furniture in the building. The sound of the earth wave in the air continued audible some seconds after the tremor had ceased.

EGLINTON AND WINTON, ARCHIBALD WILLIAM MONTGOMERIE, Earl of, an English and Scottish peer, born at Palermo, Sicily, Sept. 29, 1812, died at Eglinton Castle, Ardrossan, in Ayrshire, Oct. 14, 1861. He was educated at Oxford, where he attained a high rank as a classical scholar, and received the degree of D. C. L. He held for many years the office of lord-lieutenant and sheriff-principal of Ayrshire. He became 13th earl of Eglinton on the death of his father in 1819, Earl of Winton, in Scotland, in 1840, and Earl of Winton in the peerage of the United Kingdom in 1859. In 1852 he was elected lord-rector of Glasgow University, and in Feb. 1852, lord-lieutenant of Ireland, but resigned in December of the same year. In 1858 he was again appointed to the same office, but retired in 1859. He was passionately fond of the sports of the turf, and had done much to improve the qualities of the English blood horse. He also made improvements in agriculture. In 1839 he revived on his own estate the tournament of the middle ages, with more than its original splendor. The preparations which had been made for this festivity were vast, and the scene was one long to be remembered. Lady Seymour, now the Duchess of Somerset, was the Queen of Beauty for this occasion, and the present emperor of France one of the knights. The earl was greatly beloved by his tenants for his efforts for their improvement and welfare.

ELLIS, JOHN WILLIS, late Governor of North Carolina, born in Rowan near Davidson County, Nov. 25, 1820, died at Raleigh, 1861. His early education was conducted under Robert Allian, Esq., at Beattie's Ford, and was continued at Randolph, Macon College, Va., from which he transferred his college relation to the University of North Carolina, where he graduated in 1841. He there studied law with Hon. R. M. Pearson, of Rowan, since Judge of the Supreme Court of North Carolina. In 1844 he was elected a member of the House of Commons of the State Legislature, and reelected till 1848, when he was chosen a Judge of the Superior Courts of Law and Equity, which position he held till 1858, when he was elected Governor of the State, and in 1860 reelected. On the 2d of January Governor Ellis took possession of Fort Macon, at Beaufort, the works at Wilmington, and the United States arsenal at Fayetteville, professedly on behalf of the State. On the 20th of April he ordered the seizure of the United States mint at Charlotte. He was active also in promoting the passage of the secession ordinance in North Carolina.

ELLSWORTH, EPHRAIM ELMER, a colonel of volunteers and the introducer of the Zouave drill and organization into the United States,

born at Mechanicsville, Saratoga Co., New York, April 23, 1837, killed at Alexandria, Virginia, May 24, 1861. The financial misfortunes which overtook his father during Elmer's early childhood, prevented him from attaining the object of his boyish ambition, a cadetship at West Point; but, passionately fond of study, he acquired a good English education. After brief engagements in mercantile employment in Troy and New York, he went to Chicago, and though not yet of age, commenced business for himself as a patent solicitor, and soon attained success and a handsome income; but through the fraud of one whom he had trusted was despoiled of his hard earnings. Instead of giving way to despondency, he turned his attention to the study of law, supporting himself meanwhile by copying law papers at night. But while thus rapidly familiarizing himself with the science of law, his predilection for the military profession was very strong; and having attained a thorough familiarity with the French *chasseur d'Afrique* or Zouave drill and organization, he resolved to form a Zouave corps in Chicago, with such modifications as he deemed desirable to better adapt it to this country and the genius of the people. The corps which he organized and of which he became the commander, was a remarkable one; the strictest abstinence from spirituous liquors and tobacco was enforced, and the drill was exceedingly severe in its gymnastic requirements. They had been organized less than a year when their extraordinary performances won them at the State Agricultural Fair a stand of colors, and in July, 1860, with their gallant commander at their head and bearing their prize colors, they visited the Eastern cities, and challenged competition in their military discipline and practice, and won golden opinions everywhere. On his return to Chicago he organized a Zouave regiment, which he offered to the governor for the defence of the State, as if in premonition of the coming struggle. During the autumn Ellsworth entered heartily into the political campaign, advocating the election of Mr. Lincoln. After the election he accompanied the President elect to Washington, where he received a lieutenant's commission preparatory to his entrance into the War Department, and had already matured in his own mind a reorganization of the militia of the country. The breaking out of the war changed his plans. At the proclamation of the President on the 15th of April, he hastened to New York, organized a Zouave regiment of 1,200 men, from the Fire Department, and in three weeks marched at their head through Pennsylvania Avenue, Washington. He drilled his regiment assiduously, and more than any other man could have done, tamed and controlled those restless and ungovernable spirits. On the 23d of May his regiment was ordered to Alexandria, which they reached early in the morning of the 24th. Seeing a secession flag flying over a hotel, (the Marshall House,) he

entered and demanded of a man whom he met there, whose flag it was; the man, who was really the proprietor of the house, professed not to know, saying he was only a lodger; and Ellsworth, with two companions, ascended to the roof and took it down, wrapping it around his body. As he descended, the proprietor, (Jackson,) who had concealed himself in a dark passage, fired, and killed him instantly, and the next moment himself fell dead, from the bullet of one of Ellsworth's companions, Francis E. Brownell. The body was borne sadly back to Washington, and the funeral services performed at the White House, with the President as chief mourner. From thence it was brought to his birthplace, (Mechanicsville.) A noble regiment, made up of one man from a town, in his native State, was raised as his fittest, though not his only monument.

EPIDEMICS. The following papers upon these subjects were read before a recent meeting of the Epidemiological Society of London. The first, by Dr. M'William, the Secretary of the Society, is a *résumé* of the principal epidemics that prevailed in various quarters of the world during the year 1861; and the second, prepared by Herbert Chalmers Miles, Surgeon Royal Artillery, Halifax, Nova Scotia, brings forward an Indian remedy for small-pox.

1. We have no epidemics of any magnitude to record as having occurred either in England or on the continent during the last twelve months.

Cholera, which in 1860 and the early months of the past year was prevailing at St. Petersburg and other ports in the Gulf of Finland, ceased with the return of spring. The same disease also disappeared about the same time at Ceuta and other stations in the empire of Morocco. Typhus fever had raged to a disastrous extent in the beleaguered fortress of Gæta, and afterwards amongst the Neapolitan and Sardinian troops at Naples. Typhus had also been prevalent to some extent, but in a mild form, in some of the rural districts of England. In the northwest provinces of India, cholera had swept over extensive tracts of country with appalling force. Preceded by a desolating famine, the pestilence found in the starving population an easy prey to its ravages; and even amongst the European soldiery the percentage of deaths to attacks had been almost unprecedentedly great.

The West Indies, more especially the island of Cuba, had been visited by yellow fever in the course of the year, with more than usual virulence. Several of her Majesty's ships had been infected with yellow fever at Havanna, and merchant ships had not only suffered from the disease while in that port, but some of them had lost part of their crews in the passage thence to England and other ports of Europe. Yellow fever had been actually introduced into St. Nazaire, at the mouth of the Loire, in the month of September last, by a ship from the Havanna; and within the past week cases of the same disorder were reported on board of a

ship at Bordeaux. These facts were justly considered as highly important, and suggestive of the desirability of some authorized declaration of opinion, by a society like the Epidemiological, as to the vexed question of the infectious or non-infectious character of this terrible malady, which has on several occasions of late years extended beyond its usual recognized limits, and attained elevations and latitudes long considered incapable of maintaining its existence.

Rear-Admiral Sir Alexander Milne, K. C. B., Commander-in-Chief on the West India and North American Station, who is fully alive to the infectious character of yellow fever, and duly appreciates the value of preventive measures, had issued an order, to the effect that the ships of the squadron under his command were, unless under urgent necessity, to avoid anchorage in ports where yellow fever was known to prevail, and were not to remain in close harbors for more than ten days at a time; and, moreover, that in the event of a ship being invaded by yellow fever, she was at once to proceed to the northward for change of climate.

Small-pox had continued to prevail in many parts of England, and in some districts, from the previous neglect of vaccination, had proved very fatal, more especially in the southwestern counties, in parts of Derbyshire and in Northamptonshire. The whole circumstances of the present epidemic of small-pox, which, since its commencement in 1857, had destroyed in England little short of 20,000 persons, had abundantly borne out the allegation as to the neglect and imperfection of vaccination, made by the Small-pox and Vaccination Committee of the Epidemiological Society in their Report of 1853 and Memorial of 1855.

Sanitary reform had made very satisfactory progress, not only at home, but also in the colonies, and in some foreign countries which had long been remarkable for a disregard of the laws of health. In the colony of Victoria, Australia, at Alexandria, in Egypt, and in the empire of Brazil, sanitary improvement had considerably advanced, as well by private exertion as by legislative enactments.

The census of the population of Jamaica had been taken in the course of last summer, the previous census having been taken in 1844. There had been an increase during the last seventeen years of 63,000 inhabitants, the population in 1844 having been 377,433, and in 1861, 441,264. Amongst the population there were 5,986 cripples, 1,294 blind persons, 1,512 persons afflicted with yaws, 776 with leprosy, 650 dumb, and 461 insane; or altogether between 10,000 and 12,000 permanent, and, to a large extent, incurable invalids in a population much under 500,000.

A representation had been made in the early part of the year by Dr. Armstrong, Deputy Inspector-General, in charge of the Royal Naval Hospital at Malta, to Sir W. F. Martin, K. C. B., the Naval Commander-in-Chief in the Mediterranean, submitting that, in consequence of the

large number of men in the fleet suffering from syphilis, it was desirable he should use his influence with the Government at Malta to establish a system of periodical examination of the prostitutes of that city. A large number of prostitutes were found diseased, and being sent to the hospital, were cured. The examinations were rigorously continued by the police authorities, and the beneficial influence of the system had been most marked. The average daily number of primary syphilitic cases in the hospital had formerly been from 40 to 50, to say nothing of the numbers on the sick lists of the ships with the same disease, or of the large amount of secondary cases always under treatment afloat, as well as in the hospital. But during the last three months there had not been a single case of venereal disease that was contracted in the island received into the Naval Hospital.

A memorial with a scheme for making the sickness and mortality amongst the pauper population of Great Britain available for the purposes of statistical and general inquiry, drawn up by Dr. Milroy, had been forwarded by Dr. Babington to the President of the Poor-law Board.

Late accounts stated that the epizootic disease, known as "*Steppe murrain*" or "*pestis boum*," had been making great ravages in the western provinces of Russia. Pleuro-pneumonia had also prevailed in the early part of the year amongst the cattle in the colony of Victoria, Australia, and measures had been taken against its introduction into the adjacent colony of New South Wales. An epizooty amongst the hogs of Providence, Rhode Island, had also proved very fatal.

2. *Indian Remedy for Small-pox.*—Early in the last winter, a small coasting vessel landed a portion of her crew at an extreme seaboard village, a few miles from Halifax. The persons landed were sick of small-pox, and the disease soon spread, first among the cottagers with whom the fishermen mixed, and subsequently amongst those from the capital who resorted to the village for the purposes of trade. Through the early weeks of spring, rumor constantly asserted that vast numbers of the seafaring population were attacked with the complaint; but it was not until early in March that the large civil hospital of Halifax, by the number of its weekly admissions for variola, began to corroborate rumor, and to authenticate the justice of the public anxiety. The disease in process of time extended to the troops in the garrison, but the proportion of attacks to those amongst the civil population was singularly small. While certain portions of the inhabitants of Halifax were suffering from the epidemic, alarming accounts reached that place relative to the terrible ravages of the scourge amongst the Indians and colored people generally. Variola is the special plague amongst the Indians, and when they are invaded by this pestilence it sweeps them off by scores. Like the fire of the prairies, it passes over their encamping grounds, destroy-

ing all of human kind in its path. On this occasion, the most painful details were given of whole families being carried off by this loathsome disease. After some time, however, it was said that the pestilence had been stayed. One of the Indian race, it was asserted, had come into the disease-stricken camp, possessed of a preparation which had the extraordinary power of curing the kind of cases that had hitherto proved so fatal. This remedy was believed by the Indians to be so efficacious, that, if given to them when attacked with small-pox, they looked forward with confidence to a speedy and effectual cure. An old weird Indian woman was the fortunate possessor of the remedy in question. She had always been known as the doctress of her tribe, and had enjoyed celebrity for many years in consequence of her reputed knowledge of medicine and wonderful acquaintance with the herbs and roots of the woods. So well established was her fame among the Indians, that, when sick, they resorted to her rather than to the white doctors, whom they considered to be "no good." Captain Hardy, of the Royal Artillery, an able and intelligent officer, who has been for years amongst the Indians, says that "the old squaw's remedy has long been known amongst them as an infallible cure for small-pox," and that "the Indians believed it to be successful in every case."

From the information gathered from the Indians, the following observations have been carefully sifted:

1. In the case of an individual suspected to be under the influence of small-pox, but with no distinct eruption upon him, a large wine-glassful of an infusion of the root of the plant "*Sarracenia purpurea*,"* or pitcher plant, (several specimens of which, including the root, were exhibited on the table,) is to be taken. The effect of this dose is to bring out the eruption. After a second and third dose, given at intervals of from four to six hours, the pustules subside, apparently losing their vitality. The patient feels better at the end of each dose, and, in the graphic expression of the Micmac, "knows there is great change within him at once."

2. In a subject already covered with the eruption of small-pox in the early stage, a dose or two will dissipate the pustules and subdue the febrile symptoms; the urine, from being scanty and high colored, becomes pale and abundant; whilst from the first dose the feelings of the patient assure him that "the medicine is killing the disease." Under the influence of the remedy, in three or four days the prominent features of the constitutional dis-

* This is the plant commonly known as the side-saddle flower, and huntsman's cup. It grows in the swamps and peat bogs over all the Northern States, and to the South near the Alleghany Mountains. It is distinguished by its curious hood-shaped hollow leaves, lined with bristles pointed downward, and usually half filled with water and drowned insects. The flower is globose and purple, upon the top of a straight flower-stalk a foot high. There is no resemblance whatever to a side-saddle, but the plant is well named a pitcher, or cup.

turbance subside, although, as a precautionary measure, the sick person is kept in camp until the ninth day. No marks of the eruption (as regards pitting, &c.,) have been left in cases examined that were treated by the remedy.

8. With regard to the medicine acting (as is believed by the Indians) in the way of a preventive in those exposed to the infection, it is curious to note, that in the camps where the remedy has been used, the people keep a weak infusion of the plant constantly prepared, and take a dose occasionally during the day, so as to "keep the antidote in the blood."

In the discussion which followed the reading of this paper, all the speakers concurred in the desirability of requesting Mr. Miles to procure a further supply of the root of the *Sarracenia purpurea*, with the view of having its anti-viroid powers tested.

ERICSSON'S BATTERY. (See NAVY.)

EVANS, JOHN, M. D., an American geologist, born in Portsmouth, N. H., Feb. 14, 1812, son of Hon. Richard E., Judge of the Supreme Court of N. H., died April 13, 1861. He graduated at the St. Louis Medical College, and was engaged, soon after taking his degree, as assistant in the geological survey of Wisconsin, Minnesota, Iowa, and Nebraska, under the charge of Dr. David Dale Owen. While engaged in this survey he first attracted the notice of scientific men by his discovery and description of a large deposit of fossil bones of extinct species of mammalia in the "Mauvais Terres" of Nebraska. This discovery was deemed of such importance by European geologists, that one of the most eminent of their number was immediately sent to examine the collections as well as the locality from which they had been taken. The U. S. Government soon after commissioned him to carry on the geological survey of Washington and Oregon territories. He had, after several years of severe labor, completed this survey, and after acting for a short time as geologist of the Chiriqui commission, proceeded to Washington to prepare and superintend the publication of an elaborate report of his surveys of Oregon and Washington, where he was attacked with typhoid pneumonia, which speedily proved fatal.

EXPEDITIONS, MILITARY AND NAVAL.

At the commencement of the war the paucity of available vessels in the navy, and the large number required to maintain an efficient blockade over an extended coast line, rendered it difficult to spare a naval force sufficient for enterprises, the importance of which was fully understood by the Government; but as soon as a moderate blockading force was supplied, attention was turned to the organization of a series of expeditions, having for their object the capture of the best harbors on the coast, and the taking possession of extended tracts of country in their vicinity. The moral effect of these movements, in dividing the attention of the Confederate army, and exciting their alarm for their homes, as many of their regiments were from the seaboard and Gulf

States, was a matter of quite as much importance as the actual territory seized.

Six of these expeditions have been undertaken; all of them planned and two of them wholly executed in 1861, while some of the others have not yet completed their work. The order of their departure was as follows:

1. *The Hatteras Expedition*.—On the 13th of August, when General Wool took command at Fortress Monroe, he found that preparations had already been made for an expedition to the North Carolina coast. Hatteras Inlet, the point of destination, was a gap in the sandy barrier which lines the coast of North Carolina, about 18 miles S. W. of Cape Hatteras, and 160 miles below Fortress Monroe. Its channel was intricate but accessible without difficulty to those who were accustomed to it, provided the weather was good. This and Ocracoke Inlet were the principal entrances to Pamlico Sound, a large body of water lying between this sandy beach and the mainland of North Carolina, in which there was good anchorage, smooth water, and fine harbors. Hatteras Inlet would admit vessels drawing 7 feet water, but its tortuous channel, from which the Confederate authorities had removed all the buoys, made it difficult to enter in rough weather, without danger of grounding. On the sandy beach, commanding the inlet, the Confederate forces had erected, during the summer, two forts—the larger, named Fort Hatteras, being intended for 15 guns, though only 10 had been mounted; the smaller for 7 guns, of which 5 had been mounted. These forts were built of sand, and were 20 feet wide at top, and turfed. They had each a bomb-proof, the one at the larger fort capable of protecting about 400 men; that at the smaller 300. The guns were mounted *en barbette*, (that is, on the top of the earthworks.) The guns on both forts were thirty-two pounders, except one eight-inch shell gun on Fort Hatteras. Most of these particulars had been communicated to the Federal authorities about the 1st of August by Mr. Daniel Campbell, master of the schooner Lydia Frances, which had been wrecked about the 1st of May on the coast near Hatteras Inlet, who had been detained as a prisoner at the inlet for three months. The expedition intended for the capture of these forts consisted of the United States steamers Minnesota, Capt. Van Brune; Wabash, Capt. Mercer; Monticello, Commander Gillis; Pawnee, Commander Rowan, and Harriet Lane, Capt. Faunce; the U. S. chartered steamers Adelaide, Commander Stellwagen, and George Peabody, Lieut. Leroy, and the steam tug Fanny as transports, together with schooners towed by the steamers having surf-boats on them. The steam frigate Susquehanna and the sailing frigate Cumberland were ordered also to join the expedition. The naval portion of the expedition was under the command of Commodore S. H. Stringham, whose broad pennant was hoisted on the Minnesota. To this naval force was added a body of about 880 troops, consisting of 500 of the

20th Regiment N. Y. Volunteers, under command of Col. Max Weber; 220 of the 9th N. Y. Volunteers, (Hawkins' Zouaves,) under command of Col. R. C. Hawkins; 100 of the Union Coast Guard, Capt. Nixon commanding, and 60 of the 2d U. S. Artillery, Lieut. Larned commanding, who were embarked on the transports George Peabody and Adelaide, and were under the command of Maj.-General Benj. F. Butler. The expedition left Fortress Monroe on the afternoon of Monday, Aug. 26th, and arrived off Hatteras Inlet about 4 o'clock p. m., Tuesday. At daylight the next morning arrangements were made for landing the troops, and for an attack upon the forts by the fleet. The swell upon the beach was so heavy that after landing 315 men, including the regular troops and 55 marines, with two guns, one a 12-pound rifled boat gun, the other a howitzer of the same calibre, the boats were stove and swamped, and no more could be landed that day. Meantime the fleet had opened fire on the smaller fort, which was nearest the inlet, and continued it till about half-past 1 p. m., when both forts hauled down their flags, and the garrison of the smaller escaped to the larger. A small detachment of the troops already landed immediately proceeded to take possession of Fort Clark, and raised the Union flag. The fleet ceased firing, and the Monticello was sent in to the inlet to discover what the hauling down of the flags meant. She entered and proceeded within about 600 yards of Fort Hatteras, when the occupants of that fort commenced firing upon her, and inflicted serious injury to her hull; whereupon the Wabash, Susquehanna, and Minnesota came to her assistance, and the Confederates took themselves to their bomb-proof, and ceased firing. The little force which had landed now withdrew from Fort Clark to a safer position, where they threw up a slight intrenchment, and mounted their two cannon on it, together with one they had taken from the enemy. The General and the force on board the fleet felt much anxiety in regard to this little company, as it was supposed that the Confederates, who were known to have a considerable body of troops on board steamers in the Sound, would be largely reinforced in the night, and would take them prisoners. At 7 o'clock next morning, however, the Union troops were seen advancing in good order upon Fort Clark, and it appeared that Capt. Nixon of the coastguard with his company had occupied that fort during the night, and had hoisted the Stars and Stripes there. As a reinforcement from the fleet approached the shore, they heard firing, which they afterwards found proceeded from the temporary battery erected by the Union troops, and was directed at the Confederate steamer Winslow, which had come down the sound loaded with reinforcements, but which, on meeting with this reception, made the best of its way out of range. The fleet renewed its fire upon Fort Hatteras at a little past 8 o'clock, and, sub-

stituting 15-second for 10-second fuzes, dropped almost every shell from their heavy guns inside the fort. At ten minutes past 11, a white flag was displayed from the fort. Gen. Butler went at once on board the steamtug Fanny, and, entering the inlet, sent Lieut. Crosby on shore to demand the meaning of the white flag. He soon returned with the following memorandum from the commander of the fort, who proved to be a former commodore of the U. S. Navy.

PORT HATTERAS, Aug. 29th, 1861.

Flag-officer Samuel Barron, C. S. Navy, offers to surrender Fort Hatteras with all the arms and munitions of war. The officers allowed to go out with side-arms, and the men without arms to retire.

S. BARRON,

Commanding Naval Division, Va. and N. Car.

Accompanying this was a verbal communication stating that he had in the fort six hundred and fifteen men, and a thousand more within an hour's call, but that he was anxious to spare the effusion of blood. Gen. Butler sent in reply the following memorandum:

Aug. 29th, 1861.

Benjamin F. Butler, Major-General United States Army, commanding, in reply to the communication of Samuel Barron, commanding forces at Fort Hatteras, cannot admit the terms proposed. The terms offered are these: Full capitulation, the officers and men to be treated as prisoners of war. No other terms admissible. Commanding officers to meet on board flag-ship Minnesota to arrange details.

After waiting three-fourths of an hour, Lieut. Crosby returned, bringing with him Capt. Barron, Major Andrews, and Col. Martin, the commanding officers of the Confederate force, who informed Gen. Butler that they had accepted the terms of capitulation he had proposed, and had come to surrender themselves and their command prisoners of war. General Butler informed them that, as the expedition was a combined one from the army and navy, the surrender must be made on board the flag-ship and to Com. Stringham, as well as himself. The party then proceeded to the flag-ship Minnesota, and the following articles of capitulation were there signed:

OFF HATTERAS INLET, U. S. FLAGSHIP MINNESOTA, }

Aug. 29th, A. D. 1861. }

Articles of Capitulation between Flag-officer Stringham, commanding the Atlantic Blockading Squadron, and Benjamin F. Butler, U. S. Army, commanding on behalf of the Government, and Samuel Barron, commanding the naval force for the defence of North Carolina and Virginia, and Col. Martin, commanding the forces, and Major Andrews, commanding the same forces at Hatteras.

It is stipulated and agreed between the contracting parties, that the forces under command of the said Barron, Martin, and Andrews, and all munitions of war, arms, men, and property under the command of said Barron, Martin, and Andrews, be unconditionally surrendered to the Government of the United States in terms of full capitulation.

And it is stipulated and agreed by the contracting parties, on the part of the United States Government, that the officers and men shall receive the treatment due to prisoners of war.

In witness whereof, we, the said Stringham and Butler, on behalf of the United States, and the said Barron, Martin, and Andrews, representing the forces at Hatteras Inlet, hereunto interchangeably set our

hands, this twenty-ninth day of August, A. D. 1861, and of the independence of the United States the eighty-fifth year.

S. H. STRINGHAM,
Flag-Officer Atlantic Blockading Squadron.

BENJAMIN F. BUTLER,

Major-General U. S. A., Commanding.

S. BARRON,

Flag-Officer C. S. N., Com'g Naval Forces Va. & N. C.

WILLIAM F. MARTIN,

Col. Seventh Light Infantry N. C. Volunteers.

W. L. G. ANDREWS,

Major Com'g Forts Hatteras and Clark.

The results of this capitulation were the capture of 715 men, including the commander, Com. Barron, who was at the time Acting Secretary of the Navy of the Confederate States, and Major Bradford, Chief of the Ordnance Department of the Confederate States army, 2 forts, 1,000 stand of arms, 75 kegs of powder, 5 stand of colors, 31 pieces of cannon, including one 10-inch columbiad, a brig loaded with cotton, a sloop loaded with provisions and stores, 2 light boats, 150 bags of coffee, &c. The forts were held and garrisoned by U. S. troops, and the Fanny and Monticello retained at the inlet to keep off the Confederate gunboats, and capture vessels attempting to run the blockade. On the 30th Sept. a fortification called Fort Oregon at Ocracoke Inlet, about 15 miles below Hatteras Inlet, was abandoned by the Confederate forces, and on the 16th of September, an expedition from Hatteras Inlet visited and destroyed it. On the 7th of September, four Confederate vessels, and on the 8th a fifth, attempted to enter Hatteras Inlet, and were all captured by the steamtug Fanny. On the 2d of October, the Fanny was captured by a party of Confederates in armed steamtugs; her two brass cannon and 35 men belonging to the 9th N. Y. Volunteers (Hawkins' Zouaves) were taken, and a considerable quantity of stores. On the 4th of October, the Confederate troops attacked the 20th Indiana Regiment at Chicamacomico, about 30 miles above Hatteras Inlet, and took a considerable number of them prisoners. The next day the Monticello and Susquehanna came down and shelled the Confederate troops, killing a large number, and driving the remainder to their boats. The U. S. Government authorized the enlistment of loyal citizens of North Carolina in the army, and a considerable number availed themselves of the opportunity.

2. *The Expedition to Port Royal.*—The Hatteras expedition having proved successful, the U. S. Government was encouraged to prosecute with all diligence a much greater and more formidable undertaking, which it had already projected. The finest harbor on the Southern Atlantic coast was that of Port Royal in South Carolina—a broad estuary, formed by the junction of Broad and Port Royal rivers, and Archer's Creek and their debouchure into the Atlantic. The interlacing of these and other rivers in the vicinity has formed a large group of islands, of which Hilton Head, Hunting, St. Helena, Paris, and Port Royal are the principal. This harbor is situated about half-

way between Charleston and Savannah, with both which cities it has an interior water communication. The parish, of which these islands form the greater part, was the richest agricultural district in South Carolina. It was the most important seat of the production of the fine long-stapled Sea Island cotton, and was also largely engaged in the rice culture. It was the largest slaveholding parish in South Carolina, having 32,000 slaves to less than 7,000 whites. The village of Beaufort and the adjacent country on Port Royal and the other interior islands was the summer residence of the wealthy planters of South Carolina.

The Government at first seems to have purposed sending the expedition to some other point (perhaps Savannah) on the coast, but wisely referred the final decision of the point to be first attacked, to the thorough professional knowledge and skill of the flag-officer of the expedition, Com. S. F. Dupont, who, after much deliberation and consultation with the Assistant Secretary of the Navy, Mr. Fox, fixed upon Port Royal, as being the best point from which to move either northward or southward. The preparations for the expedition were on an extensive scale, and required a longer period for the completion of all its equipments than was at first expected. It finally set sail from Hampton Roads on the 29th of October, consisting of fifty vessels, including transports. A fleet of twenty-five coal vessels, to supply the necessary fuel, had been despatched the previous day.

The naval vessels connected with the expedition were the Wabash, (the flag-ship,) the Susquehanna, and the gunboats Mohican, Seminole, Pawnee, Unadilla, Ottawa, Pembina, Isaac Smith, Bienville, Seneca, Curlew, Penguin, Augusta, R. B. Forbes, and Pocahontas, the steam-tug Mercury, the frigate Vandalia, and the little steam-cutter Vixen. There were also thirty-three transports, many of them of the first class, such as the Baltic, Ocean Queen, Vanderbilt, Illinois, Cahawba, Empire City, Ariel, Daniel Webster, Coatzacoalcas, Ericsson, Oriental, Philadelphia, S. R. Spaulding, Winfield Scott, Atlantic, &c., &c.; and such sailing vessels as the Great Republic, Ocean Express, Golden Eagle, &c. The naval command was, as has already been said, assigned to Com. S. F. Dupont, but the transports carried out an army of about 15,000 troops, under the command of Acting Major-General Thomas W. Sherman. This force was divided into three brigades, commanded respectively by Brigadier-Generals Egbert S. Viele, Isaac J. Stevens, and Horatio G. Wright. The first brigade consisted of the Third New Hampshire, Eighth Maine, Forty-sixth, Forty-seventh, and Forty-eighth New York regiments; the second brigade of the Eighth Michigan, Fiftieth Pennsylvania, Roundhead Pennsylvania, and Seventy-ninth New York, (Highlanders); the third brigade, of the Sixth and Seventh Connecticut, the Ninth Maine, the Fourth New Hampshire, and the Third Rhode Island, with Hamilton's (late

Sherman's) battery of six rifled cannon, and a battalion of Serrell's volunteer engineers.

The weather, which was unsettled when the fleet left Hampton Roads, soon changed into a storm of wind of great violence, which, increasing on the 31st October, became on Friday, Nov. 1, a hurricane from the southeast, and scattered the ships so widely that, on Saturday morning, but one of the whole fleet was in sight from the deck of the Wabash. On Sunday the wind had moderated, and the steamers and ships began to reappear. The Isaac Smith had been compelled to throw her battery overboard to keep from foundering; the Governor and the Peerless, two of the transports, sank; but the soldiers and crews were saved except seven of the marines on the Governor, who were drowned by their own imprudence. On the morning of the 4th, Com. Dupont anchored off the bar of Port Royal harbor, with twenty-five of his vessels in company. The channel of the harbor was that day found, sounded out, and buoyed under the direction of Commander Davis, the fleet captain. The gunboats and lighter transports were, before dark of the same day, anchored inside of the bar, in the secure roadstead, and Com. Tatnall's (Confederate) fleet chased under their own batteries. The next day a reconnaissance in force was made by the Ottawa, Seneca, Curlew, and Isaac Smith, which drew the fire of the Confederate forts, and showed which was the strongest. On the 5th, the Wabash and Susquehanna, and the large transports crossed the bar, and the buoys which marked the shoal lines were planted. A storm postponed the attack until the 7th, when it was commenced at about half-past nine o'clock A. M., and continued for four hours, closing with the complete rout and flight of the Confederate force from both forts. The Confederate fortifications were Fort Walker, on Hilton's Head Island, at the right of the channel—a strong earthwork mounting 23 guns, all of the heaviest calibre and most approved pattern for sea-coast defence, some of them rifled, and several imported from England since the war commenced. A small outwork, mounting a single rifled gun, had been erected near the fort and beyond it on the sea front. Fort Beauregard, at Bay Point, on Phillips or Hunting Island, on the left bank of the channel, $2\frac{1}{2}$ miles from Fort Walker, was also a strong work, though not as formidable as Fort Walker. It mounted 20 guns of the same general character as those in the other fort, and was supported by an outwork nearly a half mile distant, mounting 5 guns. About 2 miles above the forts, where the Port Royal or Beaufort River joins the Broad, Com. Tatnall's (Confederate) fleet of six or seven gunboats was stationed.

The circumstances thus detailed influenced Com. Dupont in deciding upon his plan of attack. He first stationed his transports at anchor, beyond the range of the guns of the forts; then leading the way with the Wabash, followed immediately by the Susquehanna, Mo-

hican, Seminole, Pawnee, Unadilla, Ottawa, Pembina, and Vandalia towed by the Isaac Smith, he passed up the centre of the channel, delivering his fire at the forts on each side, and, sailing in an ellipse, passed down within 600 yards of Fort Walker, firing slowly and deliberately, but never losing the range. Meanwhile the Bienville, Seneca, Curlew, Penguin, and Augusta had passed up on the left side of the channel, pouring their broadsides into Fort Beauregard, and then taking a station where they could cut off Tatnall's fleet from any participation in the fight, and at the same time maintain a destructive flanking fire upon the weak left flank of Fort Walker. Three times the line of vessels traversed their elliptical circuit, the last time aided by the fire of the Pocahontas, the R. B. Forbes, and the Mercury tug, which came up about twelve o'clock M. At the completion of the third circuit, the guns of the forts were mostly disabled, and the garri- sons, consisting in Fort Walker of two South Carolina regiments, and in Fort Beauregard of one, had fled in a terrible panic, leaving their weapons, overcoats, and even their watches and papers behind them. The Federal loss was: killed, 8; wounded seriously, 6; wounded slightly, 17. Total killed and wounded, 31. Confederate loss not known, but considerably larger than this. With these forts were captured 48 cannon, 43 of them of excellent quality, and mostly of large calibre, and large quantities of ammunitions and stores. On the 9th of November, the Seneca, Lieut. Ammen commanding, proceeded to Beaufort, and found the town in possession of the negroes, the whites having fled. The other islands were successively occupied, and on the 25th Nov., Com. Dupont reported to the Navy Department, that he had taken possession of Tybee Island, commanding the entrance of the Savannah River. Meantime the troops under Gen. Sherman, though debarred by the circumstances from any active participation in the capture of the two forts, had not been idle. Having landed on Hilton Head, they occupied and strengthened the fortifications, and made that point the base of further operations on Savannah, Charleston, and other places, the record of which belongs to the year 1862.

3. *The Ship Island Expedition.*—Ship Island is a small island, about 7 miles in length, and from $\frac{1}{2}$ to $\frac{3}{4}$ of a mile wide, lying a little north of the 30th parallel of north latitude and near the 89th meridian of west longitude. It is about 60 miles from New Orleans, and with Horn, Pelet, Bois, and Dauphine Islands on the east and Cat Island on the west, forms the southern barrier of Mississippi Sound, a body of water extending from Mobile Bay to Lake Borgne, in Louisiana, and forming an interior communication between Mobile and New Orleans. This sound is 10 or 12 miles wide, and opposite Ship Island, which is south of the coast of Mississippi, are the towns of Biloxi, Mississippi City, and Pascagoula. The island itself is mostly a bank of clear white sand, without trees or

shrubs. On the east end, however, there are live oak and other trees and grass. Excellent water can be obtained in abundance by sinking a barrel anywhere on the island. On the west end is a fort and light-house. The fort was commenced by the U. S. Government in 1859, and in May or June, 1861, was burned by the Confederates, who also destroyed the wood-work of the light-house. The U. S. steamer *Massachusetts* visited the island on the 28th of June, and found it unoccupied, and captured five Confederate schooners in its vicinity. Between this date and the 4th of July the *Massachusetts* was absent at Fort Pickens, but on her return from that it had been visited by a Confederate force, who, however, were not then on the island. On the 8th July the *Massachusetts* found a considerable force there, who were throwing up intrenchments and had mounted some heavy guns. An attempt was made to dislodge them, but unsuccessfully, and they were allowed to remain in possession till the 16th of September when, under the apprehension that a large naval expedition was coming to attack them, they abandoned the island and escaped to the shore, taking most of their ordnance with them. During the two months of their occupation they had re-built the fort, constructing eleven fine bomb-proof casemates and a magazine, and had mounted 20 guns. They named it Fort Twiggs. On the 17th Sept. the *Massachusetts* landed a force on the island, who took possession, and having been reinforced, have continued to hold it. They mounted cannon on the fort and strengthened it still further by the addition of two more bomb-proof casemates, and a formidable armament of Dahlgren 9-inch shell guns and rifled cannon. They also erected barracks for troops, with brick, left on the island by the Confederates, and lumber captured from them. On the 19th October, Com. Hollins, in command of the Confederate gunboat *Florida*, appeared in Mississippi Sound, and challenged the U. S. gunboat *Massachusetts* to a naval battle. The challenge was accepted, and after a sharp engagement of forty-five minutes the *Florida* retired, seriously disabled, and put into Pass Christian, apparently in a sinking condition. Four of her crew were killed. The *Massachusetts* was injured, but not seriously, by a 100-lb. shell, which struck her 5 feet above her water line, but was repaired in a few days. None of her crew were killed, and only one slightly wounded. On the 21st Nov. the gunboat *New London* arrived in the sound, and in the course of a fortnight captured five Confederate vessels.

The expedition to Ship Island was projected in September, almost immediately after Gen. Butler's return from the expedition to Hatteras Inlet, and he was authorized to enlist troops for it in New England. Coming into collision with Gov. Andrew of Massachusetts, in relation to the appointment of persons as field-officers for the regiments he raised in Massachusetts, whom the Governor regarded as unfit

for their posts, and refused to commission, the expedition was delayed for a time. The first instalment of troops for it were embarked at Boston, on the 19th of November, on the U. S. transport *Constitution*, and sailed at first for Portland, Me., and thence for Fortress Monroe, which they reached on the 26th Nov., and sailed the next day for Ship Island, where they arrived on the 3d Dec. They consisted of the Twenty-sixth Massachusetts Regiment, Col. Jones, the Ninth Connecticut, Col. Cahill, and the Fourth battery of Massachusetts artillery, Capt. Manning, and were under the command of Brig.-Gen. John W. Phelps, a native of Vermont, and graduate of West Point, in 1836. He served for 23 years in the army, but resigned in 1859, and was living at Brattleboro, Vt., at the commencement of the war, when he was called to the command of the First Regiment of Vermont Volunteers, (three-months men,) and in July was appointed brigadier-general.

Having completed the debarkation of his command, Gen. Phelps issued a proclamation to the loyal citizens of the southwest, for which there seemed no occasion, as his superior in command, Maj.-Gen. Butler, had not arrived, and there were on the island none but U. S. troops, and no invasion had been made upon the territory claimed by the Confederate Government. The tone of the address was also injudicious, and Gen. Phelps was stated to have been reprimanded by the U. S. Government for issuing it. He announced in his proclamation as among the principles by which his command would be governed, that every slave State which had been admitted into the Union, since the adoption of the Constitution, had been so admitted in direct violation of that Constitution; that the slave States which existed as such, at the formation of the Constitution were, by becoming parties to that compact, under the highest obligations of honor and morality to abolish slavery; urged the claims of free, and especially of free foreign labor, to a share in the occupancy and cultivation of the soil of the Southern States, and the importance and absolute necessity of the domination of free institutions to the prosperity of the Caucasian race on the continent. He then proceeded to discuss the position and claims of slavery as a social and political evil, and the necessity of its overthrow. In illustration of this necessity, growing, as he avowed, out of its want of adaptation to modern times and free institutions, he drew a parallel between slavery and the condition of the Catholic Church in France before the Revolution, and asked whether they ought not and could not revolutionize slavery out of existence. In conclusion he bestowed a high eulogium on free labor, as the basis of free institutions; as the right, the capital, the inheritance, the hope of the poor man everywhere; that it was especially the right of five millions of our fellow-countrymen in the slave States, as well as of the four millions of Africans there, and declared that

all the efforts of his command, whether directed against the interference of governments abroad or rebellious combinations at home, should be for free labor; that their motto and their standard should be there, and everywhere, and on all occasions, "Free labor and working-men's rights." The proclamation was not circulated upon the mainland to any considerable extent; but it created much dissatisfaction among Gen. Phelps' own command. The Constitution left Ship Island on the 7th of Dec. on her return to the North, and arrived at Fortress Monroe on the 15th; in Jan. 1862, she returned with another considerable body of troops. During the month of December the gunboats Montgomery and New London had two engagements with Confederate gunboats in Mississippi Sound, but without decisive result.

4. *The Burnside Expedition.*—The preparations for this expedition were commenced early in September, and in October about 11,000 troops had been concentrated at Annapolis, to prepare for the enterprise, and to be perfected in drill. Just before the departure of the expedition, an addition of several regiments was made to this force. At the commencement it was resolved to place it in charge of Brig.-Gen. Ambrose E. Burnside, a native of Indiana, born May 23, 1824, who graduated at West Point in 1847, distinguished himself as a lieutenant in the Mexican war, and in 1849, and several succeeding years, was engaged in frontier service in New Mexico, during which he manifested great bravery in an engagement with the Apache Indians. He was quartermaster of the boundary commission with Mexico; and in 1851, with an escort of three men, he travelled 1,200 miles through the Indian Territory in seventeen days. He was next stationed at Fort Adams, Newport, but soon resigned, to enter upon the manufacture of a breech-loading rifle. This proving unprofitable, he entered the service of the Illinois Central Railroad Company as cashier and subsequently as treasurer. Gov. Sprague, of Rhode Island, tendered him an appointment as colonel of one of the Rhode Island regiments, in April, and he immediately accepted and took a prominent and honorable part in the battle of Bull Run, where he was acting brigadier-general. On the 6th of Aug. he was appointed brigadier-general, and soon after detailed for this expedition. The naval commander was Flag-officer L. M. Goldsborough, of the Atlantic Squadron, and Commander Samuel F. Hazard of the U. S. Navy had charge of the transport fleet. The army corps consisted of three brigades: the first under command of Brig.-Gen. John G. Foster, (the Capt. Foster of Fort Sumter,) and consisting of the Twenty-third, Twenty-fourth, Twenty-fifth, and Twenty-seventh Massachusetts, and the Tenth Connecticut regiments; the second under command of Brig.-Gen. Jesse L. Reno, comprising the Fifty-first New York, the Fifty-first Pennsylvania, the Twenty-first Massachusetts, the Sixth New Hampshire, and the Ninth New Jersey; the third under the

command of Brig.-Gen. John G. Parke, and consisting of the Eighth and Eleventh Connecticut, the Fifty-third and Eighty-ninth New York, and a battalion of the Fifth Rhode Island Regiment, together with Battery F. of the Rhode Island artillery. These three brigades numbered about 16,000 men, and required not far from 30 transports to take them to their destination, 5 vessels to transport the horses, 8 or 10 to carry the supplies, a siege train, and 2 pontoon-bridge schooners, a division hospital, and one for the signal corps; and the naval portion of the expedition, when it left Annapolis, consisted of 9 gunboats, and 5 floating batteries. The expedition did not sail from Fortress Monroe till the middle of January, 1862, and its movements, therefore, belong to the record of that year rather than 1861.

5. *The Mortar Fleet of Com. Porter.*—This fleet, of which not more than, perhaps, two or three of the vessels composing it sailed until January, was fitted out at the Brooklyn Navy Yard, and was for some months in preparation. It consisted of one gunboat, the *Octorara*, mounting 18 guns, and serving as Com. Porter's flag-ship, but subsequently diverted from the expedition to Fortress Monroe, and 20 schooners, of from 200 to 300 tons each, of great strength and solidity, and carrying each a mortar, weighing 8½ tons, of thirty-nine inches length of bore, forty-three inches external and fifteen inches internal diameter, and intended to throw a 15-inch shell, weighing, when unfilled, 212 lbs. They are elevated or depressed by means of projections on the breech. Each vessel also carried two 32-pounders, rifled.

This class of vessels has been selected because they are stronger in proportion to their size than larger ones, at the same time that their light draft enables them to go into shallow water; and from their small tonnage they can be handled by a small number of men.

To fit them to receive the mortars, a bed has been prepared, which is supported by an almost solid mass of wood, built from the keel to the deck. This consists of timbers over one foot square and twelve feet in length, interlaced and firmly fastened. The bed rises two or three inches above the deck, and consists of a solid horizontal surface, circular in form, with a truck near its edge, upon which run rollers bearing a revolving platform. The bed itself is carefully braced and supported by the entire strength of the vessel, so as to sustain the recoil of the mortar.

The circular platform surmounting the bed and bearing the mortar carriage, is constructed of heavy timbers, and is one foot in depth, and nearly twelve feet in diameter. When in position for a discharge, it lies flat and firmly on the bed, but by ingenious mechanism it may be made to revolve, in order to aim the mortar in any direction, or to re-sight it if the vessel shifts its position. The change of direction is easily and quickly accomplished. By means of four eccentric axles in the platform, to which levers

are fitted, the mortar and machinery (weighing altogether over ten tons) may be raised, and the weight transferred by the same movement to a great number of metallic rollers attached to a framework of immense strength under the platform. Then, by means of tackle, already arranged, the whole mass may be moved to its desired position, and instantly, by a reverse movement, replaced on the bed. In the centre of the platform, and extending into the solid mass beneath, is an iron cylinder or spindle which prevents any side movement.

The mortar carriage is constructed almost exclusively of wrought iron. Its length is about nine feet, and its height and width each four feet. In form it bears the slightest possible resemblance to a land carriage—gradually sloping at the point where the mortar rests, in the direction of the breech; and having wheels, yet not resting on them when the mortar is discharged. The carriage is composed principally of plate iron, riveted together, braced and bolted. It is a framework of excellent design, and though weighing probably not more than two tons, is capable of resisting a pressure of one to two hundred tons.

Two wheels are set close to the framework, directly under the mortars; and connected with them are eccentric axles, so arranged as to permit so large a part of the weight to be thrown on the wheels, that the carriage may be moved on them.

It is not intended, however, that the recoil of the mortar shall in any degree be taken up or lessened in its effect by the moving of the wheels. The carriage lies firmly on the platform when the mortar is discharged, and the only possible motion will be that of the vessel in the water.

The bombs are the most formidable ordnance missile known, except those used in the Rodman columbiad of 15-inch bore. In addition to the two 32-pounder guns, the vessels are provided with pikes, cutlasses, and other necessary weapons.

The mortars cannot be fired directly over the sides of the vessels, and therefore the latter must be partially headed towards the point of attack. The vessels will therefore be anchored, and a part of the rigging removed. The extraordinary weight and strength of the mortars, the unprecedentedly large charge of powder, the long range and high velocity of the projectiles, with their destructive character, combine to render this novel expedition one of the most important undertaken during the war. The vessels made their first rendezvous at Key West and subsequently proceeded to Ship Island, Mississippi.

6. *The Mississippi River Expedition.*—Soon after taking command of the Western Department, Maj.-Gen. Fremont became convinced of the necessity of preparing a fleet of gunboats and mortar-boats, for the purpose of commanding the Mississippi and other navigable waters

of the West, and decided upon the plans and ordered the construction of the number of each he deemed necessary. Their completion, and the furnishing of them with their armament and crew, and the collection of the requisite land force to accompany them, so delayed the expedition, that it did not move till February, 1862; but it was almost entirely prepared during the year 1861.

The fleet consisted of twelve gunboats, carrying an armament in all of 126 guns, viz.:

Benton.....	16 guns.
Essex.....	9 "
Mound City.....	12 "
Cincinnati.....	12 "
Louisville.....	12 "
Carondelet.....	13 "
St. Louis.....	13 "
Cairo.....	13 "
Pittsburgh.....	13 "
Lexington.....	9 "
Conestoga.....	9 "
Tyler.....	9 "

None of these guns are less than 32-pounders—some are 42-pounders, some 64-pounders, and one (on the Essex) throws a shell weighing 128 lbs. In addition to these, each boat carries a Dahlgren rifled 12-pounder boat howitzer on the upper deck. Several of the larger guns on each boat are rifled. Naval officers regarded the 10-inch Dahlgren shell guns as their most efficient weapons. The Benton carries two of these guns in her forward battery; the others carry one each.

Seven of the gunboats were iron-clad, and able to resist all except the heaviest solid-shot. These boats cost on an average \$89,000 each. The other five were of wood, but strongly and substantially built; all were fast sailers.

Beside these, thirty-eight mortar-boats were ordered; each about sixty feet long and twenty-five feet wide, surrounded on all sides by iron-plate bulwarks, six or seven feet high. The mortar itself weighs 17,200 lbs.; has a bore easily admitting a 13-inch shell, and from the edge of the bore to the outer rim is seventeen inches. The mortar bed weighs 4,500 lbs.

The mortar-boats were thoroughly tested before being used in actual service, and were found to produce but slight recoil, and the concussion caused by the iron bulwarks was remedied. With a charge of 11 lbs. of powder the mortars threw a shell, weighing 215 lbs., a distance of 2½ miles; and with a charge of 15 to 23 lbs. the same shell was thrown from 3 to 3½ miles.

There was also a sufficient number of steam-boats and tugs provided for towing and transport service. The fleet was under the command of Flag-officer Andrew H. Foote, an experienced and able commander in the navy; and each boat was in charge of a lieutenant-commanding, who had already seen service. Very efficient service was subsequently performed by this fleet.

F

FAIRFAX COURT HOUSE is a small town and the capital of Fairfax County, in Virginia. It is 120 miles north of Richmond, 21 miles west of Washington, and 14 from Alexandria. After the United States forces had taken possession of the south bank of the Potomac opposite Washington, and the Confederate forces had concentrated at Manassas Junction, near the end of the month of May—Fairfax, thus situated between the two armies, became the scene of many skirmishes. On the 1st of June a dash was made through the village by a company of regular cavalry, consisting of forty-seven men, under command of Lieut. Tompkins. The Confederate troops, in some force, were in possession of the village, and made a vigorous and determined resistance.

The cavalry charged through the principal street, and, upon their return, were met by two Confederate detachments of troops with a field-piece. Again wheeling about, they found themselves assailed in the rear by another detachment, through which the cavalry fought their way and escaped, bringing off with them five prisoners.

The cavalry lost nine horses, six shot down in the engagement, and three so badly wounded as to render it necessary to kill them shortly after leaving the village. They captured, however, with their five prisoners, three good horses with their saddles and bridles. The loss on the other side was estimated to be larger. This was the first skirmish of any interest between the Federal and Confederate forces in Northeastern Virginia.

FAST DAYS are periods of time, usually a day, in which abstinence from food is maintained as a religious observance. They are designated in the institutions of religion, and, in the United States, they are often appointed by the highest civil officer. In some of the New England States, the Governor has usually fixed by proclamation a day in the spring to be observed "by fasting, humiliation, and prayer," when religious services have generally been conducted in the churches. A few times the President of the United States has, since the existence of the Government, issued a proclamation inviting all the people thus to observe a particular day. During the year 1861, this occasion was made more frequent than ever before. On the 14th of December, President Buchanan issued the following proclamation :

A PROCLAMATION.

Numerous appeals have been made to me by pious and patriotic associations and citizens, in view of the present distracted and dangerous condition of our country, to recommend that a day be set apart for humiliation, fasting, and prayer throughout the Union. In compliance with their request, and my own sense of duty, I designate

FRIDAY, THE 4TH DAY OF JANUARY, 1861,

for this purpose, and recommend that the people assemble on that day, according to their several forms of worship, to keep it as a solemn fast.

The Union of the States is at the present moment threatened with alarming and immediate danger—panic and distress of a fearful character prevail throughout the land—our laboring population are without employment, and consequently deprived of the means of earning their bread—indeed, hope seems to have deserted the minds of men. All classes are in a state of confusion and dismay; and the wisest counsels of our best and purest men are wholly disregarded.

In this, the hour of our calamity and peril, to whom shall we resort for relief but to the God of our Fathers? His omnipotent arm only can save us from the awful effects of our own crimes and follies—our own ingratitude and guilt towards our Heavenly Father.

Let us, then, with deep contrition and penitent sorrow, unite in humbling ourselves before the Most High, in confessing our individual and national sins, and in acknowledging the justice of our punishment. Let us implore Him to remove from our hearts that false pride of opinion which would impel us to persevere in wrong for the sake of consistency, rather than yield a just submission to the unforeseen exigencies by which we are now surrounded. Let us, with deep reverence, beseech Him to restore the friendship and good will which prevailed in former days among the people of the several States, and, above all, to save us from the horrors of civil war and "blood guiltiness." Let our fervent prayers ascend to His throne, that He would not desert us in this hour of extreme peril, but remember us as He did our fathers in the darkest days of the Revolution, and preserve our Constitution and our Union—the work of their hands—for ages yet to come. An Omnipotent Providence may overrule existing evils for permanent good. He can make the wrath of man to praise Him, and the remainder of wrath He can restrain. Let me invoke every individual, in whatever sphere of life he may be placed, to feel a personal responsibility to God and his country for keeping this day holy, and for contributing all in his power to remove our actual and impending difficulties.

JAMES BUCHANAN.

WASHINGTON, Dec 14, 1861.

On the 14th of May, the Confederate Congress passed a resolution as follows:

Resolved by the Congress of the Confederate States, That the President be requested to issue his proclamation, appointing a day of fasting and prayer in the observance of which all shall be invited to join, who recognize our dependence upon God, and who desire the happiness and security of that people "whose God is the Lord."

In compliance with this resolution, President Davis issued the following proclamation:

A PROCLAMATION.

When a people who recognize their dependence upon God feel themselves surrounded by peril and difficulty, it becomes them to humble themselves under the dispensation of Divine Providence, to recognize His righteous government, to acknowledge His goodness in times past, and supplicate His merciful protection for the future.

The manifest proofs of the Divine blessings hitherto extended to the efforts of the people of the Confederate States of America to maintain and perpetuate public liberty, individual rights, and national independence, demand their devout and heartfelt gratitude. It becomes them to give public manifestation of this gratitude, and of their dependence upon the Judge of all

the earth, and to invoke the continuance of His favor. Knowing that none but a just and righteous cause can gain the Divine favor, we would implore the Lord of Hosts to guide and direct our policy in the paths of right, duty, justice, and mercy, to unite our hearts and our efforts for the defence of our dearest rights; to strengthen our weakness; crown our arms with success, and enable us to secure a speedy, just, and honorable peace.

To these ends, and in conformity with the request of Congress, I invite the people of the Confederate States to the observance of a day of fasting and prayer, by such religious services as may be suitable for the occasion, and I recommend Thursday, the 13th day of June next, for that purpose; and that we may all on that day, with one accord, join in humble and reverential approach to Him in whose hands we are, invoking Him to inspire us with a proper spirit and temper of heart and mind to bear our evils, to bless us with His favor and protection, and to bestow His gracious benedictions upon our Government and country.

On the 12th of August, President Lincoln issued the following proclamation, appointing the last Thursday in September ensuing as a day of fasting:

A PROCLAMATION.

Whereas, A joint Committee of both Houses of Congress has waited on the President of the United States, and requested him to "recommend a day of public humiliation, prayer, and fasting, to be observed by the people of the United States with religious solemnities, and the offering of fervent supplications to Almighty God for the safety and welfare of these States, His blessings on their arms, and a speedy restoration of peace;

And whereas, It is fit and becoming in all people, at all times, to acknowledge and revere the Supreme Government of God; to bow in humble submission to his chastisements; to confess and deplore their sins and transgressions, in the full conviction that the fear of the Lord is the beginning of wisdom, and to pray, with all fervency and contrition, for the pardon of their past offences, and for a blessing upon their present and prospective action;

And whereas, When our own beloved country, once, by the blessing of God, united, prosperous, and happy, is now afflicted with faction and civil war, it is peculiarly fit for us to recognize the hand of God in this terrible visitation, and in sorrowful remembrance of our own faults and crimes as a nation, and as individuals, to humble ourselves before Him, and to pray for His mercy—to pray that we may be spared further punishment, though most justly deserved; that our arms may be blessed and made effectual for the re-establishment of law, order, and peace, throughout the wide extent of our country; and that the inestimable boon of civil and religious liberty, earned under His guidance and blessing by the labors and sufferings of our fathers, may be restored in all its original excellence;

Therefore, I, Abraham Lincoln, President of the United States, do appoint the last Thursday in September next as a day of humiliation, prayer, and fasting for all the people of the nation. And I do earnestly recommend to all the people, and especially to all ministers and teachers of religion, of all denominations, and to all heads of families, to observe and keep that day, according to their several creeds and modes of worship, in all humility, and with all religious solemnity, to the end that the united prayer of the Nation may ascend to the Throne of Grace, and bring down plentiful blessings upon our country.

In testimony whereof, I have hereunto set my hand, and caused the seal of the United States to be [L. s.] affixed, this 12th day of August, A. D. 1861, and of the Independence of the United States of America the eighty-sixth. ABRAHAM LINCOLN.

On the 31st of October President Davis issued another proclamation, appointing the

15th of November as a fast day. The proclamation was as follows:

A PROCLAMATION.

Whereas, It hath pleased Almighty God, the Sovereign Disposer of events, to protect and defend the Confederate States hitherto, in their conflict with their enemies, and to be unto them a shield; and, whereas, with grateful thanks we recognize His hand and acknowledge that not unto us, but unto Him belongeth the victory; and in humble dependence upon His Almighty strength, and trusting in the justness of our cause, we appeal to Him that He may set at naught the efforts of our enemies, and put them to confusion and shame;

Now, therefore, I, Jefferson Davis, President of the Confederate States, in view of the impending conflict, do hereby set apart Friday, the 15th day of November, as a day of fasting, humiliation, and prayer; and I do hereby invite the reverend clergy and the people of these Confederate States to repair on that day to their usual places of public worship, and to implore the blessing of Almighty God upon our arms; that He may give us victory over our enemies, preserve our homes and altars from pollution, and secure to us the restoration of peace and prosperity.

Given under my hand and the seal of the Confederate States, at Richmond, this 31st day of October, in the year of our Lord one thousand eight hundred and sixty-one.

JEFFERSON DAVIS.

FINANCES OF THE UNITED STATES.

The finances of the Federal Government for the year 1861 underwent a very important and radical change, both in respect to the policy of a national debt, and in relation to the mode of raising revenue. The Constitution of the Federal Government provides for raising revenue as well by direct taxes as by indirect duties upon consumable articles. It has been the case, however, that the former have been unpopular, while the latter have not only had the merit of being easily collected, but, while they have sufficed to meet all the ordinary wants of the Government, and sometimes greatly to exceed them, as in 1836, when a surplus revenue of \$28,000,000 was distributed among the States, they have served to give incidental protection to the nascent manufactures of the Union. The revenue derived from the sales of land was also a resource which did not bear directly upon the industry of the people. In times of unforeseen difficulty, like commercial revulsion or war, the Government has always been able to borrow sufficient to meet the exigency, and returning prosperity has always afforded the means of paying off the debt. During the war of 1812 an attempt at direct taxation was made without very satisfactory results, and the taxes were soon repealed. The aggregate resources and payments of the Federal Government, from its origin down to the close of the fiscal year 1861, were as follows:

Customs revenue.....	\$1,575,152,579.92
Land	175,817,961.00
Taxes and other receipts	95,305,322.56
Total ordinary revenue,	
March 4, 1789, to July 1, 1861,	\$1,846,275,863.48
Total ordinary expenditure,	
March 4, 1789, to July 1, 1861,	1,453,790,786.00
Total excess revenue.....	\$392,485,077.48
Total amount received for loans 1789 to 1861.....	\$462,935,644.64
Total amount paid for loans 1789 to 1861.....	\$1,886,375.00
Excess payments for loans..	\$318,950,730.36

Thus by far the largest portion of all the expenses of the Government during its existence, including war expenses, purchase of territories, indemnities to Mexico, Texas, &c., was discharged by the customs revenues. If we deduct from the debt \$90,867,828, that existed July 1, 1861, the amount of \$28,101,644 deposited among the States under the law of 1836 and never returned, and also the debt made necessary by the troubles in the latter part of the fiscal year 1861, there will remain very little, thus showing that all the expenses of the Federal Government from its origin have been paid by customs revenues, leaving in the hands of the Government an immense amount of property acquired in land, and still at its disposal, also vast military resources and public buildings, in the whole Union.

The magnitude of the civil war caused, however, a complete change in the finances, involving as it did an amount of expenditure within the year, never before undertaken by any nation. The capital of the country seemed, however, equal to the exigency, although the public mind was at first somewhat startled by events. In June, 1860, Congress had authorized a loan of \$20,000,000; of this, \$10,000,000 was offered in the month of October in a 5 per cent. stock, which was taken at a small premium. Inasmuch, however, as the Presidential election of Nov. 6, 1860, intervened before the instalments were paid up, the resulting inquietude caused some of the bidders to decline the stock, and \$7,022,000 only was issued. The same circumstances caused a great decline in the customs revenues, and the means of the Government in December were greatly cramped. The Secretary of the Treasury, Howell Cobb, resigned December 10. On the 14th of that month Congress passed a law, approved on the 17th, permitting the issue of \$10,000,000 treasury notes, payable in a year, at the lowest rates of interest offered. The Secretary offered \$5,000,000 of the notes, bids to be opened Dec. 28. When the time expired, however, but \$500,000 had been bid, at 12 per cent. There were some offers at 24 per cent., and some as high as 36 per cent. The Secretary rejected all over 12 per cent. It was highly necessary that the money should be had to meet the interest on the Federal stocks due Jan. 1, and a number of banks and bankers offered for \$1,500,000 at 12 per cent., on condition that the money should be applied to the interest. On the 31st the remainder was taken by the same association at the same rate. It may be here stated that the State of New York had offered for \$1,200,000 in a 7 per cent. stock, $8\frac{1}{2}$ years to run, and it was taken at 101.12 to 102.71, average 101 $\frac{1}{2}$, on the 26th December.

General Dix was appointed Secretary of the Treasury in January, and he offered the remaining \$5,000,000 of the loan authorized.

The bids were opened on the 19th, and the notes awarded as follows:

\$10,000.....	at	8 $\frac{1}{2}$ per cent.
30,000.....	at	9 " "
10,000.....	at	9 $\frac{1}{2}$ " "
140,000.....	at	9 $\frac{1}{2}$ " "
67,000.....	at	9 $\frac{1}{2}$ " "
721,000.....	at	10 " "
265,000.....	at	10 $\frac{1}{2}$ " "
549,000.....	at	10 $\frac{1}{2}$ " "
1,267,000.....	at	10 $\frac{1}{2}$ " "
1,947,000.....	at	11 " "

\$5,000,000 Average rate, 10 $\frac{1}{2}$ per cent.

The condition of the finances now seriously engaged the attention of Congress. The apparent discredit of the Government made some vigorous means necessary to replenish the treasury. The necessity of revising the tariff, so that it would produce a larger revenue, was obvious, and a bill to that effect was introduced. Meantime a bill was passed, February 8, authorizing a loan of \$25,000,000, to bear 6 per cent. interest, to run not less than ten nor more than twenty years; the stock to be sold to the highest bidder. The Secretary offered \$8,000,000 of this stock. The bids were opened Feb. 27, and the whole amount offered was \$14,355,000, ranging from 75 to 96 per cent. All bids below 90 were refused, and the stock, as awarded, ranged at 90 $\frac{1}{2}$ to 96 per cent.

The tariff bill reported by the Committee of Ways and Means under such circumstances had been passed with little debate. It restored the highest protective character to the tariff, replaced ad valorem duties with complicated specific duties, and gave but 30 days' notice before going into operation. It was passed March 2, to go into operation April 1, and it authorized a loan of \$10,000,000. The immediate effect of the tariff was to produce larger entries at the custom-house, in order to avoid the new tax. The consequently improved customs revenue supported the Government credit, and this, with renewed hopes of continued peace, caused the Government stock to advance in the market. The new Secretary of the Treasury, S. P. Chase, offered \$8,000,000 more of the stock, for which bids were opened April 2. It was found that for \$3,000,000, 94 to 100 per cent. was offered, and 93 $\frac{1}{2}$, or 3 $\frac{1}{2}$ per cent. higher than the bids in February, for an amount equal to the balance of the loan. The department thought proper to reject all bids below 94, consequently only that part of the loan was placed, \$3,099,000, average 94.01, netting \$2,913,395. This decision was unfortunately made at the moment when the expedition was about to sail from New York to reinforce Fort Sumter, a fact not known to the public. When it became known, much uneasiness was created, and in the midst of it the department offered \$5,000,000 of the balance of the loan in 6 per cent. treasury notes, payable in two years, and convertible into twenty-years stock. These bids were opened on the 11th April, when only \$1,000,000 had been offered. Parties interested then procured a delay, in order that further effort in favor of the stock might be made. The price

of money at call was then in the market 4 per cent., and could with difficulty be placed at that rate, and the United States 6 per cent. 20-years stock was selling at 83. Finally the bids amounted to \$2,500,000, and the leading banks and bankers with great exertion made up the remainder, completing the \$5,000,000 6 per cent. treasury notes at par. These being receivable for customs-duties, while money in the open market was only 4 per cent., large importers who had funds lying idle to meet duties, could invest them in these notes, where they would earn 6 per cent., and be available for the duties.

The department was now comparatively easy for the moment, but the immense expenses rapidly absorbed means. Congress was not to meet until July 4, and the Government credit, as apparent from the price of its 6 per cent. stock being 84, when money was only worth 4 per cent., for the same description for which the Government a few years before had itself paid 22 per cent. premium, was shaken. The resources of the Treasury now consisted of \$14,000,000, that had been authorized by the act of June, 1860, but which could not be sold under par for a 6 per cent. stock. There was the balance, \$9,000,000, of the \$25,000,000 authorized by the law of February, 1861, which might be sold to the best advantage, and there was also the \$10,000,000, authorized by the tariff law of March 2, 1861; but this could not be used until after June 30, or the close of the fiscal year 1861. The difficulty was to raise means upon these stocks. The banks and capitalists began to feel the necessity of aiding the Government and sustaining its credit as a matter of self-defence. Under these circumstances the New York Chamber of Commerce, with various sub-committees, and the New York and Boston banks, took the matter in hand, and after much difficulty issued the following card, May 16:

"The undersigned, a committee of the Chamber of Commerce, having, by a sub-committee, recently visited Washington to confer with the Secretary of the Treasury on the subject of the loans, which he is authorized by law to issue, they beg to call the attention of the public to the particulars of these loans, as follows:

"1. A loan of about nine million dollars, which will be issued in bonds or stock having twenty years to run, and at six per cent. interest. For this proposals are invited, and it will be awarded to the highest bidder, at Washington, on Tuesday, the 21st inst.

"2. A loan of fourteen million dollars, (\$14,000,000), which is limited by the law of June, 1860, at par. This loan is now advertised to be awarded on the 30th instant, but from its limitation it will probably have to be issued in treasury notes having two years to run, and convertible into twenty-years stock or bonds, as above, at the pleasure of the holder; which notes the Secretary is by law authorized to

substitute, and which are also restricted to par.

"And the committee invite all capitalists and moneyed institutions to avail of these opportunities for investment.

"Committee.—Pelatiah Perit, Stewart Brown, William H. Aspinwall, J. J. Astor, jr., August Belmont, James Gallatin, A. T. Stewart, J. M. Morrison, Moses Taylor, George S. Coe, F. A. Palmer, John Q. Jones, D. R. Martin, Jacob Campbell, jr."

When the time expired for the proposals, the bids were not completed, and Mr. Chase postponed the opening of the bids until May 25. The intermediate time was employed by influential parties in endeavoring to make up the loan. Finally, on opening the bids, the offers for the \$9,000,000 reached 84 to 93 for the stocks, of which \$6,396,000 were awarded at 85 to 93, a large portion to the New York banks, and \$2,241,000 in 6 per cent. treasury notes at par.

The proposals for the \$14,000,000 were to be opened on the 30th of May. That, however, was only a formality, since no one would bid par for stocks that he could buy in the market at 84. The compliance with the law, however, enabled the Secretary to issue the amount in treasury notes. Some of these were taken, and the remainder was paid out gradually to creditors.

While the Federal Government was thus struggling for money, the various States were also in the market with war loans. New York City procured \$1,000,000 at the close of April; Pennsylvania sold \$3,000,000 of a 5 per cent. loan, Ohio \$1,000,000, Indiana offered \$1,500,000 in a 6 per cent. stock, Illinois \$1,000,000, Michigan, \$500,000 at 7 per cent., Iowa \$400,000 at 7 per cent., Connecticut \$2,000,000 at 6 per cent. The State of New York obtained \$700,000 7 per cent. loan at 101.38 to 101.65, Maine \$1,000,000 in a 5 per cent. stock at a premium.

Towards the close of June the Government wants were again attracting attention, and the banking interest was urging the adoption of the loan or stock system, rather than the treasury note plan which the Secretary seemed to favor. There were no measures adopted, however, until the meeting of Congress. The Secretary then required \$5,000,000 to carry him along until Congress should devise means. The two-years treasury notes that had been issued at par were at 2½ per cent. discount, and were therefore not directly available. It was finally decided to borrow of the banks the required amount at 60 days on pledge of the 6 per cent. notes as collateral security. The amount of \$5,000,000 was promptly made up on these terms.

At the meeting of Congress, July 4, the Secretary of the Treasury, in his report, set forth the financial difficulties that beset the Government, and stated the probable expenditure for the year at \$318,519,581.97.

ed. The Secretary made an address to the people in accordance with this understanding, and some 500 agents were appointed. The appeal was, however, without the anticipated success. The public responded but to a comparatively small extent. The Secretary continued to draw upon the credit in his favor opened by the banks, which thus found their means passing from them, without much prospect of getting them back, since the notes they had taken would no longer sell at par in the open market. Hence, as the 1st December approached, they decided to take \$50,000,000 in the 6 per cent. 20-years stock at a rate equal to par for the 7 per cent. This was 89,322, or in amount \$44,661,231 91 for the fifty millions, to which was added the interest from July, making \$45,795,478.

Congress was now again in session. The report of the Secretary, that had been looked for with the greatest interest, was at last made, and it contained the following statement of the money that had been raised since the adjournment of Congress in August:

There were paid to creditors, or exchanged for coin at par, at different dates in July and August, six per cent. two-years notes, to the amount of	\$14,019,024.66
There was borrowed, at par, in the same months, upon sixty-days six per cent. notes, the sum of	12,877,750.00
There was borrowed, at par, on the 19th of August, upon three-years 7.30 bonds, issued for the most part to subscribers to the National Loan	50,000,000.00
There was borrowed, on the 1st of October, upon like securities	50,000,000.00
There was borrowed, at par for seven per cent., on the 10th of November, upon twenty-years six per cent. bonds, reduced to the equivalent of sevens, including interest	45,795,478.48
There have been issued, and were in circulation and on deposit with the Treasurer, on the 30th of November, of United States notes, payable on demand	24,550,325.00

Making an aggregate, realized from loans in various forms, of

\$197,242,588.14

It will be observed that in the whole of this borrowing very little was really subscribed by capitalists for investment. About \$38,000,000 of the 3-years notes only had been taken, mostly by small investors, and they were already again offering them in the market to an extent which reduced the price to 96 for those that were endorsed, and 98 for clean notes. The banks had invested the idle capital accumulated in their vaults, belonging to depositors, and the securities were still hanging over the market in prospective competition with the future loans of the Government. The department, nevertheless, had obtained the money.

While thus successful in borrowing, the revenues had been far less than the estimates, and the expenses far greater—the former, by reason of the stagnation of trade, and the latter in consequence of the great increase in the army. The Secretary, therefore, revised his estimates for the year as seen in the following table:

The Secretary advised a resort to taxation as a means of raising \$50,000,000 in excess of the customs for the service of the year 1863, in which year he estimated the expenses at \$475,334,245. This result was very unsatisfactory, and the public credit did not revive on the exposition, and the year closed with the suspension of the banks, amid gloomy prospects.

On emitting the demand notes, the Secretary of the Treasury addressed a circular to the various Assistant Treasurers, to the following effect:

Under the acts of July 19th and August 5th last, Treasury notes of the denomination of \$5, \$10, and \$20, have been, and will continue to be issued, redeemable in coin on demand at the offices of the Assistant Treasurer at Boston, New York, Philadelphia, St. Louis, and at the Depository of Cincinnati. These notes are intended to furnish a current medium of payment, exchange, and remittance, being at all times convertible into coin at the option of the holder, at the place where made payable, and everywhere receivable for public dues. They must be always equivalent to gold, and often and for many purposes more convenient and valuable.

A sufficient amount of coin to redeem these notes promptly on demand will be kept with the depositaries, by whom they are respectively made payable. And all depositors and collecting-officers will receive them, enter them on their books, and pay them to public creditors as money. Large amounts of the notes of small denominations are rapidly being issued and distributed.

General Scott issued the following order:

HEAD-QUARTERS OF THE ARMY, }
WASHINGTON, Sept. 3, 1861. }

The General-in-Chief is happy to announce that the Treasury Department, to meet future payments to the troops, is about to supply, besides coin, as heretofore, Treasury notes in fives, tens, and twenties—as good as gold at all banks and Government offices throughout the United States, and most convenient for transmission by mail from the officers and men to their families at home. Good husbands, fathers, sons, and brothers, serving under the Stars and Stripes, will thus soon have the ready and safe means of relieving an immense amount of suffering, which could not be reached with coin. In making up such packages, every officer may be relied upon, no doubt, for such assistance as may be needed by his men.

By command of Lieutenant-General SCOTT.
E. D. TOWNSEND, Assistant Adjutant-General.

Of these, the Secretary had issued about

ESTIMATES OF REVENUE AND EXPENDITURE FOR THE YEAR 1862.

REVENUE.	August estimate.	December estimate.	Decrease.	Increase.
Customs	\$57,000,000	\$32,198,602	\$24,801,398	
Lands	3,000,000	2,354,062	645,938	
Direct tax	20,000,000	20,000,000		
Total revenue	\$80,000,000	\$54,552,664	\$25,447,336	
Total expenditure	318,519,582	543,406,422	\$224,886,840

\$24,500,000 up to the 11th December. There then remained to him for resources the remainder of the demand notes, \$25,500,000, to be issued; also, the instalments due from the banks on the \$50,000,000 of stock, taken December 1st; and also, \$50,000,000 balance of the \$250,000,000 loan. These resources, he said, would carry him to the 15th January, when new legislation would become necessary.

The suspension of the banks involved the suspension of the Government on its demand notes, and, notwithstanding the circular of the Secretary and the law of Congress, no one of them was paid in coin. The last instalments of coin due from the banks on the loan was applied to the interest on the public debt, which, at the close of the year, as compared with the previous year, was as follows:

UNITED STATES DEBT—CLOSE OF 1860 & 1861.

	Rate.	Jan. 1861.	Jan. 1862.
Loan 1842.....	6..	\$2,888,364.11	2,888,364.11
" 1847.....	6..	9,415,250.00	9,415,250.00
" 1848.....	6..	8,908,341.80	8,908,341.80
" 1858.....	6..	20,000,000.00	20,000,000.00
" 1860.....	5..	7,022,000.00	7,022,000.00
" 1861.....	6..		18,415,000.00
Texan Indemnity.....	5..	3,461,000.00	3,461,000.00
Texas debt.....		181,863.17	112,092.59
Oregon War debt.....			307,900.00
			\$70,524,948.50
Treasury notes issued under acts prior to 1857.....		105,111.64	\$105,111.64
Treasury notes issued under act of December 23d, 1857.....		7,281,900.00	664,200.00
Treasury notes issued under act of December 17th, 1860.....		10,000,000.00	9,933,950.00
Treasury notes issued under acts of June 22d, 1860, and February and March, 1861—two years.....		7,767,600.00
Treasury notes issued under acts of March 2d, July 17th and August 5th, 1861, for 60 days—temporary loan..		3,993,900.00
			22,464,761.64
Three-years bonds, dated August 19th, 1861, issued under act of July 17th, 1861.....		50,000,000.00
Three-years bonds, dated October 1st, 1861, issued under acts of July 17th, 1861.....		50,000,000.00
Three-years bonds under act of July, 1861.....		50,000,000.00
Twenty-years six per cent. bonds, dated July 1st, 1861.....		50,000,000.00
			200,000,000.00
United States notes, issued under act of July 17th, 1861.....		50,000,000.00
United States notes, issued under act of February, 1862.....		10,000,000.00
			60,000,000.00
Total.....		\$69,213,830.72	\$352,989,710.14

There were subsequently authorized the following amounts:

Stock, six per cent., payable after ten years...	\$500,000,000
Notes on demand, legal tender, may be funded	150,000,000
Certificates of indebtedness, six per cent., one year.....	unlimited.
Deposit certificates, five per cent., ten days' notice.....	50,000,000

Of the demand notes, \$50,000,000 in lieu of the \$50,000,000 issued in August, which are to

be called in, may be funded in the six per cent. stock; but, if they are not, the whole may be issued, which would make the debt \$1,002,989,710, besides the certificates of indebtedness, about \$100,000,000, but not limited in amount.

Most of the Northern States had also advanced considerable sums to the Federal Government, of which 40 per cent. had been returned by the close of the year.

STATES.	Advanced.	Paid back.
Indiana.....	\$1,125,000	\$450,000
Ohio.....	2,250,000	900,000

Maine.....	500,000	200,000
Wisconsin.....	512,500	205,000
Pennsylvania.....	1,515,000	606,000
New Hampshire.....	500,000	200,000
Total.....	\$10,255,500	\$4,105,000

Taxation.—The levying of a direct tax for the

support of the Federal Government involved the apportionment of the tax among the States, according to their Federal representation, since direct taxes, or taxes upon property, are by the Constitution so ordered. Hence, the proportion of the whole tax which each State is required to pay depends, not upon its ability, but upon its numbers. The following table gives the population of each State, the amount of its debt in 1861, the amount of the State valuation on which local taxes are levied, and the portion which each State must pay of the Federal tax of \$20,000,000:

LOCALITY.	Population.	Debt.	Valuation.	Tax apportionment.
Alabama.....	964,296	\$5,098,000	\$362,427,212	\$523,313
Arkansas.....	435,427	3,092,622	120,475,236	261,886
California.....	380,016	3,885,000	131,060,279	254,538
Connecticut.....	460,151	224,962,514	308,214

Wisconsin.....	775,873	100,000	184,062,536	519,688
Grand Total.....	31,145,378	\$264,918,272	\$11,296,306,942	\$19,637,126

The imposition of this tax falls very unequally. Thus, Missouri must pay nearly as much as Massachusetts, although the latter has more than double the taxable wealth, and quite five times the actual wealth of Missouri, which has been impoverished by the war operations, while the industry of Massachusetts has been less interrupted by hostilities. The tax in Missouri is two dollars on the thousand of valuation; in Massachusetts, it is less than one dollar. Illinois, with less than half the taxable property, must pay 40 per cent. more tax as compared with Massachusetts; and taxes on articles of

consumption will, of course, fall heaviest on the largest population. The aggregate valuation here given is that on which the State taxes are levied. The census gave another estimate of valuation which carried the amount to \$16,000,000,000.

The following shows the Federal representative numbers and the census valuation, distinguishing real and personal property. The aggregate of real and personal property is given at \$17,088,417,635, or \$5,792,110,693 in excess of the amount on which the State taxes are levied. Yet in New York and Massachusetts the State valuation is the highest.

TABLE SHOWING THE FEDERAL POPULATION, AND THE ASSESSED VALUE OF REAL AND PERSONAL PROPERTY OF THE SEVERAL STATES OF THE UNION. CENSUS, 1860.

STATES.	Federal Population.	Value of Real Estate.	Value of Personal Property.	STATES.	Federal Population.	Value of Real Estate.	Value of Personal Property.

The State valuation is, however, the practical one. In addition to the aggregate debt of the States, there are the city, town, and county debts, which swell the amount to fully \$300,000,000, and make the whole public debt, actual and authorized, \$1,400,000,000, bearing an annual average charge of \$84,000,000, or, in round numbers, \$100,000,000, with a one per cent. sinking fund. The \$781,000,000 that have been paid in the past eighty years of the Government, were met by the duties levied on the goods purchased abroad with the proceeds of cotton sold. That resource is, for the present, at all events, cut off, and the general exports of the country will not sustain an import revenue more than equal to the ordinary expenses of the Government; hence, the whole burden of the debt must fall upon taxation, direct and indirect. These taxes, which are now new in the country, will be systematized, so as hereafter to yield the largest portion of the Government revenue made necessary by the debt.

The currency necessities of the Government have produced also another radical change. Heretofore, under the Constitution, gold and silver have been the only legal currency, and the powers of Government have been repeatedly directed to its increase as the basis of the circulating medium. The Government has, however, resorted to paper money as a resource, by which \$150,000,000 are obtained by the use of notes, where bank notes have previously circulated to the extent of \$200,000,000. This paper, competing with that of the banks, as a matter of course, would depreciate in the proportion in which it is emitted to the amount of taxes collected. If the taxing is sufficient to meet the wants of the Government, there will be no depreciation of paper, whether the notes are paid in coin or not. The banks issue, in the United States, some \$200,000,000 of paper for circulation, payable in coin; yet, in ordinary times, they are never really paid in coin, because they are carried back to the issuer through the cancelment of the credits on which they were issued. If that did not take place, redemption in coin would be impossible; as it does take place, redemption in coin is not asked. The case is not different with the Government. No possible form or device of paper issue can save

its credit, unless it makes available, by taxation, the vast property in the country. The payment of these taxes will carry the paper money back to the Treasury, and \$200,000,000 might easily float at par. The question is, how to make the notes float until the taxes are available, and this object is sought by making them a legal tender for all debts. It is to be borne in mind, that a certain amount of currency is requisite for the transaction of business. Hitherto specie has supplied a considerable portion of the circulating medium. The disappearance of the metals on the suspension of the banks, left a vacuum which the Government notes could supply to some extent. The amount of the metals in the country may be approximated as follows:

In the country in 1821.....	\$87,000,000
United States mines, 1821 to 1849.....	\$18,511,206
Net import, 1821 to 1849.....	61,642,397
On hand, 1849.....	\$112,453,603
United States mines, 1849 to 1861.....	\$491,890,963
Net export, 1849 to 1861.....	431,552,145
On hand, January, 1861.....	\$162,282,421
United States mines in 1861.....	\$34,879,547
Net import, 1861.....	40,843,180
In the country, January, 1862...	\$237,510,148

The amount in the country in 1821 was the estimate of the Secretary of the Treasury. The result is the amount in the whole country, including about \$60,000,000 which is in banks, &c., at the South. It has been estimated that there is \$50,000,000 in plate, jewelry, &c. There would then remain about \$127,000,000 in Northern banks and circulation. Of this amount, \$50,000,000 are gold dollars and silver fractions. A considerable portion of the whole has gone out of circulation, leaving an opening for an equal quantity of paper, which, for denominations above \$5, will be well supplied with Government notes, and bank issues for small notes.

The large increase which took place in the imports of specie in 1861 grew out of the balance due the United States from the foreign trade, which brought large sums of specie into the country, and caused the retention of the California supplies. The general state of the trade, as manifest in the rates of bills and money, and the amount of specie in the city of New York monthly during the year, are expressed in the following tables:

MONTHS.	Money.			Sterling.	Specie.		Total, N. Y. City.
	At call.	60 days.	In Bank.		Ass. Treasury.		
January.....	5 - 6	10 - 12	2½ - 6½	\$24,839,475	\$3,645,737	\$28,485,212

December.....	2,684,389	353,530	26,567,085	898,018
	\$34,485,949	\$37,088,418	\$68,408,112	\$4,236,250

In December, the amount drawn from the banks was very large, and involved their suspension. It is to be regarded as a matter of course, that the stagnation of trade which caused specie to arrive from abroad in place of goods, and which caused money to accumulate in the banks, also produced unusually low prices for money. Few people wished to employ it, and the lenders were fain to accept low rates. The table on page 303 shows the highest and lowest rates of sterling bills in each month, the highest and lowest rates for money, and the amount of specie in the banks and sub-treasury, forming the total in mints.

The year opened with a very low rate for sterling bills, being nearly seven per cent. under the nominal par, and several per cent. below the cost of importing specie. The arrivals consequently were large; and none of the California receipts being shipped, the amount in the city rose nearly \$20,000,000 to March. The metals continued to fluctuate between the banks and the Treasury in proportion as the banks paid it over for loans and gradually re-collected it from the Government disbursements. The supply of gold from California was indeed less in the year 1861 than for previous years. The State has of late supplied more of its own wants, and has therefore exported less gold, while of that diminished export a larger quantity has gone direct to Europe.

California Gold Receipts, Exports, and Coinage.

GOLD RECEIVED.

	1859.	1860.	1861.
Uncoined.....	\$40,907,996	\$37,802,539	\$32,325,863
Coined.....	5,965,163	7,409,154	9,363,214
Total receipts.....	\$46,873,159	\$45,211,693	\$41,689,077
Imports, Foreign.....	2,516,132	1,809,061	1,702,688
Total supply.....	\$49,389,311	\$47,020,754	\$43,391,765
Exports.....	47,640,462	42,325,916	40,676,758
Gain for the year....	\$1,748,849	\$4,694,838	\$2,715,002

These results show a successive decline of \$5,184,082 in three years from the mines at San Francisco; but it appears that the decline in exports in the same time has been greater, reaching \$6,963,704; thus indicating that other industries in California are encroaching upon the mining, which may have become comparatively less profitable.

GOLD SHIPPED.

LOCALITY.	1859.	1860.	1861.
New York.....	\$39,831,987 82	\$35,661,500 87	\$32,628,010 60
New Orleans.....	314,500 00	57,795 83	
England.....	3,910,930 37	2,672,936 20	4,061,779 46
China.....	3,100,755 68	3,374,650 27	3,541,279 17
Japan.....	34,000 00	94,200 00	60,220 00
Manilla.....	26,000 00	75,659 94	9,000 00
Panama.....	279,949 25	300,819 07	349,769 17
Sandwich Isl.....	142,190 00	40,679 57	7,700 00
Mexico.....	19,400 00	7,100 00
Other coun- tries.....	23,245 00	11,900 00
Total.....	\$47,640,462 65	\$42,325,916 28	\$40,676,758 40

The following is the proportion of shipments from California to New York:

YEARS.	To New York.	Total Shipments.
1854.....	\$46,289,000	\$51,928,000
1855.....	38,730,000	43,050,000
1856.....	39,765,000	43,887,000
1857.....	35,257,000	48,592,000
1858.....	35,578,000	47,543,000
1859.....	39,831,000	47,640,000
1860.....	35,661,000	42,325,000
1861.....	32,628,016	40,676,758

The shipments have declined since 1854, when they were, at the highest, \$10,700,000 per annum; but the proportion sent to New York has, it appears, fallen off more than \$13,000,000, by reason of the greater quantities sent to China and to England direct. The gold exported from California to New York is in refined bars mostly. These are stamped with the value according to the fineness. The bars, on being lodged at the New York Assay Office for coinage, are charged five cents per ounce for parting the silver, one-half per cent. for coinage. The silver required for coinage is $\frac{1}{10}$ of the standard. This is taken from the parted silver, and the remaining silver is coined at a charge of one-half per cent. The calculation is simple. Thus, a bar stamped 840 fine, \$17 36.4341, will be worth, when coined, \$17 42.5951. Thus, 387 oz. of gold, 1,000 fine, are worth \$8,000; and 99 oz. of silver, 1,000 fine, are worth \$128. Hence, 387 : 8,000 :: 840 : 1736.4341. From \$17 36.4341 is deducted $\frac{1}{2}$ per cent. for coinage, leaving \$17 27.7519. In a bar, 840 fine, the silver is 155; hence, 99 : 128 :: 155 : 20.0404.

From this deduct the $\frac{1}{10}$ of alloy re- quired, and the result is.....	18.9484
Charge for parting.....	5.0000
Charge $\frac{1}{2}$ per cent. for coinage.....	.0947
	5.0947

Adding the $\frac{5}{4}$ premium for silver, on cents 18.9484.....	18.8487
	18.4839
	17 27.7519

Net value of gold, as above..... 17 27.7519

Value in coin, gold bar, 840 fine..... \$17 42.5951

The invoices of gold received from California range from 675 to 950 fine. The average of the bars governs the deposit. We have annexed a carefully prepared table, showing at a glance the value of any bar deposited.

No allowance for silver is made, unless the bars deposited yield \$5 above the expense of parting.

Fineness of Gold.	Stamped Gold, value of bar.	Fineness of Silver.	Value of Silver, (without prem.)	Value in Coin, including Silver at 54 per cent. prem.

* 950 fine will not give sufficient silver for alloy—the difference is shown by lessened proceeds in column for coin.

The Assay Office in New York was established in 1854, as a kind of compromise for a mint. Since that time the bullion deposits at the New York Assay Office by individuals for coinage or for conversion into fine bars, to the 1st October, 1861, have exceeded one hundred and eighty millions of dollars—of which was in

Gold about.....95.70 per cent.
In silver.....4.30 "

Of this large sum nearly thirty per cent. was deposited in the last year, (October 1, 1860, to October 1, 1861,) viz.:

Bullion Deposited at the New York Assay Office.

	Gold.	Silver.	Total.
5 years, 1854-'59.....	\$99,256,638	\$5,046,601	\$104,303,234
1 year, to Oct. 1, 1860.....	17,582,426	452,118	18,334,544
1 year, to Oct. 1, 1861.....	55,969,553	2,263,765	58,233,318
Total.....	\$173,108,612	\$7,762,484	\$180,871,096
Annual average.....	27,586,944	1,108,926	28,695,870

Thus in the past year the deposits have increased from a previous annual average of less than twenty millions (1854-1860) to the sum of fifty-eight millions of dollars.

The Assay Office has furnished to depositors in the same period of seven years, fine bars to the value of one hundred and twenty-one millions of dollars, viz.:

Gold.....	\$119,656,621
Silver.....	1,725,220
Total.....	\$121,381,841

an annual average exceeding seventeen millions of dollars.

And during the same period of seven years the Assay Office has forwarded to the mint at Philadelphia, for coinage, a sum of over one hundred and seven millions of dollars, viz.:

Bullion sent to the Mint at Philadelphia from New York, for Coinage.

	Gold.	Silver.	Total.
First five years.....	\$31,670,049	\$6,525,483	\$36,695,532
Sixth year.....	11,554,835	275,196	12,138,030
Seventh year.....	56,082,721	2,198,139	58,280,860
Total.....	\$99,607,604	\$7,501,815	\$107,109,422
Annual average.....	14,229,658	1,071,688	15,301,346

Thus the amount of gold and silver forwarded to Philadelphia for coinage has increased from a previous annual average of eight millions for the first six years (1854-'60) to more than fifty-eight millions in the past year. The estimated expense for mere transportation of this large sum for the year past (Oct. 1860 to Oct. 1861) was \$71,755, viz.:

For gold, \$1 per thousand.....	\$64,855
For silver, \$5 per thousand.....	6,900
Total.....	\$71,755

When to the consideration of this unavoidable expense, under the present law, is added the loss of time to the depositor, (say from twenty to thirty days,) equivalent to about one-half of one per cent., the annual loss may be estimated at about one hundred thousand dollars.

The operations of the Assay Office monthly for the past year were as follows. It will be observed to how great an extent the imports of gold from abroad have swollen the operations of the office.

NEW YORK ASSAY OFFICE, 1861.

In the past two years, when the demand for foreign coin imported. The whole amount, bars to export had ceased, nearly the whole of nearly, was sent to Philadelphia for coinage, and the deposits were ordered payable in coin, and the operations of the mint were as follows:

MONTHS.	Gold.		Silver.		Cents.
	Deposits.	Coinage.	Deposits.	Coinage.	
January.....	\$8,209,669	\$8,052,321	\$156,413	\$91,100	5,000

September.....	56,199.37	1,180,000	\$40,000	68,000	..	5,000	1,288,000
October.....	66,217.40	1,180,000	102,000	7,000	..	1,239,000
November.....	56,561.98	1,210,000	45,000	50,000	..	129,000	1,434,000
December.....	84,402.68	1,210,000	20,000	32,750	7,000	8,500	1,278,250
Total.....	820,512.04	\$15,385,000	\$95,000	\$90,000	\$60,000	\$459,750	\$19,000	\$17,250	\$16,126,000

The California and Philadelphia mints were in the past year nearly the chief sources of supply of coin, since the Southern mints early in the year passed into the hands of the Confederates. The two mints, it appears, supplied the following quantities of American coin:

	Silver.	Gold.	Total.
California.....	\$496,000	\$15,630,000	\$16,126,000
Philadelphia.....	3,107,740	67,631,356	70,739,096
Total.....	\$3,603,740	\$83,261,356	\$86,865,096

This immense supply of coin has been poured into the markets in a year of war panic, and has probably been hoarded to a very considerable extent, since the banks held but very little more at the close of 1861 than at its commencement. In fact, during the eleven years in which California and Australia have poured their supplies upon the markets of the world, the specie currency of Europe has scarcely been increased.

The London circular of Mr. James Low states

the amount of specie shipped from England to the East by the steamers of the Peninsular and Oriental Company during the last eleven years. The aggregate in that period is nearly ninety millions sterling, of which scarcely even the smallest portion has ever returned:

Years.	Gold.	Silver.
1851.....	£102,250	£1,716,100
1852.....	921,739	2,630,238
1853.....	880,202	4,710,665
1854.....	1,174,299	8,132,008
1855.....	948,272	6,409,889
1856.....	404,749	12,118,985
1857.....	269,275	16,795,292
1858.....	168,305	4,781,928
1859.....	788,269	14,828,521
1860.....	1,669,746	8,038,276
1861.....	781,043	6,586,747
Total, 11 years.....	£8,108,179	£81,748,579

This is an amount very nearly equal to the whole California product in that period. The only effect, therefore, has been to substitute gold for silver, and without increasing the aggregate metallic currency of Europe.

In the year 1861 the amount exported to the East was, it appears, \$36,800,000, mostly silver, and from Europe to the United States \$34,400,000, mostly gold, making \$71,200,000, without producing any other effect than adverse exchanges in France, which usually draws some sixty millions in bills on England for goods, silks, wines, &c., sold to the United States. This year those sales did not take place, and she was obliged to remit an equivalent in specie to England, and to rectify it, loans of specie were made in the London market for account of the Bank of France.

Stocks.—The range of the leading stock securities in the past year, as compared with former

years, is as follows, the highest, lowest, and average quotations for 1859, 1860, and 1861, at the New York Stock Exchange for the stocks most largely dealt in. The fluctuations have been very great, and being produced by causes bearing unequally upon different portions of the country, show extraordinary changes in relative prices. Bonds of Southern and Border States have suffered a very great decline; on the other hand, railroad shares in the Northern States have shown a great improvement over 1859, and under the influence of the confidence in the Union cause, have reached extraordinary high figures, which may be regarded as excessive for peace prices, and higher than can be maintained.

AVERAGE OF STOCK SALES.

Stock.	1859.			1860.			1861.			1859 to 1861.

State War Loans.—Indiana passed a loan of \$2,000,000. It was made pursuant to one of the very few provisions of the amended Constitution of Indiana in regard to the creation of new debt, viz.: For the public defence against threatened hostilities. The only other contingencies authorizing the exercise of this power are to pay the annual interest on the preëxisting debt, and to repel invasion and insurrection. The old or preëxisting public debt of Indiana is:

In 5 per cents. \$5,322,000
In 2½ per cents. 2,055,000

Together \$7,377,000
Involving an annual charge of only \$307,225

These new bonds bear interest at the rate of six per cent. per annum, payable semi-annually in New York, and the principal reimbursable in twenty years from date. For the

payment of this interest, and the ultimate liquidation of the principal, a special tax has been levied of five cents on each hundred dollars in value of the taxable property of the State, which is to be collected annually, until the bonds are paid or redeemed. In addition, a regular tax of two cents, and in 1863 and thereafter of five cents is levied for reducing the State debt, making in all, for the years 1861 and 1862, seven cents, and for the year 1863 and thereafter, 10 cents on each one hundred dollars' valuation of taxables in the State applicable to the reduction of this loan. The Legislature also, at its last session, pledged for the redemption of this loan, in addition to the tax levy, whatever may be received from the General Government in the way of reimbursement of the moneys advanced by the State for war purposes—this fund, it is expected, will be

nearly sufficient to pay the debt. The same Legislature refused unanimously to pass any stay or stop laws interfering with the collection of debts.

The taxables of the State are of the value of four hundred and fifty millions. Under the amended general banking law of the State, the basis of circulation is confined to the Indiana State and Federal stocks.

The State of New Jersey at its session in May passed laws for raising a six per cent. loan of \$2,000,000, the bonds to be redeemable after 1865, at the rate of \$100,000 per annum; and a State tax of \$100,000, to raise four new regiments, to purchase arms, artillery, and munitions of war; to pay the families of volunteers \$6, and to volunteers without families \$4 a month extra; to authorize the cities of Trenton, Newark, Camden, New Brunswick, Jersey City, and Bordentown, to borrow money to aid the volunteers, were passed. New Jersey had previously no military.

The State of Massachusetts issued a loan for \$1,000,000, six per cent. per annum, and issued in denominations and redeemable as follows:

\$200,000 in pieces of \$100 each	July 1, 1871.
200,000 in pieces of \$500 each	July 1, 1872.
200,000 in pieces of \$100 each	July 1, 1873.
200,000 in pieces of \$1,000 each	July 1, 1874.
200,000 in pieces of \$1,000 each	July 1, 1875.

The bids ranged from 98 to 101 $\frac{1}{2}$ per cent. All below par were rejected, amounting to \$66,500. At par the bids reached to \$598,000. Between par and 100.50 they reached \$577,000. Above 100.50 they reached \$16,000.

The Connecticut Legislature authorized a war loan of two millions of dollars, bearing 6 per cent. interest. The State had before no debts. The bids were opened for a portion of it July 21. A large share of the bids were at par, although many were given at an eighth premium, and in rare instances more. The banks offered a quarter of a million at par. The bidding would have commanded premiums, had it not been that the United States loan was pending, and with such rates of interest that the men who had the money at hand, were holding up for that which would give them a cent and a fraction additional every year. For the \$800,000 offered July 24, \$1,279,900 were offered at par to 5 per cent. premium.

The loan of the State of Maine was opened July 28, and the average rate was 1 per cent. premium.

The State of Illinois offered \$1,000,000, interest at the rate of six per cent. per annum, payable semi-annually in New York, and the principal reimbursable after 1879. The bonds have coupons attached for \$3 each, for each half year during which they have to run, and will of course be receivable for taxes and all other State dues at the Treasury. The bids in Wall street did not meet the views of the commissioner, and it was withdrawn. A considerable number of these small bonds were, however, subscribed for by citizens of Illinois, and the whole amount was thus taken at par.

The State of Michigan offered a war loan of \$500,000, 7 per cent., redeemable after twenty-five years.

The State of Iowa also created a loan. The Constitution of that State provides:

Article 7, Sec. 4. In addition to the above limited power to contract debts, (\$250,000 altogether,) the State may contract debts to repel invasion, suppress insurrection, or defend the State in war, &c.

Sec. 5. Except the debts hereinbefore specified in this article, no debt shall be hereafter contracted by, or on behalf of this State, unless such debt shall be authorized by some law for some single work or object, to be distinctly specified therein, &c. . . . But no such law shall take effect until, at a general election, it shall have been submitted to the people, and have received a majority of all the votes cast for and against it at such election, &c.

The General Assembly, at its extra session, recognizing, probably, the existence of "insurrection"—the State having been called upon by the President to furnish its quota of troops to meet such a crisis—considered that the provisions in Sec. 4, above cited, warranted an increase of indebtedness without the sanction of a popular vote as required by Sec. 5, the contingency contemplated in Sec. 4 having arisen. A new issue of bonds was therefore authorized, amounting to \$800,000, which, when sold, would make the entire bonded debt of the State about \$1,000,000.

Objections seem to have been made to the legality of these new bonds; it was contended that the law should have been submitted to a popular vote, pursuant to Sec. 5; that Sec. 4 applies only when the State is invaded, or in case of insurrection within the State against its authority.

The negotiation did not succeed. But the same difficulty applies to some other State bonds which were successfully placed upon the market.

The State of Ohio, April 26, authorized a loan of \$2,000,000 for war purposes, at 6 per cent., 7 years to run, and not subject to State taxes. The bids for the loan in New York were not satisfactory to the State, and as the General Government reimbursed the State at about the same time \$1,000,000 for its advances, the low offers were not accepted. The loan was subsequently placed in Ohio.

The State of New York made a loan of \$3,000,000, 7 per cent., which was negotiated 1.38 to 4.50 premium.

The State of Pennsylvania made a loan of \$3,000,000, which was promptly taken. The bonds bear six per cent. interest, payable in specie—are payable after ten years—are not subject to taxation—of denominations not less than \$25. Those less than \$100 have coupons attached.

Pennsylvania also passed a State law, granting one year's stay upon all judgments, and all that might be obtained within six months from the passage of the act.

The contributions that were made by various public bodies up to the close of May were as follows:

Confederate Finances.—When the war broke out, the currency of the South was sound. The mints at New Orleans, Charlotte, and Dahlonega supplied a fair share of the coinage. Its banks held \$36,000,000 in coin, and had emitted \$82,000,000 of circulation. The merchants of the section were largely indebted to the North for goods sold in the usual course of trade on credit, and the supplies of produce were generally good. The moment that hostilities commenced, discredit overtook the currency, and a disposition to hoard manifested itself. The currency of the suspended banks began to

depreciate, and it was manifest that the new Government would encounter great difficulty in its financial movements. The debts of the Southern merchants were due at the North in specie, and foreseeing the depreciation in the current funds, many had hoarded specie, which soon disappeared almost entirely from circulation. If all those funds were sent North in the discharge of debts, estimated to reach \$200,000,000, it was clear that it would greatly enhance the financial difficulty of the Confederate Government at a time when, by reason of the blockade, the produce of the country, that in

ordinary times would realize \$400,000,000 per annum, was no longer available. Hence it was determined that the Northern debts should not be paid. The following is the text of the act on this subject, passed by the Confederate Congress:

An Act to authorize certain Debtors to pay the Amount due by them into the Treasury of the Confederate States.

Section 1. The Congress of the Confederate States of America do enact, that all persons in any manner indebted to individuals, or corporations, in the United States of America, (except the States of Delaware, Maryland, Kentucky, and Missouri, and the District of Columbia,) be and are hereby prohibited from paying the same to their respective creditors, or their agents or assignees, pending the existing war waged by that Government against the Confederate States, or any of the slaveholding States before named.

Sec. 2. Any person indebted as aforesaid shall be, and is hereby authorized to pay the amount of his indebtedness into the Treasury of the Confederate States, in specie or treasury notes, and shall receive from the Treasurer a certificate, countersigned by the Register, showing the amount paid, and on what account, and the rate of interest which the same was bearing.

Sec. 3. Such certificate shall bear like interest with the original contract, and shall be redeemable at the close of the war and the restoration of peace, in specie or its equivalent, on presentation of the original certificate.

Sec. 4. All laws and parts of laws militating against this act, be and the same are hereby repealed.

HOWELL COBB, President of the Congress.

Approved May 21, 1861.

JEFFERSON DAVIS.

The Confederate Congress passed a law authorizing \$100,000,000 treasury notes, payable six months after the ratification of a treaty of peace between the Confederate States and the United States. The notes not less than five dollars, to be reissuable at pleasure, to be received in payment of all public dues, except the export duty on cotton, and the whole issue outstanding at one time is not to exceed one hundred millions of dollars.

There were also issued bonds payable within twenty years, 8 per cent. interest, to the amount of \$100,000,000, for the purpose of funding the treasury notes, or for the purchase of specie, military stores, etc. The bonds are not less than \$100, except when the subscription is for a less amount, when they may be issued as low as \$50.

Many of the banks had come forward with efforts to give the bonds currency, and the banks of Charleston adopted the following:

Resolved, That this bank will credit the Secretary of the Treasury with the sum of \$1,000,000, at the rate of six per cent. per annum, secured by large treasury notes, and to be convertible into eight per cent. bonds of the Confederate States, at the option of the holders.

There was, for the special purpose of paying the principal and interest of the public debt, and of supporting the Government, a war tax of fifty cents upon each one hundred dollars in value of the following property in the Confederate States, namely: real estate of all kinds; slaves; merchandise; bank stocks; railroad and other corporation stocks; money at interest, or invested by individuals in the purchase of bills, notes, and other securities for

money, except the bonds of the Confederate States of America, and cash on hand, or on deposit in bank or elsewhere; cattle, horses and mules; gold watches, gold and silver plate; pianos and pleasure carriages: the taxable property of a family, of value less than five hundred dollars, shall be exempt from taxation.

On the 3d of June the banks held a convention at Atlanta, Ga. Delegates were in attendance from Tennessee, Georgia, South Carolina, Alabama, and Florida, representing some twenty-six banking institutions.

Mr. G. B. Lamar, of Georgia, was chosen President, and Mr. James S. Gibbs, of South Carolina, Secretary.

After full discussion, the following resolutions were unanimously adopted:

Resolved, That this Convention do recommend to all the banks of the Southern Confederacy to receive in payment of all dues to them the treasury notes of the same on deposit, and pay them out again to customers.

That, until the said treasury notes can be prepared and issued, it be recommended that all the banks agree to advance to the Government, in current notes, such sums severally as may be agreed upon between them and the Secretary of the Treasury—the said advance to be made on the deposit with the banks of treasury notes of large denomination, on eight per cent. stock bonds.

That all the banks in the Southern Confederacy are earnestly urged to take immediate action on the foregoing resolutions, as a measure of the greatest importance to the Government and the people, and communicate the same without delay to the Secretary of the Treasury, at Richmond.

That it be recommended to all the railroad companies in the Southern Confederacy to receive the treasury notes in payment of fares and freights.

That the Legislatures of the several States do make it lawful for their tax-collectors and other officers to receive the treasury notes in payment of all taxes and all other public dues.

That all the States, cities, and corporations having coupons payable in the city of New York or elsewhere in the enemy's country be requested, during the continuance of the war, to appoint some place of payment in the Confederate States, and to give their creditors notice of the same.

The convention adjourned to meet at Richmond simultaneously with the Confederate Congress, July 24.

On that day the convention again assembled, and it embraced representatives from all the principal banking institutions of the Southern States. It was resolved to take treasury notes in payment of dues, and to advance money for the use of the Government, until the treasury notes could be issued. Resolutions were also adopted approving of the course of the Confederate Government in vigorously prosecuting the war. The following resolutions were also adopted:

Resolved, unanimously, That it is the duty of the banks, capitalists, and property holders generally to give the Government all the support in money and other means demanded by the war.

Resolved, unanimously, That it is the opinion of this meeting that the capital resources of this country are abundantly adequate to supply all the demands created by the war, and that this Convention will cheerfully contribute its aid to render those resources available to the people and the Government.

The Confederate Congress enacted some of the recommendations of the banks, particularly that one requiring all of the interest on Southern securities to be made payable in the Southern States. The nature of these provisions is best illustrated by an example.

A prominent private banking house in New York, doing a large business as agent of foreign capitalists, on application to draw the interest on some Virginia inscriptions, owned abroad, were refused payment direct by the State authorities, with an announcement that the payment could only be made through some house in the Confederate States. Having some coupons belonging to the same foreign parties, which they proposed to collect through a correspondent in Richmond, they were furnished with the following list of interrogatories, as necessary to be answered before any collection could be made:

Interrogatories to be propounded to —, who is claiming to draw interest on the certificates of State debt.

Are you the bona fide owner of the bond on which interest is now due, or from which this coupon was taken?

Were you such owner before the 26th day of June, 1861?

If not the owner of the bond, are you the bona fide owner of the coupon?

If you are, were you such owner before the end of 26th day of June, 1861?

If the owner of the bond or of the coupon, of what State or nation are you a citizen?

If not the owner of the bond or of the coupon, in what right do you claim the interest?

Give the name of the person or persons from whom you received the coupon, his residence, and business.

If you are the owner of bond and coupon, or of the coupon only, are you such by transfer, verbal or written?

If written, produce the written transfer.

If not a citizen of Virginia, are you a citizen of either of the States of the Confederate States of America?

If not a citizen of the Confederate States, or either of them, are you a citizen of the United States as it now exists, or of any State adhering to the United States?

If claiming to collect for another, of what State or nation is that other person a citizen?

And now give a full, just, true, and perfect account and discovery of the right, title, and interest you have, and of the right, title, and interest held by the person or persons under whom you claim, and in like manner state whether such person or persons has or have any right, title, or interest therein in possession, reversion, or remainder, or whether the same is held by you or them in any manner to evade or circumvent the ordinance passed on the 26th day of June, 1861, in relation to the interest of the State bonds.

I do hereby solemnly swear (or affirm, as the case may be) that I have truly answered all the questions propounded to me in the preceding interrogatories. So help me God.

Sworn to before me this — day of —, 1861.

These are in some respects similar to the restrictions imposed by the Union Treasury Department on the coupons of the State of Texas, but which were not enforced, because opposed to public opinion.

The difficulty of obtaining means was, however, very great on the part of the Confederate Congress, and a scheme of loans in kind was projected, called the cotton and produce loan.

An issue of treasury bonds was authorized to be made in exchange for the proceeds of the sales of crops and other industry, and these are to draw interest at the rate of eight per cent. per annum.

The Government proposed to every planter and farmer to receive from him a subscription in advance of his crop of any portion thereof exceeding one hundred dollars in value, and to pay him in Confederate bonds when the crop should be gathered and sold. The illustration is simple: If there be subscribed 1,000 bushels wheat, 1,000 bushels corn, 1,000 bales of cotton, &c., or less, and the place of delivery specified, the proceeds when sold are received in Confederate 8 per cent. bonds.

The form of subscription is as follows:

Form of Subscription.

We, the subscribers, agree to contribute to the defence of the Confederate States the portion of our crops set down to our respective names; the same to be placed in warehouse or in our factor's hands, and sold on or before the first day of — next; and the net proceeds of sale we direct to be paid over to the Treasurer of the Confederate States, for bonds for the same amount, bearing eight per cent. interest.

N. B.—The agent in charge of this subscription will fill the blank as to date of sale, with the month best suited to the locality of the subscriber, in all cases selecting the earliest practicable date.

[Here follow name, post-office, and State, quantity subscribed, place of delivery, and name of factor or warehouse.]

The issues of paper by the Confederate Congress were received and paid out everywhere by the banks and people. As, however, gold was hoarded, and paper money was issued by States, towns, and cities in profusion, while there was little or no sale for the produce, all being blockaded, the paper frightfully depreciated. In August gold and silver were already 10 to 15 per cent. premium for current bills, and at New Orleans trade nearly came to a stand for want of change, until a state of barter threatened, and all dealers were forced to issue checks receivable in trade, as was the case in New York during the suspension of 1837. Towards the close of the year the depreciation of the paper reached nearly 50 cents on the dollar, and neither the taxes, the cotton loan, nor the investments of Northern debts sufficed to stay the downward tendency. Nothing but raising the blockade, and permitting the realization of the vast wealth of the section in produce could restore the finances.

Failures.—The political events of the year could not but produce the most disastrous influences upon the outstanding credits which represent the commercial business of the country. But this influence was modified by two leading circumstances. One was that the panic of 1857 had weeded out, so to speak, the weakest of the houses, while in November, 1860, when affairs became threatening, the fall trade was passed, stocks of goods on hand were light, and there was little effort to prepare for a large spring business. Hence the payments due in the spring were, to a considerable extent, realized before

non-intercourse took place. The number of persons doing business is pretty accurately recorded by the mercantile agency of Dun & Co., whose agencies extend all over the Union. [In the foregoing table the failures in the Southern States (with the exception of the cities of Baltimore, Louisville, and St. Louis, the State of Delaware and District of Columbia, which embrace the entire year) are shown to 1st May only.]

The comparative aggregates show as follows:

YEARS.	No. Stores.	No. Failed.	Liabilities.
1857.....	204,061	4,932	\$291,750,000
1858.....		4,225	95,749,662
1859.....	229,734	3,913	64,394,000
1860.....		3,676	79,807,845
1861.....	248,205	6,993	207,210,427

In the Southern States, the number of failures for the entire year of 1857 was 675, with an indebtedness of \$25,932,000, while the partial returns for the year 1861 reveal 1,058 failures, with liabilities amounting to \$28,578,257, although the returns from the seceded States embrace a period of only four months, or up to May 1st, when the regular facilities were interrupted. The unusual amount of failures in that section during these four months, is to be accounted for mainly on the ground that many were intentional, in order to evade obligations due at the North. Subsequent State action, annulling all Northern claims; the entire cessation of trade; and the impoverished condition of the South, led to the fear that the entire indebtedness of that section would be swallowed

up in carrying on the war: involving a general mercantile bankruptcy there.

The amount of the mercantile indebtedness of the South to Northern merchants, by a very close examination of the books, confirmed by other sources of information, appears to be to the four cities of New York, Boston, Philadelphia, and Baltimore, about \$211,000,000, divided as follows:

New York.....	\$159,800,000
Philadelphia.....	24,600,000
Baltimore.....	19,000,000
Boston.....	7,600,000

In the dry goods interest alone in these cities estimates show that New York loses \$75,000,000; Philadelphia, \$14,000,000; Baltimore, \$6,500,000, and Boston \$2,000,000; making a total indebtedness to the dry goods trade of \$97,500,000. From this and other data, the total liabilities of the South to the Northern States are estimated at nearly \$300,000,000.

The cutting off of such an amount of present means was a severe blow to Northern dealers, and it is matter of surprise that so few failures took place in proportion to the whole. The average liabilities of the Northern failed firms appear to have been about \$30,000; if the liabilities of the whole number in business are as large, then the aggregate of Northern liabilities is \$5,167,110,000, and it is quite probable that the sum of outstanding credits much exceeds this amount. In New York City, 980 firms failed, owing nearly \$70,000 each, and there are 19,127 still in business that probably owe as much, which would give \$1,338,890,000 of credits.

NOTE.—The payments here stated were as far as they were actually made. Very large amounts were, however, thrown ahead, to be met out of future means, and to come into next year's accounts.

FLORIDA, although one of the smallest States in population, yet in consequence of its location it is one of the most important to the Union. Situated south of Georgia and Alabama, it extends as a peninsula a distance of 385 miles; and is bounded on the east by the waters of the Atlantic, and on the south and west by the Gulf of Mexico and a small portion of Alabama. Between her shores and Cuba is the gulf channel, which is strictly the mouth of the gulf and the outlet for its commerce. Florida was purchased of Spain by the United States in 1820. Vast appropriations have been made by the United States, for the security of commerce, by erecting establishments which fringe her borders. Her series of light-houses embrace Cape Canaveral, Jupiter, Cape Florida, Carysfort, Sombbrero, Sand Key, Key West, Tortugas, and Loggerhead. Fort Taylor at Key West and Fort Jefferson at Tortugas, an island west of Key West, the first nearly done and quite capable of defence and the second more than half complete, have each cost about a million and a quarter. At Key West are a naval coal depot and wharf, the marine hospital, army barracks, admiralty courts, and an extensive wrecking organization.

The population of the State, in 1860, was 77,778 whites, 908 free colored, and 61,753 slaves; total, 140,939. The ratio of increase during the preceding ten years was for whites 6,477; free colored, 258; slave, 5,709. The Governor is elected for four years. The Senate consists of nineteen members, elected for four years, and the House of forty members, elected annually. The term of the Governor, John Milton, expires in 1865. The public men of the State were enlisted in the secession at its earliest period. Her Senators in Congress assembled, in secret caucus, with those from other States to devise the plan of action. Prompt measures were also taken by the State authorities to secure success. At an early day a State Convention was called to meet on the 5th of January, to which delegates were at once elected. The Convention assembled at Tallahassee on the day appointed. It consisted of sixty-seven members, one-third of whom were regarded as in favor of coöperation. On the 7th, a resolution declaring the right and duty of Florida to secede was passed—ayes, 62; noes, 5.

On the 7th the ordinance of secession was passed by a vote of 62 ayes to 7 noes. The following is the ordinance:

Whereas, All hope of preserving the Union upon terms consistent with the safety and honor of the slaveholding States, has been fully dissipated by the recent indications of the strength of the anti-slavery sentiment of the free States; therefore,

Be it enacted by the people of Florida, in convention assembled, That it is undoubtedly the right of the several States of the Union, at such time and for such cause as in the opinion of the people of such States, acting in their sovereign capacity, may be just and proper, to withdraw from the Union, and, in the opinion of this Convention, the existing causes are such as to compel Florida to proceed to exercise this right.

We, the people of the State of Florida, in Convention

assembled, do solemnly ordain, publish, and declare that the State of Florida hereby withdraws herself from the Confederacy of States existing under the name of the United States of America, and from the existing Government of the said States; and that all political connection between her and the Government of said States ought to be, and the same is hereby totally annulled, and said Union of States dissolved; and the State of Florida is hereby declared a sovereign and independent nation; and that all ordinances heretofore adopted, in so far as they create or recognize said Union, are rescinded; and all laws, or parts of laws, in force in this State, in so far as they recognize or assent to said Union, be and they are hereby repealed.

The Convention, at a subsequent date, was addressed by the Commissioner from South Carolina, L. W. Spratt. In his address he admits that, if the Southern people had been left to consult their own interests in the matter, apart from the complications superinduced by the action of South Carolina, they would never have felt it their duty to initiate the movement in which, for reasons partly long conceived and partly fortuitous, she had now, as she thinks, succeeded in involving them.

The other acts of the Convention completed the work commenced by the ordinance of secession. Delegates were appointed to the Confederate Congress, with instructions to coöperate with those from other States in the formation of a Government independent of the United States. A session of the Legislature was held at the same time, in order to pass such measures as would give strength to the executive officers in their new position. An act authorizing the issue of \$500,000 dollars in treasury notes and another staying the issue of executions upon the judgments in cases of civil contract were passed. Another act, to define treason, was adopted, which declared that, "on the event of any actual collision between the troops of the late Federal Union and those in the employ of the State of Florida, it should be the duty of the Governor of the State to make public proclamation of the fact, and thereafter the act of holding office under the Federal Government should be declared treason, and the person convicted should suffer death." This act was approved by the Governor on the 14th of February. On the next day the Legislature adjourned.

The forts and arsenals of the United States and the U. S. schooner Dana were seized, under instructions from the Governor, at the same time those in Alabama were occupied by the troops of that State. At the most important forts, as Pickens, Jefferson, and Taylor, there were such garrisons as were able to defend them. The investment of the former was immediately made by the troops from Florida, with reinforcements from Georgia, Alabama, and Mississippi. The navy yard and forts on the mainland at Pensacola were thus occupied, but Pickens defied all the efforts of the besiegers. The entire force furnished from the State to the service of the Confederate Government has been estimated at 10,000 men. Those in the service for twelve months and longer were much less in number.

FORTS AND ARSENALS, MINTS AND LIGHT-HOUSES, IN THE SECEDED STATES. All the property of the United States in the seceding States was taken possession of by the State authorities either immediately before or soon after the passage of their ordinances of secession. In all cases, this property was transferred to the Confederate Government, when the State in which it was located became a member of the Confederacy. The position assumed was, that the forts had been constructed by the United States with the public money for the defence of each State, consequently when the State became independent, or joined another Union, she had a title to the property, arising out of her interest, above all other parties. This seizure was therefore justified by the State authorities on the ground of self-defence, and promises were offered to account for the property in a general and final settlement with the United States. This argument was extended to justify the seizure of mints, arsenals, custom-houses, post-offices, and hospitals. The property thus taken possession of, is of national magnitude, and would constitute a splendid outfit to a new Confederacy. It is not proposed to enter into details, any further than to describe the forts, arsenals, mints, custom-houses, and light-houses. Every village had its post-office, with its outfit; ships were lying at the navy yards, plantations of live oak were growing, and much other valuable property was scattered through States, which came into the possession of the Confederate States.

FORTS.

Fort Caswell was erected as one of the defences of the harbor of Smithville, North Carolina. It was erected at a cost of \$571,221. The fort was under the charge of Brigadier-General Foster, captain of Engineers until the 16th of April, when it was taken possession of by a military company from Wilmington. The fort was generally in good repair. The shot furnaces required rebuilding. A few guns of inferior calibre were on hand, without carriages. The fronts of the work bearing upon the entrance were deficient in gun circles.

Fort Johnston was seized at the same time. It is two miles from the mouth of Cape Fear River, and forms one of the defences of Smithville harbor.

Fort Macon, in the harbor of Beaufort, N. Carolina, was seized about the middle of April. It had been under the supervision of General Foster. Its construction cost \$463,790. At the time of its seizure a few guns were mounted on weak carriages, the shot furnace required rebuilding, and the wood work, drawbridge, and embankment of the causeway needed repairs.

Fort Sumter. See SUMTER.

Fort Johnston was constructed for the defence of Charleston harbor, South Carolina. The barracks and quarters were in such bad order as to be almost uninhabitable. The position was occupied on the 2d of January by the

State troops. A small battery of three guns was soon after built adjoining the barracks.

Fort Pinckney, in Charleston harbor, was seized by the State troops on the 27th of December. The Lieutenant in charge was suffered to leave with the workmen; but all the public property was taken possession of, including the mess property and one month's provisions for the engineer force. The armament of the fort was all mounted, except two or three guns on the barbette tier, and one 42-pounder in the casemate tier. The carriages were in good order and pretty good. The magazine was well furnished with implements, and contained some powder. The fort was generally in excellent condition. Its cost was \$53,809.

Fort Moultrie.—The work of preparing this fort, which is situated in Charleston harbor, for a vigorous defence, commenced in August, 1860, and was diligently prosecuted up to the day of its evacuation, December 26th, 1860. In this time, the large accumulation of sand which overtopped the scarp wall on the sea front was removed to the front, and formed into a glacis; a wet ditch, fifteen feet wide, dug around the fort; two planking caponnières of brick, built to flank with their fire the three water fronts; a bastionet for musketry constructed at the northwest angle; a picket fence built around the fort, bordering the ditch, and protected by a small glacis; merlons constructed on the whole of the east front; communications opened through the quarters; a bridge built connecting them with the guard-house; and the latter loop-holed for musketry, so as to serve for a citadel.

The fort is an enclosed water battery, having a front on the south or water side, of three hundred feet. It is built with salient and re-entering angles on all sides, and is admirably adapted, in its plan, for defence, either from the attack of a storming party, or by regular approaches. The outer and inner walls are of brick, capped with stone, and filled in with earth, making a solid wall about fifteen feet in thickness. The height of the wall from the bottom of the ditch to the top of the parapet is twenty feet. The commandant of the fort for many years was Colonel Gardner, but on the 18th of November, 1860, Major Robert Anderson, of Kentucky, was ordered to that post. His position on the 24th of December, is thus described by himself:

"When I inform you that our garrison consists of only sixty effective men, and that we are in a very indifferent work, the walls of which are only about fourteen feet high, and that we have, within one hundred and fifty yards of our walls, sand hills which command our work, and which afford admirable sites for batteries, and the finest covers for sharpshooters, and that beside this, there are numerous houses, some of them within pistol-shot, you will at once see that, if attacked in force, headed by any one but a simpleton, there is scarce a possibility of our being able to hold out long enough to enable our friends to come to our succor."

Meanwhile, although strengthening his own position, he urged forward the completion of Fort Sumter, and the mounting its heavy ordnance. When it was done he resolved to abandon Moultrie and occupy Sumter—to leave the weaker and hold the stronger position.

The evacuation took place on the night of the 26th of December, commencing about eight o'clock. The men were ordered to hold themselves in readiness, with knapsacks packed, but up to the moment of their leaving had no idea of abandoning the post. They were reviewed on parade, and were then ordered to two schooners, lying in the vicinity, where they embarked, taking with them all the necessaries, stores, &c., requisite in their evacuation. Several trips were made, and a great part of the provisions and camp furniture were transported under cover of night. By daylight the entire force was within the walls of Sumter except Captain Foster and eight men. Before evacuating the fort, the guns were spiked, the gun carriages on the front, looking towards Fort Sumter, burnt, and the flag staff cut down. The instructions under which Major Anderson acted were the following:

"Memorandum of Verbal Instructions to Major Anderson, First Artillery, Commanding Fort Moultrie, S. C."

"You are aware of the great anxiety of the Secretary of War that a collision of the troops with the people of the State shall be avoided, and of his studied determination to pursue a course with reference to the military force and forts in this harbor which shall guard against such a collision. He has, therefore, carefully abstained from increasing the force at this point, or taking any measures which might add to the present excited state of the public mind, or which would throw any doubt on the confidence he feels that South Carolina will not attempt by violence to obtain possession of the public works, or interfere with their occupancy.

"But as the counsel and acts of rash and impulsive persons may possibly disappoint these expectations of the Government, he deems it proper that you should be prepared with instructions to meet so unhappy a contingency. He has, therefore, directed me, verbally, to give you such instructions:

"You are carefully to avoid every act which would needlessly tend to provoke aggression, and for that reason, you are not, without necessity, to take up any position which could be construed into the assumption of a hostile attitude; but you are to hold possession of the forts in the harbor, and if attacked, you are to defend yourself to the last extremity. The smallness of your force will not permit you, perhaps, to occupy more than one of the three forts, but an attack on, or an attempt to take possession of either of them, will be regarded as an act of hostility, and you may then put your command into either of them which you may deem most proper to increase its power of

resistance. You are also authorized to take similar steps wherever you have tangible evidence of a design to proceed to a hostile act.

D. P. BUTLER,

"Asst. Adjutant-General.

"FORT MOULTRIE, S. C., Dec. 11, 1860."

"This is in conformity to my instructions to Major Buell.

"JOHN B. FLOYD, Secretary of War."

The fort was soon taken possession of by South Carolina troops. The manner in which it was done is thus described by an eye-witness:

"About seven o'clock the tramp of detachments from the artillery regiments was heard, and the Washington Artillery, the German Artillery, the Lafayette Artillery, and the Marion Artillery, making a total of two hundred and twenty-five men, rank and file, under command of Colonel Wilmot G. DeSaussure, were soon embarked on board the Nina and General Clinch, and steamed away down the harbor towards Sullivan's Island. Among those on board were Colonel Charles Alston, Aid to the Governor, and Captain Humphreys, of the arsenal. On reaching the island these two last-named gentlemen approached the gate, and the sentinel, in accordance, it is said, with orders, surrendered on demand. The troops then quietly took possession, and the Palmetto flag was soon waving over the time-honored fortifications. Three rockets (the signal agreed upon) were then sent up, to notify the people in the city that the fort was in the hands of the State, and the newly-installed garrison betook themselves, as best they might, to devising the ways and means of comfort and protection."

The labor of placing the fort in a condition for an attack on Sumter was soon commenced.

Under the direction of Major Ripley, with a black brigade of picks and shovels, breastworks were thrown up, and heavy guns mounted, to such an extent that the whole appearance of the fort was changed, and almost attained its utmost state of efficiency. Huge heaps of sandbags surmounted the ramparts, faced with palmetto logs and covered with hides, from the embrasures of which the grim dogs of war protruded their muzzles, nine of them levelled direct at Fort Sumter. What is conceived to be the weakest point in the granite mass had been selected as the mark at which all these cannon were pointed. The interior of the fort also presented a most warlike aspect. The oven for hot shot was in readiness, like a steam fire-engine, for firing up at any moment, and all the equipments for carnage piled up around the gun carriages. The magazine was buried in a cavern of sand bags, and was believed to be beyond the reach of shot or shell. Every arrangement was made not only for the protection of the men, but for receiving the balls of Sumter with the least possible damage.

When the attack was made upon Fort Sumter, her raking fire against Fort Moultrie was

very destructive of property. An intelligent eye-witness of the scene immediately afterwards, described it by stating that, upon entering, "the eye falls upon the battered walls of the archway, with openings in some places large enough for windows. In other places may be seen the hanging splinters of the rafters, large pieces of ceiling seemingly about to drop, while the holes in the roof throw a clear light over the scene of destruction. All of the officers' quarters were battered with seven, eight, or ten balls, which penetrated the whole depth of the building. The western wall on the upper balcony was entirely shot away. The barracks were almost entirely destroyed. The furnace for heating hot shot was struck four times; the flag of the Confederate States received three shots and the Palmetto flag four. The merlons of sand-bags, &c., remain unbroken. On the outside walls over one hundred shots were counted. Even the beds and bedding in the officers' quarters and the men's barracks were cut and torn. Had it not been for the bomb-proof shelter the loss of life would no doubt have been appalling." Nearly twenty houses in the neighborhood of the fort, were injured by the fire from Sumter.

Fort Pulaski.—This fort is erected on Cockspur Island, at the mouth of the Savannah River in Georgia. It was named in honor of Count Pulaski, the distinguished Polish general who espoused the cause of American freedom in the Revolution. It effectually guards the main entrance to the river. All vessels of any size have to pass under its guns. Cockspur Island is separated from Tybee Island by a narrow curve of the sea. It is an irregular pentagon, with the base line or curtain face inland, and the other faces casemated and bearing upon the approaches. The curtain, which is simply crenellated, is covered by a redan, surrounded by a deep ditch, inside the parapet of which are granite platforms ready for the reception of guns. The parapet is thick, and the counterscarp is faced with solid masonry. Sand-bag traverses guard the magazine door, and every thing is in as good trim. The walls are exceedingly solid, and well-built of hard gray brick, upwards of six feet in thickness, the casemates and bombproofs being lofty and capacious. A full garrison of the fort is 650 men. The work is intended for 128 guns. They are long 32's, with a few 42's and columbiads. The 10-inch columbiads are *en barbette*. There are three furnaces for heating red-hot shot.

This fort was seized by order of Governor Brown on the 3d of January. At the time, this was stated to have been done to prevent its seizure by a spontaneous uprising of the people. Subsequently, however, the apprehensions which led to this seizure proved to be groundless. They were excited by fabulous telegraphic despatches sent from the city of Washington. At the time of its seizure there were sixty guns mounted. It cost the Government \$988,859.

Previously it had been in the care of two men, who were employed in keeping the grassed surfaces free from weeds and in taking care of the property.

Fort Jackson was seized by order of Governor Brown, together with Fort Pulaski. Its cost of construction was \$182,000. It is so situated as to serve as one of the defences of Savannah River. At the time of its seizure, it was under the charge of a fort-keeper employed to keep the grassed surfaces free from weeds and to take care of the public property.

Fort Clinch, situated on Amelia Island, Florida, was in process of construction until the time of its seizure by the Confederates in January. There had been expended then upwards of \$170,000. The north bastion was about completed, the curtain connecting it with the northwest bastion completed, and the other bastions and curtains connecting were in a very forward state. Amelia Island is on the northeast of Florida. The town of Fernandina is situated upon it. The harbor is one of the best below Chesapeake Bay.

Fort Marion was erected by the Spaniards more than one hundred years ago, for the defence of the town of St. Augustine, and was formerly called the Castle of St. Mark. This fort and also the arsenal were seized by troops of St. Augustine on the 7th of January, under an order from the Governor of the State. This was some days before information of the secession of the State was received. The troops immediately commenced to mount the 32's and the 8-inch howitzers. The United States had expended over \$51,000 upon the works.

Fort Barancas, situated in Pensacola harbor opposite its entrance, was built by the Spaniards and captured from them by General Jackson. It is a circular work and remained in a desolate condition many years. Subsequently it was put in repairs by the United States, and seized by Confederate troops on the 12th of January, who immediately mounted upon it three 8-inch Paixhans, two 8-inch columbiads, eleven 32's, eight 24's, four 18's, and ten 12 pounders. A full complement of the fort is forty-nine guns.

Fort McRae, one of the defences of Pensacola harbor, was seized on the 12th of January. This fort is built on a low sand spit of the mainland, and appears at a distance to rise out of the water. It is further seaward than Fort Pickens, situated on the opposite side of the channel. A detachment of about twenty men took possession of it without opposition. It cost the United States \$444,426.

Fort Morgan is at the entrance of Mobile harbor, which it effectually guards. It was seized on the 4th of January by Alabama troops, and garrisoned by them, under orders from the Governor of the State. Preparation had been made to repair the wharf at the fort, and the work had been commenced. This structure had cost the United States \$1,242,552.

Fort Gaines is on Dauphin Island, up the en-

trance to Mobile harbor. The work of construction was in active progress at the time of its seizure by Alabama troops. There had then been expended \$221,500.

Fort on Ship Island.—It was visited by an armed body of men on the 13th of January, and by a second party on the same afternoon, who left some of their number on the island. On the 20th, a third armed body took forcible possession of the work, when it was in the following condition: Four embrasures from the northeast angle built up, ready for covering arches. All the other embrasures, except one, had the irons in place and leaded. The land front, mostly at the reference, (13' 4'), the concrete of the south half not being all in. It was subsequently recovered by the United States without material injury. It was designed to be one of the strongest forts on the Southern coast.

Fort St. Philip, situated on the Mississippi River, and one of the defences to New Orleans, was under the supervision of Major Beauregard. Operations were in progress to repair the damages occasioned to the levees by a storm, and to protect the river shore by a wooden revetment, when the fort was seized by State troops. This took place on the 10th of January. The orders given to the commander of the expedition from New Orleans were to demand the surrender of the forts; to take possession of them, haul down the United States flag floating there, and hoist the Pelican flag forthwith. He was further instructed to hold said forts and defend them to the last extremity. Cost \$258,734.

Fort Jackson, likewise under the supervision of Major Beauregard, was another of the defences of New Orleans, and situated on the Mississippi River. Materials had been collected at this fort for the construction of the lower battery, which was prevented by its seizure on the 10th of January. The cost of this fort had been \$837,608.

Fort Livingston, on Grand Terre Island, Barataria Bay, was seized about the 10th of January by State troops of Louisiana. The cost of this fort had been \$362,379.

Fort Brown, situated at Brownsville, on the Rio Grande, was evacuated on the 5th of March. The troops were taken on board the steamship Daniel Webster, which had been sent from New York to receive and bring them to that city. The fort was then occupied by Texas troops.

Fort Smith is a village in Sebastian County, Arkansas. It is on the right bank of the Arkansas River, 163 miles west-northwest of Little Rock, and on the western boundary of the State. The United States post located there was occupied by State troops on the 21st of April. The expedition under the command of Colonel Solon Borland, ordered by Governor Rector, consisted of five companies, well armed, drilled, and in uniform. They arrived at twelve o'clock on the night of the 20th. The United States officer stationed there, Captain Sturgis,

left about an hour before the arrival of the State troops, taking with him twenty-three wagons and one hundred and sixty horses and mules. He crossed the plateau without arousing any suspicions of his purpose, and placed himself in safety beyond the reach of his pursuers. The fruits of the expedition to the State comprised 6,000 bushels of corn, 500 tons of hay, 100 mules, a number of wagons, a large quantity of quartermaster's stores, and the possession of the buildings of the fort, which were very fine—constituting a property worth about three hundred thousand dollars.

ARSENALS.

Augusta is the second city in population in Georgia. It is situated on the Savannah River, 231 miles from its mouth, and at the head of navigation. An arsenal of the United States was established here which the State authorities determined to seize. On the 24th January seven hundred State troops assembled in the city for the purpose. Governor Brown being present demanded of the officer in charge its surrender, on the ground that the retention of foreign troops upon the soil of Georgia was an act of hostility. The commander of the arsenal, seeing that resistance was vain, capitulated. The contents of the arsenal were a fine battery of two 12-pound howitzers, two cannon about twenty thousand muskets and rifles, many of them of the best kind, and also large stores of powder, balls, &c.

Baton Rouge Arsenal.—The United States arsenal located at Baton Rouge, in Louisiana, was ordered to be seized by Governor Moore on the 8th of January. The military force from New Orleans was taken on the steamboat National, and arrived at Baton Rouge on the evening of the 10th. A demonstration of attack had been made on that day by the military of Baton Rouge, in consequence of there being no evidence of a disposition to surrender the arsenal by Major Haskins, who was in charge. There were three hundred of these troops under arms throughout the day, under command of Colonel Walton. It was determined to attack the post at twelve o'clock on the 11th, unless the garrison should decide to capitulate. Eight men were under arms in the arsenal. The next day, however, a surrender was made and the New Orleans troops took possession. On an examination of the arsenal there were found fifty thousand stand of small-arms, four howitzers, twenty heavy pieces of ordnance, one battery of six and another of twelve-pounders, three hundred barrels of powder, and a large amount of fixed ammunition, cannon balls, shells, military equipments, &c.

Charleston.—The arsenal located at Charleston was in charge of a few officers of the United States, sufficient to look after its safety in the most peaceful times. Soon after the excitement connected with the secession movement in the State began, a small body of militia were placed there as a guard, ostensibly to prevent

any injury from an excited population. But when Major Anderson removed his small force from Fort Moultrie to Fort Sumter, and Castle Pinckney and Fort Moultrie were occupied by State troops, this guard at the arsenal likewise took possession of it in the name of the State. The United States officers hitherto in command were of course respectfully relieved by them. The arsenal contained at the time seventy thousand stand of arms and other military stores, which were estimated in value at half a million of dollars. At the same time, the captain of the revenue cutter, Wm. Aiken, transferred the vessel to the State authorities.

Fayetteville.—The arsenal at Fayetteville, North Carolina, was surrendered on the 22d of April. A force of about eight hundred marched to attack it, although there were less than sixty men there for its defence. After the surrender thirty-five thousand stand of arms, seven thousand of which were of the very best kind, were found, besides considerable quantities of cannon, ball, powder, &c.

Little Rock, the capital of the State of Arkansas, is situated on the right or southern bank of the Arkansas River, three hundred miles from its mouth and one hundred and fifty miles west of Memphis, on the Mississippi. The United States arsenal located here was seized by the State forces on the 5th of February. A small body of troops from Helena came to Little Rock determined upon its capture, and requested the Government to assume the responsibility of the movement. Accordingly a demand was made, and after negotiation and some delay a surrender took place.

Mt. Vernon Arsenal.—It is located forty-five miles above Mobile, and was seized on the 4th of January, by order of Governor Moore of Alabama. It contained at the time of seizure twenty thousand stand of arms, and fifteen hundred barrels of powder.

There were also small arsenals at Appalachicola and St. Augustine in Florida.

Ordnance Depot at San Antonio, Texas, was the name given to certain public buildings belonging to the United States at that place. These were given up with their contents to the State of Texas by General Twiggs. The following is a list of the property:

1,800 mules, valued at \$50 each,	\$90,000
500 wagons, " \$140 "	70,000
950 horses, " \$150 "	142,500
500 harnesses, " \$50 "	25,000
Tools, wagon materials, iron nails, horse and mule shoes,	250,000
Corn,	7,000
Clothing,	150,000
Commissary stores,	75,000
Ordnance stores,	400,000
Total,	\$1,200,500

exclusive of the public buildings. The property was estimated to be worth to the State of Texas one and a half millions of dollars.

General Twiggs, a veteran officer of the army, and a native of the State of Georgia, was in

command of the Department of Texas, at the time of the adoption of the secession ordinance by the convention of that State. The military force under his command was sufficient, with the coöperation of the friends of the Union in the State, to have controlled the State. Instead of taking this loyal course, he ordered every thing to be surrendered to the State authorities. Some of the officers under his command refused to obey, and were withdrawn with their men by the Federal Government. An order was also issued from the War Department dismissing General Twiggs, as follows:

"WAR DEPARTMENT, March 1, 1861.

"By the direction of the President of the United States, it is ordered that Brigadier-General David E. Twiggs be, and is hereby, dismissed from the army of the United States for his treachery to the flag of his country, in having surrendered on the 18th of February, 1861, on the demand of the authorities of Texas, the military posts and other property of the United States in his department and under his charge.

"J. HOLT, Secretary of War.

"By order of the Secretary of War:

"S. COOPER, Adjutant-General."

Navy Yard at Norfolk. See NORFOLK.

Navy Yard at Pensacola. See PENSACOLA.

MINTS.

Mint at New Orleans.—The amount of deposits received up to the 31st of January, 1861, was \$1,243,449, of which the sum of \$334,410.77 was in gold, and \$909,038 in silver. There was coined during the same period \$244,000 in gold, and \$809,000 in silver; silver bars, stamped value \$16,818. Total coinage, \$1,069,818. Subsequently to the 31st of January, the institution was taken possession of by the Confederate authorities of Louisiana. Its cost to the United States was \$576,926.

Mint at Dahlonega, Georgia.—The deposits received up to the 28th of February, 1861, were \$62,193; the coinage \$60,946. It was then taken possession of by the Confederate authorities of Georgia. Its cost to the United States was \$66,500.

Mint at Charlotte, North Carolina.—The deposits up to the 31st day of March, 1861, were \$65,558; coinage, \$70,580. The deposits were all in gold. Subsequently the institution was taken by the Confederate authorities of North Carolina. Its cost to the United States was \$110,850.

The custom-houses, marine hospitals, post-offices, &c., at the following places were also occupied by the Confederate authorities on the secession of the respective States; in some instances the custom-house and post-office were in the same building.

CUSTOM-HOUSES.

Virginia—Norfolk, cost \$228,505; Petersburg, cost \$103,183; Richmond, cost \$252,016.

North Carolina—Wilmington, cost \$57,039.

South Carolina—Charleston, cost \$2,068,570.

Georgia—Savannah, cost \$174,407.

Alabama—Mobile, cost \$393,564.

Florida—Pensacola, cost \$51,000.

Louisiana—New Orleans, cost \$2,948,259.

Texas—Galveston, cost \$114,359.

Tennessee—Knoxville, cost \$231; Nashville, cost \$20,284.

COURT HOUSES AND POST-OFFICES.

South Carolina—Columbia, \$66.

North Carolina—Raleigh, cost \$8,120.

Florida—Tallahassee, cost \$84.

Tennessee—Memphis, cost \$15,143.

MARINE HOSPITALS.

North Carolina—Wilmington, cost \$43,897.

Alabama—Mobile, cost \$54,540.

Florida—Pensacola, cost \$3,052; St. Marks, cost \$25,700.

Louisiana.—The Marine Hospital at New Orleans was in the United States barracks, as they were called. On the 14th of January, the Collector of the Port, Hatch, writes to Secretary Dix of the Treasury Department, that the barracks had been taken possession of by a company of Louisiana Infantry, in the name of the State, and he adds:—"I shall take steps to remove those invalids at an early day, if necessary, and with due respect to economy."

Secretary Dix sent by telegraph the following reply:

Apply to the Governor of Louisiana to revoke Captain Bradford's order. Remonstrate with the Governor against the inhumanity of turning the sick out of the hospital. If he refuses to interfere, have them removed under the care of the resident surgeon, and do all in your power to provide for their comfort.

On the next day, the 27th, he writes to the Collector denouncing this seizure in these emphatic terms:

I did not receive, until the 26th instant, yours of the 14th instant informing me that the United States barracks below the city of New Orleans, which have for

several months been occupied as a Marine Hospital, have been taken possession of in the name of the State of Louisiana. I found enclosed a copy of the letter by Captain Bradford, of the First Louisiana Infantry, advising you that he had taken possession of the barracks, and that they would be required for the Louisiana troops now being enlisted, and requesting you to immediately remove those patients who are convalescent, and, as soon as, in the opinion of the resident surgeon, it may be practicable and humane, those also who are now confined to their beds. He also states that the barracks contained two hundred and sixteen invalids and convalescent patients.

Looking on this transaction as an outrage on the public authority, I have no comment to make; but I cannot believe that a proceeding so discordant with the character of the people of the United States, and so revolting to the civilization of the age, has had the sanction of the Governor of the State of Louisiana. I sent a telegraphic despatch to you yesterday, desiring you to remonstrate with him against the inhumanity of Captain Bradford's order, and to ask him to revoke it; but if he should decline to interfere, I instructed you in regard to the removal and treatment of the sick, and in that I trust that you will carry out my directions, not merely with economy, but with a careful regard to their helpless condition.

Subsequently on the same day, the Collector by telegraph said: "The Marine Hospital affair has been satisfactorily arranged. The barracks are retained."

Mississippi—Vicksburg, cost \$67,525.

Arkansas—Napoleon, cost \$59,250.

MISCELLANEOUS.

Louisiana—Boarding Station at Pass a l'Ouvre, cost \$12,000; do. South West Pass, \$3,500; Warehouses at Quarantine Station, New Orleans, cost \$42,544.

The following are the light-houses of the United States which were seized by the authorities of the seceding States. The lights were immediately extinguished and not re-lighted during the year. In some instances they were partially or totally destroyed.

FRANCE, a country of Western Europe, bounded on the northwest and west by the English Channel and the Bay of Biscay, on the northeast by Belgium and Rhenish Prussia, on the east by Germany, Switzerland, and Italy, on the south by the Mediterranean and Spain, the Pyrenees separating it from the latter. Its area, including its recent accessions of territory, is 213,241 square miles. Its population in 1861 was, in round numbers, 37,000,000. It is divided into 89 departments, each under the government of a prefect and a body of deputies from its communes. The Government of France is an empire; the emperor is not absolute, but shares the law-making power with a legislative body, composed of a Senate and a House of Deputies, the latter elected by the people. The emperor is Napoleon III., the second son of Louis Bonaparte and Hortense Beauharnais, the daughter of Josephine; elected president in 1850, he made himself emperor in Dec. 1852, and his assumption of the imperial power was ratified by popular suffrage soon after.

To a correct understanding of the condition of France, and the progress of events there in 1861, a brief statement of some of the occurrences of the previous year is necessary. There were at the commencement of the year five questions of policy which agitated the French

people, all of them resulting from the measures of the Government adopted the preceding year. The first was the difficulties growing out of the cession of Savoy and Nice by Sardinia to France, as a compensation for the assistance which the latter had rendered the former in the Italian war of 1859. Against this cession Switzerland protested, from the apprehension that it would produce disturbances in her cantons adjacent; Prussia, from the fear that the plea of giving a natural boundary to France would be hereafter made the apology for a demand for her Rhenish provinces; and other States of Europe, from the belief that the balance of power would be disturbed. These protests had been met by the reply that the cession had been made by the Sardinian Government, and ratified by the Sardinian Chamber by a vote of 229 out of 285 members; that the people of both provinces were almost unanimously in favor of it, as was manifested by their suffrage of the 12th June, 1860; that the relations hitherto existing between Sardinia and Switzerland were by the terms of the treaty of cession to be maintained, and finally that the emperor had no intention of aggression upon any of the continental powers, and that he was himself deeply interested in the maintenance of the balance of power. A second question of importance was that of

the occupation of Syria by the French troops, in order to suppress the insurrection and bloody massacres of the summer of 1860. The promptness with which France had made this movement, and the apparent cordiality with which it was regarded by Russia, and submitted to by the Ottoman Porte, had excited the jealousy of the English Government, which foresaw in this enterprise, undertaken, as the French Government protested, solely from motives of humanity, and in the interest of a common Christianity against Moslem fanaticism, a purpose to exclude her from a participation in Turkish affairs, and a design to divide the tottering empire of Turkey with the czar. France pledged herself to the great powers to withdraw her troops from Syria in June, 1861, and did so; but not without making the attempt to establish a Government for Lebanon under the administration of a Christian prince, and protected by the European powers. This attempt proved unsuccessful. A third question of deep interest was the change in the relations between England and France, which had excited on the part of the former a feeling of uneasiness and distrust, which was not without serious consequences. The interview of Napoleon III. with the prince-regent of Prussia, and the kings of Bavaria and Hanover, at Baden, on the 15th June, 1860, partially but not fully dissipated the apprehensions with which the Germanic States had previously regarded the French Government; while the prodigious activity and preparations for war, which were manifest throughout France—preparations which the British Government regarded as only menacing them, and which imposed on them, as they believed, the necessity of equally extensive preparations for defence, increased the anxiety of the States of Central Europe. This disquietude was not diminished by the skilful diplomacy by which the French emperor, without being himself present, turned to his own account the meeting between the czar of Russia, the emperor of Austria, and the prince-regent of Prussia, securing the friendship and sympathy of the czar, and causing him to repel the advances of the Austrian and Prussian Governments; and though Napoleon III., in an autograph letter to Persigny, disclaimed most heartily any hostile intention towards Great Britain, it was long before the British Government seemed satisfied with his protestations.

Meantime a commercial treaty negotiated with Great Britain, mainly through the efforts of Lord Cowley and Mr. Cobden, in the autumn of 1860, and to take effect in June, 1861, was destined to change to a great extent the commercial relations of the two countries, and gave rise to great excitement throughout France, and to serious apprehensions in the minds of many of the manufacturers, in relation to its effect upon their business; apprehensions, however, which the result has proved futile. This treaty admitted a large portion of the manufactures of each country into the other, free of

duty, and nearly all the remainder at a greatly reduced tariff. Among the results of this treaty, which was not finally ratified till Feb. 4, 1861, has been the resumption of a more cordial state of feeling between the two Governments.

But the most important and embarrassing of all the questions of the time, at the beginning of the year, were the relations of France with Italy, and the preservation of the temporal sovereignty of the pope. In 1860, Garibaldi had conquered, and through the instrumentality of Cavour, turned over to Victor Emanuel the kingdom of the Two Sicilies; Tuscany, Parma, Modena, and the Emilian provinces, had annexed themselves to Sardinia; Napoleon III. had stationed his fleet at Gaeta to prevent the Sardinian Government from assailing the last stronghold of Francis II. from the sea, until events had proved the inability of the young monarch to maintain any portion of his ancient kingdom; Lamoriciere, hitherto a French general, had accepted service under the pope, and had, by passionate appeals to the faithful everywhere, succeeded in organizing an army in defence of the Papal Government, but had been defeated and routed in a battle with Cialdini, the Sardinian general, who had invaded the States of the Church. A papal bull, impersonal indeed, in form, but evidently aimed alike at the king of Sardinia and the French emperor, had been issued. The collection of Peter's pence, for the aid of the Papal Government, had been undertaken, in accordance with a rescript from the pope, throughout Catholic Christendom; and the French troops, which at the pope's request had left Rome when Lamoriciere had organized his army, were recalled at his urgent appeal, and now occupied the city; and all diplomatic relations between France and Sardinia had ceased. These events had excited the liveliest interest in France. There were in that country a variety of parties, of which that sustaining the Administration was perhaps the most numerous; but the clergy, a powerful body, and hitherto favorable to the Government, were nearly unanimous in defending the temporal sovereignty of the pope, and in their denunciation of the course of Victor Emanuel. The Bourbon and Orleans parties inclined in the same direction; while the liberals and the various shades of the Republican parties demanded that the Government should aid and complete the unity of the kingdom of Italy under the Sardinian king. The situation of the emperor was embarrassing; the clergy, and especially the higher clergy, grew daily more violent in their attacks upon the Government; the bishops issued charges and pastoral letters in their dioceses, accusing the emperor of infidelity, and emboldened by their impunity hurled their denunciations against him with constantly increasing bitterness. An anonymous pamphlet, published towards the end of February, 1861, which from many circumstances was supposed to have been inspired by the emperor, entitled, "*La France, Rome*

et Italie," furnished occasion for still more violent denunciations of the Government by the bishops. Monseigneur Dupanloup, bishop of Orleans, and the bishops of Laval, Nismes, &c., distinguished themselves especially by their vituperative assaults upon the emperor: but boldest of all was Monseigneur Pie, bishop of Poitiers, who, in a published charge to his diocese, compared the emperor to Pontius Pilate, who suffered Christ to be put to death when it was in his power to save him, and thought to free himself from guilt by washing his hands. This insolent language was punished by the Council of State by a severe reprimand to the bishop. The pope himself had protested meanwhile against the pamphlet, and Cardinal Antonelli, his prime minister, replied to it in a despatch addressed to the Papal Nuncio at Paris. This action of the pope and the cardinal only inflamed the clergy to new attacks, and they at length became so abusive, that on the 11th April, 1861, the Minister of Justice addressed a circular to the prosecuting officers of the departments, in which he called their attention to the 201st and 204th articles of the penal code, which prohibited under severe penalties the criticism or censure of the Government by the ministers of religion, and directed them to prosecute all violations of the law. Against this circular the Archbishop of Tours protested as an invasion of the rights of the clergy. Another incident gave great umbrage to the higher clergy. Two ecclesiastical orders of foreign origin, the Redemptorist Fathers of Douay and the Capuchins of Hasbrouck, had established houses in France, and had been tolerated, though never legalized there. Charges were made against them of gross immorality, and substantiated by sufficient evidence, and the Government on this proof dissolved their organization and expelled the members from the country. The Archbishop of Cambray at once came to their defence, but was speedily silenced by the *Constitutionnel*, which brought sufficient proof of their malpractices, to demonstrate that they deserved a severer punishment than they received. While thus assailed by the clergy on the one hand and the radicals on the other, the emperor, with that tact which has characterized his whole career, on the 24th Nov. 1860, to the surprise of the nation, promulgated a decree greatly enlarging the liberty and scope of the legislative body, and according a greater freedom to the press. The legislative body was to have, within certain limitations, the right of amending the Government bills; it was to have the privilege of replying to the emperor's speech, and stating what measures it desired; its sessions were to be public, and freedom of debate allowed; and the Government measures were to be explained and advocated in open session by ministers without portfolio, who had a seat in the Legislature. The restrictions on the press were greatly modified, and all previous notices or warnings abrogated.

It was under these circumstances that the session of the legislative body took place, on the 2d February, 1861. The Syrian, the Italian, and the Papal questions were fully and ably discussed, but the wise policy of the emperor had conciliated the liberals, and the clerical party were defeated in every attempt to censure the Government, in the wisdom and patriotism of which, a large majority expressed their hearty confidence. The English commercial treaty yielding too great concessions, it was thought, to that Government in respect to the fisheries, the Legislature demanded a modification of it in the interest of the national fisheries. The sliding scale of duties was also, at their instance, abrogated. A similar commercial treaty was concluded with Belgium on the 1st of March, and there were added to it three conventions upon navigation, postal arrangements, and guarantees of artistic and literary copyrights and patents. A copyright treaty was also concluded between France and Russia. A new topic of excitement was the defeat of the Prince Murat as Grand Master of the Masonic fraternity, in consequence of his advocacy of the temporal power of the pope, and the election, by a great majority, of his cousin Prince Napoleon who had opposed it. This event caused so many meetings and such intense agitation throughout France, that the Government deemed it necessary to interdict temporarily their assembling, and to cause another election for Grand Master to be held in October.

On the 24th of June, the *Moniteur* (the official gazette) published a decree of the emperor, recognizing Victor Emanuel II., King of Sardinia, as "King of Italy;" and during the same month diplomatic relations between the two courts were reestablished.

The elections of June, for members of the legislative corps, which, in accordance with the decree of Nov. 1860, had been conducted with much less restraint on the voters than previously, resulted in the success of the liberal party, by a small majority. In Paris, M. Jules Favre, a representative man among the liberal or republican party, who, as an advocate, had distinguished himself by defending those charged with political offences, and was regarded as the ablest opponent of the Government, was chosen a member of the Chamber of Deputies from Paris.

The blockade proclaimed by the U. S. Government, and the privateering proclamations of Mr. Jefferson Davis, had excited great interest and attention in France; and the French Government, on the 10th of June, announced its intention of regarding the seceded States as a belligerent power, and of maintaining strict neutrality between the two contending powers, following in these particulars, the course adopted by England. (*See PUBLIC DOCUMENTS.*)

The stupendous defalcation of M. Mires, the Treasurer of the Department of Railroads, his arrest and the charges of complicity in his offence openly made against prominent members

of the Government, produced a great excitement throughout France during the summer months. M. Mires was tried and sentenced to a long imprisonment and mulcted in a ruinous money penalty, but appealed his cause to a higher tribunal, and on a decision against him by that court, has again appealed to the court of last resort.

The loss of the usual export trade to the United States, which amounted ordinarily to from forty to fifty millions of dollars, and the consequent dulness in the manufacturing interests, the suffering of the working classes for want of employment, the high rate of discount maintained by the Bank of France, and above all the certainty in August and September of an alarming deficit in the crops, combined to produce in the early autumn a condition of depression and restlessness, which occasioned much apprehension on the part of the Government. It was ascertained that the deficit in the grain crops amounted to over eighty millions of bushels, and the reserve of specie in the Bank of France had, in spite of the high rate of discount, fallen much below its usual amount.

The emperor saw that some measures must be taken to improve the condition of the finances, and to restore the confidence of the mercantile and manufacturing classes, which was greatly shaken in the Government. In September, as was generally believed, at the instance of the empress, M. Fould, the ablest financier in the cabinet, had been offered a different portfolio, and had in consequence resigned. The emperor now proposed to recall him to the department of finance. M. Fould would not consent except upon condition of stating beforehand to the emperor, in a carefully drawn paper, the reforms in finance which he deemed indispensable, and receiving the imperial guarantee that they should be undertaken. The emperor consented to his terms. The finances of the country had been severely deranged from the fact, that while the "budget," or estimate of expenses and receipts for each year, was reported to and acted upon by the legislative body, the emperor retained the power, and almost invariably exercised it, of opening supplementary credits, often of very large sums, during the period when they were not in session, and thus a floating debt of large amount was constantly incurred, and the estimates for taxes and other revenue measures seriously disturbed. Thus, if the emperor deemed it desirable to increase the army or navy, to place himself in a hostile position to another nation, to grant a subsidy to another power, or to engage in any great enterprise at home or abroad, a supplementary credit was opened to furnish the means for such expenditure.

The power of thus increasing at will the national expenditure, M. Fould proposed that the emperor should relinquish; that henceforth the legislative body should have the sole right to fix the amount of Government expenditure, and that the emperor should confine himself to this; that in case of any great emergency re-

quiring increased resources, an extra session of the legislative body should be called. This measure, he argued, would restore confidence to the tax-payers and order to the finances, and would at the same time prove the most effectual guarantee of the pacific intentions of the emperor towards adjacent nations.

To the credit of Napoleon III., it should be recorded that he consented promptly and gracefully to this material abridgment of his prerogative, and yielding to a body elected by the people the control of the national expenditure, surrendered one of the two great elements of absolute monarchy, the power of the purse.

The capture of Mason and Slidell by the San Jacinto, occurring almost immediately after the accession of M. Fould to the cabinet, threatened for a time to thwart his plans of financial reform, as in the event of war between England and the United States which seemed imminent, the effective force of the army which had risen during the year from 392,000 to 467,000, and the naval force which had been similarly increased, could not, it was thought, be materially diminished; but the intelligence of the peaceful solution of the difficulty removed this obstacle. The course pursued by the emperor towards the United States on this occasion was eminently dignified and conciliatory; the French Government did not, in any event, propose to unite with Great Britain in a war against the United States, but made a courteous expression of their view of the question to the U. S. Government, indicating their partial concurrence in the position taken by Great Britain, though from other motives, and such as accorded with the past policy of France. The correspondence which took place between the two Governments is given under the title of *DIPLOMATIC CORRESPONDENCE*.

Among the other events of importance in the history of France in 1861, was the Mexican expedition, in which she united with England and Spain. This was projected in June, and the object was ostensibly the securing of substantial guarantees for the payment of the large amount of indebtedness due the three countries from Mexico; but it was supposed that measures of State policy, and possibly the providing a throne for one of the Austrian princes, had a place in the views of the allies. The expedition sailed in September, and France reinforced her portion of the troops in December. (*See MEXICO.*)

In the latter part of October, the Society of St. Vincent de Paul (an organization at first of a strictly charitable and praiseworthy character, founded by the Abbé Ozanam, in 1833, but within the past two years perverted into a society for the promotion by questionable measures of the designs of the clergy against the Government) was suppressed. Its suppression occasioned for the time considerable excitement, which, however, speedily subsided.

The Italian question continued to agitate the public mind, and the French occupation of

Rome was strongly denounced by the liberals. Signor Ratazzi, the Italian premier, visited Paris, and had an interview with the emperor, but without any apparent result. It was believed that the emperor was favorable at heart to the wishes of the Italian king, but the pope was impracticable, and the resort to compulsory measures to induce him to relinquish his temporal sovereignty, would have evoked a storm among the Catholic powers, which the emperor was desirous of avoiding.

In December, M. Ernest Renan, a young but distinguished savant, of Jewish extraction, was appointed to a theological chair in the University, much to the joy of the students, but to the displeasure of the Roman Catholic party. M. Renan's opening lecture was very able and eloquent, but not at all in accordance with the views of the Catholic Church; and the clergy obtained an order prohibiting him from giving further instruction. This prohibition led to an excitement and riot on the part of the students of the Quartier Latin, and as a large part of those who participated in the riot were radicals and already *suspect*, (*i. e.*, on the police lists as of doubtful loyalty,) some hundreds were arrested and committed to prison. The excitement was kept up for some weeks and arrests continued to be made; but eventually the greater part of those who had been arrested were discharged.

FRANCIS, JOHN WAKEFIELD, M. D., LL. D., an American physician and author, born in the city of New York, Nov. 17, 1789, died in the same city Feb. 8, 1861. His father was a German, who emigrated to this country soon after the close of the revolutionary war, and his mother, though a native of Philadelphia, was of Swiss extraction. He was apprenticed to the printer's profession while a lad, but subsequently prepared for college, under eminent teachers, and entered Columbia College in advance, in 1807, and soon after commenced the study of medicine in the office of Dr. Hosack. He graduated as A. B. in 1809 and M. D. in 1811, at the College of Physicians and Surgeons. Soon after taking his medical degree, Dr. Hosack offered him a partnership, which he accepted, and which extended to literary as well as professional pursuits, and continued till 1820. He had, indeed, in 1810, been associated with his then preceptor in editing the "American Medical and Philosophical Register," which was continued for four years.

In 1813, when but twenty-four years of age, he was appointed lecturer in the Institute of Medicine and *Materia Medica* at the College of Physicians and Surgeons; and, when soon after the medical faculty of Columbia College was consolidated with that institution, he was appointed professor of *materia medica* in the united body. After delivering one course of lectures without fees, from the fear lest the increased expense of the new establishment should deter some from taking lectures, he sailed for Europe to perfect himself in the knowledge

requisite for his professorship, and to become familiar with any new features in the medical instruction of the schools abroad. While in Europe he formed the acquaintance of the most eminent physicians and literary men of the time. On his return he entered again upon his duties as professor, first of the institutes of medicine, afterwards of medical jurisprudence, then of obstetrics, and finally of forensic medicine, and filled these professorships with great ability in the united Medical College till 1826, and then for four years more in the Rutgers Medical College. During all this period, with the added cares of a large medical practice, he never relaxed his interest in literature or the fine arts. He was a ready and eloquent writer, and while he performed a large amount of literary labor in connection with his profession, he contributed freely by his writings to the cultivation of a taste for general literature and the fine arts. In 1830 he relinquished his post as professor, and devoted his attention to his practice and to literary pursuits, and to the promotion of those public charities so congenial to his kindly and generous nature. The New York Historical Society was an especial favorite with him, and the New York Lyceum of Natural History hardly less so. His early connection with the Typographical Society, of which he was till his death a valued member. In the promotion of the fine arts he was especially interested, and the young painter or sculptor always found in him a genial and warm-hearted friend, to whom he could confide his trials and difficulties with the certainty of receiving hearty sympathy. The Woman's Asylum and the Inebriate Asylum both secured his services as their president, and both were the recipients of large-handed charity and earnest labor from him. The early period at which he entered upon public life, his clear and tenacious memory, and his great conversational powers made him always a welcome guest at every public entertainment, and his historical reminiscences of New York, at the beginning of the present century, were always deeply interesting. He had published seven or eight medical treatises, besides numerous essays in the medical periodicals, biographical sketches of great numbers of eminent men of the last half century with whom he had been intimate; addresses, almost without number, before the Historical, Horticultural, Typographical, and other societies, Bellevue Hospital, the Lyceum of Natural History, and New York Academy of Medicine; and several historical and biographical monographs, mostly on the men and times of old New York. He was the first president of the New York Academy of Medicine after its organization in 1847, and was elected an associate of numerous medical and scientific associations abroad as well as in this country. Perhaps no man in the city of New York was more universally popular with its citizens. At his funeral the concourse which gathered to do

him the last sad honors was such as has seldom been witnessed.

FREDERICK WILLIAM IV., late King of Prussia, born at Potsdam, Prussia, Oct. 15, 1795, succeeded his father Frederick William III. on the 7th June, 1840, died Jan. 1, 1861. He received a careful and thorough education under the instruction of some of the most eminent scholars of the time, being taught military science by Scharnhorst and Knessebeck; philosophy and letters by J. F. C. Delbrück and Ancillon; public and national law by Savigny; and the principles of the fine arts by Schinkel and Rauch. In the campaigns of 1813 and 1814 he was present at most of the great battles; and on coming of age was admitted into the Council of State. Not long after he was appointed military governor of Pomerania. On ascending the throne he repaired many of the injuries which his father's rigorous system had inflicted upon the people; proclaimed an amnesty for political offences, and recalled a large number of eminent scholars and professors who had been exiled or displaced for political reasons. The University of Berlin was greatly improved by his efforts; and he determined to make his capital the literary and scientific centre of Europe. His fostering care was never withheld from the University, and no man who had attained eminence in science elsewhere failed to receive the offer of a professorship or official appointment there. His father had presented a constitution to his people, but had delayed to grant it, and Frederick William IV. long refused to fulfil the promise, while at the same time he was willing to grant a considerable degree of freedom to his people. The revolution of 1848 induced him to grant a constitution, but after his terror was over he wished to revoke it. From that period his course seemed constantly to become more vacillating and insincere, and he lost the good opinion of the adjacent nations by his manifestation of these traits of character. In the Crimean war he temporized and made pledges to both parties, which lost him the confidence of each, and at the Congress of 1856, Prussia was only admitted as a member at the earnest solicitation of Napoleon III. His course in relation to the Duchy of Schleswig Holstein, was also marked by the same vacillating spirit; after encouraging the Holsteiners to commence the war with Denmark, by the promise of the assistance of Prussia, he abandoned them to their fate. He reorganized the Lutheran Church of Prussia, giving it the name of the "Reformed Church," and though not intolerant to other forms of faith, he was a great stickler for uniformity. In 1857 he was attacked with apoplexy, and though he recovered so far as to enjoy tolerable health of body, his mind was permanently impaired, and his brother, the Prince of Prussia, was appointed Regent of the Kingdom.

FREDERICKTOWN, a small town of south-east Missouri, the capital of Madison Co. Near

this place, on the 21st October, the Confederate troops under Gen. Jeff. Thompson and Col. Lowe, from 3,500 to 4,000 in number, were attacked by a Federal force, consisting of the Seventeenth, Twentieth, Twenty-first, and Thirty-third Illinois and Eleventh Missouri regiments, six companies of the First Indiana Cavalry, and one section of Schofield's battery, the whole under the command of Col. J. B. Plummer, of the Eleventh Missouri, and numbering about 3,000 men. An engagement followed, which continued two hours and a half, when the Confederate troops were routed along their whole line and fled in disorder, seeking protection in the woods. They were pursued 22 miles. Their loss was very heavy, Col. Lowe was slain and about 170 of their killed left on the field were buried by the Federal soldiers. Col. Plummer captured 80 prisoners, of whom 38 were wounded. He also took one 42-pounder and a considerable quantity of small-arms. The Federal loss was six killed, (among them Major Gavitt and Capt. Highman, of the First Indiana Cavalry,) and 60 wounded.

FREEDOM OF THE PRESS. A weekly newspaper, called the "Democratic Standard," published at Concord, New Hampshire, was attacked by a mob of soldiers on the 8th of August, and the office completely stripped of its contents. The soldiers belonged to the First Regiment of returned volunteers. An article was published in the paper which reflected upon them. A retraction was demanded, and refused defiantly.

On the 12th of August, the office of the "Democrat," a weekly newspaper, published at Bangor, Maine, was completely cleared by a crowd of people. No one was injured. The objections against the print by the people were that its views favored the Confederate States.

On the 14th of August, Gen. Fremont declared martial law in St. Louis, and appointed Major J. McKinstry provost-marshal. On the next day the marshal suppressed the publication of the "War Bulletin," and the "Missourian," two newspapers published in that city, which had been, as it was charged, "shamelessly devoted to the publication of transparently false statements respecting military movements in Missouri."

On the 24th of August, the editor of the St. Louis "Christian Advocate" addressed a letter to Marshal McKinstry, stating that he had been informed suggestions were made to him to suppress the publication of the "Advocate," &c.

To this, on the next day, the marshal replied: "In reference to the course of the St. Louis 'Christian Advocate,' permit me to say that in my judgment, in these times of political excitement, and heated discussion, and civil war, it would be more becoming, as well as more consistent, that a public newspaper, belonging to and advocating the doctrines and principles of the Church of Christ, should abstain from publishing articles of a political character, calculated to inflame the passions of

men, and evidently hostile to the Government of the country.

"Let your journal be a religious paper, as it professes to be, and it will never come under the discipline of this department."

On the 20th of August, the office of the "Sentinel," a weekly paper, published at Easton, Pa., was destroyed. The alleged motive was stated to be, that this paper had printed a series of resolutions, passed at a democratic county convention, which were regarded as not truly loyal.

On the same night, Ambrose S. Kimball, editor of the "Essex County Democrat," published once a week, at Haverhill, Mass., was violently taken from his house by an excited crowd, and refusing to give such information as was demanded of him, "he was covered with a coat of tar and feathers, and ridden on a rail through the town." He subsequently was made to take an oath that he would "never again write or publish articles against the North and in favor of secession."

About the same time the printing office of the "Jeffersonian," a weekly paper, published at Westchester, Pa., was destroyed.

On the 16th day of August, the Grand Jury, impanelled for the Circuit Court of the United States for the Southern District of New York, brought into court the following document, asking if certain newspapers could be indicted.

New York, August 16, 1861.

The Grand Inquest of the United States of America for the Southern District of New York, beg leave to present the following facts to the Court, and ask its advice thereon:

There are certain newspapers within this district which are in the frequent practice of encouraging the rebels now in arms against the Federal Government by expressing sympathy and agreement with them, the duty of acceding to their demands, and dissatisfaction with the employment of force to overcome them. These papers are the New York daily and weekly "Journal of Commerce," the daily and weekly "News," the daily and weekly "Day Book," the "Freeman's Journal," all published in the city of New York, and the daily and weekly "Eagle," published in the city of Brooklyn. The first-named of these has just published a list of newspapers in the Free States opposed to what it calls "the present unholy war"—a war in defence of our country and its institutions, and our most sacred rights, and carried on solely for the restoration of the authority of the Government.

The Grand Jury are aware that free governments allow liberty of speech and of the press to their utmost limit, but there is, nevertheless, a limit. If a person in a fortress or an army were to preach to the soldiers submission to the enemy, he would be treated as an offender. Would he be more culpable than the citizen who, in the midst of the most formidable conspiracy and rebellion, tells the conspirators and rebels that they are right, encourages them to persevere in resistance, and condemns the effort of loyal citizens to overcome and punish them as an "unholy war?" If the utterance of such language in the streets or through the press is not a crime, then there is a great defect in our laws, or they were not made for such an emergency.

The conduct of these disloyal presses is, of course, condemned and abhorred by all loyal men; but the Grand Jury will be glad to learn from the Court that it is also subject to indictment and condign punishment.

All which is respectfully presented.

CHARLES GOULD, Foreman.

It is a singular instance of the excitement of the public mind that this document, which simply asks the judge if the press could be indicted, was universally regarded as an indictment.

The clear charge made by Judge Betts to this jury when they were impanelled, placed the question beyond all doubt; and the wording of the document brought in, shows clearly that the jury so understood it. The Judge turned the matter over to the October term, when it was dismissed. The resulting excitement was very great, and on the 22d of August, six days after, Marshal Milward of Philadelphia seized the papers sent from certain New York offices, named in the paper of the Grand Jury, for circulation to their subscribers; on the same day the following order was issued:

POST-OFFICE DEPARTMENT, August 22, 1861.

SIR: The Postmaster-General directs that from and after your receipt of this letter none of the newspapers published in New York city, "which were lately presented by the Grand Jury" as dangerous for their disloyalty, shall be forwarded in the mails. I am respectfully, your obedient servant,

T. P. TROTT, Chief Clerk.

To Postmaster New York City.

Thus the authorities at Washington regarded the action of the Grand Jury as a presentment, and incurred the severe penalties of the post-office laws by excluding the newspapers indicated from the mails.

In consequence of these measures the "Journal of Commerce" changed its editors, and was allowed to circulate through the mails. The publication of the "News" and "Daybook" was stopped, and the "Freeman's Journal" changed its name.

On the 22d of September the Grand Jury of the United States District Court at Trenton, N. Jersey, brought into Court the following presentment:

The Grand Jury came into the United States Court on the 22d, and made a lengthy presentment that complaints have been made before this Grand Inquest concerning certain newspapers published in this State, and copies of the following papers, issued during the last few months, have been submitted and carefully examined; namely, the Newark "Evening Journal," the Warren "Journal," the Hunterdon "Democrat," the New Brunswick "Times" and Plainfield "Gazette," that during the most critical period, while the capital of the nation has been besieged by armed insurgents; while eleven States in actual rebellion, having been striving by invasion and treachery to plunge other States still remaining loyal into open opposition to the National Government, these newspapers have been, up to within a very recent period, persistently denouncing and libelling those to whom this great duty of national defence is necessarily intrusted, in thwarting their efforts for self-preservation, and fomenting rebellion by discouraging and opposing the only means by which it can be put down. While they cherish a due regard for freedom of speech, they feel it their duty to repudiate and denounce the conduct of those journals; that while the press may freely criticize public men and measure in the peaceful contests of party, yet in a war for the life of a nation the press, as well as individuals, should uphold the existing Government, or be treated as its enemies. They consider their duty freely discharged in reference to these newspapers by this presentment, leaving them to the wholesome action

of public opinion. They recommend all loyal citizens, all public officers, all municipal corporations, rigorously to withhold all patronage from such newspapers as do not hereafter give their unqualified support to the National Government.

The jurors were then discharged for the term.

Later in the year the "Franklin Gazette," published in Franklin County, New York, was suppressed, and its editor sent to Fort Lafayette, as a State prisoner.

The "Herald," a daily paper, published at Cleveland, Ohio, defended Gen. Fremont from the reports circulating for a time against him, and espoused his cause with earnestness. The packages of this paper were ordered to be taken away from the cars of one of the railroads in the State of Ohio. As they were express packages,

the threat was made, that unless they were removed, no express packages should be allowed to go over the road. This threat caused the newspaper packages to be removed. The editor then made a complaint to the president of the road, who had recently been elected Governor of the State of Ohio. The answer was in these words: "That the course of the 'Herald' for the past few weeks has been highly destructive to the best interests of our Government, there can be no question, and so long as its proprietors see proper to continue the same line of policy, I hope the superintendent (who, since my election, has been entrusted with the entire management of the road) will use all legitimate means in his power to suppress its circulation."

G

GALVESTON has been the most populous and commercial city of Texas. It is situated on an island at the mouth of a bay of its own name, about 450 miles west by south of New Orleans, and 230 miles southeast of Austin City. The island which separates the bay from the Gulf of Mexico is about thirty miles long, from east to west, and about a mile and a half wide. The distance from the island across the bay by the railroad bridge to the mainland is about two miles. For the defence of the city during the year guns were placed at the east end of the island, at Bolivar Point, and at Pelican Spit Island, commanding the bay. The city is situated on the bay, and is a mile to a mile and a half from the Gulf. The population of the city, in 1853, was about 7,000. The commerce of the city continued as usual, until the commencement of hostilities, when it declined, and under the blockade ceased entirely. The cause of the South was ardently espoused by the inhabitants, and numbers entered the army. No important occurrence of a hostile nature, however, took place here, until the month of August.

On the 3d, a few shots were fired from the blockading schooner Dart at the batteries on Galveston Island. This was intended as a sort of reconnoissance. Again, on the 5th, the steamer North Carolina opened her fire upon the batteries, and threw some shells into the city. A large number of persons having collected on the sand hills, a little eastward of the batteries, a shell fell among them, killing one man and wounding three others. This led to a protest by the foreign consuls resident in the city, as follows:

GALVESTON, August 5, 1861.

To Capt. James Alden, commanding U. S. Steamer South Carolina:

SIR: The undersigned Consuls and Vice-Consuls at Galveston consider it their duty to enter their solemn protest against your bombardment of this city on the evening of the 3d inst., without having given notice, so that the women and children might have been removed; and also against your firing a shell in the midst of a large crowd of unarmed citizens, amongst

whom were many women and children, causing thereby the death of an unoffending Portuguese, and wounding boys and peacefully-disposed citizens, as acts of inhumanity unrecognized in modern warfare, and meriting the condemnation of Christian and civilized nations.

ARTHUR S. LYNN,

British Consul.

JAS. FREDRICH,

Hanoverian and Oldenburg Consul; and, in absence of James Jachurch, acting Consul for Prussia and Hamburg.

To this note Capt. Alden, on the next day, sent a reply, stating the facts to have been as follows:

Early on the morning of the 3d, our gunboat found herself near the shore, and shortly after, as the result proved, within range of some of the batteries. The first warning she got was a shot—not a blank cartridge, but a shot—not fired ahead or astern of her to warn her off, but straight at her. She of course fired back, and some shots were exchanged; then she came back and reported the facts to me. This was in the morning. I waited till nearly five in the afternoon hoping explanation, some disavowal, of the act would be sent off. None came. I then got under way and stood in for the batteries, which, you are aware, are in the rear and close to the town, merely to see if they could, when they knew the town must be injured by our return fire, repeat such an act of aggression by commencing upon us. We were no sooner within range of their guns, however, than they opened their fire, when we, after exchanging a few shots, retired, preferring that it should appear that we were beaten off rather than continue a contest where, as the result shows, so many unoffending citizens must necessarily suffer. If that act merits the condemnation of Christian and civilized nations, tell me, gentlemen, what would you have done were you in my place?

Again, you protest against my firing a shell into a crowd of unarmed citizens—amongst whom were many women and children. Good God! gentlemen, do you think such an act was premeditated? Besides, was it not the duty of the military commandant, who by his act in the morning had invited me to the contest, to see that all such were out of the way? Did he not have all day to prepare? It was evident to my mind they knew we were coming, or why was that demonstration of the steamer Gen. Rusk?

In conclusion, let me add that no one can regret the injury done to unoffending citizens more than I do. Still, I find no complaints of my acts of the 3d instant coming from military or civil authorities of Galveston, and with due deference to your consideration and humanity, I must respectfully remark that it is the

first time I have ever heard that the women and children and unarmed citizens of an American town were under the protection of foreign Consuls.

Yours, etc., etc.,

JAMES ALDEN.

Later in the year apprehensions were entertained by the inhabitants that an attack would be made upon the city. On the 20th of November a consultation of the citizens was held, at which it was concluded that it was impossible to defend the town. The largest guns at the fortifications on the island were thirty-two pounders, smooth bores, having a range not exceeding two miles, while the Federal guns were of the largest calibre, shooting with accuracy three or four miles. To await an attack was simply to invite the surrender or the destruction of the troops and the city, without the power of inflicting injury upon the assailants. Under these circumstances it was concluded to evacuate the city, and occupy a position in the rear, so as to repel any advance of the Federal troops after they might land. Consequently, an order was issued for the removal of all hospital stores to Houston, which was immediately done. All the public and private property of a movable kind was sent to the same place. In order to prevent surprise, and to repel any attack that might be made, measures were adopted to watch the first approach of an enemy, and send the news to the interior, so that a force might be rapidly concentrated. Videttes were stationed over the island, a line of telegraph made to convey the earliest information, and troops were stationed at various points to await orders and to be rapidly transported by railroad, to any point where they might be needed. No further attack, however, was made during the year.

GARLAND, JOHN, an officer of the American army, born in Virginia in 1792, died in New York City, June 5, 1861. He was made first lieutenant in the Thirty-fifth Regiment infantry in March, 1813, and retained in the service after the war in the Third Infantry; promoted to a captaincy in 1817, brevet major in 1827, major in 1836, lieutenant-colonel in 1839, distinguished himself in six battles in the Mexican war, and was severely wounded in the taking of the city of Mexico; received the brevet rank of brigadier-general for his gallant and meritorious services in 1848, and was promoted to the rank of colonel in 1849.

GARNETT, ROBERT SELDEN, an officer of the Confederate army, born in Virginia about 1821, and killed in the battle of Carrick's Ford, July 15, 1861. He entered West Point in 1837, and graduated 27th in his class in 1841, was appointed brevet second-lieutenant of artillery on his graduation, and from July 1843 to Oct. 1844, was assistant-instructor of infantry tactics at the military academy; was aide-de-camp to Gen. Wool in 1845, distinguished himself in the battles of Palo Alto and Resaca de la Palma, was promoted to a first-lieutenancy in 1846, was aide-de-camp to Gen. Taylor through the Mexican war and until 1849, was

brevetted captain and major for gallant and meritorious conduct at Monterey and Buena Vista; transferred to the infantry in 1848, and promoted to a captaincy in 1851. From 1852 to 1854, he was commandant of the corps of cadets, and instructor in infantry tactics at West Point; appointed captain of the First Regiment cavalry in 1855, and major of Ninth Infantry in the same month; was the commander in the operations against the Indians on Puget's Sound, Washington Territory, in 1856, and commanded the Yakima expedition in 1858. At the breaking out of the present war he took the side of the Confederates, was promoted to a brigadier-generalship, and assigned to the department of Western Virginia. Here, in July, Gen. McClellan attacked him, and after several days of alternate fighting and retreating, at the decisive action of Carrick's Ford, Gen. Garnett was killed and his forces routed. His body was carefully cared for by the Federal commander, and after being embalmed, was forwarded to his friends.

GAULEY BRIDGE is the name of the capital of Fayette County, Virginia. The Gauley and New rivers unite at this point and form the Great Kanawha. This town is at the head of navigation on the river, 300 miles west of Richmond and 36 miles above Charleston. The valley of Gauley River is about 60 miles long. Mountain cones rise as sentinels everywhere along the romantic vale.

After leaving Charleston, the character of the country undergoes a considerable change, the valley becoming narrower and the hills growing loftier and more precipitous till here, where the Gauley and New rivers unite in forming the Great Kanawha, rugged mountain spurs, rocky cliffs, and pyramidal-shaped elevations of wondrous symmetry characterize the scene. Two miles below are the celebrated falls of the Kanawha, whose roar can be heard for miles. The river here is more than half a mile in width, and plunges over a succession of rocky precipices, extending across it in an oblique direction, vainly attempting to obstruct its passage. Were the leaps united in one, the fall would be about twenty feet, and, of course, much more imposing.

On the 30th of July, the brigade of Gen. Cox reached this point from Charleston, having been three days on the route. The march had been marked by innumerable evidences of a precipitate retreat of Gen. Wise and his men, who effected their escape from the region before their retreat could be cut off. At one point about fifty tents, a medicine chest, and sundry other articles which had been thrown aside by the retreating force were taken, as also the entire official correspondence of the secessionists in the Kanawha Valley, a number of company muster rolls, and many private letters. About twelve hundred flint-lock muskets, a hundred kegs of powder, cartridge boxes, camp-kettles, and many other articles were also found. The bridge over the river had been

destroyed. It was a substantial structure and difficult to rebuild, owing to the scarcity of timber. Gen. Cox's report, under date of July 29th, was as follows :

"The Kanawha Valley is now free from the secession troops. Most of the forces raised by Wise in this valley left him between Charleston and this place. I had sent them assurances that if they laid down their arms they might go quietly to their homes, and many have done so, asserting that they were cheated into the rebel service. I regret to have to say that Wise, in his retreat, has burned a number of valuable bridges, and carried off most of the wagons and teams of the people of the valley. All parties denounce him for his vandalism. I congratulate you on the success of this expedition."

GEOGRAPHICAL EXPLORATIONS OF 1861. At the commencement of the year, the highest hopes were entertained that before its close a large number of the yet unsolved problems of geographical science would have become familiar facts to the world. At no former period had so many and so important expeditions been undertaken, and never before did it seem so certain that Africa at least was to remain no longer an unknown land, and that the veil, which had so long hid from eager eyes the sources of the Nile and the great lakes and snow-clad mountains of its interior, was to be removed.

The results attained have been less satisfactory than could have been hoped; yet more has been accomplished than in some previous years, and the aggregate of human knowledge of the surface of the earth has been materially increased.

Commencing with the arctic regions, to which four expeditions were sent, part of them the previous year, we have but meagre results to report. Two of these expeditions were from the United States, the first that of Dr. J. J. Hayes, the companion of Dr. Kane in his second expedition. Dr. Hayes sailed from Boston on the 10th of July, 1860, in the schooner *United States*, 140 tons, which had, mainly by the liberality of Henry Grinnell, Esq., been fitted up for the service. His scientific associates in the expedition were Messrs. Sonntag, McCormick, Dodge, Radcliff, Knorr, and Starr. On the 12th of August he reached Upernavik, and sailed from thence on the 16th. On the 23d of the same month he entered Melville Bay, and on the 25th reached Cape York. Here he encountered some Esquimaux, and among them Hans, who had run away from Dr. Kane, and whom, with his wife and child and Esquimaux dogs, he took on board. After repeated attempts to enter Smith's Strait, which was obstructed by ice, and several narrow escapes from being crushed by the closing of the pack, in one of which his rudder was seriously injured, he was forced to make his winter harbor at Port Foulke, lat. $78^{\circ} 17' 41''$ N., and long. $72^{\circ} 30' 57''$ W., about 20 miles further south than

Dr. Kane's winter-quarters. The repeated gales and boisterous weather through the month of October prevented the freezing of the waters of the harbor and rendered sledge expeditions impossible till the dark season, when they were attended with more danger; but the harbor and adjacent coast, as well as "John's Glacier," observed by Dr. Kane, were surveyed. The party succeeded in capturing upwards of 200 reindeer, which kept them abundantly supplied with food; but their dogs were attacked with an epidemic, which resulted in the death of all but 11 of them, and in an expedition undertaken on the 22d of December, for the purpose of purchasing a further supply of the Esquimaux of Northumberland Island by Mr. Sonntag and Hans, the former lost his life from the exposure. He was the second in command, and an accomplished astronomer, and his loss was severely felt. Hans procured no dogs, but some weeks later the Esquimaux visited the vessel and sold them eight. With these and all his crew but three men, Dr. Hayes started northward on the 4th of April, taking his metallic life-boat with him, and on reaching Fog Harbor found that their progress was so slow that they would consume the whole summer. He therefore sent all but three of his companions and two sledges back, and kept on northward amid constantly increasing difficulties till the 18th of May, when, having reached latitude $81^{\circ} 35'$, a higher point than any other explorer except Sir Edward Parry, he was compelled to turn back. Returning to Port Foulke, he remained there six weeks, making further observations and surveys, photographing the scenery, and collecting specimens of natural history. On the 14th of July he set sail on his return, and on the 14th August reached Upernavik, where he remained ten days. On the 1st September he entered the harbor of Lievely, where he was detained by S. W. gales till the 17th, and on his way to Halifax his vessel received serious injuries, which compelled him to put into that port for repairs. The chief results attained by the expedition were: the completion of the survey of Smith's Sound; the discovery of a new channel at the westward of Smith's Strait; the determination of the magnetic dip and declination at many points within the arctic circle; surveys of glaciers, by which their rate of movement is determined; pendulum experiments, &c.

The second expedition from the United States was an individual one. Mr. C. F. Hall, an editor from Cincinnati, embarked in the summer of 1860 on board the whale ship *George Henry* from New London, Conn., passed the winter on board that ship in a harbor south of Cumberland Straits, and in the spring of 1861 directed his course towards the straits of Fury and Hecla. He discovered before leaving Cumberland Strait that Frobisher's Strait was only an inlet or arm of the sea.

Captain Parker Snow, an English navigator who had attained considerable reputation by his previous discoveries on the coast of Pata-

gonia, sailed from England in June, 1861, in the little schooner *Intrepid* of 45 tons, for the Straits of Bellot, intending to explore King William's Land and seek for some traces or some last relics of the unfortunate companions of Sir John Franklin.

The Swedish polar expedition, under the direction of Prof. Torell, equipped on a magnificent scale by the Swedish Government and Swedish noblemen, and composed of eminent Swedish and Danish naturalists, and of students from the Swedish universities, sailed from Tromsøe in Norway, May 9, 1861, and reached a bay on the north of the island of Spitzbergen, but were unable to proceed further. The ships were blockaded by the ice pack, and an attempt to proceed by sledges soon brought them to an open sea. They made a careful survey of that portion of the island which they were able to visit, but could not attain the other proposed objects of the expedition—the penetration of the Arctic Sea to the north and northeast, and the measuring an arc of the meridian.

The Governments of Great Britain, France, Belgium, Holland, Sweden, Russia, and Spain have for many years been engaged in careful topographical surveys of their respective countries; that of Belgium is now complete and those of England, France, and Russia nearly so, and the English Government has proposed to connect its triangulation with that of France and Belgium, and being thus able to command the measurement of an arc of parallel extending from the western point of Ireland to the Ural Mountains, to determine mathematically the form of the earth; and taking advantage of the opportunity, a commission has been appointed to act in concert with similar commissions from France and Russia, to fix upon a single meridional line to be substituted for the three, Greenwich, Paris, and St. Petersburg, now in use in those countries respectively, and thus harmonize the longitude of all European maps.

During the year, Russia has sent out several geographical commissions; one of these was fitted out for the purpose of exploring the isthmus between the Caspian and Black seas, for the double purpose of determining the feasibility of a ship canal between the two seas, aided by the river Manytch, and of ascertaining the possibility of colonizing the valley of the Manytch. The report of this commission, which was composed of Messrs. Kostenkoff, Barbet de Marny, Krijine, and other eminent scientific men, was entirely unfavorable. They demonstrate that the bed of the Manytch is dry in summer, and that the soil is so full of saline and alkaline matters as to be hopelessly sterile.

A second commission has been sent to explore the present condition of the sea of Azof, and to report upon the best means of remedying the gradual filling up of its basin. They report that within 32 years its depth has decreased 11 feet, and that there is serious reason to fear that it may yet become a vast marsh.

It is difficult to find a remedy for this transformation.

The Russian Government, which has within the past four years been making large accessions to her territory in Turkistan, and has made a treaty with the khan of Khiva, by which that khanat becomes virtually a Russian dependency, has been exploring that region of Central Asia hitherto so little known. M. Kul-lewin, an attaché of the Russian General Ignatieff, has just presented to the Russian Geographical Society a narrative of his explorations across the steppe of Orenburg, along the west bank of the Sea of Aral as far as to the lake of Aiboughir, of his survey of that lake, his tour over the promontory of Onega, and his navigation of the Amoo-Daria (the Ancient Oxus) for 18 days in a native vessel from Koongrad to Khiva. He reports the Amoo-Daria, which, in Strabo's time discharged its waters into the Caspian Sea, but for the last 600 years at least has debouched into the Sea of Aral, as likely to return to its old channel—an event which would revolutionize the trade between Europe and Asia.

The sources of the Amoo-Daria, and the vast table-land of Pamir occupying the western slopes of the lofty Bolor-Tag range, have been within historical times an almost unknown region; even Ritter and Humboldt, with their extended research, were unable to obtain any thing more than a very general description of them, and this derived more from the inferences drawn from the structure of adjacent countries than from any results of actual observation. The races which inhabit them are so savage and fierce, that the traveller who visits them can hardly hope to escape with life.
